Technical Specifications - Solar String Inverter - 50 kW to 70 kW (3Ph.)

HIVERTER-Si Series Three Phase		Si 50K	Si 60K	Si 70K(HV)
Input (DC)	Recommended PV Input Power	55000W	66000W	77000W
	Max. DC Power for Single MPPT	22000W/16000W/16000W	22000W/22000W/22000W	26000W/26000W/26000W
	No. of Independent MPPT	3		
	No. of DC Inputs	4/3/3	4/4/4	
	Max. Input Voltage	1000V		
	Start-up Input Voltage	250V		
	Rated Input Voltage	600V	600V	700V
	MPPT Voltage Range	250V-960V		
	Full Load DC Voltage Range	530V-800V	530V-800V	660V-800V
	Max. Input MPPT Current	40A/30A/30A	40A/40A/40A	40A/40A/40A
	Max. Input Current per String	12A		
	Max. DC Input Short Circuit Current per MPPT	48A/36A/36A	48A	48A
Output (AC)	Rated Power	50000W	60000W	70000W
	Max. AC Power	55000VA	60000VA	70000VA
	Max. Output Current	80A	90A	90A
	Nominal Grid Voltage	3/N/PE, 220/380VAC, 230/400VAC, 240/415VAC		3/N/PE or 3/PE, 277/480VAC
	Grid Voltage Range	310VAC-480VAC (According to local standard)		422VAC-528VAC (According to local standard)
	Nominal Frequency	50 / 60Hz		
	Grid Frequency Range	40Hz-55Hz/54Hz-66Hz (According to local standard)		
	Active Power Adjustable Range	0 ~100%		
	THDi	<3%		
	Power Factor	1 default (adjustable ± 0.8)		
Performance	Max Efficiency up to	98.5%	98.6%	98.6%
	European Weighted Efficiency up to	98.3%	98.4%	98.4%
	Self Consumption at Night	<1W		
	MPPT Efficiency	>99.9%		
Protection	DC Reverse Polarity Protection	Yes		
	DC Switch	Yes		
	Protection Class/Overvoltage Category	I/III		
	Input/Output SPD (II)	PV: Type II standard, AC: Type II		
	Safety Protection	Anti-islanding, RCMU, ground fault monitoring		
	ARPC	Anti-reverse power controller (optional)		
		According to certification and request		
Communication	Power Management Unit	According to certification and request		
	Standard Communication Mode	RS485, Wifi / Ethernet / GPRS (optional), SD card, Multi-function relay		
	Operation Data Storage	25 years		
General Data	Ambient Temperature Range	-25°C ~ +60°C		
	Topology	Transformer-less		
	Degree of Protection	IP65		
	Allowable Relative Humidity Range	0~100%		
	Max. Operating Altitude	4000m		
	Noise	≤ 60 dB		
	Weight	68kg	70kg	
	Cooling	Fan		
	Dimensions	713 x 737 x 297 mm		
	Display	LCD display		
Standard	EMC	EN 61000-6-2, EN 61000-6-4, EN 61000-3-11, EN 61000-3-12		
	Safety Standards	IEC62109-1/2, IEC62116, IEC61727, IEC-61683, IEC60068(1,2,14,30)		
	Grid Standards	AS/NZS 4777, VDE V 0124-100, V 0126-1-1, VDE-AR-N 4105, BDEW, CEI 0-21/CEI 0-16, UNE 206 007-1, EN50438/EN50549, G59, EN50530, NB/T32004		

Attestation of Conformity

Attestation No.: 1888AP1220N074001
Equipment: PV Grid inverter
Brand Name: **HITACHI**
Test Model No.: Hiverter Si-50K, Hiverter Si-60K, Hiverter Si-70K
Applicant: Hitachi Hi-Rel Power Electronics Pvt. Ltd.
 SM 3 & 4, Sanand-II GIDC, Industrial Estate, Boll Village, Sanand-382
 110, Gujarat, India.
Report No.: PV181220N074, PV181220N074-1, PV181220N074-2, WT186003741

Use in accordance with regulations:

The inverters are tested for functional safety, grid protection, specified environmental influences and efficiency. For detailed information, please watch the corresponding test reports.

Applied rules and standards

VERIFICATION OF COMPLIANCE

No.: LVD GZES1901010043PV

Applicant: Hitachi Hi-Rel Power Electronics Pvt. Ltd.
SM 3 & 4, Sanand – II GIDC, Industrial Estate, Boll Village, Sanand – 382 110, Gujarat, India.

Manufacturer: Hitachi Hi-Rel Power Electronics Pvt. Ltd.
SM 3 & 4, Sanand – II GIDC, Industrial Estate, Boll Village, Sanand – 382 110, Gujarat, India.

Product Description: PV inverter

Model No.: Hiverter Si-50K, Hiverter Si-60K, Hiverter Si-70K

Trade Mark: 

Rating: Refer to page 2

Protection against Electric Shock: Class I

Degree of Protection: IP65

Additional Information: N/A

Sufficient samples of the product have been tested and found to be in conformity with

Test Standard: EN 62109-1: 2010,
EN 62109-2: 2011

as shown in the

Test Report Number(s): GZES190101004301, GZES190101004302

This Verification of Compliance has been granted to the applicant based on the results of tests, performed by Laboratory of SGS-CSTC Standards Technical Services Co., Ltd. on sample of the above-mentioned product in accordance with the provisions of the relevant harmonized standards under the Low Voltage Directive 2014/35/EU. The CE marking as shown below can be affixed, under the responsibility of the manufacturer, after completion of an EC Declaration of Conformity and compliance with all relevant EC Directives. The affixing of the CE marking presumes in addition that the conditions in annexes III and IV of the Directive are fulfilled.

Compact and Powerful

Compact and lightweight

30% DC input
oversizing

Up to 10% AC output
overloading

Wide MPPT range from
200 V to 950 V

IP65 dustproof and
waterproof

SMT Series

Three-MPPT, Three-Phase

25kW

30kW

36kW

The brand new GoodWe SMT series inverter is ideal for medium and large-scale commercial rooftop installations, providing a maximum efficiency of 98.8 percent and up to three MPPT routes for a particular environment. With its weight of just 40 kg and compact design, the SMT series is easier to handle and install than similar inverters in the market. Featuring a maximum DC input voltage of 1100V, wider MPPT range, and a start-up voltage of 180V, the SMT series guarantees an earlier generation of power and a longer working time in order to maximize long-term returns and profitability for the system owner.

of Conformity

Registration No.: AK 50495661 0001

Report No.: CN21GD2X 001

Holder: **JIANGSU GOODWE POWER SUPPLY
TECHNOLOGY CO., LTD.**
No.90 Zijin Rd.,
New District, Suzhou
215011 Jiangsu
P.R. China

Product: PV-inverter
(Grid-connected PV Inverter)

Identification: Type Designation : GW3300-XS
Serial Number : Engineering Sample
Firmware Version : V1.00.08
Remark : Refer to test report CN21GD2X 001
for details.

Tested acc. to: IEC 61727:2004
IEC 62116:2014

The certificate of conformity refers to the above mentioned product. This is to certify that the specimen is in conformity with the assessment requirement mentioned above. This certificate does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity.

Date 18.02.2021

Type of Equipment : Grid-connected PV Inverter
Model Designation : See Certificate
Certificate No. : AK 50495661 0001
Report No. : CN21GD2X 001

Dear Mr. Jiang Tao,

We herewith confirm that a sample of the above mentioned technical equipment has been tested and was found to be in accordance with the relevant requirements.

Enclosed please find your Certificate of Conformity.

We appreciate your kind support and would like to offer our assistance and continuous services in the future.

With kind regards,

Certification Body

IEC 60068-2-30:2005
IEC 60068-2-64:2019

This Attestation is granted on account of an examination by DEKRA, the results of which are laid down in a confidential file no. 6140348.51(A-C)

The examination has been carried out on one single specimen or several specimens of the product, submitted by the manufacturer. The Attestation does not include an assessment of the manufacturer's production. Conformity of his production with the specimen tested by DEKRA is not the responsibility of DEKRA.

ATTESTATION of conformity with European Directives

Product: PV inverter (Grid-tied photovoltaic inverter)
Reference GW700-XS, GW1000-XS, GW1500-XS, GW2000-XS, GW2500-XS,
 GW3000-XS
Issued to JIANGSU GOODWE POWER SUPPLY TECHNOLOGY CO., LTD
Address NO.189 Kun Lun Shan Road Suzhou New District, Jiangsu, China
Manufacturer JIANGSU GOODWE POWER SUPPLY TECHNOLOGY CO., LTD
Technical characteristics See Next Page

The submitted sample of the above equipment has been tested for **CE** marking according to following European Directive and following standards:

Low Voltage Directive 2014/35/EU

Standards	Report number	Report date
EN 62109-1: 2010	ZEM-19JA0748FCSHP-1	18/02/2019
EN 62109-2: 2011	ZEM-19JA0748FCSHP -2	18/02/2019

The referred test report(s) show that the product complies with standard(s) recognized as giving presumption of compliance with the essential requirements in the specified European Directive

This verification does not imply assessment of the production of the product
 The **CE** marking may be affixed if all relevant and effective European Directives with **CE** are applicable

Shanghai (P.R. China),), Feb 18th, 2019.

Certificate of compliance

Applicant: JIANGSU GOODWE POWER SUPPLY TECHNOLOGY CO., LTD
No.90 ZiJin Rd., New District, Suzhou,
215011,
China

Product: Photovoltaic (PV) inverter

Model: GW700-XS
GW1000-XS
GW1500-XS
GW2000-XS
GW2500-XS
GW3000-XS

Use in accordance with regulations:

Automatic disconnection device with single-phase mains surveillance in accordance with Engineering Recommendation G98/1 for photovoltaic systems with a single-phase parallel coupling via an inverter in the public mains supply. The automatic disconnection device is an integral part of the aforementioned inverter. This serves as a replacement for the disconnection device with isolating function that can access the distribution network provider at any time.

Applied rules and standards:

Engineering Recommendation G98/1-4:2019

Requirements for the connection of Fully Type Tested Micro-generators (up to and including 16 A per phase) in parallel with public Low Voltage Distribution Networks

DIN V VDE V 0126-1-1:2006-02 (4.1 Functional safety)

Automatic disconnection device between a generator and the public low-voltage grid

At the time of issue of this certificate the safety concept of an aforementioned representative product corresponds to the valid safety specifications for the specified use in accordance with regulations.

-------------------------	----------

Measurement period:	2019-08-01 to 2019-09-30
----------------------------	--------------------------

Description of the structure of the power generation unit:

The power generation unit is equipped with a PV and line-side EMC filter. The power generation unit has no galvanic isolation between DC input and AC output. Output switch-off is performed with single-fault tolerance based on two series-connected relays in line and neutral. This enables a safe disconnection of the power generation unit from the network in case of error.

The above stated Generating Units are tested according the requirements in the Engineering Recommendation G98/1. Any modification that affects the stated tests must be named by the manufacturer/supplier of the product to ensure that the product meets all requirements of the Engineering Recommendation G98/1.

Appendix C Type Test Verification Report	
Extract from test report according to the Engineering Recommendation G98/1

Protection. Voltage tests.						
Phase 1						
Function	Setting		Trip test		No trip test	
	Voltage [V]	Time delay [s]	Voltage [V]	Time delay [s]	Voltage / time	Confirm no trip
U/V	154	2,0	183,6	2,751	156V / 1s	No trip
					160V / 2,45s	No trip
O/V stage 1	262,2	1,0	262,7	1,281	258,7V / 0,0s	No trip
O/V stage 2	273,7	0,5	273,3	0,778	269,7V / 0,95s	No trip
					277,7V / 0,45s	No trip
Note: For voltage tests the Voltage required to trip is the setting $\pm 3,45V$. The time delay can be measured at a larger deviation than the minimum required to operate the protection. The No trip tests need to be carried out at the setting $\pm 4V$ and for the relevant times as shown in the table above to ensure that the protection will not trip in error.						

Annex to the G98/1 certificate of compliance No. U19-0596

Appendix C Type Test Verification Report

Extract from test report according to the Engineering Recommendation G98/1

Nr. ZEM-19JY246BPT5HP

Protection, Frequency limits.

Function	Setting		Trip test		No trip test	
	Frequency [Hz]	Time delay [s]	Frequency [Hz]	Time delay [s]	Frequency / time	Confirm no trip
U/F stage 1	47.5	20	47.46	20.41	47.7Hz / 30s	No trip
U/F stage 2	47	0.5	47.01	0.781	47.2Hz / 19.5s	No trip
					46.8Hz / 0.45s	No trip
O/F stage 2	52	0.5	52.02	0.781	51.8Hz / 120s	No trip
					52.2Hz / 0.45s	No trip

Note. For Frequency Trip tests the Frequency required to trip is the setting ± 0.1 Hz. In order to measure the time delay a larger deviation than the minimum required to operate the protection can be used. The "No-trip tests" need to be carried out at the setting ± 0.2 Hz and for the relevant times as shown in the table above to ensure that the protection will not trip in error.

Protection, Loss of Mains.

Inverters tested according to BS EN 62116.

Balancing load on islanded network	33% of -5% Q Test 22	66% of -5% Q Test 12	100% of -5% P Test 6	33% of +5% Q Test 31	66% of +5% Q Test 21	100% of +5% P Test 10
Trip time, Ph1 fuse removed [s]	0.104	0.112	0.108	0.080	0.104	0.100

Note. Trip time limit is 0.5s. For technologies which have a substantial shut down time this can be added to the 0.5s in establishing that the trip occurred in less than 0.5s maximum. Shut down time could therefore be up to 1.0s for these technologies.

Annex to the G98/1 certificate of compliance No. U19-0596

Appendix C Type Test Verification Report

Extract from test report according to the Engineering Recommendation G98/1

Nr. ZEM-19/Y2468FTSHP

Protection: Re-connection timer.

Test should prove that the reconnection sequence starts in no less than 20 seconds for restoration of voltage and frequency to within the stage 1 settings of table 2.

Over Voltage				
Time delay setting		Measured delay		
20s		45.81s		
Under Voltage				
Time delay setting		Measured delay		
20s		45.81s		
Over Frequency				
Time delay setting		Measured delay		
20s		45.81s		
Under Frequency				
Time delay setting		Measured delay		
20s		45.71s		
	Checks on no reconnection when voltage or frequency is brought to just outside stage 1 limits of table 1.			
	At 266,2V	At 180,0V	At 47,4Hz	At 52,1Hz
Confirmation that the Generating Unit does not re-connect.	No reconnection	No reconnection	No reconnection	No reconnection

Protection: Frequency change, Stability test.				
	Start Frequency [Hz]	Change	Test Duration	Confirm no trip
Positive Vector Shift	49.5	+50 degrees		No trip
Negative Vector Shift	50.5	-50 degrees		No trip
Positive Frequency drift	49.0 to 51.0	+0.55Hz/sec	2.1s	No trip
Negative Frequency drift	51.0 to 49.0	-0.55Hz/sec	2.1s	No trip

Measured values at test impedance	0.75%	0.61%	0.00%	0.61%	0.54%	0.00%	0.12	0.10
Limits set under BS EN 61000-3-11	4%	3.3%	3.3% 500ms	4%	3.3%	3.3% 500ms	1.0	0.65
Test impedance	R	0.4	Ω	R	0.4	Ω		
	Z	0.47	Ω					

Power Quality, DC injection.

Test level power [%]	20	50	75	100
Recorded value [mA]	13.7	18.4	24.7	0.51
Recorded value [%]	0.10	0.13	0.17	0.12
Limit [%]	0.25	0.25	0.25	0.25
Note: DC-injection is tested at each phase of the inverter and a limit of 0.25% per phase was used as pass criteria.				

Annex to the G98/1 certificate of compliance No. U19-0596

Appendix C Type Test Verification Report

Extract from test report according to the Engineering Recommendation G98/1

Nr. ZEM-19JY2488FTSRP

Fault level Contribution.

For a directly coupled SSEG			For a inverter SSEG		
Parameter	Symbol	Value	Time after fault	Volts [V]	Amps [A]
Peak Short Circuit current	I_k	N/A	20ms	105.35V	1.37A
Initial Value of aperiodic current	I_a	N/A	100ms	N/A	N/A
Initial symmetrical short-circuit current*	I_k	N/A	250ms	N/A	N/A
Decaying (aperiodic) component of short circuit current*	I_{dc}	N/A	500ms	N/A	N/A
Reactance/Resistance Ratio of source*	X/R	N/A	Time to Trip [s]	0.00s	

For rotating machines and linear piston machines the test should produce a 0s - 2s plot of the short circuit current as seen at the Generating Unit terminals.

* Values for these parameters should be provided where the short circuit duration is sufficiently long to enable interpolation of the plot.

Self Monitoring – Solid state switching.	N/A
It has been verified that in the event of the solid state switching device failing to disconnect the Generating Unit, the voltage on the output side of the switching device is reduced to a value below 50 volts within 0.5 seconds.	
Note. Unit do not provide solid state switching relays. In case the semiconductor bridge is switched off, then the voltage on the output drops to 0. In this case the relays on the output will also open (Functional safety of the internal automatic disconnection device according to VDE 0126-1-1).	

Logic Interface (Input port) Required by paragraph 11.1.3	N
Confirm that an input port is provided and can be used to shut down the module.	Yes

Certificate of compliance

Applicant: JIANGSU GOODWE POWER SUPPLY TECHNOLOGY CO., LTD
NO.189 Kun Lun Shan Road
Suzhou New District, Jiangsu
China

Product: Photovoltaic (PV) inverter

Model: GW700-XS, GW1000-XS, GW1500-XS,
GW2000-XS, GW2500-XS, GW3000-XS

Use in accordance with regulations:

Automatic disconnection device with single-phase mains surveillance in accordance with IEC 61727:2004 and IEC 62116:2014 for photovoltaic systems with a single-phase parallel coupling via an inverter in the public mains supply. The automatic disconnection device is an integral part of the aforementioned inverters.

Applied rules and standards :

IEC 61727:2004

Photovoltaic (PV) systems – Characteristics of the utility interface

IEC 62116:2014

Test procedure of islanding prevention measures for utility interconnected photovoltaic inverters

At the time of issue of this certificate the safety concept of an aforementioned representative product corresponds to the valid safety specifications for the specified use in accordance with regulations

Report number: ZEM-19JA0749FCSHP-1
ZEM-19JA0749FCSHP-2

Certificate number: U19-0174

Date of issue: 2019-03-14

Certification body of Bureau Veritas Consumer Products Services Germany GmbH
Accredited according to DIN EN ISO/IEC 17065

Certificate of Conformity

Certificate No.: 2088AP0409N065001
Product: SOLAR (PV) Grid INVERTER
Brand Name:  **GOODWE**
Test Model No.: GW12KT-DT, GW15KT-DT
Applicant: Jiangsu GoodWe Power Supply Technology Co.,Ltd.
 No.90 Zijin Rd., New District, Suzhou, 215011, China
Report No.: PV200409N065, PV200409N065-1, PV200409N065-2, PV200409N065-3,
 WT203102059

Use in accordance with regulations:

The inverters are tested for functional safety, grid protection, specified environmental influences and efficiency. For detailed information, please watch the corresponding test reports.

Certificate of Suitability

Certificate No.: **SAA192403**

Certificate Holder: Jiangsu Goodwe Power Supply Technology Co., Ltd.
No. 189, Kun Lun Shan Road,
Suzhou New District, 215163 Suzhou,
Jiangsu
P.R. China

Class Description: Non-Prescribed
Product Description: PV Inverter (Grid-tied photovoltaic inverter)
Trade Name: GOODWE
Model No.: GW6K-DT
Markings: Input: MPPT Voltage range: 180-850Vdc, Max 1000Vdc,
Max 12.5A/12.5A, Isc: 15.6/15.6A
Output: 3/N/PE, 400V~ 50/60Hz, 3x8.7A 6000W
-30°C to +60°C, IP65, Class I
Standard: IEC 62109-1 Ed 1.0
IEC 62109-2 Ed 1.0
AS/NZS 4777.2:2015
Conditions: Nil

Certification Mark: RCM and SAA192403

Date First Registered: 4 September 2019

Date of Expiry: 4 September 2024

For and on Behalf of
SAA Approvals Pty Ltd

SAA Approvals Pty Ltd as accredited by JAS-ANZ under ISO/IEC 17065 and declared a RECS under *Old Electrical Safety Act 2002 and Electrical Safety Regulations 2013* certifies in accordance with the SAA Approvals Electrical Product Safety Certification Scheme that the product nominated in this certificate complies with standard/s listed.

When using the RCM the requirements of all relevant parts of AS/NZS 4417 applicable to the article must be fulfilled.

For SAA Contact Details and to verify this Certificate go to:

www.saaapprovals.com.au

www.jas-anz.org/register

Issued: 04-09-19 192403/1

Certificate of Suitability

Addendum

Certificate No.: SAA192403

Date of Issue: 4 September 2019

Class Description: Non-Prescribed

Product Description: PV Inverter (Grid-tied photovoltaic inverter)

General Modification:

Hardware (Firmware) version: 290-10098-00

Software version: V1.00.00.01

Additional Models	Trade Name	Rating
GW4K-DT	GOODWE	Input: MPPT Voltage range: 180-850Vdc, Max 1000Vdc, Max 12.5A/12.5A, Isc: 15.6/15.6A Output: 3/N/PE, 400V~ 50/60Hz, 3x5.8A 4000W
GW4KL-DT	GOODWE	Input: MPPT Voltage range: 180-550Vdc, Max 600Vdc, Max 12.5A/12.5A, Isc: 15.6/15.6A Output: 3/N/PE, 400V~ 50/60Hz, 3x5.8A 4000W
GW5K-DT	GOODWE	Input: MPPT Voltage range: 180-850Vdc, Max 1000Vdc, Max 12.5A/12.5A, Isc: 15.6/15.6A Output: 3/N/PE, 400V~ 50/60Hz, 3x7.3A 5000W
GW5KL-DT	GOODWE	Input: MPPT Voltage range: 180-550Vdc, Max 600Vdc, Max 12.5A/12.5A, Isc: 15.6/15.6A Output: 3/N/PE, 400V~ 50/60Hz, 3x7.3A 5000W
GW6KL-DT	GOODWE	Input: MPPT Voltage range: 180-550Vdc, Max 600Vdc, Max 12.5A/12.5A, Isc: 15.6/15.6A Output: 3/N/PE, 400V~ 50/60Hz, 3x8.7A 6000W

ANLAGE (Appendix): 1

Dem Zertifikat liegt unsere Prüf- und Zertifizierungsordnung zugrunde und es bestätigt die Konformität des Produktes mit den oben genannten Standards und Prüfgrundlagen. Zusätzliche Anforderungen in Ländern, in denen das Produkt in Verkehr gebracht werden soll, müssen zusätzlich betrachtet werden. Die Herstellung des zertifizierten Produktes wird überwacht.
This certificate is based on our Testing and Certification Regulation and states the conformity of the product with the standards and testing requirements as indicated above. Any additional requirements in countries where the product is going to be marketed have to be considered additionally. The manufacturing of the certified product is subject to surveillance.

P.R. China

Ref : R TÜV-Mark Approval

Type of Equipment : Grid-connected PV Inverter
Model Designation : See Certificate
Certificate No. : R 50471900 0001
Report No. : 50381214 001

Dear Mr. Jiang Tao,

The above specified equipment has been tested and found to be in accordance with the relevant requirements.

Please find enclosed your certificate as specified above.

If cancellation of the certificate is submitted by 15 November in a given year, no fee will be charged for the following year.

The certificate is issued with the reservation that the license holder applies all information required in § 6 of the ProdSG related to name and address of the manufacturer or his authorized representative / importer, including their respective contact addresses on the product prior to marketing of the product in the European Economic Area.

With kind regards,

Certification Body

DESCRIPTION OF EQUIPMENT

Ratings:

For all models (GW50K-MT, GW60K-MT)

Output voltage: 400Va.c./N/PE., 50Hz, three-phase;

Power factor: >0.99 (adjustable 0.8 inductive to 0.8 capacitive), Class I, IP65, PDIII;

Operating Temp.: -30°C to 60°C (>50°C derating);

Overvoltage Category (OVC): PV input: II; Grid Output: III.

For model GW50K-MT:

Input:

VDC max: 1000Vd.c., VDC MPPT: 200-850Vd.c.;

IDC max: 30/30/20/20Ad.c., for 10 input strings;

IDC max: 30/30/30/30Ad.c., for 12 input strings;

Output:

Rated AC Power: 50000VA @50°C Amb.,

IAC max.: 80*3Aa.c.

Certificate No. : AZ 69022517 0001
Report No. : 50127631 001

Dear Xie Jing,

The above specified technical equipment has been certified and found to be in accordance with the relevant requirements.

Enclosed you will find the Certificate of Suitability in respect to your application received.

The Authorised Marking is specified in the certificate.

Alternatively, the Regulatory Compliance Mark (RCM) may be used providing that the requirements of all relevant parts of AS/NZS 4417 applicable to the article are fulfilled.

Please be advised that should the electrical equipment be modified, you are required to notify us and apply for a modification of the certificate.

We appreciate your kind support and would like to offer our assistance and continuous services in the future. Please contact our office for approval of your new products.

With kind regards,

GOODWE

SMT Series

25-36kW | Three Phase | 3 MPPTs

The GoodWe SMT Series three-phase inverter is ideal for commercial rooftop system solutions. The SMT series achieves maximum efficiency of 98.8% and features unique design highlights, including solid capacitors, fuse-free design, and optional Arc Fault Circuit Interrupter (AFCI) function. These new features ensure a longer lifespan and a higher safety level of operation, allowing for an improved user experience. With a compact design and weight of just 40kg, the SMT series is more convenient to install. With a maximum DC input voltage of 1100V, a wider MPPT range for complex rooftops, and a start-up voltage of 180V, the SMT series guarantees an earlier generation of power and a longer working time to maximize long-term returns and profitability in safe operating conditions.

Smart Control & Monitoring

- String level monitoring
- Dynamic power export limit

Optimal Generation for Higher Return

- 98.8% Max. Efficiency
- Up to 130% DC input oversizing & 110% AC output overloading

Superb Safety & Reliability

- Optional Arc-fault circuit interrupter*
- Optional Type II SPD on both DC and AC*

Friendly & Thoughtful Design

- 40kg compact design
- Power line communication optional*

GOODWE

MT Series

50-80kW | Three Phase | 4 MPPTs

The second generation of GoodWe MT Series inverter is suited for medium and large scale commercial rooftops and ground-mounted solar PV systems where maximum versatility and profitability are important. With its compact design and power boost function, the Goodwe MT series of the new generation can provide a 150% continuous maximum AC output power overload, offering a faster return on investment. The start-up voltage is 200V, much lower than other products, which makes the inverter start up earlier, therefore generating more power over time.

Up to 150% DC input oversizing

String level monitoring

Up to 115% AC output overloading

Full-load running at 50°C

Up to 99% Max. Efficiency

Power line communication

Holder: JIANGSU GOODWE POWER SUPPLY
TECHNOLOGY CO., LTD.
No.90 Zijin Rd.,
New District, Suzhou
215011 Jiangsu
P.R. China

Product: PV-Inverter
(Grid-connected PV Inverter)

Identification:

Type Designation	: GW73KLV-HT	GW100K-HT	GW110K-HT
		GW120K-HT	GW136K-HTH
Serial Number	: Engineering Samples		
Firmware Version	: V1.01.01		
Remark	: Refer to test report CN201MNG 001 for details.		

Tested acc. to: IEC 61727:2004
IEC 62116:2014

The certificate of conformity refers to the above mentioned product. This is to certify that the specimen is in conformity with the assessment requirement mentioned above. This certificate does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity.

Date 20.11.2020

Mr. Jiang Tao

Date : 20.11.2020
Our ref. : DJW 01
Your ref.: Jiang Tao

No.90 Zijin Rd.,
New District, Suzhou
215011 Jiangsu
P.R. China

Ref : AK Certificate of Conformity

Type of Equipment : Grid-connected PV Inverter
Model Designation : See Certificate
Certificate No. : AK 50487186 0001
Report No. : CN201MNG 001

Dear Mr. Jiang Tao,

We herewith confirm that a sample of the above mentioned technical equipment has been tested and was found to be in accordance with the relevant requirements.

Enclosed please find your Certificate of Conformity.

We appreciate your kind support and would like to offer our assistance and continuous services in the future.

With kind regards,

Certification Body

GOODWE

HT Series | 1100Vdc

73-136kW | Up to 12 MPPTs Three Phase

The HT 1100 Vdc Series 73-136kW is GoodWe's new string inverter for C&I and small utility projects to boost your power and profit. Generate your solar power and make use of it with this centerpiece of the clean energy system. The HT Series seamlessly incorporates its technical strengths designed to achieve higher savings in the installation, enhance productivity with increased energy yields, realize high power density and diversify available monitoring options. It takes safety to the top possible level in accordance with the strictest industry standards and runs efficiently even under the harshest environmental conditions. This unrivalled set of features was conceived to ensure the lowest levelized cost of electricity (LCOE) to offer this ideal choice for commercial and industrial PV systems.

Smart Control & Monitoring

- String Level Monitoring
- Dynamic power export limit

Optimal Generation for Higher Return

- Full load running at 45°C
- Up to 12 MPPTs

Superb Safety & Reliability

- IP66 and C5 protection
- Optional Type I Surge Protection & AFCI¹

Friendly & Thoughtful Design

- Easy and quick configuration via Bluetooth
- Power line communication

FRONIUS TAURO

Direct variant.

System design flexibility

Max. performance up to 50°C

Direct sunlight

Optimizing costs

Active Double Wall Cooling

Power stage replacement

The three-phase Fronius Tauro in the 50 and 100 kW power classes promises maximum performance for decentral systems even under the harshest conditions.

With its smart hardware design, it offers not just BOS cost optimization but unprecedented flexibility in system design. Simple installation and the fastest service on the market ensure maximum yield.

TECHNICAL DATA FRONIUS TAURO

INPUT DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Number of MPP trackers	3		1	
Max. input current ($I_{dc\ max}$)	134 A	87.5 A		175 A
Max. input current module field (PV1 / PV2 / PV3)	36 / 36 / 72 A	75 / 75 / - A		75 / 75 / 75 A
Max. short circuit current (PV1 / PV2 / PV3)	72 / 72 / 125	125 / 125 / -		125 / 125 / 125
Max. short circuit current ($I_{sc\ max}$, inverter)	240	178		355
DC input voltage range ($U_{dc\ min} - U_{dc\ max}$)	200 - 1000 V		580 - 1000 V	
Feed-in start voltage ($U_{dc\ start}$)	200 V		650 V	
Usable MPP voltage range ($U_{mpp\ min} - U_{mpp\ max}$)	400 - 870 V		580 - 930 V	
Number of DC connections (PV1 / PV2 / PV3)	4 / 3 / 7	7 / 7 / -		7 / 7 / 8
Max. PV generator power ($P_{dc\ max}$)		75 kW _{peak}		150 kW _{peak}

OUTPUT DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
AC nominal output ($P_{ac\ n}$)		50,000 W	99,990 W	100,000 W
Max. output power		50,000 VA	99,990 VA	100,000 VA
AC output current ($I_{ac\ nom}$)		76 A		152 A
Grid connection ($U_{ac\ n}$)		3~ NPE 400/230 V ; 3~ NPE 380/220 V		
Frequency (frequency range $f_{min} - f_{max}$)		50 Hz / 60 Hz (45 - 65 Hz)		
Power factor ($\cos \phi_{ac\ n}$)		0 - 1 ind. / cap.		

GENERAL DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Dimensions (height x width x depth)		755 x 1109 x 346 mm (without wall mount)		
Weight	92 kg	74 kg		103 kg
Degree of protection		IP 65		
Protection class		1		
Night-time consumption		< 16 W		
Cooling		Active cooling technology and double wall system		
Installation		Indoor and outdoor ¹		
Ambient temperature range		- 40 bis + 65 °C ²		
Certificates and compliance with standards ³		AS/NZS 4777.2:2020, IEC62109-1/-2, VDE-AR-N 4105:2018, IEC62116, EN50549-1:2019 & EN50549-2:2019, VDE-AR-N 4110:2018, CEI 0-16:2019, CEI 0-21:2019		

¹ Direct under the sun is possible

² Optional AC-disconnect mounted inside the inverter: from -30 to +65 °C

THREE BUSINESS UNITS, ONE GOAL: TO SET THE STANDARD THROUGH TECHNOLOGICAL ADVANCEMENT.

What began in 1945 as a one-man operation now sets technological standards in the fields of welding technology, photovoltaics and battery charging. Today, the company has around 5,440 employees worldwide and 1,264 patents for product development show the innovative spirit within the company. Sustainable development means for us to implement environmentally relevant and social aspects equally with economic factors. Our goal has remained constant throughout: to be the innovation leader.

PERFECT WELDING

Our mission is Perfect Welding; a task we have approached with passion and skill for decades in order that our customers can join materials with the perfect weld seam. With our outstanding technologies and services and together with our customer's applications, not only do we solve their specific welding technology problems, but we also make a substantial contribution to increasing their productivity.

SOLAR ENERGY

Our mission is to achieve 24 hours of sun. Day after day we are hard at work turning this vision of a future in which 100% of the world's energy needs are covered by renewable sources into a reality. We are therefore concentrating on solutions to intelligently, efficiently and economically generate, store, distribute and consume solar energy.

PERFECT CHARGING

As know-how leaders in the world of battery charging, we deliver exceptional solutions to create the maximum benefit for our customers. For the intralogistics sector, we are committed to energy flow optimisation for electric forklift trucks and are constantly striving for the next innovation. Our powerful charging systems for vehicle workshops guarantee safe and reliable processes.

FRONIUS PRIMO

/ The communicative inverter for optimised energy management.

/ SnapINverter Technology

/ Integrated data communication

/ SuperFlex Design

/ Dynamic Peak Manager

/ Smart Grid Ready

/ Zero feed-in

/ The Fronius Primo in power categories from 3.0 to 8.2 kW perfectly completes the SnapINverter generation. This single-phase, transformerless device is the ideal inverter for private households. Its innovative SuperFlex Design provides maximum flexibility in system design, while the SnapINverter mounting system makes installation and maintenance easier than ever before. The communication package included as standard, with WLAN, energy management, several interfaces and much more besides, makes the Fronius Primo a communicative inverter for owner-occupiers.

TECHNICAL DATA FRONIUS PRIMO (3.0-1, 3.5-1, 3.6-1, 4.0-1, 4.6-1)

INPUT DATA	PRIMO 3.0-1	PRIMO 3.5-1	PRIMO 3.6-1	PRIMO 4.0-1	PRIMO 4.6-1

WLAN / Ethernet LAN	Fronius Solar.web, Modbus TCP SunSpec, Fronius Solar API (JSON)			
6 inputs and 4 digital in/out	Interface to ripple control receiver			
USB (A socket) ¹⁾	Datalogging, inverter update via USB flash drive			
2x RS422 (RJ45 socket) ¹⁾	Fronius Solar Net			
Signalling output ¹⁾	Energy management (potential-free relay output)			
Datalogger and Webserver	Included			
External input ¹⁾	S0-Meter Interface / Input for overvoltage protection			
RS485	Modbus RTU SunSpec or meter connection			

¹⁾ Also available in the light version.

Further information and technical data can be found at www.fronius.com.

/ Perfect Welding / Solar Energy / Perfect Charging

WE HAVE THREE DIVISIONS AND ONE PASSION: SHIFTING THE LIMITS OF POSSIBILITY.

/ Whether welding technology, photovoltaics or battery charging technology – our goal is clearly defined: to be the innovation leader. With around 3,700 employees worldwide, we shift the limits of what's possible - our record of over 800 granted patents is testimony to this. While others progress step by step, we innovate in leaps and bounds. Just as we've always done. The responsible use of our resources forms the basis of our corporate policy.

Further information about all Fronius products and our global sales partners and representatives can be found at www.fronius.com

SHIFTING THE LIMITS

FRONIUS sYMO

/ Maximum flexibility for the applications of tomorrow.

/ SnapINverter technology

/ Integrated data communication

/ SuperFlex Design

/ Dynamic Peak Manager

/ Smart Grid Ready

/ Boasting power categories ranging from 3.0 to 20.0 kW, the transformerless Fronius Symo is the three-phase inverter for systems of every size. Owing to the SuperFlex Design, the Fronius Symo is the perfect answer to irregularly shaped or multi-oriented roofs. The standard interface to the internet via WLAN or Ethernet and the ease of integration of third-party components make the Fronius Symo one of the most communicative inverters on the market. Furthermore, the meter interface permits dynamic feed-in management and a clear visualisation of the consumption overview.

TECHNICAL DATA FRONIUS SYMO (3.0-3-S, 3.7-3-S, 4.5-3-S, 3.0-3-M, 3.7-3-M, 4.5-3-M)

INPUT DATA	SYMO 3.0-3-S	SYMO 3.7-3-S	SYMO 4.5-3-S	SYMO 3.0-3-M	SYMO 3.7-3-M	SYMO 4.5-3-M
Max. input Current (I _{dc max 1} / I _{dc max 2} ¹⁾)	16.0 A / 16.0 A					
Max. array short Circuit Current (MPP ₁ /MPP ₂ ¹⁾)	24.0 A / 24.0 A					
Min. input voltage (U _{dc min})	150 V					
Feed-in start voltage (U _{dc start})	200 V					
Nominal input voltage (U _{dc,r})	595 V					
Max. input voltage (U _{dc max})	1,000 V					
MPP voltage range (U _{mpp min} – U _{mpp max})	200 - 800 V	250 - 800 V	300 - 800 V	150 - 800 V		
Number MPP trackers	1			2		
Number of DC connections	3			2+2

/ Perfect Welding / Solar Energy / Perfect Charging

WE HAVE THREE DIVISIONS AND ONE PASSION: SHIFTING THE LIMITS OF POSSIBILITY.

/ Whether welding technology, photovoltaics or battery charging technology – our goal is clearly defined: to be the innovation leader. With around 3,300 employees worldwide, we shift the limits of what's possible – our record of over 900 granted patents is testimony to this. While others progress step by step, we innovate in leaps and bounds. Just as we've always done. The responsible use of our resources forms the basis of our corporate policy.

Further information about all Fronius products and our global sales partners and representatives can be found at www.fronius.com

Wels, April 03rd 2018

ANTI ISLANDING PROTECTION FRONIUS INVERTERS

Fronius International GmbH

hereby certifies, that the inverters

- / **Fronius Symo 3.0-3- S – 20.0-3-M**
- / **Fronius Symo Hybrid 3.0-3-S – 5.0-3-S**
- / **Fronius Galvo 1.5-1 – 3.1-1**
- / **Fronius Primo 3.0-1 – 8.2-1**
- / **Fronius Eco 25.0-3-S – 27.0-3-S**

Fulfil all requirements, which are postulated by the Greek Energy Supply Industry, including the Anti Islanding Protection.

1. The disconnection and connection of the inverter to the point of power injection is done with internal relays which are controlled by a software which will initiate:
 - a. an automatic (re-)connection to the public grid provided that voltage and frequency are within the range of $0,8 \times V_{nom} - 1,15 \times V_{nom}$ and $49,5 \text{ Hz} - 50,5 \text{ Hz}$.
 - b. an immediate ($< 0,5 \text{ s}$) disconnection if the voltage, the frequency or both are not within these limits.
 - c. the software with its adjustments can not be accessed by the end-user.
2. The connection time and the reconnection time after clearance of grid failure is not shorter than 180 s.
3. The injected DC current into the grid is $< 0,5\%$ of nominal current.
4. The total harmonic distortion of the output current (THDI) is lower than 5%.
5. In addition to the passive protection limits (voltage and frequency) an Active Anti Islanding method according to VDE 0126-1-1 is implemented. The pattern detection method injects reactive current pulses and analyses the resulting frequency behavior. The Anti Islanding protection trip time is < 5 seconds.

Με το παρόν βεβαιώνει ότι όλα τα είδη των μετατροπέων

- / **Fronius Symo 3.0-3- S – 20.0-3-M**
- / **Fronius Symo Hybrid 3.0-3-S – 5.0-3-S**
- / **Fronius Galvo 1.5-1 – 3.1-1**
- / **Fronius Primo 3.0-1 – 8.2-1**
- / **Fronius Eco 25.0-3-S – 27.0-3-S**

Εκπληρώνουν όλες τις απαιτήσεις οι οποίες αξιώνονται από την Ελληνική βιομηχανία παραγωγής ενέργειας, συμπεριλαμβανομένης της προστασίας έναντι του φαινομένου της νησιδοποίησης.

1. Ο μετατροπέας συνδέεται στο σημείο εισαγωγής ισχύος και αποσυνδέεται από αυτό με τη βοήθεια εσωτερικών ηλεκτρονόμων που ελέγχονται μέσω λογισμικού το οποίο πραγματοποιεί:
 - a. αυτόματη (επανα-)σύνδεση στο δημόσιο δίκτυο, εφόσον οι τιμές της τάσης και της συχνότητας εμπίπτουν εντός του εύρους τιμών $0,8 \times V_{nom} - 1,15 \times V_{nom}$ και $49,5 \text{ Hz} - 50,5 \text{ Hz}$.
 - b. άμεση ($< 0,5 \text{ s}$) αποσύνδεση, εφόσον η τάση, η συχνότητα ή και τα δύο δεν εμπίπτουν εντός αυτού του εύρους.
 - c. ο τελικός χρήστης δεν έχει πρόσβαση στο λογισμικό ούτε στις ρυθμίσεις του.
2. Ο χρόνος σύνδεσης και ο χρόνος επανασύνδεσης μετά την επαναφορά του δικτύου από σφάλμα είναι τουλάχιστον 180 s.
3. Η έγχυση συνεχούς ρεύματος στο δίκτυο είναι $< 0,5\%$ του ονομαστικού
4. Η συνολική αρμονική παραμόρφωση του ρεύματος εξόδου (THDI) είναι μικρότερη από 5%.
5. Επιπλέον των ορίων προστασίας της τάσης και της συχνότητας, εφαρμόζεται ενεργή μέθοδος προστασίας έναντι του φαινομένου της νησιδοποίησης κατά το πρότυπο VDE 0126-1-1. Η σύμφωνη με το πρότυπο μέθοδος ανίχνευσης, αναλύει την συμπεριφορά της συχνότητας ως αποτέλεσμα της έγχυσης παλμών άεργου ρεύματος. Ο χρόνος λειτουργίας της προστασίας έναντι νησιδοποίησης είναι < 5 δευτερόλεπτα.

Our Ref: REGISTRATION/CRS 2021-0161/R-41186376

Date:28-01-2022

Inclusion Id: 53212

Subject :Inclusion of Additional Model(s)

MANUFACTURING UNIT :	Fronius International GmbH FRONIUSSTRAÙE 1, 4643 PETTENBACH UPPER AUSTRIA,Austria-04643 Einwagner.Hans@fronius.com 00436646100943	
----------------------	---	---

Dear Sir,

1. This has reference to your request for inclusion of models of "Utility-Interconnected Photovoltaic Inverters" as per IS 16221 (Part 2):2015/IEC 62109-2 :2011 & IS 16169 :2014/IEC 62116 :2008 in Licence No. R-41186376 already granted to you which is valid upto 06-04-2023.
2. It is intimated that the additional Models as per details given below have been agreed to be included in your scope of Licence. **R-41186376 w.e.f. 28-01-2022:**

Product Category	Utility-Interconnected Photovoltaic Inverters
Product Name	Utility-Interconnected Photovoltaic Inverters
IS No.	IS 16221 (Part 2):2015/IEC 62109-2 :2011 & IS 16169 :2014/IEC 62116 :2008
Brand (As Declared by Manufacturer):	FRONIUS
Inclusion of Additional Models (w.e.f. 28-01-2022)	Fronius Tauro ECO 100-3-D,Fronius Tauro ECO 100-3-P, Fronius Tauro ECO 50-3-D , Fronius Tauro ECO 50-3-P
Factory Address	FRONIUSSTRAÙE 1, 4643 PETTENBACH UPPER AUSTRIA,Austria-04643

3. Other terms and conditions of the licence shall remain same.
4. This letter is being issued with the approval of competent authority.

Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Sundeep Kumar)

MANUFACTURING UNIT :	Fronius International GmbH FRONIUSSTRAßE 1, 4643 PETTENBACH UPPER AUSTRIA, Austria-04643 Einwagner.Hans@fronius.com 00436646100943	
----------------------	--	---

Dear Sir,

1. With reference to your Application, we are pleased to inform you that it has been decided to grant you licence as per details given below :

Product Category :	Utility-Interconnected Photovoltaic Inverters
Product Name :	Utility-Interconnected Photovoltaic Inverters
IS NO :	IS 16221 (PART 2):2015/IEC 62109-2 :2011 & IS 16169 :2014/IEC 62116 :2008
Brand (As Declared by Manufacturer) :	FRONIUS
Model :	[Brand -> FRONIUS, Models -> Fronius Eco 25.0-3-S, Fronius Eco 27.0-3-S (Lead model), Fronius Primo 3.0-1, Fronius P primo 3.5-1, Fronius Primo 4.0-1, Fronius Primo 4.6-1, Fronius Primo 5.0-1, (Lead model) , Fronius Primo 6.0-1, Fronius Primo 8.2-1 (Lead model), Fronius Symo 10.0-3-M, Fronius Symo 12.5-3-M (Lead model), Fronius Symo 15.0-3-M, Fronius Symo 17.5-3-M, Fronius Symo 20.0-3-M (Lead model), Fronius Symo 3.0-3-M, Fronius Symo 3.7-3-M, Fronius Symo 4.5-3-M, Fronius Symo 5.0-3-M, Fronius Symo 6.0-3-M (Lead model), Fronius Symo 7.0-3-M, Fronius Symo 8.2-3-M (Lead model)]
Factory Address :	FRONIUSSTRAßE 1, 4643 PETTENBACH UPPER AUSTRIA, Austria-04643

2. The Licence is being granted for your unit located at the address and for the brand and models mentioned at serial no 1 above.

3. The number assigned to this Licence is **R-41186376** which has been made operative from **07-04-2021** and is valid upto **06-04-2023** . The Licence Number should invariably be referred to in your future correspondence.

4. The rights and privileges under the licence shall not be exercised by any other factory / organization at any other location. This licence is not transferable. In the event of shifting of the manufacturing machinery from the registered premises to some other place use of the Licence Number shall be stopped and BIS shall be informed.

5. The licensee shall comply with the provisions of the Act, rules and regulations framed thereunder and as amended from time to time.

6. The licensee shall follow the guidelines for the use of Standard Mark and labeling requirements as per Annex-I.

7. The licensee shall not use the licence in any manner which contravenes the provisions of Act, rules and regulations framed thereunder and as amended from time to time.

8. Upon expiry of validity, stoppage or suspension or cancellation of licence, you shall discontinue forthwith the self declaration of conformity to the relevant Indian Standard(s) and withdraw all promotional and advertising matter which contains any reference thereto.

9. As per your declaration, **VISHWANATH VENKATESH KAMATH, Managing Director, Fronius India Private Limited (Address- BG-71/2/B, PIMPRI INDUSTRIAL AREA, TELCO ROAD, MIDC BHOSARI, PUNE, Pune, Maharashtra, 411026, NA)** is your authorized Indian representative. Any intended change in the name of the Indian representative ought to be brought to our notice immediately along with requisite fees and document.

10. For renewal of licence, the licensee shall have to apply to BIS three months in advance before expiration of the licence and application form for renewal is available on BIS website

11. The licence is not transferable. Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Mohit Prabhat)

Annex - 1

The guidelines for use of Standard Mark for Scheme-C are per 3(1) of BIS (Conformity Assessment) Regulations, 2017 are given below:

- i) The monogram of the 'Standard Mark' consists of the pictorial representation, drawn in the exact style as indicated in the figure in the figure in Annexure I. Its photographic reduction and enlargement is permitted.
- ii) The 'Standard Mark' can be displayed in single colour or multi-colour as per the details given below. The colour scheme for the Standard Mark to be used in multi colour shall be use as indicated below.
- iii) The licensee shall display the 'Standard Mark' on the article and/or the packaging, as the case may be, in a manner so as to be easily visible. It shall be legible, indelible and non-removable. Further, the durability of marking shall be as per the provisions of the relevant Indian Standard, wherever applicable. The display of IS number, Registration number and words shall not be less than Arial font size 6.
- iv) Any device with an integrated display screen may present the Standard Mark electronically (e-labelling) in lieu of a physical presentation on the product.

For details information on BIS, consult the e-BIS Portal (www.manakonline.in).
Please use BIS CARE APP for verification of ISI-marked goods and hallmarked gold jewellery.

FRONIUS ECO

The compact project inverter for maximum yields

SnapInverter
Technology

Integrated data
communication

Dynamic Peak
Manager

Smart Grid
Ready

Zero feed-in

The three-phase Fronius Eco in power categories 25.0 and 27.0 kW perfectly meets all the requirements of large-scale installations. Thanks to its light weight and SnapInverter mounting system, this transformerless device can be installed quickly and easily either indoors or outdoors.

This inverter range is setting new standards with its IP 66 protection class. Furthermore, thanks to its integrated double fuse holders and optional overvoltage protection, string collection boxes are no longer necessary.

TECHNICAL DATA FRONIUS ECO

INPUT DATA	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
Number of MPP trackers	1	
Max. input current ($I_{dc \max}$)	44.2 A	47.7 A
Max. array short circuit current	71.6 A	
DC input voltage range ($U_{dc \min} - U_{dc \max}$)	580 - 1,000 V	
Feed-in start voltage ($U_{dc \text{ start}}$)	650 V	
Usable MPP voltage range	580 - 850 V*	
Number of DC connections	6	
Max. PV generator output ($P_{dc \max}$)	37.8 kW _{peak}	

* based on 230 V grid voltage

OUTPUT DATA	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
AC nominal output ($P_{ac,n}$)	25,000 W	27,000 W
Max. output power	25,000 VA	27,000 VA
AC output current ($I_{ac,nom}$)	37.9 A / 36.2 A	40.9 A / 39.1 A
Grid connection (voltage range)	3~NPE 380 V / 220 V or 3~NPE 400 V / 230 V (+20 % / - 30 %)	
Frequency (frequency range)	50 Hz / 60 Hz (45 - 65 Hz)	
Total harmonic distortion	< 2.0 %	
Power factor ($\cos \phi_{ac,r}$)	0 - 1 ind. / cap.	

GENERAL DATA	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
Dimensions (height x width x depth)	725 x 510 x 225 mm	
Weight	35.7 kg	
Degree of protection	IP 66	
Protection class	1	
Overvoltage category (DC / AC) ¹⁾	2 / 3	
Night-time consumption	< 1 W	
Inverter concept	Transformerless	
Cooling	Regulated air cooling	
Installation (DIN rail)	Indoor and outdoor installation (106 x 90 x 66 mm)	
Ambient temperature range	-25 - +60 °C	
Permitted humidity	0 to 100 %	
Max. altitude	2,000 m	
DC connection technology	6x DC+ and 6x DC- screw terminals 2.5 - 16 mm ²	
AC connection technology	5-pole AC screw terminals 2.5 - 16 mm ²	
Certificates and compliance with standards	ÖVE / ÖNORM E 8001-4-712, DIN V VDE 0126-1-1/A1, VDE AR N 4105, IEC 62109-1/-2, IEC 62116, IEC 61727, AS 3100, AS 4806, AS 4777-3, CER 06-190, G59/3, UNE 206007-1, SI 4777, CEI 0-16, CEI 0-21	

¹⁾ According to IEC 62109-1, DIN rail for optional type 1 + 2 or type 2 surge protection device available.

Further information regarding the availability of the inverters in your country can be found at www.fronius.com.

FRONIUS ECO 27.0.3-S EFFICIENCY CURVE

FRONIUS ECO 27.0.3-S TEMPERATURE DERATING

TECHNICAL DATA FRONIUS ECO

EFFICIENCY	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
Max. efficiency	98.2 %	98.3 %
European efficiency (η_{EU})	98.0 %	98.0 %
MPP adaptation efficiency	> 99.9 %	

PROTECTION DEVICES	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
DC insulation measurement		Yes
Overload behavior	Operating point shift, power limitation	
DC disconnect		Yes
Integrated string fuse holders ¹⁾		Yes
Reverse polarity protection		Yes
RCMU		Yes

INTERFACES	FRONIUS ECO 25.0-3-S	FRONIUS ECO 27.0-3-S
WLAN / Ethernet LAN	Fronius Solar.web, Modbus TCP SunSpec, Fronius Solar API (JSON)	
6 inputs and 4 digital inputs/outputs	Interface to ripple control receiver	
USB (A socket) ²⁾	Datalogging, inverter update via USB flash drive	
2x RS422 (RJ45 socket) ²⁾	Fronius Solar Net	
Signalling output ²⁾	Energy management (floating relay output)	
Datalogger and Webserver	Included	
External input ²⁾	50 meter connection / Evaluation of overvoltage protection	
RS485	Modbus RTU SunSpec or meter connection	

¹⁾ Optionally fitted with 6 fuses 15 A / 1,000 V on the plus side. ²⁾ Also available in the light version.

Further information and technical data can be found at www.fronius.com.

/ Perfect Welding / Solar Energy / Perfect Charging

THREE BUSINESS UNITS, ONE GOAL: TO SET THE STANDARD THROUGH TECHNOLOGICAL ADVANCEMENT.

What began in 1945 as a one-man operation now sets technological standards in the fields of welding technology, photovoltaics and battery charging. Today, the company has around 4,760 employees worldwide and 1,253 patents for product development show the innovative spirit within the company. Sustainable development means for us to implement environmentally relevant and social aspects equally with economic factors. Our goal has remained constant throughout: to be the innovation leader.

Three Phase Inverter

SE25K / SE33.3K / SE40K

INVERTERS

Specifically designed to work with power optimizers

- / Fixed voltage inverter for superior efficiency (98.3%) and longer strings
- / Quick and easy inverter commissioning directly from a smartphone using the SolarEdge SetApp
- / Small, lightest in its class, and easy to install
- / Optional RS485 and type 2 DC and AC Surge Protection, to better withstand surges caused by lightning or other events
- / Built-in module-level monitoring with Ethernet, wireless or cellular communication (optional) for full system visibility
- / IP65 Outdoor and indoor installation
- / Optional integrated DC Safety Unit - eliminates the need for external DC isolators
- / Future-ready for SolarEdge energy storage solution

/ Three Phase Inverter

SE25K / SE33.3K / SE40K

Applicable to inverters with part number		SEXK-RWXXIXXXX		
	SE25K	SE33.3K	SE40K	
OUTPUT				
Rated AC Active Power Output	25000	33300	40000	W
Maximum AC Apparent Output Power	25000	33300	40000	VA
AC Output Voltage - Line to Line / Line to Neutral (Nominal)	380 / 220 ; 400 / 230		480 / 277	Vac
AC Output Voltage - Line to Line / Line to Neutral	304 - 437 / 176 - 253 ; 320 - 478 / 184 - 264.5		422.5 - 529 / 244 - 305	Vac
AC Frequency	50/60 ± 5%			Hz
Maximum Continuous Output Current (per Phase)	36.25	48.25		Aac
AC Output Line Connections	3W + PE, 4W + PE			
Supported Grids	WYE: TN-C, TN-S, TN-C-S, TT, IT; Delta: IT			
Utility Monitoring, Islanding Protection, Configurable Power Factor, Country Configurable Thresholds	Yes			
Total Harmonic Distortion	≤ 3			%
Power Factor Range	+/-0.2 to 1			
Maximum Residual Current Injection ⁽¹⁾	100			mA
INPUT				
Maximum DC Power (Module STC)	43750	58275	70000	W
Transformer-less, Ungrounded	Yes			
Maximum Input Voltage DC+ to DC-	1000			Vdc
Operating Voltage Range	680 - 1000			Vdc
Maximum Input Current	36.25	48.25		Adc
Reverse-Polarity Protection	Yes			
Ground-Fault Isolation Detection	167kΩ Sensitivity ⁽²⁾			
Maximum Inverter Efficiency	98.3	98.1		%
European Weighted Efficiency	98			%
Nighttime Power Consumption	< 4			W
ADDITIONAL FEATURES				
Supported Communication Interfaces ⁽³⁾	2 x RS485, Wi-Fi (optional), Cellular (optional)			
Smart Energy Management	Export Limitation			
Inverter Commissioning	With the SetApp mobile application using built-in Wi-Fi access point for local connection			
Arc Fault Protection	Built-in, User Configurable (According to UL1699B)			
Rapid Shutdown	Optional ⁽⁴⁾ (Automatic upon AC Grid Disconnect)			
RS485 Surge Protection	Optional			
DC Surge Protection	Type II, field replaceable, optional			
AC Surge Protection	Type II, field replaceable, optional			
DC SAFETY UNIT (OPTIONAL)				
DC Disconnect	Integrated in the DC safety unit			
DC Fuses (Single Pole)	Optional, 25A			
STANDARD COMPLIANCE				
Safety	IEC-62109-1, IEC-62109-2			
Grid Connection Standards ⁽⁵⁾	VDE-AR-N-4105, VDE-AR-N-4110, AS-4777, EN 50549-1, EN 50549-2, CEI-021, VDE 0126-1-1, CEI-016			
Emissions	IEC61000-6-2, IEC61000-6-3 Class A, IEC61000-3-11, IEC61000-3-12			
RoHS	Yes			
INSTALLATION SPECIFICATIONS				
AC Output Gland Diameter / Line cross section / PE cross section	Cable diameter 19 - 28 mm / 4 - 16 mm² / 4 - 16 mm²			
DC Input ⁽⁶⁾	4 MC4 pairs			
DC Input with Safety Unit	4 Strings: Gland: Cable outer diameter 5 - 10 mm / Wire cross section 2.5 - 16mm²			
Dimensions (H x W x D)	558 x 328 x 273			mm
Dimensions with Safety Unit (H x W x D)	839 x 328 x 300			mm
Weight	32			kg
Weight with Safety Unit	36.5			kg
Operating Temperature Range	-40 to +60 ⁽⁷⁾			°C
Cooling	Fan (user replaceable)			
Noise	< 62			dBA
Protection Rating	IP65 - outdoor and indoor			
Mounting	Brackets provided			

(1) If an external RCD is required, its trip value must be ≥ 100mA

(2) Where permitted by local regulations

(3) Refer to Datasheets -> Communications category on Downloads page for specifications of optional communication options: <https://www.solaredge.com/products/communication>

(4) Inverters with rapid shutdown part number: SExxK-xxRxxxxx

(5) For all standards refer to Certifications category in Downloads page: <https://www.solaredge.com/downloads/#/>

(6) Only MC4 connectors manufactured by Stäubli are approved for use

(7) For power de-rating information refer to: <https://www.solaredge.com/sites/default/files/se-temperature-derating-note.pdf>

Three Phase Inverter with Synergy Technology

For Delta Grids (Belgium, Norway, Taiwan & Philippines)

SE50K / SE55K / SE82.8K

INVERTERS

Specifically designed to work with power optimizers

- / Easy two-person installation – each unit mounted separately, equipped with cables for simple connection between units
- / Balance of System and labor reduction compared to using multiple smaller string inverters
- / Independent operation of each unit enables higher uptime and easy serviceability
- / No wasted ground area: wall/rail mounted or horizontally mounted under the modules (10° inclination)
- / Built-in module-level monitoring with Ethernet or cellular GSM
- / Fixed voltage inverter for superior efficiency (98.3%) and longer strings
- / Integrated Connection Unit with optional integrated DC Safety Switch – eliminates the need for external DC isolators
- / Advanced safety features - integrated are fault protection and optional rapid shutdown
- / Built-in RS485 Surge Protection, to better withstand lightning events

Three Phase Inverter with Synergy Technology for Delta Grids (Belgium, Norway, Taiwan & Philippines)

SE50K / SE55K / SE82.8K

SE50K ⁽¹⁾		SE55K		SE82.8K	
OUTPUT					
Rated AC Power Output	29000	32000		48000	VA
Maximum AC Power Output	29000	32000		48000	VA
AC Output Voltage — Line to Line / Line to PE	220 / 127 ; 230 / 133				Vac
AC Output Voltage — Line to Line Range	184 - 264.5				Vac
AC Frequency	50/60 ± 5				Hz
Maximum Continuous Output Current (per Phase) @Vac,nom	76	80		120	A
Grids Supported — Three Phase	3 Lines / PE (Delta; corner grounding not supported)				
Maximum Residual Current Injection	250 per unit ⁽²⁾				mA
Utility Monitoring, Islanding Protection, Configurable Power Factor, Country Configurable Thresholds	Yes				
INPUT					
Maximum DC Power (Module STC), Inverter / Unit	39150 / 19575	43200 / 21600		64800 / 21600	W
Transformer-less, Ungrounded	Yes				
Maximum Input Voltage	600				Vdc
Operating Voltage Range	370 - 600				Vdc
Maximum Input Current	74	80		120	Adc
Reverse-Polarity Protection	Yes				
Ground-Fault Isolation Detection	350kΩ Sensitivity per Unit ⁽³⁾				
Maximum Inverter Efficiency	98.3				%
European Weighted Efficiency	98				%
Nighttime Power Consumption	< 12				W
ADDITIONAL FEATURES					
Supported Communication Interfaces ⁽⁴⁾	RS485, Ethernet, GSM plug-in (optional)				
RS485 Surge Protection	Built-in				
Rapid Shutdown	Optional ⁽⁵⁾ (Automatic upon AC Grid Disconnect)				
CONNECTION UNIT					
DC Disconnect (optional)	1000V / 2 x 40A		1000V / 3 x 40A		
STANDARD COMPLIANCE					
Safety	IEC-62109, AS3100				
Grid Connection Standards ⁽⁶⁾	VDE-AR-N-4105, G59/3, AS-4777,EN 50438 , CEI-021,VDE 0126-1-1, CEI-016, BDEW				
Emissions	IEC61000-6-2, IEC61000-6-3 , IEC61000-3-11, IEC61000-3-12				
RoHS	Yes				
INSTALLATION SPECIFICATIONS					
Number of Units	2		3		
AC Output Cable	Cable gland — diameter 22-32; PE gland diameter 10-16		Cable gland — diameter 20-38; PE gland diameter 10-16		mm
DC Input ⁽⁷⁾	6 strings, 4-10mm² DC wire, gland outer diameter 5-10mm / 2 MC4 pairs per unit		9 strings, 4-10mm² DC wire, gland outer diameter 5-10mm / 3 MC4 pairs per unit		
AC Output Wire	Aluminum or Copper; L, N: Up to 70, PE: Up to 35		Aluminum or Copper; L, N: Up to 95, PE: Up to 50		mm²
Dimensions (H x W x D)	Primary Unit: 940 x 315 x 260; Secondary Unit: 540 x 315 x 260				mm
Weight	Primary Unit: 48; Secondary Unit: 45				kg
Operating Temperature Range	-40 to +60 ⁽⁸⁾				°C
Cooling	Fan (user replaceable)				
Noise	< 60				dBA
Protection Rating	IP65 — Outdoor and Indoor				
Mounting	Bracket provided				

⁽¹⁾ Available in the UK, Hungary and Israel

⁽²⁾ If an external RCD is required, its trip value must be ≥ 300mA per unit (≥ 600mA for SE55K; ≥ 900mA for SE82.8K)

⁽³⁾ Where permitted by local regulations

⁽⁴⁾ Refer to Datasheets -> Communications category on Downloads page for specifications of optional communication options: <http://www.solaredge.com/groups/support/downloads>

⁽⁵⁾ Inverter with rapid shutdown part number: SExxK-RWRP04NU4; Available for SE55K and SE82.8K.

⁽⁶⁾ For all standards refer to Certifications category on Downloads page: <http://www.solaredge.com/groups/support/downloads>

⁽⁷⁾ The DC input type, MC4 or glands, and DC switch depends on the part number ordered. Inverter with glands and DC switch P/N: SExxK-xx0P0BNG4, inverter with glands and without DC switch P/N: SExxKxx0P0BNA4, inverter with MC4 and with DC switch P/N: SExxK-xx0P0BNU4, inverter with MC4 and without DC switch P/N: SExxK-xx0P0BNU4

Certificate of compliance

Applicant: SolarEdge Technologies Ltd.
1 HaMada Street
Herzliya 4673335
Israel

Product: Photovoltaic inverter

Model: SE40K
SE33.3K
SE30K
SE27.6K
SE25K
SE20K

Use in accordance with regulations:

The inverters are tested according to electrical safety, grid protection, specified environmental influences and efficiency. For detailed information, please watch the corresponding test reports.

Applied rules and standards:

IEC 61727:2004 Characteristics of the utility interface
IEC 62116:2008/2014 Islanding prevention measures for utility-interconnected photovoltaic inverters.
IEC 62109-1:2010 Safety of power converters for use in photovoltaic power systems
IEC 62109-2:2011 Safety of power converters for use in photovoltaic power systems
IEC 60068-2-1:2007 Environmental testing – Part 2-1: Tests – Test A: Cold
IEC 60068-2-2:2007 Environmental testing – Part 2-2: Tests – Test B: Dry heat
IEC 60068-2-14:2009 Environmental testing – Part 2-14: Tests – Test N: Change of temperature
IEC 60068-2-30:2005 Environmental testing – Part 2-30: Tests – Test Db: Damp heat, cyclic (12h + 12 h cycle)
IEC 60068-2-78:2012 Environmental testing – Part 2-78: Tests – Test Cab: Damp heat, steady state
IEC 61683:1999 Photovoltaic systems – Power conditioners – Procedure for measuring efficiency

At the time of issue of this certificate, the safety concept of an aforementioned representative product corresponds to the valid safety specifications for the specified use in accordance with regulations.

----------------------	--	---

Dear Sir,

1. This has reference to your request for inclusion of models of **"Utility-Interconnected Photovoltaic Inverters" as per IS 16221 (Part 2):2015/IEC 62109-2 :2011 & IS 16169 :2014/IEC 62116 :2008 in Licence No. R-41191833** already granted to you which is valid upto 26-05-2023.

2. It is intimated that the additional Models as per details given below have been agreed to be included in your scope of Licence. **R-41191833 w.e.f. 04-02-2022:**

Product Category	Utility-Interconnected Photovoltaic Inverters
Product Name	Utility-Interconnected Photovoltaic Inverters
IS No.	IS 16221 (Part 2):2015/IEC 62109-2 :2011 & IS 16169 :2014/IEC 62116 :2008
Brand (As Declared by Manufacturer):	Solaredge (Logo)
Inclusion of Additional Models (w.e.f. 04-02-2022)	SE100K, SE33.3K, SE55K-IN, SE66.6K, SE82.8K-IN, SE90K
Factory Address	128, JUN CHENG ROAD, GUNAGZHOU ECONOMIC AND TECHNOLOGICAL DEVELOPMENT DISTRICT, GUANGDONG PROVINCE, PEOPLE'S REPUBLIC OF CHINA GUANGDONG PROVINCE,China-510530

3. Other terms and conditions of the licence shall remain same.

4. This letter is being issued with the approval of competent authority.

Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Sundeep Kumar)

SG15KTL-M/SG20KTL-M

Multi-MPPT String Inverter for 1000 V_{dc} System

High Yield

- Max. efficiency 98.6 %, European efficiency 98.3 %
- 1.1 overload capacity, 10% more yield under high irradiance
- Adapt to complex power grid, extend the grid-connected generation time
- Patented PID recovery function optional

Easy O&M

- 24kg, easy O&M
- Plug and play design, easy installation
- String current monitoring function for fast trouble shooting
- Fast commissioning, easy local and on-line monitoring

Safe and Reliable

- High power quality, no interference for electrical equipment
- Low radiation, compliance with household equipment standards
- High anti-corrosion with aluminum alloy die casting
- Built-in surge arresters and residual current protection

Input (DC)**SG15KTL-M****SG20KTL-M**

Max. PV input voltage	1100 V	
Min. PV input voltage / Start-up input voltage	200 V / 250 V	
Nominal PV input voltage	600 V	
MPP voltage range	200 V – 1000 V	
MPP voltage range for nominal power	380 V – 850 V	480 V – 850 V
No. of independent MPP inputs	2	
Max. number of PV strings per MPPT	2	
Max. PV input current	44 A (22 A / 22 A)	
Max. current for input connector	15 A	
Max. DC short-circuit current	60 A (30 A / 30 A)	

Output (AC)

AC output power	16500 VA @ 35 °C / 15000 kVA @ 45 °C	22000 VA @ 35 °C / 20000 kVA @ 45 °C
Max. AC output current	24.0 A	31.9 A
Nominal AC voltage	3 / N / PE, 230 / 400 V	
AC voltage range	270 V – 480 V	
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz	
THD	< 3 % (at nominal power)	
DC current injection	< 0.5 % I _n	
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging	
Feed-in phases / Connection phases	3 / 3	

Efficiency

Max. efficiency / Euro. efficiency	98.6 % / 98.3 %
------------------------------------	-----------------

Protection

DC reverse connection protection	Yes
AC short-circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
DC switch / AC switch	Yes* / No
PV string current monitoring	Yes
PID recovery function	Optional
Overvoltage protection	DC Type II / AC Type II

General Data

Dimensions (W*H*D)	370*485*210 mm
Weight	24 kg
Isolation method	Transformerless
Degree of protection	IP65
Night power consumption	< 1 W
Operating ambient temperature range	-25 to 60 °C (> 45 °C derating)
Allowable relative humidity range (non-condensing)	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	4000 m (> 3000 m derating)
Display / Communication	LED, Bluetooth + APP / RS485 (Optional: WiFi / Ethernet)
DC connection type	MC4 (Max. 6 mm ²)
AC connection type	Plug and play connector (Max. 16 mm ²)
Compliance	EN 62109-1, EN 62109-2, EN 61000-3-11, EN 61000-3-12, IEC 61727, IEC 62116, VDE0126-1-1/4105, AS 4777.2, IEC 60068, IEC 61683, EN 50530, CEI 0-21,NB/T32004-2013, UNE 206007-1, G59/3, UTE C15-712-1
Grid support	Active & reactive power control and power ramp rate control
Type designation	SG15KTL-M-10 SG20KTL-M-10

*:Devices for Australia are not equipped with DC switches

This certificate of conformity is based on an evaluation of a sample of the above mentioned product. Technical Report and documentation are at the Licence Holder's disposal. This is to certify that the tested sample is in conformity with all provisions of Annex I of Council Directive 2014/30/EU. This certificate does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity. The holder of the certificate is authorized to use this certificate in connection with the EC declaration of conformity according to the same Directive.

Dear Shandong Cao,

We herewith confirm that a sample of the above mentioned technical equipment has been tested and was found to be in accordance with the relevant requirements.

Enclosed please find your Certificate of Conformity.

We appreciate your kind support and would like to offer our assistance and continuous services in the future.

With kind regards,

Weichun Li

TÜV Rheinland LGA Products GmbH - Tillystraße 2 - 90431 Nürnberg

SG15KTL-M/SG20KTL-M

Multi-MPPT String Inverter for 1000 V_{dc} System

High Yield

- Max. efficiency 98.6 %, European efficiency 98.3 %
- 1.1 overload capacity, 10% more yield under high irradiance
- Adapt to complex power grid, extend the grid-connected generation time
- Patented PID recovery function optional

Easy O&M

- 24kg, easy O&M
- Plug and play design, easy installation
- String current monitoring function for fast trouble shooting
- Fast commissioning, easy local and on-line monitoring

Safe and Reliable

- High power quality, no interference for electrical equipment
- Low radiation, compliance with household equipment standards
- High anti-corrosion with aluminum alloy die casting
- Built-in surge arresters and residual current protection

Input (DC)**SG15KTL-M****SG20KTL-M**

Max. PV input voltage	1100 V	
Min. PV input voltage / Start-up input voltage	200 V / 250 V	
Nominal PV input voltage	600 V	
MPP voltage range	200 V – 1000 V	
MPP voltage range for nominal power	380 V – 850 V	480 V – 850 V
No. of independent MPP inputs	2	
Max. number of PV strings per MPPT	2	
Max. PV input current	44 A (22 A / 22 A)	
Max. current for input connector	15 A	
Max. DC short-circuit current	60 A (30 A / 30 A)	

Output (AC)

AC output power	16500 VA @ 35 °C / 15000 kVA @ 45 °C	22000 VA @ 35 °C / 20000 kVA @ 45 °C
Max. AC output current	24.0 A	31.9 A
Nominal AC voltage	3 / N / PE, 230 / 400 V	
AC voltage range	270 V – 480 V	
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz	
THD	< 3 % (at nominal power)	
DC current injection	< 0.5 % I _n	
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging	
Feed-in phases / Connection phases	3 / 3	

Efficiency

Max. efficiency / Euro. efficiency	98.6 % / 98.3 %
------------------------------------	-----------------

Protection

DC reverse connection protection	Yes
AC short-circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
DC switch / AC switch	Yes* / No
PV string current monitoring	Yes
PID recovery function	Optional
Overvoltage protection	DC Type II / AC Type II

General Data

Dimensions (W*H*D)	370*485*210 mm
Weight	24 kg
Isolation method	Transformerless
Degree of protection	IP65
Night power consumption	< 1 W
Operating ambient temperature range	-25 to 60 °C (> 45 °C derating)
Allowable relative humidity range (non-condensing)	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	4000 m (> 3000 m derating)
Display / Communication	LED, Bluetooth + APP / RS485 (Optional: WiFi / Ethernet)
DC connection type	MC4 (Max. 6 mm ²)
AC connection type	Plug and play connector (Max. 16 mm ²)
Compliance	EN 62109-1, EN 62109-2, EN 61000-3-11, EN 61000-3-12, IEC 61727, IEC 62116, VDE0126-1-1/4105, AS 4777.2, IEC 60068, IEC 61683, EN 50530, CEI 0-21,NB/T32004-2013, UNE 206007-1, G59/3, UTE C15-712-1
Grid support	Active & reactive power control and power ramp rate control
Type designation	SG15KTL-M-10 SG20KTL-M-10

*:Devices for Australia are not equipped with DC switches

SG33CX/SG40CX/SG50CX **New**

SUNGROW
Clean power for all

Multi-MPPT String Inverter for 1000 Vdc System

HIGH YIELD

- Up to 5 MPPTs with max. efficiency 98.7%
- Compatible with bifacial module
- Built-in PID recovery function

SMART O&M

- Touch free commissioning and remote firmware upgrade
- Smart IV Curve diagnosis *
- Fuse free design with smart string current monitoring

SAVED INVESTMENT

- Compatible with Al and Cu AC cables
- DC 2 in 1 connection enabled
- Cable free communication with optional WLAN

PROVEN SAFETY

- IP66 and C5 anti-corrosion
- Type II SPD for both DC and AC, DC Type I+II Opt.
- Satisfied global safety and grid code

PV-Wechselrichter (Grid-connected PV Inverter)

Type Designation	:	SG30CX	SG33CX	SG40CX	SG50CX	11
Vmax PV[Vd.c.]	:	1100				
Isc PV[Ad.c.]	:	120	120	160	200	
MPP Voltage Range[Vd.c.]	:	200 - 1000				
Max.Input Current[Ad.c.]	:	78	78	104	130	
MPP Voltage Range for	:					
Rated Power[Vd.c.]	:	550 - 850				
Overvoltage Category(OVC)	:	II for PV				
Rated Output Voltage[Va.c.]	:	3/N/PE, AC 230/400V				
Rated Output Frequency[Hz]	:	50/60				
Rated Output Power[kW]	:	29.9	33	40	50	
Max. Output Current[Aa.c.]	:	43.16	55.2	66.9	83.6	
Power Factor	:	0.80 leading, 0.80 lagging				
Overvoltage Category(OVC)	:	III for AC Mains

ANLAGE (Appendix): 1.0

Dem Zertifikat liegt unsere Prüf- und Zertifizierungsordnung zugrunde und es bestätigt die Konformität des Produktes mit den oben genannten Standards und Prüfgrundlagen. Zusätzliche Anforderungen in Ländern, in denen das Produkt in Verkehr gebracht werden soll, müssen zusätzlich betrachtet werden. Die Herstellung des zertifizierten Produktes wird überwacht.

This certificate is based on our Testing and Certification Regulation and states the conformity of the product with the standards and testing requirements as indicated above. Any additional requirements in countries where the product is going to be marketed have to be considered additionally. The manufacturing of the certified product is subject to surveillance.

SG110CX New

Multi-MPPT String Inverter for 1000 Vdc System

High Yield

- 9 MPPTs with max. efficiency 98.7%
- Compatible with bifacial module
- Built-in PID recovery function

Smart O&M

- Touch free commissioning and remote firmware upgrade
- Online IV curve scan and diagnosis
- Fuse free design with smart string current monitoring

Low Cost

- Compatible with Al and Cu AC cables
- DC 2 in 1 connection enabled
- Q at night function

Proven Safety

- IP66 and C5 protection
- Type II SPD for both DC and AC
- Compliant with global safety and grid code

Circuit Diagram

Efficiency Curve

© 2019 Sungrow Power Supply Co., Ltd. All rights reserved.
 Subject to change without notice. Version 1.1

Input (DC)**SG110CX**

Max. PV input voltage	1100 V
Min. PV input voltage / Startup input voltage	200 V / 250 V
Nominal PV input voltage	585 V
MPP voltage range	200 – 1000 V
MPP voltage range for nominal power	550V – 850 V
No. of independent MPP inputs	9
Max. number of PV strings per MPPT	2
Max. PV input current	26 A * 9
Max. current for input connector	30 A
Max. DC short-circuit current	40 A * 9

Output (AC)

AC output power	110 kVA @ 45 °C / 100 kVA @ 50 °C
Max. AC output current	158.8 A
Nominal AC voltage	3 / N / PE, 400 V
AC voltage range	320 – 460 V
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz
THD	< 3 % (at nominal power)
DC current injection	< 0.5 % In
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging
Feed-in phases / connection phases	3 / 3

Efficiency

Max. efficiency / Euro. efficiency	98.7 % / 98.5 %
------------------------------------	-----------------

Protection

DC reverse connection protection	Yes
AC short circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
Ground fault monitoring	Yes
DC switch / AC switch	Yes / No
PV String current monitoring	Yes
Q at night function	Yes
PID recovery function	Optional
Overvoltage protection	DC Type II / AC Type II

General Data

Dimensions (W*H*D)	1051*660*362.5 mm
Weight	85 kg
Isolation method	Transformerless
Ingress protection rating	IP66
Night power consumption	< 2W
Operating ambient temperature range	-30 to 60 °C (> 50 °C derating)
Allowable relative humidity range (non-condensing)	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	4000 m (> 3000 m derating)
Display	LED, Bluetooth+APP
Communication	RS485 / Optional: Wi-Fi, Ethernet
DC connection type	MC4 (Max. 6 mm ²)
AC connection type	OT terminal (Max. 240 mm ²)
Compliance	IEC 62109, IEC 61727, IEC 62116, IEC 60068, IEC 61683, VDE-AR-N 4110:2018, VDE-AR-N 4120:2018, IEC 61000-6-3, EN 50438, AS/NZS 4777.2:2015, CEI 0-21, VDE 0126-1-1/A1 VFR 2014, UTE C15-712-1:2013, DEWA
Grid Support	Q at night function, LVRT, HVRT, active & reactive power control and power ramp rate control

APPENDIX: Certificate of Conformity

This is an Appendix to Certificate of Conformity Number: CN-PV-210038

Ratings & Principle Characteristics:

Maximum d.c. input voltage: 1100 Vdc
 Input voltage range: 160-1000Vdc
 MPPT voltage range (full Load): 280-850 V (for MID 10KTL3-X, MID 12KTL3-X); 420-850 V (for MID 10KTL3-X, MID 12KTL3-X, MID 15KTL3-X); 480-850 V (for MID 17KTL3-X, MID 20KTL3-X); 520-850 V (for MID 22KTL3-X, MID 25KTL3-X);
 Max. input current: 2×27A (for the models except MID 25KTL3-X), 27/40.5A (for MID 25KTL3-X)
 PV Isc: 2×33.8A (for the models except MID 25KTL3-X), 33.8/50.7A (for MID 25KTL3-X)
 Nominal output voltage: 3W/N/PE 230V/400Vac
 Max. output current: 16.1A (for MID 10KTL3-X); 19.3A (for MID 12KTL3-X); 24.2A (for MID 15KTL3-X); 27.4A (for MID 17KTL3-X); 31.9 A (for MID 20KTL3-X); 35.5A (for MID 22KTL3-X); 40.2 A (for MID 25KTL3-X)
 Nominal frequency: 50/60 Hz
 Max. output power: 10000W (for MID 10KTL3-X); 12000W (for MID 12KTL3-X); 15000W (for MID 15KTL3-X); 17000W (for MID 17KTL3-X); 20000W (for MID 20KTL3-X); 22000W (for MID 22KTL3-X); 25000W (for MID 25KTL3-X)
 Max. apparent power: 11100VA (for MID 10KTL3-X); 13300VA (for MID 12KTL3-X); 16600VA (for MID 15KTL3-X); 18800VA (for MID 17KTL3-X); 22000VA (for MID 20KTL3-X); 24400VA (for MID 22KTL3-X); 27700VA (for MID 25KTL3-X)
 Power factor range: 0.8leading ~ 0.8lagging
 Safety level: Class I
 Ingress protection: IP65
 Operating temperature range: -25 ~ +60°C
 Software Version: TJ1.0

This Certificate is for the exclusive use of Intertek's client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Certificate. Only the Client is authorized to permit copying or distribution of this Certificate. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek.

Certificate of Conformity

Certificate Number: CN-PV-210037

On the basis of the tests undertaken, the samples of the below product have been found to comply with the requirements of the referenced specifications /standards at the time the tests were carried out. It does not imply that Intertek has performed any surveillance or control of the manufacture. The manufacturer shall ensure that the manufacturing process assures compliance of the production units with the examined products mentioned in this certificate.

Applicant:	Shenzhen Growatt New Energy Co., Ltd. 2F and 3F, Building 4, Jiayu Company Industrial Park, Xibianling, Shangyu Village, Shiyan Street, Bao'an District, Shenzhen, Guangdong, China
Product:	PV Grid inverter
Ratings & Principle Characteristics:	See Appendix to Certificate of Conformity
Models:	MID 20KTL3-X, MID 25KTL3-X
Brand Name:	Growatt
Tested according to:	IEC 60068-2-1:2007, Environmental testing – Part 2-1: Tests- Test A: Cold IEC 60068-2-2:2007, Environmental testing – Part 2-2: Tests- Test B: Dry heat IEC 60068-2-14:2009, Environmental testing – Part 2-14: Tests- Test N: Change of temperature IEC 60068-2-30:2005, Environmental testing – Part 2-30: Tests- Test Db: Damp heat, cyclic (12h +12h cycle) IEC 61683: 1999, Photovoltaic systems – Power conditioners – Procedure for measuring efficiency
Certificate Issuing Office Name & Address:	Intertek Testing Services Ltd. Shanghai West Area, 2nd Floor, No. 707, Zhangyang Road China (Shanghai) Pilot Free Trade Zone, Shanghai, P. R. China

APPENDIX: Certificate of Conformity

This is an Appendix to Certificate of Conformity Number: CN-PV-210037

Ratings & Principle Characteristics:

Model	MID 20KTL3-X	MID 25KTL3-X
Max.PV voltage	1100Vdc	
PV voltage range	160V – 1000Vdc	
Max.input current	27A*2	27/40.5A
PV Isc	33.8A*2	33.8/50.7A
Nominal output voltage	3W/N/PE, 230/400Vac	
Nominal output Frequency	50/60Hz	
Max.output current	31.9A	40.2A
Max.output power	20.0KW	25.0KW
Max.apparent power	22.0KVA	27.7KVA
Power factor range	0.8Leading – 0.8 lagging	
Safety level	Class I	
Ingress Protection	IP 65	
Operation Ambient Temperature	-25°C - +60°C	
Software version	TJ1.0

APPENDIX: Certificate of Conformity

This is an Annex to Certificate of Conformity with certificate/Report Number(s): 180108053GZU-001. The issuing office is Intertek Legal Entity as above.

Ratings and principal characteristics

Maximum d.c. input voltage: 1100 Vdc

Input voltage range: 200-1000 Vdc

MPPT voltage range (full Load): 500-850 V (for MAX 50KTL3 LV); 520-850 V (for MAX 60KTL3 LV, MAX 60KTL3 MV); 600-850 V (for MAX 70KTL3 LV, MAX 70KTL3 MV); 685-850 V (for MAX 80KTL3 LV, MAX 80KTL3 MV);

Max. input current: 6×25A

Nominal output voltage: 3/N/PE230V/400Vac (for MAX 50KTL3 LV, MAX 60KTL3 LV, MAX 70KTL3 LV, MAX 80KTL3 LV); 3/PE 480Vac (for MAX 60KTL3 MV, MAX 70KTL3 MV, MAX 80KTL3 MV);

Max. output current: 3×81 A (for MAX 50KTL3 LV); 3×97A (for MAX 60KTL3 LV); 3×113 A (for MAX 70KTL3 LV); 3×129A (for MAX 80KTL3 LV); 3×81 A (for MAX 60KTL3 MV); 3×94 A (for MAX 70KTL3 MV); 3×107A (for MAX 80KTL3 MV)

Nominal frequency: 50 Hz

Max. output power: 55500VA (for MAX 50KTL3 LV); 66600VA (for MAX 60KTL3 LV, MAX 60KTL3 MV); 77700VA (for MAX 70KTL3 LV, MAX 70KTL3 MV); 88800VA (for MAX 80KTL3 LV, MAX 80KTL3 MV);

Ingress protection: IP65

Operating temperature range: -25~+60°C

This Certificate is for the exclusive use of Intertek's client and is provided pursuant to the agreement between Intertek and its Client. This is an Appendix to Certificate of Conformity Number: CN-PV-210194

Ratings & Principle Characteristics:

Model	MOD 7000TL3-XH	MOD 8000TL3-XH	MOD 9000TL3-XH	MOD 10KTL3-XH
Max. PV voltage	1100Vdc			
PV voltage range	140 – 1000Vdc			
PV Isc	20A*2			
Max. input current	16A*2			
Max. output power	7000W	8000W	9000W	10000W
Max. apparent power	7700VA	8800VA	9900VA	11000VA
Nominal output voltage	3W/N/PE 230/400Vac			
Max. output current	11.7A	13.3A	15.0A	16.7A
Nominal output frequency	50/60 Hz			
Power factor range	0.8Leading ~ 0.8Lagging			
Safety level	Class I			
Ingress protection	IP66			
Operation ambient temperature	-25°C - +60°C			
Software version	DN 1.0			

This Certificate is for the exclusive use of Intertek's client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Certificate. Only the Client is authorized to permit copying or distribution of this Certificate. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek.

Solar inverter

PVS-10/12.5/15-TL

The PVS-10/12.5/15-TL is the new FIMER three-phase solution, ideal for the optimization of installation and operational costs in commercial and industrial PV plants.

From 10 to 15 kW

1196

String inverter PVS-10/12.5/15-TL

This new PVS string inverter family, with power ratings of up to 33 kW, has been designed with the objective to maximize the ROI in commercial and industrial applications such as rooftop plants, carports and trackers.

Ease of installation and maintenance

The compact design of the product allows savings on installation costs. The installation is quick and easy, without the need to open the front cover. Moreover, being fuse-free, this inverter guarantees further savings on maintenance costs and time, reducing on site interventions to a minimum.

Maximum flexibility and integration

The input voltage range and all DC-side specs as a whole allow for the greatest plant design flexibility within both new and existing installations. This new inverter family guarantees maximum integration with the latest PV technologies, including bifacial modules.

Advanced communication

Fast commissioning thanks to the Solar Inverters installer app which enable a quick multi-inverter installation, saving up to 70% commissioning time. The single string current monitoring allows to keep the status of the PV generator under control and to detect potential faults in real time. The built-in FIMER Export Limitation solution allows to comply with any power export constraints established by utilities, without any additional devices to be installed.

Integrated PID recovery function

Inverters equipped with PID (Potential Induced Degradation) recovery function are able to restore the optimal conditions of the PV module in

order to prevent performance losses which could be caused by the PID during standard operation. Such functionality allows to maintain the highest level of performance and to maximize the working life of the plant, hence, optimizing the return on investment.

Integrated Arc Fault Circuit Interrupter

The Integrated Arc Fault Circuit Interrupter allows to recognize and immediately interrupt the electric arcs which may occur on the PV system. Thanks to such functionality the inverter is able to offer a reliable fire prevention mechanism wherever required for roof mounted installations.

RSD compatibility

PVS-10/33 is tested for operation in PV systems equipped with Rapid Shutdown systems (RSD) and/or with I-V optimizers installed at module level (contact FIMER for a complete list of compatible systems).

Highlights

- Communication active during the night
- High DC/AC power oversizing capability
- Compact inverter suitable for vertical and horizontal installation
- Fuse-free design
- Installation on new and existing plants
- Maximum string voltage 1100 Vdc
- PID recovery function (optional)
- Commissioning through the Solar Inverters installer app
- Integrated Export Limitation function
- Single string current monitoring
- Arc fault circuit interrupter (optional)
- Energy communities ready

Block diagram PVS-10/12.5/15-TL

Technical data and types			
Type code	PVS-10-TL	PVS-12.5-TL	PVS-15-TL
Input side			
Absolute maximum DC input voltage ($V_{\text{max,abs}}$)	1100 V		
Start-up DC input voltage (V_{start})	250...500V (default 360V)		
Operating DC input voltage range ($V_{\text{dcmin}}...V_{\text{dcmax}}$)	200-1000 V		
Rated DC input voltage (V_{dcr})	620V		
Rated DC input power (P_{dcr})	10200 W	12760 W	15300 W
Number of independent MPPT	2		
Maximum photovoltaic power recommended ($P_{\text{PV, max}}$)	14500 Wp	18125 Wp	21750 Wp
Maximum DC input power for each MPPT ($P_{\text{MPPT, Tmax}}$)	7800W	8300W	10000W
MPPT input DC voltage range ($V_{\text{MPPTmin}} ... V_{\text{MPPTmax}}$) a P_{acr}	460-850V		
Maximum DC input current (I_{dcmax}) for each MPPT	2x17A	2x18A	2x22A
Maximum input short circuit current for each MPPT	30 A		
Number of DC input pairs for each MPPT	2		
DC connection type	PV quick fit connector		
Input protection			
Revers polarity protection	Yes, from limited current source		
Input over voltage protection for each MPPT	SPD Type II / Type I+II (optional)		
Isolation control	According to local standard		
Output side			
AC grid connection type	Three-phase (3W+PE or 3W+N+PE)		
Earthing system	TN-S, TN-C, TN-CS, TT	TN-S, TN-C, TN-CS, TT	TN-S, TN-C, TN-CS, TT
Rated AC power ($P_{\text{acr}} @\cos\varphi=1$)	10000 W	12500 W	15000 W
Maximum AC output power ($P_{\text{acmax}} @\cos\varphi=1$)	10000 W	12500 W	15000 W
Maximum apparent power (S_{max})	10000 VA	12500 VA	15000 VA
Maximum reactive power (Q_{max})	6000 VAR	7500 VAR	9000 VAR
Nominal power factor and adjustable range	> 0.995; 0.8...1 inductive/capacitive		
Rated AC output voltage (V_{acr})	380V, 400V ¹⁾		
Maximum AC output current ($I_{\text{ac,max}}$)	16 A	20 A	23 A
Rated output frequency (f_i)	50 Hz / 60 Hz		
Output frequency range ($f_{\text{min}}...f_{\text{max}}$)	47...53 Hz / 57...63 Hz ²⁾		
Total current harmonic distortion	<3%		
Maximum AC cable	16 mm² copper		
AC connection type	AC quick fit connector		
Output protection			
Anti-islanding protection	According to local standard		
Maximum external AC overcurrent protection	25 A	32 A	32 A
Output overvoltage protection	SPD Type II		
Operating performance			
Maximum efficiency (η_{max})	98,4%	98,5%	98,5%
Weighted efficiency (EURO)	98,1%	98,2%	98,2%
Communication			
Embedded communication interfaces	Double Ethernet port, WLAN, RS485 port		
Communication protocol	Modbus TCP Sunspec, Modbus RTU Sunspec		
User interface	LEDs, Web User Interface, Installer APP, Display (optional)		
Cloud services	Aurora Vision® Plant Management Platform, Rest API		
Advanced features	Embedded export limitation control (in combination with external meter), 24h self-consumption monitoring		

Technical data and types

Type code	PVS-10-TL	PVS-12.5-TL	PVS-15-TL
Environmental			
Ambient temperature range	-25...+60°C (-13...140 °F) with derating above 45 °C (113 °F)		
Relative humidity	4%... 100% with condensation		
Maximum operating altitude	4000 m (13123 ft) with derating above 2000 m (6561 ft)		
Physical			
Inverter type	Grid connected, double stage, transformerless		
Environmental protection rating	IP65		
Environmental classification	4K26 (IEC 60721-3-4)		
Cooling	Natural cooling		
Dimension (H x W x D)	568,2 x 473,6 x 207		
Weight	29,6 Kg		
Mounting system	Mounting bracket		
Safety			
Marking	CE, RCM		
Safety and EMC standards	IEC/EN 62109-1, IEC/EN 62109-2, EN 61000-6-1, EN 61000-6-2, EN 61000-3-11, EN 61000-3-12 EN 62311, EN 301 489-1, EN 301 489-17, EN 300 328		
Certificates and compliance (check your sales channel for availability)	IEC 61683, EN 50530, IEC 62116, IEC 61727, AS/NZS 4777.2, VDE-AR-N 4105, VDE-AR-N 4110, VDE V 0124-100, DIN VDE V 0126-1-1, VFR 2019, UTE C15-712-1, CEI 0-21, CEI 0-16, PEA, MEA, EN 50438, EN 50549-1/-2, DRRG (DUBAI), CLC/TS 50549-1/-2, G98, G99, Synergrid C10/11, RD 413, RD 1565, RD244, P.O. 12.3, NTS 631, UNE 206006 IN (ITC-BT-40), PPDS-priloha, Denmark Type A/B, IRR-DCC-MV, ABNT NBR 16149, ABNT NBR 16150, NRS 097-2-1, SII, ISO/IEC Guide 67, Netherlands Type A, EIFS Type A, Ireland		
Available product versions			
Inverter equipped with SPD Type 2 on the DC and AC side	PVS-10-TL-SX	PVS-12.5-TL-SX	PVS-15-TL-SX
Inverter equipped with SPD Type 1+2 on the DC side and Type 2 on the AC side	PVS-10-TL-SY	PVS-12.5-TL-SY	PVS-15-TL-SY
Available ordering options			
PID recovery	Only for SX version	Only for SX version	Only for SX version
AFCI (Arc Fault Circuit Interrupter)	Only for SX version	Only for SX version	Only for SX version
Display	Only for SX version	Only for SX version	Only for SX version

1) The output voltage range may vary depending on specific country grid standards
2) The output frequency range may vary depending on specific country grid standards

Remarks:

- Designed and manufactured in Italy
- Features not specifically listed in the present data sheet are not included in the product

Solar inverter

TRIO-20.0/27.6-TL-OUTD

The TRIO 20.0/27.6 commercial inverter offers more flexibility and control to installers who have installations with varying configurations and orientations.

From 20.0 to 27.6 kW

1205

String inverter - TRIO-20.0/27.6-TL-OUTD

The dual input section featuring two independent Maximum Power Point Tracking (MPPT), allows optimal energy harvesting from two sub-arrays oriented in different directions.

The TRIO features a high speed and precise MPPT algorithm for real power tracking and improved energy harvesting.

High efficiency at all output levels

Flat efficiency curves ensure high efficiency at all output levels guaranteeing consistent and stable performance across the entire input voltage and output power range.

This device has an efficiency rating of up to 98.2%.

The very wide input voltage range makes the inverter suitable for installations with reduced string length.

Highlights

- True three-phase bridge topology for DC/AC output converter
- Transformerless topology
- Each inverter is set on specific grid codes which can be selected upon commissioning
- Detachable wiring box to allow an easy installation
- Wide input voltage range
- Integrated string combiner with different configurations which include DC and AC disconnect switch in compliance with international standards (-S2, -S1J, -S2J, -S2F and -S2X versions)
- Natural convection cooling for maximum reliability
- Outdoor enclosure for operation use under any environmental conditions
- Capability to connect external sensors for monitoring environmental conditions
- Availability of auxiliary DC output voltage (24 V, 300 mA)
- VSN300 Wifi Logger Card enables wireless access to Aurora Vision with DC input channel monitoring
- Lifetime free of charge access to Aurora Vision

TRIO-20.0/27.6-TL-OUTD string inverter block diagram

Technical data and types		
Type code	TRIO-20.0-TL-OUTD	TRIO-27.6-TL-OUTD
Input side		
Absolute maximum DC input voltage (V _{max,abs})	1000 V	
Start-up DC input voltage (V _{start})	430 V (adj. 250...500 V)	
Operating DC input voltage range (V _{dmin} ...V _{dmax})	0.7 x V _{start} ...950 V (min 200 V)	
Rated DC input voltage (V _{dcr})	620 V	
Rated DC input power (P _{dcr})	20750 W	28600 W
Number of independent MPPT	2	
Maximum DC input power for each MPPT (P _{MPPTmax})	12000 W	16000 W
DC input voltage range with parallel configuration of MPPT at P _{acr}	440...800 V	500...800 V
DC power limitation with parallel configuration of MPPT	Linear derating from max to null [800 V≤V _{MPPT} ≤950 V]	
DC power limitation for each MPPT with independent configuration of MPPT at P _{acr} , max unbalance example	12000 W [480 V≤V _{MPPT} ≤800 V] the other channel: P _{dcr} =12000 W [350 V≤V _{MPPT} ≤800 V]	16000 W [500 V≤V _{MPPT} ≤800 V] the other channel: P _{dcr} =16000 W [400 V≤V _{MPPT} ≤800 V]
Maximum DC input current (I _{dcm}) / for each MPPT (I _{MPPTmax})	50.0 A / 25.0 A	64.0 A / 32.0 A
Maximum input short circuit current for each MPPT	30.0 A	40.0 A
Number of DC input pairs for each MPPT	1 (4 in -S2X, -S2F, -S1J, -S2J versions)	1 (5 in -S2X and -S2F versions, 4 in -S1J and -S2J)
DC connection type	PV quick fit connector ¹⁾ / Screw terminal block on Standard and -S2 versions	
Input protection		
Reverse polarity protection	Yes, from limited current source	
Input over voltage protection for each MPPT - varistor	Yes, 4	
Input over voltage protection for each MPPT - plug In modular surge arrester (-S2X, -S1J and -S2J versions)	-S2X: Type 2; -S1J, -S1J: Type 1+2	
Photovoltaic array isolation control	According to local standard	
DC switch rating for each MPPT (version with DC switch)	40 A / 1000 V	
Fuse rating (versions with fuses)	15 A / 1000 V	
Output side		
AC grid connection type	Three-phase 3W+PE or 4W+PE	
Rated AC power (P _{acr} @cosφ=1)	20000 W	27600 W
Maximum AC output power (P _{acmax} @cosφ=1)	22000 W ²⁾	30000 W ³⁾
Maximum apparent power (S _{max})	22200 VA ⁴⁾	30670 VA ⁴⁾
Rated AC grid voltage (V _{ac,r})	400 V	
AC voltage range	320...480 V ⁵⁾	
Maximum AC output current (I _{ac,max})	33.0 A	45.0 A
Contributory fault current	35.0 A	46.0 A
Rated output frequency (f _r)	50 Hz / 60 Hz	
Output frequency range (f _{min} ...f _{max})	47...53 Hz / 57...63 Hz ⁶⁾	
Nominal power factor and adjustable range	> 0.995, adj. ± 0.9 with P _{acr} =20.0 kW, ± 0.8 with max 22.2 kVA	> 0.995, adj. ± 0.9 with P _{acr} =27.6 kW, ± 0.8 with max 30 kVA
Total current harmonic distortion	< 3%	
AC connection type	Screw terminal block, cable gland PG36	
Output protection		
Anti-islanding protection	According to local standard	
Maximum external AC overcurrent protection	50.0 A	63.0 A
Output overvoltage protection - varistor	4	
Output overvoltage protection - plug in modular surge arrester (-S2X version)	4 (Type 2)	
Operating performance		
Maximum efficiency (η _{max})	98.2%	
Weighted efficiency (EURO/CEC)	98.0% / 98.0%	
Feed in power threshold	40 W	
Night consumption	< 0.6 W	
Communication		
Wired local monitoring	PVI-USB-RS232_485 (opt.)	
Remote monitoring	VSN300 Wifi Logger Card (opt.), VSN700 Data Logger (opt.)	
Wireless local monitoring	VSN300 Wifi Logger Card (opt.)	
User interface	Graphic display

Product: **Grid-tied photovoltaic (PV) inverter**

Model: **TRIO-20.0-TL-OUTD-400**
TRIO-20.0-TL-OUTD-S2-400
TRIO-20.0-TL-OUTD-S2F-400
TRIO-20.0-TL-OUTD-S2X-400
TRIO-20.0-TL-OUTD-S1J-400
TRIO-20.0-TL-OUTD-S2J-400
TRIO-27.6-TL-OUTD-400
TRIO-27.6-TL-OUTD-S2-400
TRIO-27.6-TL-OUTD-S2F-400
TRIO-27.6-TL-OUTD-S2X-400
TRIO-27.6-TL-OUTD-S1J-400
TRIO-27.6-TL-OUTD-S2J-400

Use in accordance with regulations:

The inverter are tested according the IEC 61683:1999, EN 61683:2000, DIN EN 61683:2000 procedure for measuring efficiency.

Applied rules and standards:

IEC 61683:1999, EN 61683:2000, DIN EN 61683:2000

Photovoltaic systems – Power conditioners – Procedure for measuring efficiency

At the time of issue of this certificate the safety concept of an aforementioned representative product corresponds to the valid safety specifications for the specified use in accordance with regulations.

Report number: **14TH0151-IEC61683**

Certificate number: **U14-0286**

Date of issue: **2014-05-12**

Solar inverter

PVS-50/60-TL

The PVS-50/60-TL is FIMER's cloud connected three-phase string solution enabling cost efficient large decentralized photovoltaic systems for both commercial and utility applications.

From 50 to 60 kW

1220

String inverter - PVS-50/60-TL

The PVS string inverter family, with 3 independent MPPT and power ratings of up to 60 kW, has been designed with the objective to maximize the ROI in large systems with all the advantages of a decentralized configuration for both rooftop and ground-mounted installations.

Compact design

Thanks to technological choices aimed at optimizing installation times and costs, the product design features the power module and wiring box enclosed in a single compact chassis thus saving installation resources and costs.

The inverter comes in multiple versions also allowing the possibility to connect to third-party DC string combiners.

Ease of installation

The horizontal and vertical mounting possibility creates flexibility for both rooftop and ground mounted installations.

Moreover the cover is equipped with hinges and locks that are fast to open and reduce the risk of damaging the chassis and interior components when commissioning and performing maintenance actions.

Advanced cloud connected features

Standard wireless access from any mobile device makes the configuration of inverter and plant easier and faster. Improved user experience thanks to a built-in User Interface (UI) enables access to advanced inverter configuration settings.

The Installer for Solar Inverters mobile app and configuration wizard enable a quick multi-inverter installation, saving up to 70% commissioning time.

Fast system integration

Industry standard Modbus (RTU/TCP)/SUNSPEC protocol enables fast system integration. Two ethernet ports enable fast and future-proof communication for PV plants.

Plant portfolio integration

Monitoring your assets is made easy, as every inverter is capable to connect to Aurora Vision cloud platform to secure your assets and profitability in long term.

Highlights

- Up to 3 independent MPPT
- Two power ratings: 50 kW at 400 V_{ac} and 60 kW at 480 V_{ac}
- Horizontal and vertical installation
- Easy access to wiring box thanks to hinges and cam latches positioned on cover
- Power module and wiring box in a single compact chassis
- Wi-Fi interface for commissioning and configuration
- Reactive power management capability
- Remote monitoring and firmware upgrade via Aurora Vision cloud platform (logger free)
- Provides 10% extra power in case of limited ambient temperature
- Improved operating altitude. Can work up to 4000 mt.
- Built-in dynamic export limitation control algorithm

PVS-50/60-TL string inverter block diagram

Technical data and types		
Type code	PVS-50-TL	PVS-60-TL
Input side		
Absolute maximum DC input voltage ($V_{max,abs}$)	1000 V	
Start-up DC input voltage (V_{start})	420...700 V (Default 420 V)	420...700 V (Default 500 V)
Operating DC input voltage range ($V_{dcmin}...V_{dcmax}$)	0,7x V_{start} ...950 V (min 300 V)	0,7x V_{start} ...950 V (min 360 V)
Rated DC input voltage (V_{dcr})	610 Vdc	720 Vdc
Rated DC input power (P_{dcr})	52000 W	61800 W
Number of independent MPPT	3 (version SX and SX2) / 1 (standard version)	
Maximum DC input power for each MPPT ($P_{MPPTmax}$)	19300W@30°C / 17500W@45°C	23100W@30°C / 21000W@45°C
MPPT input DC voltage range ($V_{MPPTmin}$... $V_{MPPTmax}$) at P_{acr}	480-800 Vdc	570-800 Vdc
Maximum DC input current ($I_{dcm\max}$) for each MPPT	36 A	
Maximum input short circuit current for each MPPT	55 A (165 A in case of parallel MPPT)	
Number of DC input pairs for each MPPT	5 (SX and SX2 versions), 1 (standard version)	
DC connection type	Screw terminal block (Standard version) or PV quick fit connector ¹⁾ (SX and SX2 version)	
Input protection		
Reverse polarity protection	Yes, from limited current source	
Input over voltage protection for each MPPT	Type 2 / Type 1 + 2 (option)	
Photovoltaic array isolation control	According to local standard	
DC switch rating for each MPPT	75 A / 1000 V for each MPPT (SX and SX2 version)	
Fuse rating (version with fuses) / max fuse rating	15 A, 20 A, 25 A ²⁾	
Output side		
AC grid connection type	Three-phase (3W+PE or 3W+N+PE), grounded WYE system only	
Rated AC power (P_{acr} @cosf=1)	50000 W	60000 W
Maximum AC output power (P_{acmax} @cosf=1)	55000 W up to 30°C ³⁾	66000 W up to 30°C ³⁾
Maximum apparent power (S_{max})	55000 VA up to 30°C ³⁾	66000 VA up to 30°C ³⁾
Rated AC grid voltage ($V_{ac,r}$)	400 V	480 V
AC voltage range	320...480 V ³⁾	384...571 V ⁴⁾
Maximum AC output current ($I_{ac,max}$)	80 A	
Contributory fault current	92 A	
Rated output frequency (f_r)	50 Hz / 60 Hz	
Output frequency range ($f_{min}...f_{max}$)	47...53 Hz / 57...63 Hz ⁵⁾	
Nominal power factor and adjustable range	> 0.995; 0...1 inductive/capacitive with maximum Sn	
Total current harmonic distortion	<3%	
Maximum AC cable	95mm2 copper or stranded aluminum	
AC connection type	Screw terminal block, cable gland (admitted cable diameter 25...44mm)	
Output protection		
Anti-islanding protection	According to local standard	
Maximum external AC overcurrent protection	100 A	
Output overvoltage protection	Type 2	
Operating performance		
Maximum efficiency (η_{max})	98.4%	98.6%
Euro efficiency	98.2%	98.4%
Communication		
Embedded communication interfaces	3x RS-485, 2X Ethernet (RJ45), WLAN (IEEE802.11 b/g/n @ 2.4 GHz)	
Communication protocol	Modbus RTU / TCP (Sunspec compliant); Aurora Protocol	
Remote monitoring services	Standard level access to Aurora Vision monitoring portal	
Advanced features	Integrated Web User Interface; Embedded logging and direct transferring of data to Cloud	

Technical data and types

Type code	PVS-50-TL	PVS-60-TL
Environmental		
Ambient temperature range	-25...+60°C (-13...140 °F) with derating above 45 °C (113 °F) with derating above 45 °C (113 °F)	
Relative humidity	4%... 100% condensing	
Sound pressure level, typical	75 dB(A) @1 m	
Maximum operating altitude	4000 m (13123 ft) with derating above 2000 m / 6561 ft	
Physical		
Environmental protection rating	IP65	
Cooling	Forced air	
Dimension (H x W x D)	750 mm x 1100 mm x 257 mm / 29.5" x 43.3" x 10.12"	
Weight	70 kg / 154 lbs (SX version)	
Mounting system	Single mounting bracket	
Safety		
Marking	CE	
Safety and EMC standard	IEC/EN 62109-1, IEC/EN 62109-2, EN 61000-6-2, EN 61000-6-3, EN 61000-3-11, EN 61000-3-12 EN 62311, EN 301 489-1, EN 301 489-17, EN 300 328	
Grid standard (check your sales channel for availability)	CEI 0-21, CEI 0-16, DIN V VDE V 0126-1-1, VDE-AR-N 4105, G59/3, DRRG/DEWA, EN 50438, RD 1565, RD 413, UTE C15-7-712-1 P.O. 12.3, AS/NZS 4777.3, BDEW, NRS-097-2-1, MEA, PEA, IEC 61727, ISO/IEC Guide 67 (System 5) IEC 61683, VFR-2014, IEC 62116, Synergrid C10/11, IRR-DCC-MV, CLC-TS-50549-1/-2, G99, EN 50549-1/-2	
Available product versions		
Input connections with terminal blocks + surge arrester Type 2 in both DC and AC sides	PVS-50-TL	PVS-60-TL
15 quick Input connections + fuses (single pole) + DC switch + surge arresters Type 2 in both DC and AC sides	PVS-50-TL-SX	PVS-60-TL-SX
15 quick Input connections + fuses (both poles) + DC switch + surge arresters Type 2 in both DC and AC sides	PVS-50-TL-SX2	PVS-60-TL-SX2
Available options		
SPD Type 1 + 2 on the DC side	Only for SX2 version	Only for SX2 version
Display	For all versions	For all versions
Additional plug-in		
PVS-50/60-GROUNDING KIT	Available	Available

- 1) Please refer to the document “String inverters – Product manual appendix” available at www.fimer.com for information on the quick-fit connector brand and model used in the inverter.
- 2) 25 A fuses can be used with a limited number of inputs, only up to 3 per channel. The inverter equipped with the desired fuse size can be ordered through dedicated part.
- 3) Due to country specific regulation this value can be automatically limited to the rated value (50kW for PVS-50-TL, 60kW for PVS-60-TL). This limitation

- can also be set manually through the integrated Web User Interface.
- 4) The AC voltage range may vary depending on specific country grid standards.
- 5) The Frequency range may vary depending on specific country grid standards.

Remarks:

- Designed and manufactured in Italy
- Features not specifically listed in the present data sheet are not included in the product

C E R T I F I C A T E

of Conformity

Registration No.: AK 60132736 0001

Report No.: 28111530 007

Holder: Power - One Italy S.p.A.
Via San Giorgio 642
52028 Terranuova Bracciolini AR
Italia

Product: Electrical Equipment
Solar grid tied inverter

Identification: Trademark: ABB
Models: PVS-50-TL(-S) (-SX) (-SX2)
PVS-60-TL(-S) (-SX) (-SX2)

Tested acc. to: EN 62116:2014
IEC 62116:2014

The certificate of conformity refers to the above mentioned product. This is to certify that the specimen is in conformity with the assessment requirement mentioned above. This certificate does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity.

Certificate

Registration No.: AK 60147533 0001

Page 1/1

Report No.: 28111830 031

License Holder:

Power-One Italy S.p.A.
Via S. Giorgio, 642
52028 Terranuova Bracciolini (AR)
Italy

Product:

Solar Grid Tied Inverter

Trademark:

ABB

Model:

PVS-50-TL(-S)(-SX)(-SX2)
PVS-60-TL(-S)(-SX)(-SX2)

Manufacturing Plant(s) *:

Power-One Italy S.p.A.
Via S. Giorgio, 642
52028 Terranuova Bracciolini (AR)
Italy

Basis:

☒ **DIN V VDE V 0126-1-1: 2006 +A1:2012**

"Automatic disconnection device between a generator and the public low-voltage grid"

☒ **Factory Inspection**

To document the consistent quality of the product factory inspection are performed periodically.

Remarks:

Tested Acc. To: System 5 of ISO/IEC Guide 67:2004

This Certificate is valid up to 04.03.2025 conditioned to the positive result of yearly based inspection at Manufacturer's facility.

04.03.2020

Solar inverter

PVS-100/120-TL

The PVS-100/120-TL is FIMER's cloud connected three-phase string solution for cost efficient decentralized photovoltaic systems for both ground mounted and large commercial applications.

From 100 to 120 kW

1232

String inverter - PVS-100/120-TL

This platform, for extreme high power string inverters with power ratings up to 120 kW, maximizes the ROI for decentralized ground mounted and large rooftop applications. With up to six MPPT, energy harvesting is optimized even in shading situations.

Extreme power with high integration level

The extreme high power module up to 120 kW saves installation resources as less units are required.

Due to its compact size further savings are generated in logistics and in maintenance. Thanks to the integrated DC/AC disconnection, 24 string connections, fuses and surge protection no additional boxes are required.

Ease of installation

The horizontal and vertical mounting possibility creates flexibility for both ground mounted and rooftop installations. Covers are equipped with hinges and locks that are fast to open and reduce the risk of damaging the chassis and interior components when commissioning and performing maintenance actions.

Standard wireless access from any mobile device makes the configuration of inverter and plant easier and faster. Improved user experience thanks to a built in User Interface (UI) enables access to advanced inverter configuration settings.

The installer mobile APP, available for Android/iOS devices, further simplifies multi-inverter installations.

The design supports both copper and aluminum cabling even up to 185 mm² cross section to minimize the energy losses.

Fast system integration

Industry standard Modbus/SUNSPEC protocol enables fast system integration. Two ethernet ports enable fast and future proof communication for PV plants.

Plant portfolio integration

Monitoring your assets is made easy as every inverter is capable to connect to Aurora Vision cloud platform to secure your assets and profitability in long term.

Design flexibility and shade tolerance

Available in different versions, thanks to the double stage conversion topology and the modular design, PVS-100/120 guarantees maximum flexibility for the system design on rooftops or hilly ground. The separate and configurable wiring compartment, available with six MPPT as well as with two parallelable MPPT, allows the inverter to satisfy any plant condition and any customer need.

With this technological choice energy harvesting is optimized even in shading situations.

Highlights

- Up to 6 independent MPPT
- Transformerless inverter
- 120 kW for 480 Vac and 100 kW for 400 Vac
- Wi-Fi as standard for configuration
- Two ethernet ports for plant level communication
- Large set of specific grid codes available which can be selected directly in the field
- Double stage topology for a wide input range
- Both vertical and horizontal installation
- Separate wiring compartment for fast swap and replacement
- IP66 Environmental protection
- Maximum efficiency up to 98.9%

PVS-100/120-TL string inverter block diagram

String inverter - PVS-100/120-TL

Technical data and types				
Type code		PVS-100-TL		
Wiring Box version	SX, SX2	SY, SY2	Standard	S2
Input side				
Absolute maximum DC input voltage ($V_{max,abs}$)	1000 V			
Start-up DC input voltage (V_{start})	420 V (400...500 V)			
Operating DC input voltage range ($V_{dcmin}...V_{dcmax}$)	360...1000 V			
Rated DC input voltage (V_{dcr})	620 V			
Rated DC input power (P_{dcr})	102000 W			
Number of independent MPPT	6		2 (Parallelable)	
MPPT input DC voltage range at ($V_{MPPTmin}...V_{MPPTmax}$) at P_{acr}	480...850 V (symmetrical load)			
Maximum DC input power for each MPPT ($P_{MPPT,max}$)	21000 W [585 V≤VMPPT≤850 V]		63000 W [585 V≤VMPPT≤850 V]	
Maximum DC input current for each MPPT (I_{dcmax})	36 A		108 A	
Maximum input short circuit current (I_{scmax}) for each MPPT ¹⁾	50 A		150 A	
Number of DC input pairs for each MPPT	4		1	
DC connection type	PV quick fit connector ²⁾		4 x M40 cable glands (Ø 19...28mm) with M10 Cable lugs	
Input protection				
Reverse polarity protection	Yes, from limited current source			
Input over voltage protection for each MPPT-surge arrester with monitoring	Type II	Type I+II	Type II	
Photovoltaic array isolation control	Yes, acc. to IEC 62109-2			
Residual Current Monitoring Unit (leakage current protection)	Yes, acc. to IEC 62109-2			
DC switch rating for each MPPT	50 A-1000 V		Not present	150 A-1000V
Fuse rating (versions with fuses)	20 A / 1000 V ³⁾		No fuses inside	
Input current monitoring	Single string level (24ch.): SX2, SY2 / MPPT level: Standard, S2, SX, SY			
Output side				
AC Grid connection type	Three phase 3W+PE or 4W+PE			
Rated AC power (P_{acr} @cosφ=1)	100000 W			
Maximum AC output power (P_{acmax} @cosφ=1)	100000 W			
Maximum apparent power (S_{max})	100000 VA			
Rated Apparent Power (S_r)	100000 VA			
Rated AC grid voltage ($V_{ac,r}$)	400 V			
AC voltage range	320...480 V ⁴⁾			
Maximum AC output current ($I_{ac,max}$)	145 A			
Rated output current	145 A			
Output inrush current (peak and duration)	10% of I _{max} for 5 msec			
Rated output frequency (f _r)	50 Hz / 60 Hz			
Output frequency range ($f_{min}...f_{max}$)	45...55 Hz / 55...65 Hz ⁵⁾			
Nominal power factor and adjustable range	> 0.995, 0...1 inductive/capacitive with maximum S _{max}			
Total current harmonic distortion	< 3%			
Max DC Current Injection (% of I _n)	< 0.5%*I _n			
Maximum AC cable	185mm ² Aluminum and copper			
AC connection type	Provided bar for lug connections M10, single core cable glands 4xM40 and M25, multi core cable gland M63 as option			
Output protection				
Anti-islanding protection	According to local standard			
Maximum external AC overcurrent protection	225 A			
Output overvoltage protection - replaceable surge protection device	Type 2 with monitoring			
Operating performance				
Maximum efficiency (η_{max})	98.4%			
Weighted efficiency (EURO)	98.2%			
Communication				
Embedded communication interfaces	1x RS485, 2x Ethernet (RJ45), WLAN (IEEE802.11 b/g/n @ 2,4 GHz)			
User interface	4 LEDs, Web User Interface			
Communication protocol	Modbus RTU/TCP (Sunspec compliant)			
Commissioning tool	Web User Interface, Mobile APP/APP for plant level			
Remote monitoring services	Aurora Vision monitoring portal			
Advanced features	Embedded logging, direct telemetry data transferring to Aurora Vision			
Environmental				
Operating ambient temperature range	-25...+60°C / -13...140°F with derating above 40°C / 104°F			
Relative humidity	4%...100% condensing			
Sound pressure level, typical	68dB(A)@ 1m			
Maximum operating altitude without derating	2000 m / 6560 ft			

String inverter - PVS-100/120-TL

Technical data and types				
Type code		PVS-100-TL		
Wiring Box version	SX, SX2	SY, SY2	Standard	S2
Physical				
Environmental protection rating		IP 66 (IP54 for cooling section)		
Cooling		Forced air		
Dimension (H x W x D)		869x1086x419 mm / 34.2" x 42.7" x 16.5"		
Weight		70kg / 154 lbs for power module ; ~55kg / 121 lbs for wiring box Overall max 125 kg / 276 lbs		
Mounting system		Mounting bracket vertical & horizontal support		
Safety				
Isolation level		Transformer-less		
Marking		CE		
Safety and EMC standard		IEC/EN 62109-1, IEC/EN 62109-2, EN 61000-6-2, EN 61000-6-4		
Grid standard (check your sales channel for availability)		CEI 0-16, CEI 0-21, IEC 61727, IEC 62116, IEC 60068, IEC 61683, JORDAN IRR-DCC-MV, DRRG/ DEWA, Chile LV/MV, Belg C10-C11, EN50438 Generic +Ireland, EN50549-1/2, CLC-TS50549-1/2, AS/ NZS4777.2, UK G59/3, EREC G99-1, MEA, PEA, ISO-IEC Guide 67 (system 5), NRS 097-2-1, P.O. 12.3, ITC-BT-40, UNE 206006 IN, VDE-AR-N 4105, VDE-AR-N 4110, VDE-AR-N 4120, VDE V 0-126-1-1, VFR 2019, UTE C15-712-1, Taiwan		
Available products variants				
Inverter power module		PVS-100-TL-POWER MODULE		
Input with 24 quick fit connectors pairs + String fuses (both positive and negative pole) + DC disconnect switches + AC disconnect switch + AC and DC overvoltage surge arresters (Type II) + individual string monitoring (24 ch.)		WB -SX2-PVS-100-TL		
Input with 24 quick fit connectors pairs + String fuses (positive pole) + DC disconnect switches + AC and DC overvoltage surge arresters (Type II) + MPPT level input current monitoring (6 ch.)		WB -SX-PVS-100-TL		
Input with 24 quick fit connectors pairs + String fuses (both positive and negative pole) + DC disconnect switches + AC disconnect switch + AC and DC overvoltage surge arresters (Type II for AC and Type I+II for DC) + individual string monitoring (24 ch.)		WB -SY2-PVS-100-TL		
Input with 24 quick fit connectors pairs + String fuses (positive pole) + DC disconnect switches + AC and DC overvoltage surge arresters (Type II for AC and Type I+II for DC) + MPPT level input current monitoring (6 ch.)		WB -SY-PVS-100-TL		
Input with cable gland + DC disconnect switch + AC disconnect switch + AC and DC overvoltage surge arresters (Type II) + MPPT level input current monitoring		WB-S2-PVS-100-TL		
Input with cable gland + AC and DC overvoltage surge arresters (Type II) + MPPT level input current monitoring		WB-PVS-100-TL		
Optional available				
AC Plate, Single Core Cables		Plate with 5 individual AC cable glands: 4 x M40: Ø 19...28mm, 1 x M25: Ø 10...17mm		
AC Plate, Multi Core Cables		Plate with 2 individual AC cable glands: 1 x M63: Ø 37...53mm, 1 x M25: Ø 10...17mm		
PVS-100/120 Pre-Charge Board Kit		Night time operation with restart capability		
PVS-100/120 Grounding Kit ⁶⁾		Allow to connect the negative input pole to ground		

1) Maximum number of opening 5 under overloading
2) Please refer to the document "String inverters – Product manual appendix" available at www.fimer.com for information on the quick-fit connector brand and model used in the inverter
3) Maximum fuse size supported 20A. Additionally two strings input per MPPT supports 30A fuse size for connecting two strings per input
4) The AC voltage range may vary depending on country specific country grid standard
5) The Frequency range may vary depending on specific country grid standards

6) When grounding-kit is installed, Residual Current Monitoring does not fully operate. Inverter must be installed and operate in "restricted areas (access limited to qualified personnel)" according to IEC 62109-2

Remarks:
• **Designed and manufactured in Italy**
• **Features not specifically listed in the present data sheet are not included in the product**

HIGH EFFICIENCY MONOFACIAL PV MODULES

525-550W

MAXIMUM EFFICIENCY %

21.33

POSITIVE POWER TOLERANCE WP

0~+4.99

CELLS

M10 144

MODULE TECHNOLOGY

**HALF CUT & MICRO
GAP DESIGN**

WITH IMPROVED SHADE TOLERANCE

CYLINDRICAL TABBING WIRE increases cell absorption by enhancing scattering effects

Implementation of bypass diodes in split JB series-parallel connections enable the module to perform in **PARTIAL SHADOW CONDITIONS** with respect to full-cell module

HIGHER NUMBER OF BUSBARS make the PV modules less prone to loss in efficiency and increases tolerance to micro cracks

FIELD RELIABILITY is improved due to multiple contact points on the cell which lowers the cell stress during module fabrication

LCOE IS CUT BACK by using M10 size solar cell with adding more power output than lower size cell module

LOWER INTERNAL RESISTANCE boosts module power helping to achieve minimal power loss with respect to previous variant modules

APPLICATIONS

- On-grid large scale utility systems
- On-grid rooftop industrial and commercial systems
- Rooftop residential systems

MANUFACTURING UNIT :	Vikram Solar Limited B1000A,B1100C, INDOSPACE INDUSTRIAL PARK PANRUTI PVT LTD, SURVEY NO-2/A, SRIPERUMBUDUR TALUK, PANAIYUR VILLAGE, KANCHIPURAM TAMIL NADU,India-603302 madhab.das@vikramsolar.com 9830800701	
----------------------	--	---

Dear Sir,

1. This has reference to your request for inclusion of models of "**CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)**" as per **IS 14286 : 2010/ IEC 61215 : 2005, IS/IEC 61730 (Part 1) : 2004 & IS/IEC 61730 (Part 2) : 2004** in Licence No. **R-61002070** already granted to you which is valid upto 14-06-2023.
2. It is intimated that the additional Models as per details given below have been agreed to be included in your scope of Licence. **R-61002070 w.e.f. 21-11-2022:**

Product Category	CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)
Product Name	Crystalline Silicon Terrestrial Photovoltaic (PV) modules (Si wafer based)
IS No.	IS 14286 : 2010/ IEC 61215 : 2005, IS/IEC 61730 (Part 1) : 2004 & IS/IEC 61730 (Part 2) : 2004
Brand (As Declared by Manufacturer):	VIKRAMSOLAR
Inclusion of Additional Models (w.e.f. 21-11-2022)	SOMERA VSMH.54.395.05,SOMERA VSMH.54.400.05,SOMERA VSMH.54.405.05,SOMERA VSMH.54.410.05,SOMERA VSMH.60.450.05,SOMERA VSMH.60.455.05,SOMERA VSMH.60.460.05,SOMERA VSMH.72.540.05,SOMERA VSMH.72.545.05,SOMERA VSMH.72.550.05,SOMERA VSMHBB.54.395.05,SOMERA VSMHBB.54.400.05,SOMERA VSMHBB.54.405.05,SOMERA VSMHBB.54.410.05,SOMERA VSMHBB.60.450.05,SOMERA VSMHBB.60.455.05,SOMERA VSMHBB.60.460.05,SOMERA VSMHBB.72.540.05,SOMERA VSMHBB.72.545.05,SOMERA VSMHBB.72.550.05
Factory Address	B1000A,B1100C, INDOSPACE INDUSTRIAL PARK PANRUTI PVT LTD, SURVEY NO-2/A, SRIPERUMBUDUR TALUK, PANAIYUR VILLAGE, KANCHIPURAM TAMIL NADU,India-603302

3. Other terms and conditions of the licence shall remain same.
4. This letter is being issued with the approval of competent authority.

Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Sundeep Kumar)

Quasar

Half Cut Mono PERC Module

670Wp

Efficiency up to 21.60%

Credence Solar: As a Solar PV Modules manufacturer our commitment is simple: High-power Solar energy that is reliable and efficient. Our main priorities are Performance and reliability.

We are on a mission: To build a sustainable future, to fight the climate change and to reduce the carbon footprint. We want to shift the future into a better world and we want to show you how you can be a part of this mission. Join us in a journey to change the world.

We've only just begun & soon you'll find us Chasing The Sun..!

To achieve what we have dreamt, our modules are manufactured under one of the top class latest & most advanced state of art manufacturing facility with fully automatic line and having the latest testing facility located in Rajkot, Gujarat, India.

CS-QU545-110	34.33	28.58	13.82	14.70	395	18.90
CS-QU540-110	34.24	28.49	13.73	14.58	391	18.75
CS-QU535-110	34.21	28.40	13.65	14.54	388	18.55

*NMOT (Nominal Module Operating Temperature): Irradiance 800W/m², Ambient temperature 20°C, Spectrum at AM 1.5G, Wind speed at 1m/s. (NOCT is similar to NMOT)

Design Specifications:

Cell Type	210mm- 12BB Mono PERC Crystalline
Cell Configuration	110 (11 x 5 x 2) Half Cut Cells
Operating Temperature	-40°C to +85°C
Max. System Voltage	1500V DC
Max. Series Fuse Rating	30A (Recommended)
Application Class	A
Safety Class	C
Junction Box Type	Split JB IP68
Output Cable Length	300mm (1000mm/1200mm upon request)

Dimensional & Packing Details:

Dimensions	2384 x 1096 x 35mm
Weight	29.0 kg
Modules/ Pallet	30 Nos
19Ft Truck	300 Nos
40 Ft HQ Container	600 Nos

Temperature Coefficients:

Power (Pmax)	-0.38%/°C
Voltage (Voc)	-0.36%/°C
Current (Isc)	+0.07%/°C
NMOT/ NOCT	44±2 °C

Other Quasar Products:

MANUFACTURING UNIT :	CREDENCE SOLAR PANELS PRIVATE LIMITED PLOT NO 18 AND 19, SURVAY NO 142/2, NR. RAJKOT- JAMNAGAR HIGHWAY, PADADHARI, RAJKOT, GUJARAT, 360110 GUJARAT,India-360110 info.credencepanels@gmail.com 9537682287	
----------------------	--	---

Dear Sir,

1. This has reference to your request for inclusion of models of "**CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)**" as per **IS 14286 : 2010/ IEC 61215 : 2005, IS/IEC 61730 (Part 1) : 2004 & IS/IEC 61730 (Part 2) : 2004** in Licence No. **R-72006165** already granted to you which is valid upto 10-05-2024.
2. It is intimated that the additional Models as per details given below have been agreed to be included in your scope of Licence. **R-72006165 w.e.f. 01-09-2022:**

Product Category	CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)
Product Name	Crystalline Silicon Terrestrial Photovoltaic (PV) modules (Si wafer based)
IS No.	IS 14286 : 2010/ IEC 61215 : 2005, IS/IEC 61730 (Part 1) : 2004 & IS/IEC 61730 (Part 2) : 2004
Brand (As Declared by Manufacturer):	CREDENCE SOLAR PANELS PRIVATE LIMITED
Inclusion of Additional Models (w.e.f. 01-09-2022)	CS-QB315-70 , CS-QB320-70, CS-QB325-70, CS-QB330-70, CS-QB335-70, CS-QB340-70, CS-QB355-80, CS-QB360-80, CS-QB365-80, CS-QB370-80, CS-QB375-80, CS-QB380-80, CS-QB385-80, CS-QB390-80, CS-QB400-90, CS-QB405-90, CS-QB410-90, CS-QB415-90, CS-QB420-90, CS-QB425-90, CS-QB430-90, CS-QB435-90, CS-QB440-90, CS-QB445-100, CS-QB450-100, CS-QB455-100, CS-QB460-100, CS-QB465-100, CS-QB470-100, CS-QB475-100, CS-QB480-100, CS-QB485-100, CS-QB490-100, CS-QB490-110, CS-QB495-110, CS-QB500-110, CS-QB505-110, CS-QB510-110, CS-QB515-110, CS-QB520-110, CS-QB525-110, CS-QB530-110, CS-QB535-110, CS-QB535-120, CS-QB540-110, CS-QB540-120, CS-QB545-120, CS-QB550-120, CS-QB555-120, CS-QB560-120, CS-QB565-120, CS-QB570-120, CS-QB575-120, CS-QB580-120, CS-QB585-120, CS-QB590-120, CS-QB590-132, CS-QB595-132, CS-QB600-132, CS-QB605-132, CS-QB610-132, CS-QB615-132, CS-QB620-132, CS-QB625-132, CS-QB630-132, CS-QB635-132, CS-QB640-132, CS-QB645-132,CS-QB650-132
Factory Address	PLOT NO 18 AND 19, SURVAY NO 142/2, NR. RAJKOT- JAMNAGAR HIGHWAY, PADADHARI, RAJKOT, GUJARAT, 360110 GUJARAT,India-360110

3. Other terms and conditions of the licence shall remain same.
4. This letter is being issued with the approval of competent authority.
- Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Saksham Vasudev)

TEST CERTIFICATE

The product Photovoltaic Modules have been tested by HI Physix Laboratory India Pvt Ltd. and found to comply in accordance with the test procedure indicated in this report.

Report No.: HPLI/Test/2210045002

Issue Date: 08/12/2022

Applicant: Credence Solar Panels Pvt Ltd.

Plot No. 18 & 19, Survey No. 142/2, Near Rajkot- Jamnagar Highway,
Padadhari, Rajkot, Gujarat-360110

Tested Model: CS-QU650-132 (Representative Model)

Series Models: 132 Cut Cells: CS-QU590-132 to CS-QU645-132 (in steps of 5W)

120 Cut Cells: CS-QU535-120 to CS-QU590-120 (in steps of 5W)

110 Cut Cells: CS-QU490-110 to CS-QU540-110 (in steps of 5W)

100 Cut Cells: CS-QU445-100 to CS-QU490-100 (in steps of 5W)

90 Cut Cells: CS-QU400-90 to CS-QU440-90 (in steps of 5W)

80 Cut Cells: CS-QU355-80 to CS-QU390-80 (in steps of 5W)

70 Cut Cells: CS-QU315-70 to CS-QU340-70 (in steps of 5W)

Test Specification: IEC TS 62804-1:2015

Disclaimer: The test results presented in this report related only to the object tested and to the specific test carried out. This report shall not be reproduced, except in full, without the written approval of the issuing test laboratory.

DESERV® EXTREME 144 525 WP - 550 WP

*Module image for representation purpose only

SAFE

-  IP68 Junction box
-  10 years of product warranty
-  25 Years of power output warranty
-  1500 Vdc

RELIABLE

-  Extreme weather resilience
-  Windspeed - 2400 Pa, Snowload - 5400 Pa
-  Highly reliable anti-reflective coated glass

HIGH PERFORMANCE

-  PID resistant
-  Superlative performance in low light
-  High power density
-  Positive power tolerance

World-class products, Made in India

- **Smart:** High module efficiency with 144X half-cut Mono crystalline Bi-facial PERC Solar Cells
- **Modern:** Processed on state-of-the-art technology production lines
- **Dependable:** Use of highest quality raw material coupled with rigorous in-house testing
- **Versatile:** Suitable for Utility, Rooftop, and other general applications

SAFE

-  IP68 Junction box
-  10 YEARS 10 years of product warranty
-  25 YEARS 25 Years of power output warranty
-  1500 Vdc

RELIABLE

-  Extreme weather resilience
-  Windspeed - 2400 Pa, Snowload - 5400 Pa
-  Highly reliable anti-reflective coated glass

HIGH PERFORMANCE

-  PID resistant
-  Superlative performance in low light
-  High power density
-  Positive power tolerance

World-class products, Made in India

- **Smart:** High module efficiency with 144X half-cut Mono crystalline PERC Solar Cells
- **Modern:** Processed on state-of-the-art technology production lines
- **Dependable:** Use of highest quality raw material coupled with rigorous in-house testing
- **Versatile:** Suitable for Utility, Rooftop, and other general applications

Certifications:

- IEC 61215: 2016 (520-540 Wp)
- IEC 61730: 2016 (520-540 Wp)
- CAN/CSA: 61730 (520 Wp)

Elan Shine Bifacial PV Modules MBB P-Type PERC Half-cut

ASB-M10-144-AAA. (AAA=520-545) | 144 Cells | 520-545 Wp

Highlights

MBB cell technology - excellent anti-microcracking performance with more balanced interior stress; grid pattern current path, lower cost

Up to $70 \pm 5\%$ bifaciality Factor

Longer Product life and performance -0.45 year over year degradation with 30 years warranty on power

Least Degradation for LID, LeTID

Modules Made with Ga doped wafer, Smart Soldering, 10BB

Excellent PID Resistance

Higher generation due to bifacial technology

■ Adani bifacial module ■ Monofacial module

Warranty based on power

■ ADANI Linear warranty ■ STD Linear warranty

Technical Data

Multi irradiance curve Bifacial M10-144 HC cell Module

Dimensions in mm

Warranty and certifications

Product warranty**

12 years of product warranty

Performance warranty**

Power degradation < 2.0 % in first year
< 0.45 % / year in 2-30 years

Our Ref: Registration/CRS 2021-7347/R-72005460

Date:27-12-2021

Subject : Licence Document

Manufacturing Unit :	Mundra Solar Energy Limited SURVEY NO.180/P, APSEZ, VILLAGE TUNDA, MUNDRA, KACHCHH, GUJARAT GUJARAT,India-370435 vishanth.venkatesh@adani.com 9099991283	
----------------------	--	---

Dear Sir,

1.With reference to your Application, we are pleased to inform you that it has been decided to grant you licence as per details given below :

Product Category:	CRYSTALLINE SILICON TERRESTRIAL PHOTOVOLTAIC (PV) MODULES (Si wafer based)
Product Name:	Crystalline Silicon Terrestrial Photovoltaic (PV) modules (Si wafer based)
IS NO :	IS 14286 : 2010/ IEC 61215 : 2005, IS/IEC 61730 (PART 1) : 2004 & IS/IEC 61730 (PART 2) : 2004
Brand (As Declared by Manufacturer) :	Adani
Model :	[Brand -> Adani, Models -> ASB-M10-144-500, ASB-M10-144-501, ASB-M10-144-502, ASB-M10-144-503, ASB-M10-144-504, ASB-M10-144-505, ASB-M10-144-506, ASB-M10-144-507, ASB-M10-144-508, ASB-M10-144-509, ASB-M10-144-510, ASB-M10-144-511, ASB-M10-144-512, ASB-M10-144-513, ASB-M10-144-514, ASB-M10-144-515, ASB-M10-144-516, ASB-M10-144-517, ASB-M10-144-518, ASB-M10-144-519, ASB-M10-144-520, ASB-M10-144-521, ASB-M10-144-522, ASB-M10-144-523, ASB-M10-144-524, ASB-M10-144-525, ASB-M10-144-526, ASB-M10-144-527, ASB-M10-144-528, ASB-M10-144-529, ASB-M10-144-530, ASB-M10-144-531, ASB-M10-144-532, ASB-M10-144-533, ASB-M10-144-534, ASB-M10-144-535, ASB-M10-144-536, ASB-M10-144-537, ASB-M10-144-538, ASB-M10-144-539, ASB-M10-144-540, ASM-M10-144-500, ASM-M10-144-501, ASM-M10-144-502, ASM-M10-144-503, ASM-M10-144-504, ASM-M10-144-505, ASM-M10-144-506, ASM-M10-144-507, ASM-M10-144-508, ASM-M10-144-509, ASM-M10-144-510, ASM-M10-144-511, ASM-M10-144-512, ASM-M10-144-513, ASM-M10-144-514, ASM-M10-144-515, ASM-M10-144-516, ASM-M10-144-517, ASM-M10-144-518, ASM-M10-144-519, ASM-M10-144-520, ASM-M10-144-521, ASM-M10-144-522, ASM-M10-144-523, ASM-M10-144-524, ASM-M10-144-525, ASM-M10-144-526, ASM-M10-144-527, ASM-M10-144-528, ASM-M10-144-529, ASM-M10-144-530, ASM-M10-144-531, ASM-M10-144-532, ASM-M10-144-533, ASM-M10-144-534, ASM-M10-144-535, ASM-M10-144-536, ASM-M10-144-537, ASM-M10-144-538, ASM-M10-144-539, ASM-M10-144-540]
Factory Address :	SURVEY NO.180/P, APSEZ, VILLAGE TUNDA, MUNDRA, KACHCHH, GUJARAT GUJARAT,India-370435

2. The licence is being granted for your unit located at the address and for the brand and models mentioned at serial no 1 above.
3. The number assigned to this Licence is **R-72005460** which has been made operative from **27-12-2021** and is valid upto **26-12-2023** . The Licence Number should invariably be referred to in your future correspondence.
4. The rights and privileges under the licence shall not be exercised by any other factory / organization at any other location. This licence is not transferable. In the event of shifting of the manufacturing machinery from the registered premises to some other place use of the licence Number shall be stopped and BIS shall be informed.
5. The licensee shall comply with the provisions of the Act, rules and regulations framed thereunder and as amended from time to time.
6. The licensee shall follow the guidelines for the use of Standard Mark and labeling requirements as per Annex-I.
7. The licensee shall not use the licence in any manner which contravenes the provisions of Act, rules and regulations framed thereunder and as amended from time to time.
8. Upon expiry of validity, stoppage or suspension or cancellation of licence, you shall discontinue forthwith the self declaration of conformity to the relevant Indian Standard(s) and withdraw all promotional and advertising matter which contains any reference thereto.
9. For renewal of licence, the licensee shall have to apply to BIS three months in advance before expiration of the licence and application form for renewal is available on BIS website.
10. The licence is not transferable. Kindly acknowledge receipt of this letter.

Thanking you,

Yours faithfully,
(Avik Datta)
Scientist-C

Annex - 1

The guidelines for use of Standard Mark for Scheme-C are per 3(1) of BIS (Conformity Assessment) Regulations,2017 are given below:

- i) The monogram of the 'Standard Mark' consists of the pictorial representation, drawn in the exact style as indicated in the figure in the figure in Annexure I. Its photograpic reductin and enlargement is permitted.
- ii)The 'Standard Mark' can be displayed in single colour or multi-colour as per the details given below. The colour scheme for the Standard Mark to be used in multi colour shall be use as indicated below.
- iii) The licensee shall diplay the 'Standard Mark' on the article and/or the packaging, as the case may be, in a manner so as to be easily visible. It shall be legible, indelible and non-remobable. Further, the durability of marking shall be as per the provisions of the relevant Indian Standard, wherever applicable. The diplay of IS number, Registration number and words shall not be less than Arial forn size 6.
- iv) Any device with a integrated display scenen may present the Standard Mark electronically (e-labelling) in lieu of a physical presentation on the product.

Important Note: Prospective Bidders are requested to remain updated for any notices/amendments/clarifications etc. to the RFS document through the website www.anert.gov.in/www.etenders.kerala.gov.in. No separate notifications will be issued for such notices/amendments/clarification etc. in the print media or individually.

DISCLAIMER

1. Though adequate care has been taken while preparing the NIT document, the Bidders shall satisfy themselves that the document is complete in all respect. Intimation regarding any discrepancy shall be given to this office immediately. If no intimation is received from any Bidder within Ten (10) days from the date of notification of NIT / issuance of e-Tender documents, it shall be considered that the document is complete in all respect and has been received / acknowledged by the Bidder(s).
2. Agency for New and Renewable Energy Research and Technology (ANERT) reserves the right to modify, amend or supplement this document.
3. While this tender document has been prepared in good faith, neither ANERT nor their employees or advisors make any representation or warranty, express or implied, or accept any responsibility or liability, whatsoever, in respect of any statements or omissions herein, or the accuracy, completeness or reliability of information, and shall incur no liability under any law, statute, rules or regulations as to the accuracy, reliability or completeness of this document, even if any loss or damage is caused by any act or omission on their part.

GENERAL TERMS AND CONDITIONS FOR E-PROCUREMENT

This e-Tender is being published as the Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd. The tender is invited in two cover system from experienced manufacturers / EPC contractors through e-procurement portal of Government of Kerala (www.etenders.kerala.gov.in). Prospective bidders willing to participate in this tender shall necessarily register themselves with above mentioned e-procurement portal.

The tender timeline is available in the critical date section of this tender published in www.etenders.kerala.gov.in

1. ONLINE BIDDER REGISTRATION PROCESS:

- 1.1 Bidders should have a Class III or above Digital Signature Certificate (DSC) to be procured from any Registration Authorities (RA) under the Certifying Agency of India. Details of RAs will be available on www.cca.gov.in. Once, the DSC is obtained, bidders have to register on www.etenders.kerala.gov.in website for participating in this tender. Website registration is a one-time process without any registration fees. However, bidders have to procure DSC at their own cost.
- 1.2 Bidders may contact e-Procurement support desk of Kerala State IT Mission over telephone at 0471- 2577088, 2577188, 2577388 or 0484 – 2336006, 2332262 - through email: helpetender@gmail.com/etendershelp@kerala.gov.in for assistance in this regard

2. ONLINE TENDER PROCESS:

The tender process shall consist of the following stages:

- i. Downloading of tender document: Tender document will be available for free download on www.etenders.kerala.gov.in. However, tender document fees shall be payable at the time of bid submission as stipulated in this tender document.

- ii. Publishing of Corrigendum: All corrigenda shall be published on www.etenders.kerala.gov.in and shall not be available elsewhere.
- iii. Bid submission: Bidders have to submit their bids along with supporting documents to support their eligibility, as required in this tender document on www.etenders.kerala.gov.in. No manual submission of bid is allowed and manual bids shall not be accepted under any circumstances.
- iv. In case bidder encounters any technical issues pertaining to e-Procurement system while acting on the tender, computer screen shot of the error message with date & time stamp on the web-browser along with the query shall be e-mailed by the bidder to the help desk (**helpetender@gmail.com/etendershelp@kerala.gov.in**), for resolution of the problem. At the same time, problem must be intimated to the concerned Tender Inviting Authority via email.
- v. The time taken to ascertain, evaluate and suggest a solution for the problem reported by bidder may vary from case to case. Hence bidders are advised to submit the bid **at least 2 working days before the due date** and time of bid submission to avoid any last-minute issues that may come up.
- vi. Opening of Bid and Bidder short-listing: The single cover bids will be opened, evaluated and shortlisted as per the eligibility. Failure to submit the required documents online will attract disqualification. Price bids of the qualified bidders will open on the day to be intimated to all bidders and the work will be awarded.

3. DOCUMENTS COMPRISING BID:

- 3.1 The 2-cover bid shall contain the scanned copies of the following documents which every bidder has to upload:
 - i. The tender document duly signed and sealed downloaded from the website.
 - ii. Pre-Agreement in the prescribed format (Annexure A) on Govt. of Kerala stamp paper worth Rs. 200/-
 - iii. Copy of Registration Certificate of the bidder firm
 - iv. Copy of PAN card

- v. The bidder must have an experience of successful commissioning of at least 5 MW SPV Power Plants in India.
- vi. Documentary evidence to support the bidders experience in any completed or ongoing SPV contract with a Govt. Department / Govt. undertaking / PSU / Private sector for having a single plant capacity not less than 1 MW. The plant shall be in operation at least 3 months before the date of opening of this bid proposal.
- vii. Documents to prove the annual Turnover of the bidder (audited statement)
- viii. Certifications required for proving technical compliance
- ix. Summary of bidders Technical Information (Annexure B)
- x. Declaration by the Bidder (format as in Annexure C)
- xi. Declaration of relationship with ANERT employee (format as in Annexure D)
- xii. The Price Schedule as per BOQ in Excel format for this tender to be downloaded from e-tender website, duly digitally signed by the tenderer/authorized signatory of the tender.
- xiii. Bill of Material

3.2 The department doesn't take any responsibility for any technical snag or failure that has taken place during document upload.

3.3 The Bidder shall complete the Price bid as per format given for download along with this tender.

Note: The blank price bid should be downloaded and saved on bidder's computer without changing file-name otherwise price bid will not get uploaded. The bidder should fill in the details in the same file and upload the same back to the website.

4. TENDER DOCUMENT FEES AND EARNEST MONEY DEPOSIT (EMD)

4.1 The Bidder shall pay, a tender document fee of Rs. 17,850/- and Earnest Money Deposit or Bid Security or Bid Bond of Rs. 2,00,000/-. The Bid security is required to protect the purchaser against risk of Bidder's conduct, which would warrant the forfeiture of security.

4.2 Online Payment modes: The tender document fees and EMD can be paid in through e-Payment facility provided by the e-Procurement system. Bidders can make payment only via Internet banking facility

- 5.3 It is necessary to click on “Freeze bid” link/ icon to complete the process of bid submission otherwise the bid will not get submitted online and the same shall not be available for viewing/ opening during bid opening process.

6. VALIDITY

- 6.1 The tender offer shall be kept valid for acceptance for a period of 3 months from the date of opening of offers. The offers with lower validity period are liable for rejection.
- 6.2 Further, the tenderer may extend the validity of the Bids without altering the substance and prices of their Bid for further periods, if so required

7. DEVIATIONS

- 7.1 The offers of the bidders with Deviations in Commercial terms and Technical Terms of the Tender Document are liable for rejection.

8. BLACK LIST

- 8.1 All the intending tenderers shall agree that in the event of the documents furnished with the offer being found to be bogus or the documents contain false particulars, they shall be blacklisted for future tenders/ association with ANERT and EMD shall be forfeited against any losses incurred by ANERT.

9. BIDDER'S LOCATION

- 9.1 The tenderers are requested to furnish the exact location of their factories/godown with detailed postal address and pin code, telephone and fax nos. etc. in their tenders to arrange inspection by ANERT, if considered necessary.
- 9.2 All communication shall be made to the registered email of the bidder in the e-tendering systems and ANERT shall not be responsible for non-receipt or delay of any such communication.

CONDITIONS OF CONTRACT

10. GENERAL CONDITIONS

- 10.1 The tenders should be submitted online at www.etenders.kerala.gov.in.
- 10.2 The tenders should be as per the prescribed form which should be downloaded from the e-tender website. The cost of tender forms should be paid online, and once paid will not be refunded. Tender forms are not transferable. Tenders that are not in the prescribed form are liable to be rejected.
- 10.3 Intending tenderers should submit their tenders on or before the due date and time mentioned in the tender abstract. Late tender will not be accepted.
- 10.4 The rates quoted should be only in Indian currency. Tenders in any other currency are liable to rejection. The rates quoted should be for the unit specified in the schedule attached.
- 10.5 The tenderer shall submit a copy of PAN card of the authorised signatory along with tender.
- 10.6 Tenders subject to conditions will not be considered. They are liable to be rejected on that sole ground.
- 10.7 The tenders will be opened on the specified day and time in the office of the CEO, ANERT in the presence of such of those tenderer's representatives who may be present with proper authorisation issued by the tenderer.
- 10.8 Every tenderer should send along with his tender an Earnest Money Deposit. This may be paid online at the e-tenders website.
- 10.9 If any tenderer withdraws from his e-tender before the expiry of the period fixed for keeping the rates firm for acceptance, the earnest money if any, deposited by him, will be forfeited.
- 10.10 The final acceptance/rejection of the tenders rests entirely with CEO, ANERT who do not bind themselves to accept the lowest or any tender.
- 10.11 In the case of materials of technical nature, the successful tenderer should be prepared to guarantee satisfactory performance for a period of guarantee under a definite penalty. Communication of acceptance of the e-tender normally constitutes a concluded contract. Nevertheless, the successful tenderer shall also

execute an agreement for the due fulfilment of the contract within the period to be specified in the letter of acceptance. The contractor shall have to pay all stamp duty, Lawyer's charges and other expenses incidental to the execution of the agreement. Failure to execute the agreement within the period specified will entail the penalties set out below:

- 10.11.1 The successful tenderer shall **a) deposit a sum @ 3% of the contract till the completion of Installation works. The deposit shall be in the form of a BG which shall be returned after COD (Commercial Operation Date).** There will be no exemption for MSE's in depositing this security amount. If the successful bidder fails to deposit the security and execute the agreement as stated above, the earnest money deposited by him will be forfeited to ANERT; and contract arranged elsewhere at the defaulter's risk and any loss incurred by ANERT on account of the purchase will be recovered from the defaulter who will however not be entitled to any gain accruing thereby.
- 10.11.2 In cases where a successful tenderer, after having made partial supplies fails to fulfil the contracts in full, all or any of the materials not supplied may at the discretion of the Purchasing Officer be purchased by means of another tender/quotation or by negotiation or from the next higher tenderer who had offered to supply already, and the loss if any caused to ANERT shall thereby together with such sums as may be fixed by ANERT towards damages be recovered from the defaulting tenderer.
- 10.12 Return the Security deposit shall, subject to the conditions specified herein to the contractor within three months after the expiration of the contract. But in the event of any dispute arising between ANERT and the contractor, ANERT shall be entitled to deduct out of the deposits or the balance thereof, until such dispute is determined the amount of such damages, costs, charges and expenses as may be claimed. The same may also be deducted from any other sum, which may be due at any time from ANERT to the contractor. In all cases where there are guarantee for the goods supplied, the security deposit will be released only after the expiry of the guarantee period.

(a) All payments to the contractors will be made by CEO ANERT in due course by NEFT transfer only

(b) All incidental expenses incurred by ANERT for making payments outside the State in which the claim arises shall be borne by the contractor.

10.13 The contractor shall not assign or make over the contract on the benefits or burdens thereof to any other person or body corporate. The contractor shall not underlet or sublet to any person or persons or body corporate the execution of the contract or any part thereof without the consent in writing of the purchasing officer who shall have absolute power to refuse such consent or to rescind such consent (if given) at any time if he is not satisfied with the manner in which the contract is being executed and no allowance or compensation shall be made to the contractor or the subcontractor upon such rescission. Provided always that if such consent be given at any time, the contractor shall not be relieved from any obligation, duty or responsibility under this contract.

10.14 In case the contractor becomes insolvent or goes into liquidation, or makes or proposes to make any assignment for the benefit of his creditors or proposes any composition with his creditors for the settlement of his debts, carries on his business or the contract under inspection or behalf of or his creditors or in case any receiving order(s) for the administration of his estate are made against him or in case the contractor shall commit any act of insolvency or in case in which under any clause or clauses any act of insolvency or in case in which under any clause(s) of this contract the contractor shall have rendered himself liable to damages amounting to the whole of his security deposits, the contract shall, thereupon, after notice given by the Purchasing Officer to the contractor, be determined and ANERT may complete the contract in such time and manner and by such persons as ANERT shall think fit. But such determination of the contract shall be without any prejudice to any right or remedy of ANERT against the contractor or his sureties in respect of any breach of contract committed by the contractor. All expenses and damages caused to ANERT by any breach of contract by the contractor shall be paid by the contractor to ANERT and may be recovered from him under the provisions of the Revenue Recovery Act in force in the State.

- 10.15 Any sum of money due and payable to the contractor (including security deposit returnable to him) under this contract may be appropriated by the CEO or any other person authorised by ANERT and set off against any claim of ANERT for the payment of a sum of money arising out of or under any other contract made by the contractor with ANERT or any other person authorised by ANERT. Any sum of money due and payable to the successful tenderer or contractor from ANERT shall be adjusted against any sum of money due to ANERT from him under any other contracts.
- 10.16 Every notice hereby required or authorised to be given may be either given to the contractor personally or left at his residence or last known place of abode or business, or may be handed over to his agent personally, or may be addressed to the contractor by post at his usual or last known place of abode or business and if so addressed and posted, shall be deemed to have been served on the contractor on the date on which in the ordinary course of post, a letter so addressed and posted would reach his place of abode or business.
- 10.17 The tenderer shall undertake the installation and commissioning of the system according to the standards and specification.
- 10.18 No representation for enhancement of rate once accepted will be considered.
- 10.19 Special conditions, if any, of the tenderers attached with the tenders will not be applicable to the contract unless they are expressly accepted in writing by the purchaser.
- 10.20 The tenderer should send along with this tender an agreement executed and signed in Kerala Stamp Paper of value Rs.200/-. A specimen form of agreement is given as Annexure A to this tender. Tenders without the agreement in stamped paper will be rejected outright.
- 10.21 Conditions in the technical document, technical specifications and special conditions of this tender document would override these general conditions, wherever applicable.
- 10.22 ANERT, by notice sent to the Supplier, may terminate the contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination be for ANERT's convenience, the extent to which performance of the

Supplier under the contract is terminated, and the date upon which such termination becomes effective.

- 10.23 The E-tender shall be opened at the time and date announced in the tender notice, and the price bid will be evaluated as intimated vide auto generated email only.
- 10.24 In case any difference or dispute arises in connection with the contract, all legal proceedings relating to the matter shall be instituted in the Court within whose jurisdiction the CEO, ANERT voluntarily resides.
- 10.25 The Courts situated at the place where the headquarters of ANERT is situated viz, Thiruvananthapuram alone will have jurisdiction to entertain civil suits and all other legal pertaining to this contract.

11. SPECIAL CONDITIONS

- 11.1 Each bidder should submit only one (1) bid. Any bidder who submits/participates in more than one bid for the work shall be disqualified.
- 11.2 The tenders will be opened at the date and time advised in the Bidding Document. If the due date for receiving and opening the tender happens to be declared holiday, then the tender will be received and opened on the very next day, for which no prior intimation will be given.
- 11.3 If the bidder has NOT submitted the requisite EMD OR Agreement, OR if the price bid is not submitted along with the tender, such tenders will be summarily rejected.
- 11.4 During the tender evaluation, ANERT may seek more clarifications/details from any or all of the tenderers, if felt necessary.
- 11.5 The price bids of the tenderers, which submitted the required documents only will be opened and the L1 bidder will be awarded the work of supply and installation of items after fulfilling all the requirements.
- 11.6 If found essential, ANERT reserves the right, in the interest of completion of work within the time limit, to award portion/portions of the Work order to next higher bidders, called for negotiation in the increasing order of their price offers, if they agree to supply at the L1 price.

- 11.7 **The rate quoted should be all-inclusive including delivery of materials at the location to be specified, and the cost of materials and labour for the civil works, installation and commissioning, Warranties, Application fees, O&M charges, GST and all other expenses.**
- 11.8 The tender offer shall be kept valid for acceptance for a period of 6 months from the date of opening of bid. The offers with lower validity period are liable for rejection.
- 11.9 The evaluation of the price bid will be based on the grand total of all-inclusive amount quoted excluding GST.

13.29 **"Qualified Bidder"** shall mean the Bidder(s) who, after evaluation of their Techno Commercial Bid stand qualified for opening and evaluation of their Price Bid;

13.30 **"RFS"** shall mean Request for Selection (RFS)/Bid document/Tender document

13.31 **"Statutory Auditor"** shall mean the auditor of a Company appointed under the provisions of the Companies Act, 1956 or under the provisions of any other applicable governing law;

13.32 **"Successful Bidder(s) /Contractor/Project Developers(s)"** shall mean the Bidder(s) selected by Owner pursuant to this RFS for Implementation of Grid Connected Ground mounted Solar PV System as per the terms of the RFS Documents, and to whom an Allocation Letter has been issued;

13.33 **"Site"** shall mean the project location at the address mentioned below.

MILMA Ernakulam Dairy, Thrippunithura PO., Ernakulam-682 301

13.34 **"SNA"** shall mean State Nodal Agency, ANERT.

13.35 **"Tendered Capacity"** shall mean the Total aggregate capacity in MW proposed to be tendered by ANERT to the Successful Bidder through this bidding process as per terms and conditions specified therein;

13.36 **"Ultimate Parent"** shall mean a company, which owns at least more than fifty percent (51%) equity either directly or indirectly in the Parent and Affiliates.

13.37 **"Wp"** shall mean Watt Peak.

13.38 **2MWp** for the purpose of conversion in **kWp** shall be considered as 2000kWp.

b) INTERPRETATIONS

- i. Words comprising the singular shall include the plural & vice versa
- ii. An applicable law shall be construed as reference to such applicable law including its amendments or re-enactments from time to time.
- iii. A time of day shall save as otherwise provided in any agreement or document be construed as a reference to Indian Standard Time.
- iv. Different parts of this contract are to be taken as mutually explanatory and

supplementary to each other and if there is any differentiation between or among the parts of this contract, they shall be interpreted in a harmonious manner to give effect to each part.

- v. The table of contents and any headings or sub headings in the contract has been inserted for case of reference only & shall not affect the interpretation of this agreement.

INTRODUCTION, BID DETAILS AND INSTRUCTIONS TO THE BIDDERS

14. INTRODUCTION

- 14.1 ANERT, on behalf of Smart City Thiruvananthapuram Ltd, hereby invites interested companies to participate in the bidding process for the selection of Successful Bidder(s) for implementation of grid-connected Solar Photovoltaic Project under CAPEX model in Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram.
- 14.2 The Bidders are advised to read carefully all instructions and conditions appearing in this document and understand them fully. All information and documents required as per the bid document must be furnished. Failure to provide the information and / or documents as required may render the bid technically unacceptable.
- 14.3 The bidder shall be deemed to have examined the bid document, to have obtained his own information in all matters whatsoever that might affect the carrying out the works in line with the scope of work specified elsewhere in the document at the offered rates and to have satisfied himself to the sufficiency of his bid. The bidder shall be deemed to know the scope, nature and magnitude of the works and requirement of materials, equipment, tools and labour involved, wage structures and as to what all works, he has to complete in accordance with the bid documents irrespective of any defects, omissions or errors that may be found in the bid documents.

15. BID DETAILS

- 15.1 The bidding process under this RFS is for a 2 MWp cumulative capacity of SPV Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram. This includes 1.5 MWp installation to be done in Ground and 500 kWp in the Rooftop of various buildings within TTL campus.

BID QUALIFICATION REQUIREMENTS

16. ELIGIBILITY CRITERIA

16.1 General

- i. The Bidder should be either a body incorporated in India under the Companies Act, 1956 or 2013 including any amendment thereto, Sole Proprietorship, Partnership company and engaged in the business of Solar Power.
- ii. A copy of certificate of incorporation shall be furnished along with the bid in support of above.

16.2 Technical Eligibility Criteria:

The Bidder should have installed & commissioned Grid connected Solar PV Power Project having a capacity of single plant not less than 1 MW and cumulative capacity of above 5 MW, which should have been commissioned at least two months prior to Techno-Commercial Bid Opening date. The list of projects commissioned at least 2 months prior to Techno-Commercial Bid Opening date, indicating whether the project is grid connected, along with a copy of the Commissioning certificate and Work order / Contract / Agreement/ from the Client/Owner shall be submitted in support of Clause 16.2.

16.3 Financial eligibility criteria

The Bidder should have an Annual Turnover or Net worth as indicated below.

- i. The Minimum Average Annual turnover of Rupees 8 Crores in any two of the last 5 financial years preceding the Bid Deadline subject to the condition that the Bidder should at least have completed two financial years.

OR

- ii. Net worth equals to or greater than the value calculated at rate of Rs. 10 Crores. The Computation of Net worth shall be based on unconsolidated audited annual accounts of the last financial year immediately preceding the Bid Deadline. Share

premium can be included in the Net-worth calculation in case of listed companies in India only.

The formula of calculation of net-worth shall be as follows:

Net-worth = (Paid up share capital) + {(Free reserves - Share premium) + Share premium of listed companies}} - (Revaluation of reserves)- (Intangible assets) - (Miscellaneous expenditure to the extent not written off and carry forward losses).

For the purposes of meeting financial requirements, only unconsolidated audited annual accounts shall be used. Bidders shall furnish documentary evidence as per the Format - 5, duly certified by Authorized Signatory and the Statutory Auditor / Practising Chattered Accountant of the Bidding Company in support of their financial capability.

16.4 Bid submission by the bidder

16.4.1 The Bidder shall submit the information and/or documents as per the formats specified in Volume-IV.

16.4.2 Strict adherence to the formats wherever specified, is required. Wherever, information has been sought in specified formats, the Bidder shall refrain from referring to brochures /pamphlets. Non-adherence to formats and / or submission of incomplete information may be a ground for declaring the Bid as non-responsive. Each format has to be duly signed and stamped by the authorized signatory of the Bidder.

16.4.3 The Bidder shall furnish documentary evidence in support of meeting Eligibility Criteria as indicated in Clause no. 16.1, 16.2 and 16.3 to the satisfaction of ANERT. They shall also furnish unconsolidated/consolidated audited annual accounts in support of meeting financial requirement, which shall consist of balance sheet, profit and loss account, profit appropriation account, auditors report, etc., as the case may be of Bidding Company or Financially Evaluated Entity for any of the last three(3) financial years immediately preceding the Bid Deadline which are used by the bidder for the purpose of calculation of Annual Turnover or of last Financial Year in case of Net Worth.

16.4.4 In case the annual accounts for the latest financial year are not audited and therefore the bidder cannot make it available, the applicant shall give certificate to this effect from their CEOs. In such a case, the Applicant shall provide the Audited Annual Reports for 3 (Three) years preceding the year or from the date of incorporation if less than 3 years for which the Audited Annual Report is not being provided.

16.5 Amendments to RFS

16.5.1 At any time prior to the deadline for submission of Bids, ANERT may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, modify the RFS document by issuing clarification(s) and/or amendment(s).

16.5.2 The clarification(s) / amendment(s) (if any) may be notified on Kerala Tenders website www.etenders.kerala.gov.in at least Two (2) days before the proposed date of submission of the Bid. If any amendment is required to be notified within Two (2) days of the proposed date of submission of the Bid, the Bid Deadline may be extended for a suitable period.

16.5.3 ANERT will not bear any responsibility or liability arising out of non-receipt of the information regarding Amendments in time or otherwise. Bidders must check the website for any such amendment before submitting their Bid.

16.5.4 In case any amendment is notified after submission of the Bid (prior to the opening of Techno-Commercial Bid.

16.5.5 All the notices related to this Bid which are required to be publicized shall be uploaded on website www.etenders.kerala.gov.in

16.6 Bidding process

16.6.1 Bid formats

The Bid shall comprise of the following:

(A) Cover I - Techno-Commercial documents

i. Covering Letter as per the prescribed Format-1

- ii. Copy of PAN and TAN certificates of Bidding company
- iii. Original power of attorney issued by the Bidding Company in favour of the authorized person signing the Bid, in the form attached hereto as Format-2 or standard power of attorney in favour of authorized person signing the Bid. (Power of Attorney must be supplemented by Board Resolution to above effect for the company). However, ANERT may accept general Power of Attorney executed in favour of Authorised signatory of the Bidder, if it shall conclusively establish that the signatory has been authorized by the Board of CEOs to execute all documents on behalf of the Bidding Company.
- iv. General particulars of bidders as per Format-3
- v. Document in support of meeting Eligibility Criteria as per Clause no. 16.1 & 16.2.
- vi. Certificates of incorporation of Bidding company
- viii. Details for meeting Financial Eligibility Criteria as per Clause no. 16.3 along with documentary evidence for the same as per Format -4
- ix. Board resolution for Authorised signatory
- x. Signed and stamped Copy of RFS Documents including amendments & clarifications by Authorised signatory on each page.

(B) Cover II- Price bid

The Bidder shall inter-alia take into account the following while preparing and submitting the Price Bid digitally signed by the authorized signatory. The Bidder shall submit Price Bid in excel BoQ file downloaded from the e-tender website.

16.7 Validity of Bid

- 16.7.1 The bid and the Price Schedule included shall remain valid for a period of 3 months from the date of techno-commercial bid opening, with bidder having no right to withdraw, revoke or cancel his offer or unilaterally vary the offer submitted or any terms thereof. In case of the bidder revoking or cancelling his offer or varying any term & conditions in regard thereof or not accepting letter of allocation, ANERT shall forfeit the Bid Bond furnished by him.

16.7.2 In exceptional circumstances when letter of acceptance is not issued, ANERT may solicit the Bidder's consent to an extension of the period of validity. The request and the responses thereto shall be made in writing. The EMD provided shall also be suitably extended. A Bidder may refuse the request without forfeiting its Bid Bond. A Bidder granting the request will neither be required nor permitted to modify its Bid in any manner.

16.8 Cost of bidding

The bidder shall bear all the costs associated with the preparation and submission of his offer, and ANERT will in no case be responsible or liable for those costs, under any conditions. The Bidder shall not be entitled to claim any costs, charges and expenses of and incidental to or incurred by him through or in connection with his submission of bid even though ANERT may elect to modify / withdraw the invitation of Bid.

16.9 Performance Security / Performance Bank Guarantee (PBG)

- 16.9.1 Within 30 days from the date of issue of Allocation letter, Successful Bidder shall furnish the Performance Security @ 3% of the total contract value.
- 16.9.2 The Performance Security shall be denominated in Indian Rupees and shall be in one of the following forms:
 - a. A demand draft, or a bank guarantee in the format given in Format-4 from any nationalised bank.
 - b. Be confirmed for payment by the branch of the bank giving the bank guarantee at Thiruvananthapuram.
- 16.9.3 The PBG shall be forfeited as follows without prejudice to the Bidder being liable for any further consequential loss or damage incurred to ANERT, if the Successful Bidder is not able to commission the projects to the satisfaction of ANERT.
- 16.9.4 The Performance Security shall be valid for a minimum period of 6 months from the date of issue of LoA

16.10 Right to withdraw the RFS and to reject any bid

- 16.10.1 This RFS may be withdrawn or cancelled by ANERT at any time without assigning any reasons thereof. ANERT further reserves the right, at its

complete discretion, to reject any or all of the Bids without assigning any reasons whatsoever and without incurring any liability on any account.

16.10.2 ANERT reserve the right to interpret the Bid submitted by the Bidder in accordance with the provisions of the RFS and make its own judgment regarding the interpretation of the same. In this regard ANERT shall have no liability towards any Bidder and no Bidder shall have any recourse to ANERT with respect to the selection process. ANERT shall evaluate the Bids using the evaluation process specified in Volume - III, at its sole discretion. ANERT's decision in this regard shall be final and binding on the Bidders.

16.10.3 ANERT reserves its right to vary, modify, revise, amend or change any of the terms and conditions of the Bid before submission. The decision regarding acceptance or rejection of bid by ANERT will be final.

16.11 Zero Deviation

This is a ZERO Deviation Bidding Process. Bidder is to ensure compliance of all provisions of the Bid Document and submit their Bid accordingly. Tenders with any deviation to the bid conditions shall be liable for rejection.

16.12 Examination of Bid document

16.12.1 The Bidder is required to carefully examine the Technical Specification, terms and Conditions of Contract, and other details relating to supplies as given in the Bid Document.

16.12.2 The Bidder shall be deemed to have examined the bid document including the agreement/contract, to have obtained information on all matters whatsoever that might affect to execute the project activity and to have satisfied himself as to the adequacy of his bid. The bidder shall be deemed to have known the scope, nature and magnitude of the supplies and the requirements of material and labour involved etc. and as to all supplies he has to complete in accordance with the Bid document.

16.12.3 Bidder is advised to submit the bid on the basis of conditions stipulated in the Bid Document. Bidder's standard terms and conditions if any will not be considered. The cancellation / alteration / amendment / modification in Bid documents shall not be accepted by ANERT.

16.12.4 Bid not submitted as per the instructions to bidders is liable to be rejected. Bid shall confirm in all respects with requirements and conditions referred in this bid document.

SCOPE OF WORK

17. SCOPE OF WORKS

The scope includes the Supply, Installation, Testing and Commissioning of Rooftop On-Grid SPV power plants. All the necessary approvals from KSEBL/Electrical Inspectorate, feasibility study, necessary civil work, Mounting of Module Structures, PV Module Installation, Inverter Installation, DC/AC Cabling and interconnections, Installation of Lightning Arresters and Earthing System as per the standards, Arranging all the necessary inspections from KSEBL/Electrical Inspectorate/ANERT District Office as part of Pre-Commissioning, if any, Commissioning of the PV Power Plant along with warranty and Operation and Maintenance (O&M) of the project under CAPEX model for 10 years after Commercial Operation Date (COD) are coming under the scope of the bidder.

The total project comprises of 500 kWp Rooftop Solar Power plant and 1500 kWp Ground Mounted Solar Power plant. The successful bidder reserves the right to finalise the capacity being installed at these locations identified within the area available with due approval of ANERT/TTL authorities.

17.1 LOCATION DETAILS

The location of installation of the proposed 2 MWp Solar Power plant is at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala.

Site Name	Travancore Titanium Products Ltd., Kochuveli
Area available	Rooftop (Various buildings as listed below) and Ground of area 13000 Sqm.
District	Thiruvananthapuram
State	Kerala
Latitude	8°29'57.73"N
Longitude	76°54'5.13"E
Nearest National Highway	NH-66
Nearest Village/Town	Kochuveli

Nearest Railway Station	Kochuveli (3 km from the site)
Nearest Airport	Trivandrum International Airport (5 km from the site)
Nearest KSEB Substation	Within the Campus

The Proposed 1.5 MW Solar Power Plant is to be installed on the area marked below

The balance 500 kWp is to be installed at the Rooftops of Buildings listed below:

#	Name of Block / Building	Capacity (kW)
1	Canteen	200
2	Locker Room	75
3	CLSS	75
4	Lime Storage Area	50
5	Filter Press	50
6	Time Office	25
7	66 kV Substation	25
TOTAL		500

The bidders are to quote the per kW cost for the successful Supply, Testing, Installation and Commissioning of the Power plants as per the capacity mentioned for Rooftop as well as Ground mounted system. The full work will be awarded to the lowest bidder for the 2000 kWp. The cost of O&M will not form part of the selection of the L1 bidder.

17.2 ADDITIONAL WORKS

- i. The successful bidder is to borne the fee for KSEBL feasibility, Registration and all other expenses. The additional costs for site specific cabling works, earthing, mounting structure modifications, required civil works etc to meet the technical criteria as detailed in this document are under the scope of the bidder.
- ii. The scope of enhancing load, phase conversion, changing of CTs, PT, modification of Panel boards, extension of bus bars, replacement of metering panel boards etc wherever necessary is under the scope of the bidder. The rates for the same are to be considered in the bid for each site.
- iii. In case of installations to be made in sites with HT connection, the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items to be quoted along with the bid.
- iv. It is mandatory that the bidders are to visit the sites and quote the rates considering all the requirements as mentioned in this tender document. No requests for revision of rates will be entertained. In case, the successful bidder is not undertaking the specific work, the work will be cancelled and disciplinary proceedings will be initiated against the bidder and all payments due will be withheld. Hence, Bidders are requested to visit the site before quoting and the rate for successful commissioning in all aspects is to be quoted.
- v. **The rate quoted should be all inclusive including delivery of materials, the cost of materials and labour for the civil works, Installation and Commissioning, 10-year Warranty, fee for approval from the KSEBL, Electrical Inspectorate if any, Solar Meter, Remote monitoring Facility, Insurance, GST and all other expenses deemed necessary for the proper**

implementation of the conditions and specification as in-corporated in the tender.

- vi. The Operation and Maintenance of the Power plant for the whole period of warranty will be duty of the vendor. The rates for O&M per year need to be quoted in the BoQ file provided.**
- vii. The Component wise split up of the costs in percentage for each capacity is to be included as part of the technical bid (included as format 6).**
- viii. Any other work required for the successful commissioning of the power plant which are not mentioned in this document and are required as per prevailing laws & regulations in the country**

17.3 SUBMITTALS

On commencement of the Project, the Contractor shall submit the following to ANERT:

- a. Prior to the technical submittals, the contractor shall submit detailed baseline program and methodology indicating the proposed overall schedule for documentation such as calculations, shop/ working drawings, plan/ procedures and records. Submission of samples, process of fabrication / delivery to site storage yard for the approval of the Employer. Also, Contractor shall submit Method statements and Quality Assurance plan for each activity to be done and get approval from ANERT before commencing the work. Contractor shall maintain the necessary Quality and Quantity documentation. All the documents shall be submitted to Employer for their review and records.
- b. Detailed work procedures and schedules shall be submitted by contractor at least one month before start of work and shall get necessary approval from ANERT authorities and various entities. If required meeting shall be called to settle all the open issues. Contractor to ensure that all issues are closed one month prior to start of work.
- c. Complete fabrication drawings, materials list, cutting lists, bolt lists, welding schedules and QC schedules, based on the design drawing furnished to him and in accordance with the approved schedule. It is highlighted that structural steel

members, dimensions thereof indicated in tender drawings are tentative only, and may be modified during final design stage.

- d. Results of any tests, as and when conducted and as required by Employer.
- e. A detailed list of all constructional Plant & Equipment, such as cranes, derricks, winches, welding sets etc. their makes, model, present condition and location, available to the contractor and the ones he will employ on the job to maintain the progress of work in accordance with the contract.
- f. The total number of experienced personnel of each category, like fitters, welders, riggers etc., which he intends to deploy on the project.
- g. The contractor shall submit complete design calculations for any alternative sections proposed by him, for the approval of Employer and records of Owner.

18. PROJECT COST

18.1 The Project cost shall include all the costs related to above Scope of Work. Bidder shall quote for the entire facilities on a “single responsibility” basis such that the total Bid Price covers all the obligations mentioned in the Bidding Documents in respect of Design, Supply, Erection, Testing and Commissioning including Warranty, Operation & Maintenance for a period 10 years under CAPEX model, goods and services including spares required if any during O&M period. The Bidder has to take all permits, approvals and licenses, Insurance etc., provide training and such other items and services required to complete the scope of work mentioned above.

18.2 The Project cost shall remain firm and fixed and shall be binding on the Successful Bidder till completion of work. No escalation will be granted on any reason whatsoever. The bidder shall not be entitled to claim any additional charges, even though it may be necessary to extend the completion period for any reasons whatsoever.

18.3 The cost shall be inclusive of all duties and taxes, insurance etc. The prices quoted by the firm shall be complete in all respect and no price variation /adjustment shall be payable during the 10-year period.

18.4 The Operation & Maintenance of Solar Photovoltaic Power Plant would include wear, tear, overhauling, machine breakdown, insurance, and replacement of

defective modules, invertors / Power Conditioning Unit (PCU), spares, consumables & other parts for a period of 10 years.

- 18.5 The cost shall be specified in sanction letter based on Successful Bidder's quote for the project. The project cost shall be in accordance with all terms, conditions, specifications and other conditions of the Contract as accepted by ANERT and incorporated into the sanction letter.

19. INSURANCE

- 20.1 The Bidder shall be responsible and take an Insurance Policy for transit-cum-storage-cum-erection for all the materials to cover all risks and liabilities for supply of materials on site basis, storage of materials at site, erection, testing and commissioning. The bidder shall also take appropriate insurance during O&M period.
- 20.2 The Bidder shall also take insurance for Third Party Liability covering loss of human life, engineers and workmen and also covering the risks of damage to the third party/material/equipment/properties during execution of the Contract. Before commencement of the work, the Bidder will ensure that all its employees and representatives are covered by suitable insurance against any damage, loss, injury or death arising out of the execution of the work or in carrying out the Contract. Liquidation, Death, Bankruptcy etc., shall be the responsibility of bidder.

20. WARRANTIES AND GUARANTEES

The Bidder shall warrant that the goods supplied under this contract are new, unused, of the most recent or latest technology and incorporate all recent improvements in design and materials. The bidder shall provide system warrantee covering the rectification of any and all defects in the design of equipment, materials and workmanship including spare parts for a period of the 10-years from the date of commissioning. The successful bidder has to transfer all the Guarantees /Warrantees of the different components to the Owner of the project. The responsibility of operation of Warrantee and Guarantee clauses and Claims/ Settlement of issues arising out of said clauses shall be

joint responsibility of the Successful bidder and the owner of the project and ANERT will not be responsible in any way for any claims whatsoever on account of the above.

21. TYPE AND QUALITY OF MATERIALS AND WORKMANSHIP

- 22.1 The Design, Engineering, Manufacture, Supply, Installation, Testing and Performance of the equipment shall be in accordance with latest appropriate IEC/Indian Standards as detailed in the Vol- III (Technical specifications) of the bid document. Where appropriate Indian Standards and Codes are not available, other suitable standards and codes as approved by the MNRE / authorised Government agency shall be used.
- 22.2 The specifications of the components should meet the technical specifications mentioned in Volume III.
- 22.3 Any supplies which have not been specifically mentioned in this Contract but which are necessary for the design, engineering, manufacture, supply & performance or completeness of the project shall be provided by the Bidder without any extra cost and within the time schedule for efficient and smooth operation and maintenance of the SPV plant.

22. OPERATION & MAINTENANCE

- i. The bidder shall be responsible for Operation and Maintenance of the Solar PV system for the 10-year period, during which ANERT will monitor the project for effective performance in line with conditions specified elsewhere in the bid document. During this period, the bidder shall be responsible for supply of all spare parts as required from time to time for scheduled and preventive maintenance, major overhauling of the plant, replacement of defective modules, inverters, PCU's etc and maintaining log sheets for operation detail, deployment of staff for continuous operations and qualified engineer for supervision of O&M work, complaint logging & its attending.
- ii. If any Operation & Maintenance issues are not resolved within 7 days, then complaint may be raised to ANERT, pursuant to which a penalty as decided by CEO, ANERT will be imposed.

- iii. If the outage of the plant is more than 30 days continuously, then the 50% PBG amount shall be encashed by ANERT.
- iv. If the outage is exceedingly more than 60 days then complete PBG amount shall be encashed by Owner. (This will be applicable till 10 years of O&M as per the Scope of the RFS.) Legal proceedings and other as deemed necessary by CEO, ANERT will be initiated against the defaulted contractor.

23. METERING AND GRID CONNECTIVITY

Metering and grid connectivity of the solar PV system under this project would be the responsibility of the Bidder in accordance with the prevailing guidelines of the concerned DISCOM and / or CEA (if available by the time of implementation). The bidder need to connectivity and the entire responsibility lies with bidder only. This particular power plant will be connected to the 11 kV bus at the 66 kV Substation under Captive consumer category.

24. PLANT PERFORMANCE EVALUATION

The successful bidder shall be required to meet minimum guaranteed generation with Performance Ratio (PR) at the time of commissioning and related Capacity Utilization Factor (CUF) as per the GHI levels of the location during the O&M period. PR should be shown minimum of 75% at the time of inspection for initial commissioning acceptance. Minimum CUF shall not be less than 21% for a period of 10 years. The bidder should send the periodic plant output details to ANERT for ensuring the CUF. The PR will be measured at Inverter output level during peak radiation conditions.

25. PROGRESS REPORT

The bidder shall submit the progress report monthly to ANERT in Prescribed Proforma. ANERT will have the right to depute his/their representatives to ascertain the progress of contract at the premises of works of the bidder.

26. SCHEDULE OF SUPPLY

- i. The items should be delivered and installed at the sites of institution for which work order shall be given and specified by ANERT, under prior intimation and supervision of ANERT. The list of sites is listed below:
- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next bidder and penalty as decided by ANERT will be levied.

#	Capacity of Solar Plant	Material Delivery (Days)	Completion Period (Days)
1	2 MWp	25	45

- iii. For any delay in Installation and Commissioning beyond the period mentioned above, the ANERT will charge penalty of 0.5% of the order value/week or part thereof, subject to the cost not exceeding 10% of the total cost. Order will be cancelled if the delay of service is more than this time period and work will be issued to the second successful bidder
- iv. Bidders are to submit their quotes only after visiting the site and the details of additional works required for the successful commissioning of the power plant is to be mentioned in the technical bid. No additional amount for any works will be provided under any circumstance, even if the site requires additional work other than quoted by the bidder. Hence, special care must be taken while submitting the bids.
- v. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. The test certificates and reports of the inverters being used for the project must be submitted along with the bid. ANERT reserves the right to reject the bid based on the non-conformity of the inverter being supplied.
- vi. The successful bidder shall submit the detailed BoM and the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of the bidder.

- vii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.
- viii. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the PAC subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the PAC subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

27. PAYMENT

27.1 No advance payment will be given. All the documents submitted should be certified by the concerned personnel of ANERT.

27.2 The quotes for the Design, Supply, Installation & Commissioning including 10 years of warranty (EPC Part) to be provided by the bidders. The L1 bidder will be selected on the basis of their quotes on the EPC part with 10-year warranty and the O&M quote will not be part of bid evaluation.

27.3 The terms of payment shall be:

27.3.1 EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter etc) at the site/warehouse, a maximum of 60% of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of installation of the power plant, a maximum of 20% of the contract value can be released as Running Account Bills of min 10% of the

contract value. The supplier shall submit the invoice for the materials supplied and all documents related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The second part invoice can be raised only after submitting application for energization to the Electrical Inspectorate. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.

- iii. After the Inspection and Approval of the Electrical Inspectorate, 5% of the contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
- iv. The date of Energisation to the Grid by the DISCOM will be considered as the official Date of Commissioning (CoD) of the project and this will be treated as the commissioning of the system. On commissioning of the grid connected system, 5% of the contract value will be released after proving the Performance ratio (AC). The PR report as per standard is to be provided for release of the amount.
- v. The balance 10% shall be retained as performance security and will be released in five equal parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and last 2% after the 10 years of warranty. For releasing these payment, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. **The plant shall be handed over at the end of 10 years after commissioning after proving the performance ratio (AC).** This period will be considered only from the date of commissioning.
- vi. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

27.3.2 *Maintenance Payment*

- i. The amount shall be released on annual basis after completion of the period of the previous year. The start of maintenance period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

27.4 Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

28. PROJECT INSPECTION

The project progress will be monitored by ANERT and the projects will be inspected for quality at any time during commissioning or after the completion of the project either by officer(s) from ANERT or any authorized agency/ experts.

29. APPLICABLE LAW

The Contract shall be interpreted in accordance with the laws of the Union of India and in the Jurisdiction of Thiruvananthapuram, Kerala.

30. SETTLEMENT OF DISPUTE

29.1 If any dispute of any kind whatsoever arises between ANERT and Successful bidder in connection with or arising out of the contract including without prejudice to the generality of the foregoing, any question regarding the existence, validity or termination, the parties shall seek to resolve any such dispute or difference by mutual consent. If the same cannot be resolved, the courts in the jurisdiction will be approached and finalised by the appropriate court after legal proceedings.

31. FORCE MAJEURE

30.1 Notwithstanding the provisions of clauses contained in this RFS document, the contractor shall not be liable to forfeit (a) Security deposit for delay and (b)

termination of contract; if he is unable to fulfill his obligation under this contract due to force majeure conditions.

30.2 For purpose of this clause, "Force Majeure" means an event beyond the control of the contractor and not involving the contractor's fault or negligence and not foreseeable, either in its sovereign or contractual capacity. Such events may include but are not restricted to Acts of God, wars or revolutions, fires, floods, epidemics, quarantine restrictions and fright embargoes etc. Whether a "Force majeure" situation exists or not, shall be decided by ANERT and its decision shall be final and binding on the contractor and all other concerned.

30.3 In the event that the contractor is not able to perform his obligations under this contract on account of force majeure, he will be relieved of his obligations during the force majeure period. In the event that such force majeure extends beyond six months, ANERT has the right to terminate the contract in which case, the security deposit shall be refunded to him.

30.4 If a force majeure situation arises, the contractor shall notify ANERT in writing promptly, not later than 14 days from the date such situation arises. The contractor shall notify ANERT not later than 3 days of cessation of force majeure conditions. After examining the cases, ANERT shall decide and grant suitable additional time for the completion of the work, if required.

32. LANGUAGE

All documents, drawings, instructions, design data, calculations, operation, maintenance and safety manuals, reports, labels and any other data shall be in English Language. The contract agreement and all correspondence between ANERT and the bidder shall be in English language.

33. OTHER CONDITIONS

32.1 The Successful bidder shall not transfer, assign or sublet the work under this contract or any substantial part thereof to any other party without the prior consent of ANERT in writing.

32.2 The Successful bidder shall not display the photographs of the work and not take advantage through publicity of the work without written permission of ANERT.

32.3 The Successful bidder shall not make any other use of any of the documents or information of this contract, except for the purposes of performing the contract.

32.4 Successors and Assigns:

In case ANERT or Successful bidder may undergo any merger or amalgamation or a scheme of arrangement or similar re-organization & this contract is assigned to any entity (ies) partly or wholly, the contract shall be binding mutatis mutandis upon the successor entities & shall continue to remain valid with respect to obligation of the successor entities.

32.5 Severability:

It is stated that each paragraph, clause, sub-clause, schedule or annexure of this contract shall be deemed severable & in the event of the unenforceability of any paragraph, clause sub-clause, schedule or the remaining part of the paragraph, clause, sub-clause, schedule annexure & rest of the contract shall continue to be in full force & effect.

32.6 Counterparts

This contract may be executed in one or more counterparts, each of which shall be deemed an original & all of which collectively shall be deemed one of the same instruments.

32.7 Rights and Remedies under the contract only for the parties

This contract is not intended & shall not be construed to confer on any person other than the ANERT & Successful bidder hereto, any rights and / or remedies herein.

BID EVALUATION

34. BID EVALUATION

The evaluation process comprises the following four steps:

Step I - Responsiveness check of Techno Commercial Bid

Step II - Evaluation of Bidder's fulfilment of Eligibility Criteria as per Clause 16

Step III - Evaluation of Price Bid

Step IV - Successful Bidders(s) selection

I. Responsiveness check of Techno Commercial Bid

The Techno Commercial Bid submitted by Bidders shall be scrutinized to establish responsiveness to the requirements laid down in the RFS subject to Clause 16.1 and Clause 16.2. Any of the following may cause the Bid to be considered "non-responsive", at the sole discretion of ANERT:

- a. Bids that are incomplete, i.e. not accompanied by any of the applicable formats inter alia covering letter, power of attorney supported by a board resolution, applicable undertakings, format for disclosure, etc.;
- b. Bid not signed by authorized signatory and /or stamped in the manner indicated in this RFS;
- c. Material inconsistencies in the information /documents submitted by the Bidder, affecting the Eligibility Criteria;
- d. Information not submitted in the formats specified in this RFS;
- e. Bid being conditional in nature;
- f. Bid having Conflict of Interest;
- g. More than one Member of a Bidding Company using the credentials of the same Parent Company /Affiliate;
- h. Bidder delaying in submission of additional information or clarifications sought by ANERT as applicable;
- i. Bidder makes any misrepresentation.

Each Bid shall be checked for compliance with the submission requirements set forth in this RFS before the evaluation of Bidder's fulfilment of Eligibility Criteria is taken up. Clause 16.2 shall be used to check whether each Bidder meets the stipulated requirement.

33.1 Preliminary Examination

33.1.1 ANERT will examine the Bids to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed and stamped and whether the Bids are otherwise in order.

33.1.2 Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total Amount that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total amount shall be corrected. If there is a discrepancy between words and figures, the amount written in words will prevail.

II. Evaluation of Bidder's fulfilment of eligibility criteria

Evaluation of Bidder's Eligibility will be carried out based on the information furnished by the Bidder as per the prescribed Formats and related documentary evidence in support of meeting the Eligibility Criteria as specified in Clause 16.2. Non-availability of information and related documentary evidence for the satisfaction of Eligibility Criteria may cause the Bid to be non-responsive.

III. Evaluation of Price Bid

The Price Bid of only the Qualified Bidders shall be opened in presence of the representatives of such Qualified Bidders, who wish to be present, on a date as may be intimated by ANERT to the Bidders through ANERT. The evaluation of Price Bid shall be carried out based on the information furnished in the BoQ. The Price Bid submitted by the Bidders shall be scrutinized to ensure conformity with the RFS. Any Bid not meeting any of the requirements of this RFS may cause the Bid to be considered "non-responsive" at the sole decision of the ANERT.

IV. Successful Bidder(s) Selection

- i. Bids qualifying in Clause 16.2 shall only be evaluated in this stage.
- ii. The Price Bids of Qualified Bidders shall be ranked from the lowest to the highest. The lowest bidder will be declared as the successful bidder.
- iii. Letter of Acceptance (LOA): The Letter of Acceptance (LOA) shall be issued to Successful Bidder selected as per the provisions of this Clause 33
- iv. The Successful Bidder shall acknowledge the LoA and return duplicate copy with signature & stamp of the authorized signatory of the Successful Bidder to ANERT within Seven (7) days of issue of LoA.
- v. If the Successful Bidder, to whom the Letter of Acceptance has been issued does not fulfil any of the conditions specified in Bid document, ANERT reserves the right to annul/cancel the award of the Letter of Acceptance of the Successful Bidder and forfeit the Bid security.
- vi. ANERT at its own discretion, has the right to reject any or all the Bids without assigning any reason whatsoever, at its sole discretion

35. NOTIFICATION TO SUCCESSFUL BIDDERS

The name of Successful Bidder shall be notified indicating the awarded project price individually through letter of acceptance.

36. REQUIREMENT OF APPROVALS ON MAKES OF THE COMPONENTS:

The modules should be manufactured in India only. Rest of the components can be procured from any source. However, these items should meet the Technical specification and standards mentioned in RFS.

37. OPERATION OF THE SYSTEM DURING WEEKENDS AND GENERAL HOLIDAYS AND CALCULATION OF CUF:

During grid failure, the SPV system stops generating. Any instances of grid failure need to be mentioned in the monthly report and those instances need to be authorised by local DISCOM. Then the period will be excluded in calculation of CUF.

38. COMMERCIAL OPERATION DATE:

38.1 Document Submission for Issue Commissioning/ Completion Certificate:

The following documents will be deemed to form the completion documents:

- a. Project completion report from successful bidder as per ANERT format
- b. Project completion/satisfaction certificate from ANERT.

38.2 Commercial Operation Date

If the results of system acceptance testing indicate that the System is capable of generating electric energy (at full rated kWp) for 3 continuous days using such instruments and meters as have been installed for such purposes, then the power producer shall send a written notice to Employer to that effect, and the date of successful conducting such tests and injection of power at delivery point shall be the "Commercial Operation Date"

39. CORRUPT OR FRAUDULENT PRACTICES

The Successful Bidders/ Contractors should follow the highest standard of ethics during the execution of contract. In pursuance of this policy, ANERT:

39.1 defines, for the purposes of this provision, the terms set forth as follows:

- a. "corrupt practice" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the bid process or in contract execution; and
- b. "fraudulent practice" means a misrepresentation of facts in order to influence a bid process or the execution of a contract to the detriment of ANERT/Govt. scheme, and includes collusive practice among Bidders (prior to or after Bid submission) designed to establish Bid prices at artificial non-competitive levels and to deprive ANERT of the benefits of free and open competition;
- c. will declare a firm ineligible/debarred, either indefinitely or for a specific period of time, a GOVT contract if at any time it is found that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government/ANERT schemes.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 3: TECHNICAL SPECIFICATIONS

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

TECHNICAL SPECIFICATIONS

The proposed projects shall be commissioned as per the technical specifications given below.

40. DEFINITION

A Grid Tied Solar Photo Voltaic (SPV) power plant consists of SPV array, Module Mounting Structure, Power Conditioning Unit (PCU) consisting of Maximum Power Point Tracker (MPPT), Inverter, and Controls & Protections, interconnect cables and switches. PV Array is mounted on a suitable structure. Grid tied SPV system do not have battery backup and should be designed with necessary features to supplement the grid power during day time. Components and parts used in the SPV power plants including the PV modules, metallic structures, cables, junction box, switches, PCUs etc., should conform to the BIS or IEC or international specifications, wherever such specifications are available and applicable.

Solar PV system shall consist of following equipments/components.

- Solar PV modules consisting of required number of **Crystalline** PV modules.
- Grid interactive Power Conditioning Unit with Remote Monitoring System
- Mounting structures
- String Monitoring Units / Junction Boxes.
- Power evacuation system
- Earthing and lightening protections.
- IR/UV protected PVC Cables, pipes and accessories
- RTTU / Metering

The detailed list of certifications and standards to be followed are given in annexure – F

41. SYSTEM COMPONENTS - TECHNICAL COMPLIANCE FOR SYSTEM COMPONENTS

S/N	System Component	Capacity/ rating	Minimum Technical Compliance
1.	Solar panel (MONO PERC Half cut of capacity 600 Wp or above)	As per the required capacity	IS 14286 - Design Qualification and Type Approval for Crystalline Silicon Terrestrial Photovoltaic (PV) Modules IEC/IS 61730: Part I & II;
2.	Grid Tied Inverter (DC to AC ratio of 1.2 to be maintained at all sites)	As per the required capacity	IS 16221: Part 1 & 2 - Safety of Power Converters for use in Photovoltaic Power Systems IS 16169 - Test Procedure of Islanding Prevention Measures for Utility-Interconnected Photovoltaic Inverters
3.	Module Mounting Structure	As per the required capacity	IS 2062 - Hot Rolled Medium and High Tensile structural Steel
4.	Cables	As required	IS 4759 - Hot-dip Zinc Coatings on structural steel and other products IEC 60227 / IS 694 IEC 60502 / IS 1554 (Pt. I & II)
5.	Switches/ Circuit Breakers	As required	IEC 60947 part I, II, III / IS 60947 Part I, II, III
6.	Connectors		EN 50521
7.	Surge Protection Device		IEC 60364-5-53 / IS 15086-5
8.	Junction Boxes/Enclosures for Inverters/ Charge Controllers	As required	IP 54 (for outdoor) or IP 65 / IP 21(for indoor) as per IEC 529
9.	Energy Meter for Recording Solar Electricity Generated & Two-way meter for Distribution Licensee grid connection		As per CEA Regulations; IEC 60687/ IEC 62052-11 / IEC 62053-22 / IS 14697
10.	Lightning Protection	As required	As per IEC 62305 / IEC 62561
11.	Electrical Grounding (Earthing)	As required	As per IS 3043

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

1345

42. SOLAR PHOTOVOLTAIC MODULES:

42.1 The PV modules used should be made in India and should be from the ALMM list issued by MNRE from time to time of Mono PERC type having module capacity of 600Wp or above.

42.2 The PV modules used must qualify to the latest edition BIS standards for Crystalline Silicon Solar Cell Modules - IS 14286. In addition, the modules must conform to IEC 61730 Part-2- requirements for construction & Part 2 - requirements for testing, for safety qualification or equivalent IS.

- i. For the PV modules to be used in a highly corrosive atmosphere throughout their lifetime, they must qualify to IEC 61701/IS 61701
- ii. The total solar PV array capacity should not be less than 2 MWp and should comprise of solar crystalline modules of MONO PERC type of minimum 525 Wp and above wattage. Module capacity less than minimum 525 watts shall not be accepted. Inspection of testing of PV array will be conducted by the Tendering Authority including identification of panels ready for dispatch to be confirmed with details provided in RFID tag using RFID reader at site during FAT. The RFID details of each module shall be issued to the employer during FAT.
- iii. Protective devices against surges at the PV module shall be provided. Low voltage drop bypass diodes shall be provided.
- iv. PV modules must be tested and approved by one of the BIS approved test centers.
- v. The module frame shall be made of corrosion resistant materials, preferably having anodized aluminum.
- vi. The bidder shall carefully design & accommodate requisite numbers of the modules to achieve the rated power in his bid. ANERT shall allow only minor changes at the time of execution.
- vii. Other general requirement for the PV modules and subsystems shall be the Following:
 - a. The rated output power of any supplied module shall have tolerance of $\pm 3\%$.
 - b. The peak-power point voltage and the peak-power point current of any supplied module and/or any module string (series connected modules) shall

not vary by more than 2 (two) per cent from the respective arithmetic means for all modules and/or for all module strings, as the case may be.

- c. The module shall be provided with a junction box with either provision of external screw terminal connection or sealed type and with arrangement for provision of by-pass diode. The box shall have hinged, weather proof lid with captive screws and cable gland entry points or may be of sealed type and IP-65 rated.
- d. IV curves at STC should be provided by bidder.

42.3 Modules deployed must use a RF identification tag. The following information must be mentioned in the RFID used on each module (This can be inside or outside the laminate, but must be able to withstand harsh environmental conditions).

- a. Name of the manufacturer of the PV module
- b. Name of the manufacturer of Solar Cells.
- c. Month & year of the manufacture (separate for solar cells and modules)
- d. Country of origin (separately for solar cells and module)
- e. I-V curve for the module Wattage, I_m , V_m and FF for the module
- f. Unique Serial No and Model No of the module
- g. Date and year of obtaining BIS PV module qualification certificate.
- h. Name of the test lab issuing BIS certificate.
- i. Other relevant information on traceability of solar cells and module as per ISO 9001 and ISO 14001

42.4 Warranties:

A. Material Warranty:

- i. Material Warranty is defined as: The manufacturer should warrant the Solar Module(s) to be free from the defects and/or failures specified below for a period not less than five (10) years from the date of sale to the original customer ("Customer")
- ii. Defects and/or failures due to manufacturing
- iii. Defects and/or failures due to quality of materials

- iv. Non conformity to specifications due to faulty manufacturing and/or inspection processes. If the solar Module(s) fails to conform to this warranty, the manufacturer will repair or replace the solar module(s), at the Owners sole option

B. Performance Warranty:

- i. The predicted electrical degradation of power generated not more than 10% after ten years' period and not exceeding 20% of the minimum rated power over the 25-year period and of the full rated original output.

42.5 Use of advance cell technologies

- a. The Contractor shall try to maximize the output within the allocated area. The contractor is allowed to propose use of new and better technology. (Eg. Bifacial Modules)
- b. Additionally, the bidder at bidding stage may propose modern methods for maintenance & cleaning of the plant. Technology employing drone, cleaning methods without water, which will automate the maintenance and reduce the cost of maintenance may be proposed.
- c. Based on the technology employed, the contractor has to design, Electrical System Features, Architecture and Structural requirement and the same shall be implemented with the prior approval of ANERT. The tenderer at tender stage shall submit the details of the technology proposed. The tender submission shall also include the proposed modified structure also. The capacity mentioned in the tender is indicative and extra capacity over and above the indicative capacity mentioned will be permitted, based on the technology proposed and employed.

43. ARRAY STRUCTURE

43.1 For Ground Mounted:

- a. Hot dip galvanized MS as per specifications BIS 2062 or shall be cold formed light gauge structural steel sections with IS 811: 1987/IS 801: 1975 having galvanization thickness as per BIS 4759 -amended upto date; may be used for mounting the modules/ panels/arrays. Each structure should have angle of inclination as per the

site conditions to take maximum insolation. However, to accommodate more capacity the angle inclination may be reduced until the plant meets the specified performance ratio requirements.

- b. The Mounting structure shall be so designed to withstand the speed for the wind zone of the location where a PV system is proposed to be installed (min wind speed of 150 km/ hour). It may be ensured that the design has been certified by a recognized Lab/ Institution in this regard and submit wind loading calculation sheet to ANERT. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The array design shall be submitted with the STAAD structural design report for the materials used with relevant IS.
- c. Structural material shall be corrosion resistant and electrolytically compatible with the materials used in the module frame, its fasteners, nuts and bolts. Aluminium structures also can be used which can withstand the wind speed of respective wind zone. Necessary protection towards rusting need to be provided either by coating or anodization.
- d. The fasteners used should be made up of stainless steel. The structures shall be designed to allow easy replacement of any module. The array structure shall be so designed that it will occupy minimum space without sacrificing the output from the SPV panels
- e. Regarding civil structures, the bidder needs to take care of the load bearing capacity of the soil at the site of installation. The soil is fine sand and specific care is to be taken while designing the foundation. The foundation design must be submitted to ANERT duly certified by a chartered structural engineer before start of works.
- f. The minimum clearance of the structure from the ground level should be 200 mm for ground mounted installations
- g. The array will be installed on steel racking structures that are anchored in the ground. Racks will be laid out in parallel matrices allowing for individuals to access the area between the racks for cleaning and other maintenance needs. In between the row of solar panels sufficient gap need to be provided to avoid falling of shadow.

of previous row on the next row. Seismic factors for the site will be considered while making the design of the foundation.

43.2 For Ground Mounted:

- a. Photovoltaic arrays must be mounted on a stable, durable structure that can support the array and withstand wind, rain, and other adverse conditions. The modules will be fixed on structures with fixed arrangement.
- b. The module mounting structures shall have adequate strength and appropriate design suitable to the locations, which can withstand the load and high wind velocities. Stationary structures shall support PV modules at a given orientation, absorb and transfer the mechanical loads to the surface properly.
- c. Wherever required, suitable number of PV panel structures shall be provided. Structures shall be of flat-plate design using minimum size of C (75 x 40 x 5mm) or L (55 x 55 x 5mm) or I (60x 40x 4mm) sections or higher dimensions for respective sections.
- d. Each structure with fixed tilt should have a tilt angle as per the site conditions to take maximum insolation which will be approximately equal to the latitude of the location facing true South with a North - South orientation. The tilt angle can vary from 9 degree to 12 degree based on the location's latitude in Kerala
- e. The PV module mounting structure shall have a capacity to withstand a wind velocity of 150 km/hr unless specified for dedicated requirements
- f. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The PV array structure design shall be appropriate with a factor of safety of min 1.5.
- g. The materials used for structures shall be Hot dip Galvanized Mild Steel conformed to IS 2062:1992 or aluminium of suitable grade minimum alloy 6063 or better.
- h. The minimum thickness of galvanization for hot dip Galvanized Mild Steel should be at least 80 microns as per IS 4759. The galvanisation thickness will be checked during inspection and the vendor is to arrange the equipment needed for the same at the site.

- i. The Bolts, Nuts, fasteners, and clamps used for panel mounting shall be of Stainless-Steel SS 304.
- j. Structures shall be supplied complete with all members to be compatible for allowing easy installation at the site. Additional Structures/Frames for required for the installation of modules if any need to be provided by the bidder.
- k. The structures shall be designed to allow easy replacement of any module, repairing and cleaning of any module. No Welding is allowed on the mounting structure. Adequate spacing shall be provided between two panel frames and rows of panels to facilitate personnel protection, ease of installation, replacement, cleaning of panels and electrical maintenance
- l. Aluminium structures used shall be protected against rusting either by coating or anodization. Aluminium frames should be avoided for installations in coastal areas.
- m. The structure shall be designed to withstand operating environmental conditions for a period of minimum 25 years. And shall be free from corrosion while installation.
- n. Screw fasteners shall use existing mounting holes provided by module manufacturer. No additional holes shall be drilled on module frames
- o. The total load of the structure (when installed with PV modules) on the roof should be less than 60 kg/m².
- p. Minimum distance between the lower level of PV Module and the ground shall be 0.6m from the ground level.
- q. The PV Panel area shall be accessible for cleaning and for any repair work.
- r. Sufficient gap needs to be provided between the rows to avoid falling of shadow of one row on the next row. Seismic factors for the site will be considered while making the design of the foundation.
- s. Adequate spacing shall be provided between any two modules secured on PV panel for improved wind resistance.
- t. Installation of structure for solar PV mounting should not tamper with the water proofing of the roofs.

43.3 The Rooftop Structures maybe classified in three broad categories as follows (drawings at **Annexure-G**). The bidders are required to quote the rates for each separately in the financial bid:

i. Ballast structure

- a. The mounting structure must be Non-invasive ballast type and any sort of penetration of roof to be avoided.
- b. The minimum clearance of the structure from the roof level should be in between 70 - 150 mm to allow ventilation for cooling, also ease of cleaning and maintenance of panels as well as cleaning of terrace.
- c. The structures should be suitably loaded with reinforced concrete blocks of appropriate weight made out of M25 concrete mixture.

ii. Tin shed

- a. The structure design should be as per the slope of the tin shed.
- b. The inclination angle of structure can be done in two ways
 - b.1. Parallel to the tin shed (flat keeping zero-degree tiling angle), if the slope of shed in Proper south direction
 - b.2. With same tilt angle based on the slope of tin shed to get the maximum output.
- c. The minimum clearance of the lowest point from the tin shade should be more then 100mm.
- d. The base of structure should be connected on the Purlin of tin shed with the proper riveting. e. All structure member should be of minimum 2 mm thickness.

iii. RCC Elevated structure: It can be divided into further three categories:

A. Minimum Ground clearance (300MM – 1000 MM)

- a. The structure shall be designed to allow easy replacement of any module and shall be in line with site requirement. The gap between module should be minimum 30MM.
- b. Base Plate – Base plate thickness of the Structure should be 5MM for this segment.
- c. Column – Structure Column should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.

- d. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side (y-axis) and 40MM in flange side (x-axis).
- e. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
- f. Front/back bracing - The section for bracing part should be minimum 2MM thickness.
- g. Connection - The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- h. For single portrait structure the minimum ground clearance should be 500MM.

B. Medium Ground clearance (1000MM – 2000 MM)

- a. Base Plate - Base plate thickness of the Structure should be Minimum 6MM for this segment.
- b. Column - Structure Column should be minimum 2MM in Lip section / 3MM in C-Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- e. Front/back bracing - The section for bracing part should be minimum 2MM thickness.
- f. Connection - The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

C. Maximum Ground clearance (2000MM – 3000 MM)

- a. Base Plate – Base plate thickness of the Structure should be minimum 8 MM for this segment.
- b. Column – Structure Column thickness should be minimum 2.6MM in square hollow section (minimum 50x50) or rectangular hollow section (minimum 60x40) or 3MM in C-Channel section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 3MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

D. Super elevated structure (More than 3000 MM)

i. Base structure

- b. Base Plate – Base plate thickness of the Structure should be 10MM for this segment.
- c. Column – Structure Column minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40).
- d. Rafter - Structure Rafter minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40)

- e. Cross bracing – Bracing for the connection of rafter and column should be of minimum thickness of 4mm L-angle with the help of minimum bolt diameter of 10mm.

ii. Upper structure of super elevated structure

- a. Base Plate – Base plate thickness of the Structure should be minimum 5MM for this segment.
- b. Column – Structure Column should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- iii. If distance between two legs in X-Direction is more than 3M than sag angle/Bar should be provide for purlin to avoid deflection failure. The sag angle should be minimum 2MM thick, and bar should be minimum 12Dia.
- iv. Degree - The Module alignment and tilt angle shell be calculated to provide the maximum annual energy output. This shall be decided on the location of array installation
- v. Foundation – Foundation should be as per the roof condition; two types of the foundation can be done- either penetrating the roof or without penetrating the roof.
 - a) If penetration on the roof is allowed (based on the client requirement) then minimum 12MM diameter anchor fasteners with minimum length 100MM

be used with proper chipping. The minimum RCC size should be 400x400x300 cubic mm. Material grade of foundation should be minimum M20.

- b) If penetration on roof is not allowed, then foundation can be done with the help of 'J Bolt' (refer IS 5624 for foundation hardware). Proper Neto bond solution should be used to adhere the Foundation block with the RCC roof. Foundation J - bolt length should be minimum 12MM diameter and length should be minimum 300MM.

44. ARRAY JUNCTION BOXES (JBs)

- a. The junction boxes are to be provided in the PV array for termination of connecting cables. The J. Boxes (JBs) shall be made of GRP/FRP/Powder Coated Aluminum /cast aluminum alloy with full dust, water & vermin proof arrangement. All wires/cables must be terminated through cable lugs. The JBs shall be such that input & output termination can be made through suitable cable glands.
- b. Copper bus bars/terminal blocks housed in the junction box with suitable termination threads Conforming to IP65 standard and IEC 62208 Hinged door with EPDM rubber gasket to prevent water entry. Single / double compression cable glands, Provision for earthing the box must be provided.
- c. Each Junction Box shall have High quality Suitable Capacity Metal Oxide Varistors (MOVs) / SPDs, suitable Reverse Blocking Diodes. The Junction Boxes shall have suitable arrangement monitoring and disconnection for each of the groups. Each string combiner box/ junction box will have suitable Reverse Blocking Diodes of maximum DC blocking voltage of 600 / 1000V or as per the system requirement with suitable arrangement for its connecting.
- d. Suitable markings shall be provided on the bus bar for easy identification and the cable ferrules must be fitted at the cable termination points for identification
- e. The junction boxes/ enclosures should be IP 65(for outdoor)/ IP 54 (indoor) and as per IEC 529 specifications. The Junction boxes / string combiner boxes shall conform to IEC 60529 (Degrees of Protection provided by Enclosures (IP Code))

45. DC DISTRIBUTION BOARD:

- a. DC Distribution panel to receive the DC output from the array field. DC generated by the solar modules is transmitted through the appropriate cables from Array Yard to Control facility. DC bus & panel should be provided for the incoming DC supply from array yard. The panel should consist of adequate size.
- b. DC DPBs shall have sheet from enclosure of dust & vermin proof conform to IP 65 protection. The bus bars are made of copper of desired size. Suitable capacity MCBs/MCCB shall be provided for controlling the DC power output to the PCU along with necessary surge arrestors.

46. AC DISTRIBUTION PANEL BOARD:

- a. AC Distribution Panel Board (DPB) shall control the AC power from PCU/ inverter, and should have necessary surge arrestors. Output from the inverter shall be fed to the ACDB through 4 pole MCCB of suitable current rating and multifunction export solar meter.
- b. All switches and the circuit breakers, connectors should conform to IEC 60947, part I, II and III/ IS60947 part I, II and III.
- c. The changeover switches, cabling work should be undertaken by the bidder as part of the project.
- d. All the Panel's shall be metal clad, totally enclosed, rigid, floor mounted, air - insulated, cubical type suitable for operation on three phase / single phase, 415 or 230 volts, 50 Hz
- e. The panels shall be designed for minimum expected ambient temperature of 45 degrees Celsius, 80 percent humidity and dusty weather.
- f. All indoor panels will have protection of IP54 or better. All outdoor panels will have protection of IP65 or better.
- g. Should conform to Indian Electricity Act and rules (till last amendment).
- h. All the 415 AC or 230 volts' devices / equipment like bus support insulators, circuit breakers, SPDs, VTs etc., mounted inside the switchgear shall be suitable for

continuous operation and satisfactory performance under the following supply conditions

Variation in supply voltage +/- 10 %

Variation in supply frequency +/- 3 Hz

47. PCU/ARRAY SIZE RATIO:

- a. The combined wattage of all inverters should not be less than 80% of rated capacity of DC power of the plant under STC.
- b. Maximum power point tracker shall be integrated in the PCU/inverter to maximize energy drawn from the array.

48. PCU/ INVERTER:

The Power Conditioning Unit shall be String Inverter with power exporting facility to the Grid. The DC to AC ratio of 1.25 is to be maintained at all sites. (For eg. – For DC capacity of 100 kWp, the AC capacity of minimum 80 kW is to be maintained). Preferred Makes – Fronius / ABB / SMA

General Specifications:

48.1 All the Inverters should contain the following clear and indelible Marking Label & Warning Label as per IS16221 Part II, clause 5. The equipment shall, as a minimum, be permanently marked with:

- a. The name or trademark of the manufacturer or supplier.
- b. A model number, name or other means to identify the equipment.
- c. A serial number, code or other markings allowing identification of manufacturing location and the manufacturing batch or date within a three-month time period.
- d. Input voltage, type of voltage (A.C. or D.C.), frequency, and maximum continuous current for each input.
- e. Output voltage, type of voltage (A.C. or D.C.), frequency, maximum continuous current, and for A.C. outputs, either the power or power factor for each output.
- f. The Ingress Protection (IP) rating

- 48.2 The inverter output shall be 415 VAC, 50 Hz, 3 phase.
- 48.3 The inverter shall include appropriate self-protective and self-diagnostic feature to protect itself and the PV array from damage in the event of inverter component failure or from parameters beyond the inverter's safe operating range due to internal or external causes.
- 48.4 PCU shall have the dynamic and efficient MPPT algorithm behaviour which finds maximum power point even in low light conditions. The PCU Company should be able to display this feature.
- 48.5 The PCU shall be supplied with in-built advanced grid feed-in feature along with dynamic feed-in control considering self-consumption. The PCU shall also include control functions for optimum feed-in of reactive power and effective power. The amount of reactive power injection and absorption can be controlled depending upon under/over excited systems.
- 48.6 The PCU shall have a provision of external shutdown via remote signal separately with an in-built floating-point contact or similar option using any minimum interface which is to ensure the emergency stop function in the inverter
- 48.7 The PCU shall have a higher degree of ingress protection of IP 65 to handle robust environment conditions from dust and water ingress under complete outdoor installations.
- 48.8 The data logger should possess the feature of extracting the data externally with open protocols like Modbus TCP/RTU. The manufacturer should provide the Modbus register mapping file to utilise this feature
- 48.9 **The inverter shall have an efficient cooling concept with better power derating feature to handle higher temperatures and ensure the best efficiency. The inverter shall be able to provide full rated output power even at ambient temperatures of 50°C. The manufacturer to provide the power derating curves to demonstrate the same.**
- 48.10 The inverter shall be flexible in terms of the installation and should be capable for installation in a horizontal position facilitating easy installation for site specific requirements.

- 48.11 The inverter shall have an integrated feature of emergency stop to halt the inverter from operation considering safety scenarios
- 48.12 The PCU manufacturer should have an authorised service centre in Kerala. The details of the service centre along with the spare list must be submitted along with the bid.
- 48.13 **PCU should be able to respond smoothly to the voltage fluctuations on the low-tension grid via active & reactive power control/ support. The PCU should be able to respond separately to fulfil below mentioned:**
- 48.13.1 Finding out optimisation of the system**
- 48.13.2 Optimal power distribution on each phase**
- 48.13.3 Prevent PCU from unnecessary disconnections**
- 48.14 The PCU Company should have grid connected solar plants running in the country with inverters at least 7 years from the time of bidding to showcase the service reliability and long-term presence. Also, the PCU should have local presence in the county for at least last 5 years. The PCU manufacturer to provide details to authenticate the same.
- 48.15 The Technical Specification of On-Grid Inverters are summarized below:

Specifications of Inverters	
Parameters	Detailed specification
Nominal voltage	230V/415V
Voltage Band	Between 80% and 110% of V nominal
Nominal Frequency	50 Hz
Operating Frequency Range	47.5 to 50.5 Hz
Waveform	Sine wave
Harmonics	AC side total harmonic current distortion < 3%
Ripple	DC Voltage ripple content shall be not more than 1%
Efficiency	Efficiency shall be >98%
Casing protection levels	Degree of protection: Min IP-65
Operating ambient Temp range	-10 to + 60 degree Celsius
Operation	Completely automatic including wakeup, synchronization (phase locking) and shut down
MPPT	MPPT range must be suitable to individual array voltages

Specifications of Inverters	
Parameters	Detailed specification
Protection Class	1
Protections	Over voltage: both input and output Over current: both input and output Over / Under grid frequency Over temperature Short circuit Lightning Surge voltage induced at output due to external source Islanding
Ingress Protection	IP 65
Recommended LED indications	ON Grid ON Under/ Over voltage Overload Over temperature
Recommended LCD Display on front Panel	DC input voltage DC current AC Voltage (all 3 phases) AC current (all 3 phases) Frequency Ambient Temperature Instantaneous power Cumulative output energy Cumulative hours of operation Daily DC energy produced
Communication Interface	RS485/ RS232/Wi-Fi (with or without USB)

48.16 The Technical Specification for Interconnection are summarized below:

Sl No	Parameters	Requirements	Reference
1	Overall conditions of service	Reference to regulations	Conditions for Supply of Electricity
2	Overall Grid Standards	Reference to regulations	Central Electricity Authority (Grid standards) Regulations 2010

3	Equipment	Applicable industry standards	IEC/EN standards
4	Safety and Supply	Reference to regulations, (General safety requirements	Central Electricity Authority (Measures of safety and electricity supply) Regulations, 2010 and subsequent amendments
5	Meters	Reference to regulations and additional conditions issued by the commission.	Central Electricity Authority (Installation & operation of meters) regulations 2006 and subsequent amendments
6	Harmonic current	Harmonic current injections from a generating station shall not exceed the limits specified in IEEE 519	IEEE 519 relevant CEA (Technical Standards for connectivity of the distributed generation resource) Regulations 2013 and subsequent amendments
7	Synchronization	Photovoltaic system must be equipped with a grid frequency synchronization device, if the system is using synchronizer inherently built in to the inverter, then no separate synchronizer is required	Relevant CEA (Technical Standards for Connectivity of the distributed generation resources) regulations 2013 and subsequent amendments.
8	Voltage	The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage. beyond the clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid	
9	Flicker	Operation of Photovoltaic system should not cause	Relevant CEA regulations 2013 and subsequent

		voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards if any	any, (Technical standards for connectivity of the distributed generation resource)
10	Frequency	When the distribution system frequency deviates outside the specified limits (50.5 Hz on upper side and 47.5 Hz on lower side) up to 0.2 sec, the Photovoltaic systems shall automatically disconnect from grid and be in island mode.	
11	DC injection	Photovoltaic system shall not inject DC current greater than 0.5% of full rated output at the interconnection point or 1% rated inverter output current into distribution system under any operating conditions.	
12	Power Factor	While the output of the inverter is greater than 50%, a lagging power factor greater than 0.9 shall be maintained.	
13	Islanding and Disconnection	The photovoltaic system in the event of voltage or frequency variations must island/disconnect itself with the time stipulated as per IEC standards	
14	Overload and overheat	The inverter should have the facility to automatically switch off in case of overload or overheat and should restart when normal conditions are restored	

48.17 The Certifications of On-Grid Inverters are summarized below:

Standard	Description
IS 16221-2	Safety of Power Converters for use in Photovoltaic Power Systems Part 2 (Particular Requirements for Inverters)
IEC 61683	Photovoltaic systems - Power conditioners - Procedure for measuring efficiency
IEC 61727	Photovoltaic (PV) systems- Characteristics of the utility interface
IEC/EN 62109-1	Safety of power converters for use in photovoltaic power systems - Part 1: General requirements
IEC/EN 62109-2	Safety of power converters for use in photovoltaic power systems - Part 2: Particular requirements for inverters
IEC/EN 61000-3-3/ 3-11/ 3-5	Electromagnetic compatibility (EMC) - Part 3-11; Limits; Limitation of Voltage Change, Voltage Fluctuations and Flicker in Public Low- Voltage Supply Systems; Rated Current <16A / >16A and <75A / >75A per Phase respectively
IEC/EN 61000-3-2/ -3-12/ -3-4	Electromagnetic compatibility (EMC) - Part 3-12; Limits; Limits for Harmonic Currents produced by equipment connected to the public low voltage systems with Rated Current <16A / >16A and <75A / >75A per Phase respectively
*IEC/EN 61000-6-1 / 6-2	Electromagnetic compatibility (EMC) - Part 6-2: Generic standards - Immunity standard for residential and commercial / industrial environments
*IEC/EN 61000-6-3 / 6-4	Electromagnetic compatibility (EMC) - Part 6-4: Generic standards - Emission standard for residential and commercial / industrial environments
IEC 62116 / IS 16169	Utility-interconnected photovoltaic inverters - Test procedure of islanding prevention measures
IEC 60068-2-1	Environmental testing - Part 2-1: Tests - Test A: Cold
IEC 60068-2-2	Environmental testing - Part 2-2: Tests - Test B: Dry heat
IEC 60068-2-14	Environmental testing - Part 2-14: Tests - Test N: Change of temperature
IEC 60068-2-30	Environmental testing - Part 2-30: Tests - Test Db:, Damp heat, cyclic (12 h + 12 h cycle)

***Recommended but not mandatory**

49. INTEGRATION OF PV POWER WITH GRID:

The output power from SPV would be fed to the inverters which converts DC produced by SPV array to AC and feeds it into the main electricity grid after synchronization. In case of grid failure, or low or high voltage, solar PV system shall be out of synchronization and shall be disconnected from the grid.

50. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance:

A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- i. AC Voltage
- ii. AC Output current
- iii. Output Power
- iv. Energy in kWh
- v. DC Input Voltage
- vi. DC Input Current
- vii. Ambient Temperatures
- viii. Invertor Status
- ix. Irradiation
- x. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

51. PROTECTIONS

The system should be provided with all necessary protections like earthing, Lightning, and grid islanding as follows:

51.1 LIGHTNING PROTECTION

The SPV power plants shall be provided with lightning & overvoltage protection. The main aim in this protection shall be to reduce the over voltage to a tolerable value before it reaches the PV or other sub system components. The source of over voltage can be lightning, atmosphere disturbances etc. The entire space occupying the SPV array shall be suitably protected against Lightning by deploying required number of Lightning Arrestors. Lightning protection should be provided as per IS/IEC 62305 standard. The protection against induced high-voltages shall be provided by the use of metal oxide varistors (MOVs) and suitable earthing such that induced transients find an alternate route to earth.

51.2 SURGE PROTECTION

The system should have installed with Surge Protection Device (SPD) for higher withstand of the continuous PV-DC voltage during earth fault condition. SPD shall have safe disconnection and short circuit interruption arrangements through integrated DC in-built bypass fuse (parallel) which should get tripped driving failure mode of MOV, extinguishing DC arc safely in order to protect the installation against fire hazards. The SPD should be provided in the AC Distribution Box as well.

51.3 EARTHING PROTECTION

- i. Each array structure of the PV yard should be grounded/ earthed properly as per IS:3043-1987. In addition, the lightning arrester/masts should also be earthed inside the array field. Earth Resistance shall be tested in presence of the representative of ANERT as and when required after earthing by calibrated earth tester. PCU, ACDB and DCDB should also be earthed properly.
- ii. Earth resistance shall not be more than 5 ohms. It shall be ensured that all the earthing points are bonded together to make them at the same potential.
- iii. Earthing System shall connect all non-current carrying metal receptacles, electrical boxes, appliance frames, chassis and PV module mounting structures in one long run. The earth strips should not be bolted. Earthing GI strips shall be interconnected by proper welding.
- iv. Masonry enclosure with the earth pit of size not less than 400mm X 400mm (width) complete with cemented brick work (1:6) of minimum 500 mm depth duly plastered with cement mortar (inside), shall be provided. Hinged inspection covers of size not less than 300mm X 300mm with locking arrangement shall be provided. Suitable handle shall be provided on the cover by means of welding a rod on top of the cover for future maintenance.
- v. Earthing system must be interconnected through GI strip to arrive equipotential bonding. The size of the GI earth strip must be minimum 25mm X 6mm.
- vi. The complete earthing system shall be mechanically and electrically connected to provide independent return to earth. All three-phase equipment shall have two distinct earth connections. An earth bus shall be provided inside the control facility. For each earth pit, necessary test point shall have to be provided.

51.4 GRID ISLANDING:

- i. In the event of a power failure on the electric grid, it is required that any independent power-producing inverters attached to the grid turn off in a short period of time. This prevents the DC-to-AC inverters from continuing to feed power into small sections of the grid, known as "islands." Powered islands present a risk to workers who may expect the area to be unpowered, and they may also damage grid-tied equipment. The PV system shall be equipped with islanding protection.

In addition to disconnection from the grid (due to islanding protection) disconnection due to under and over voltage conditions shall also be provided.

- ii. A manual disconnect 4pole isolation switch beside automatic disconnection to grid would have to be provided at utility end to isolate the grid connection by the utility personnel to carry out any maintenance. This switch shall be locked by the utility personnel

52. CABLES

Cables of appropriate size to be used in the system shall have the following characteristics:

- i. Shall meet IEC 60227/IS 694, IEC 60502/IS1554 standards
- ii. Temp. Range: -10°C to $+80^{\circ}\text{C}$.
- iii. Voltage rating 660/1000V
- iv. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
- v. Flexible
- vi. Sizes of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum. The cables (as per IS) should be insulated with a special grade PVC compound formulated for outdoor use.
- vii. Cable Routing/ Marking: All cable/wires are to be routed in a GI cable tray and suitably tagged and marked with proper manner by good quality ferrule or by other means so that the cable easily identified.
- viii. The Cable should be so selected that it should be compatible up to the life of the solar PV panels i.e. 25years.
- ix. The ratings given are approximate. Bidder to indicate size and length as per system design requirement. All the cables required for the plant provided by the bidder. Any change in cabling sizes if desired by the bidder/approved after citing appropriate reasons. All cable schedules/layout drawings approved prior to installation.
- x. Multi Strand, annealed high conductivity copper conductor PVC type 'A' pressure extruded insulation or XLPE insulation. Overall PVC/XLPE insulation for 1000V

protection Armored cable for underground laying. All cable trays including covers to be provided. All cables conform to latest edition of IEC/ equivalent BIS Standards as specified below: BoS item / component Standard

Description Standard Number Cables General Test and Measuring Methods, PVC/XLPE insulated cables for working Voltage up to and including 1100 V, UV resistant for outdoor installation IS /IEC 69947.

- xi. For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible Aluminium cables shall be used, Outdoor AC cables shall have a UV -stabilized outer sheath.
- xii. The size of each type of DC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 1%.
- xiii. The size of each type of AC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 2 %.
- xiv. The minimum DC cables size shall be 4.0mm² copper; The minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire shall be equal to the size of the phase wires.
- xv. The following colour code shall be used for cable wires and shall confirm to IEC 69947
 - DC positive: red (the outer PVC sheath can be black with a red line marking)
 - DC negative: black
 - AC single phase: Phase: Red; Neutral: Black
 - AC three phase: phases: Red, Yellow, Blue; Neutral: Black
 - Earth wires: Green

53. CABLING PRACTICE

Cable Cabling is required for wiring from AC output of inverter/PCU to the Grid Interconnection point. It includes the DC cabling from Solar Array to AJB and from AJB to inverter input.

- 53.1 All cables of appropriate size to be used in the system shall have the following characteristic:

- a. Shall conform to IEC 60227 / IS 694 & IEC 60502 / IS 1554 standards.
 - b. Temperature Range: -10 degree Celsius to +80 degree Celsius
 - c. Voltage rating: 660/1000V
 - d. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
 - e. Flexible
- 53.2 Sizes of cables between any array interconnections, array to junction boxes, junction boxes to inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum (2%).
- 53.3 For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; multi-core cables shall not be used.
- 53.4 For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible copper cables shall be used. However, for above 10kWp systems, XLPE insulated Aluminium cable of suitable area of cross section can be used in the AC side subject to a minimum area of cross section of 10 sq.mm. Outdoor AC cables shall have a UV -stabilized outer sheath IS/IEC 69947.
- 53.5 All LT XLPE cables shall conform to IS:7098 part I&II.
- 53.6 The total voltage drop on the cable segments from the solar PV modules to the solar grid inverter shall not exceed 2.0%
- 53.7 The total voltage drop on the cable segments from the solar grid inverter to the building distribution board shall not exceed 2.0%
- 53.8 The DC cables from the SPV module array shall run through a UV-stabilized PVC conduit pipe of adequate diameter with a minimum wall thickness of 1.5mm
- 53.9 Cables and wires used for the interconnection of solar PV modules shall be provided with solar PV connectors (MC4) and couplers
- 53.10 All cables and conduit pipes shall be clamped to the rooftop, walls and ceilings with thermo-plastic clamps at intervals not exceeding 50cm; the minimum DC cables size shall be 4.0mm² copper; the minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire size shall be equal to the size of the phase wires. Conduits for taking outdoor cables shall be UV treated.

- 53.11 Cable Marking: All cable/wires are to be marked in proper manner by good quality ferule or by other means so that the cable can be easily identified. The following colour code shall be used for cable wires
- DC positive: red (the outer PVC sheath can be black with a red line marking)
 - DC negative: black
 - AC single phase: Phase: red; Neutral: black
 - AC three phase: phases: red, yellow, blue; neutral: black
 - Earth wires: green
- 53.12 Cables and conduits that have to pass through walls or ceilings shall be taken through PVC pipe sleeve.
- 53.13 Cable conductors shall be terminated with tinned copper end ferrules to prevent fraying and breaking of individual wire strands. The termination of the DC and AC cables at the Solar Grid Inverter shall be done as per instructions of the manufacturer, which in most cases will include the use of special connectors.
- 53.14 All cables and connectors used for installation of solar field must be of solar grade which can withstand harsh environment conditions including high temperatures, UV radiation, rain, humidity, dirt, salt, burial and attack by moss and microbes for 25 years and voltages as per latest IEC standards. DC cables used from solar modules to array junction box shall solar grade copper (Cu) with XLPO insulation and rated for 1.1 kV as per relevant standards only.
- 53.15 Bending radii for cables shall be as per manufactures recommendations and IS: 1255.
- 53.16 For laying/termination of cables latest BIS/IEC Codes/ standards shall be followed.

54. FACTORY TESTING

- PCU shall be tested prior to shipment and factory test certificate for relevant parameters should be provided with the PCU supplied. ANERT or authorised representative of ANERT may be allowed to witness the tests if required.
- Factory testing shall not only be limited to measurement of phase currents, efficiencies, harmonic content and power factor, but shall also include all other

necessary tests/simulation required and requested by the Purchasers Engineers. Tests may be performed at 25, 50, 75 and 100 percent of the rated nominal power.

55 NET METERING AND UTILITY INTERCONNECTION

- a. Net metering equipment (an Import-Export Energy Meter) approved and tested by the electrical utility based on the accuracy class required for the proposed capacity of the system must be provided with the necessary data cables if required.
- b. Net Metering and Utility Interconnection should be accomplished according the Kerala State Electricity Regulatory Commission (Grid Interactive Distributed Solar Energy Systems) Regulations 2014 Clauses (8) & (9) (Notification No. 2096/KSERC/CT/2014 dt. 10th June 2014)

56 INTER CONNECTION OF INVERTER OUTPUT WITH UTILITY GRID

- a. The interconnection of load with inverter output should be done after obtaining permission from Electrical Inspectorate and Electrical Utility.
- b. The plan scheme and drawing related to interconnection details should be submitted to Electrical Inspectorate through a licensed Electrical contractor with the guidance appropriate Engineering Authority.
- c. Licenced contractor has to be engaged for preparation of plan scheme to be submitted to the Kerala State Electricity Licensing Board and necessary fee should be remitted for energisation of Solar Power Plant.
- d. The panel board and distribution board required for AC interconnection should be done as per specification/ instruction given appropriate Engineering Authority.
- e. All the electrical works required for the interconnection of load with inverter output should be done by the successful bidder as a part of the Solar Power Plant installation.
- f. Bidder should visit the actual site and ensure the exact place for providing Solar Modules and Inverter etc. in presence of technical representative from the ANERT.
- g. Net Metering Equipment shall be installed and maintained in accordance with the provisions of The Central Electricity Authority (Installation and Operation of

Meters) Regulations, 2006 as amended from time to time. The Contractor shall maintain the Metering System as per metering code and CEA guidelines. The defective meter shall be immediately tested and calibrated.

- h. The accuracy class of the Net Metering Equipment will be selected so that all levels of energy produced or taken by the Solar Power Plant will be measured accurately, and this equipment has applicable accuracy class.
- i. Net Metering Equipment shall be microprocessor-based conforming to the relevant IEC standards with Advanced Metering Infrastructure (AMI) with RS232 cable facility.
- j. Net Metering Equipment shall measure active energy (both import and export) and reactive energy (import) by 3 ph, 4 wire principle suitable for balanced / unbalanced 3 phase load (With KVA_r, KWh, KVA measuring registers). Tri-vector based energy meter shall have an accuracy class of energy measurement of at least Class 0.2 for active energy and at least 0.5 Class for reactive energy according to IEC 60687.
- k. Display parameters: LCD test, KWH import, KWH export, MD in KW export, MD in KW import, Date & Time, AC current and voltages and power factor (Cumulative KWH will be indicated continuously by default)

57 WARRANTY

- a. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided as per the special conditions of the contract.
- b. PV modules used in solar power plants/ systems must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- c. The Warranty Card to be supplied with the system must contain the details of the all the components supplied including serial numbers accompanied with the OEM warranty card

58. OPERATION & MAINTENANCE OF THE PLANT

58.1 For the optimal operation of a PV plant, maintenance must be carried out on a regular basis. All the components should be kept clean. It should be ensured that all the components are fastened well at their due place. The O&M Charges for 10-year period is to be quoted by the bidders

58.2 The service personnel should visit the installations at least once a month for preventive maintenance even if no faults are reported. **Reports of these preventive maintenance visits and generation data should be submitted to the concerned ANERT District Offices on a quarterly basis.**

58.3 Maintenance guidelines for various components viz. solar panels, inverter, wiring etc. are discussed below:

58.3.1 SOLAR PV PANELS

Although the cleaning frequency for the panels will vary from site to site depending on soiling, it is recommended that

- a) The panels are cleaned at least once every thirty days.
- b) Use water and a soft sponge or cloth for cleaning.
- c) Do not use detergent or any abrasive material for panel cleaning.
- d) Iso-propyl alcohol may be used to remove oil or grease stains.
- e) Do not spray water on the panel if the panel glass is cracked or the back side is perforated.
- f) Wipe water from module as soon as possible.
- g) Use proper safety belts while cleaning modules at inclined roofs etc.
- h) The modules should not be cleaned when they are excessively hot. Early morning is particularly good time for module cleaning.
- i) Check if there are any shade problems due to vegetation or new building. If there are, make arrangements for removing the vegetation or moving the panels to a shade-free place.
- j) Ensure that the module terminal connections are not exposed while cleaning; this poses a risk of electric shock.

- k) Never use panels for any unintended use, e. g. drying clothes, chips etc.) Ensure that monkeys or other animals do not damage the panels.

58.3.2 CABLES AND CONNECTION BOXES

- a) Check the connections for corrosion and tightness.
- b) Check the connection box to make sure that the wires are tight, and the water seals are not damaged.
- c) There should be no vermin inside the box.
- d) Check the cable insulating sheath for cracks, breaks or burns. If the insulation is damaged, replace the wire.
- e) If the wire is outside the building, use wire with weather-resistant insulation.
- f) Make sure that the wire is clamped properly and that it should not rub against any sharp edges or corners.
- g) If some wire needs to be changed, make sure it is of proper rating and type.

58.3.3 INVERTER

- a) The inverter should be installed in a clean, dry, and ventilated area.
- b) Remove any excess dust in heat sinks and ventilations. This should only be done with a dry cloth or brush.
- c) Check that vermin have not infested the inverter. Typical signs of this include spider webs on ventilation grills or wasps' nests in heat sinks.
- d) Check functionality, e.g., automatic disconnection upon loss of grid power supply, at least once a month.
- e) Verify the state of DC/AC surge arrestors, cable connections, and circuit breakers.

58.4 Inspection and Maintenance Schedule

Component	Activity	Description	Interval
PV Module	Cleaning	• Clean PV modules with plain water or mild dishwashing detergent. • Do not use brushes, any types of solvents, abrasives, or harsh detergents.	Monthly or as per site conditions
PV Array	Inspection	• Check the PV modules and rack for any damage.	Annual

Component	Activity	Description	Interval
		Note down location and serial number of damaged modules.	
	Inspection	Determine if any new objects, such as vegetation growth, are causing shading of the array and move them if possible.	Half Yearly
	Vermin Removal	Remove bird nests or vermin from array and rack area.	Half Yearly
Junction Boxes	Inspection	- Inspect electrical boxes for corrosion or intrusion of water or insects. Seal boxes if required. - Check position of switches and breakers. - Check operation of all protection devices.	Annual
Wiring	Inspection	Inspect cabling for signs of cracks, defects, loose connections, overheating, arcing, short or open circuits, and ground faults.	Annual
Inverter	Inspection Service	- Observe instantaneous operational indicators on the faceplate of the inverter to ensure that the amount of power being generated is typical of the conditions. - Inspect Inverter housing or shelter for physical maintenance, if required.	Monthly
Plant	Monitoring	Operation and Performance Monitoring	Monthly
Spare Parts	Management	Manage inventory of spare parts.	As needed

58.5 The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation. If any of the components are to be taken out from the site for repair, a standby must be provided to ensure un-interrupted power generation and the systems functions smoothly.

58.6 Any Delay in servicing beyond 7 days of fault reporting would attract penalty at the rate of at the rate fixed by CEO, ANERT and further actions will be initiated against the agency.

58.7 A designated contact Telephone Number and address should be submitted for reporting faults during the O&M period of 5 years.

59. CIVIL WORKS

While installing solar power plants on rooftops, the physical condition of the rooftop, chances of shading, chances water level rise in the rooftop during raining due improper drainage in the roof-top should be taken in to consideration.

- a. PV array shall be installed in the terrace space free from any obstruction and/or shadow and to minimize effects of shadows due to adjacent PV panel rows.
- b. PV array shall be oriented in the south direction in order to maximize annual energy yield of the plant.
- c. The solar PV array must be installed on the rooftop in such a way that there is sufficient space on the rooftop for maintenance etc.
- d. There should not be any damage what so ever to the rooftop due to setting up of the solar power plant so that on a later day there is leakage of rainwater, etc. from the rooftop.
- e. Some civil works are inevitable for erecting the footings for the module mounting structure as discussed in Module Mounting Structure section. The roof top may be given a suitable grading plaster with suitable leak proof compound so as to render the roof entirely leak proof.
- f. Ample clearance shall be provided in the layout of the inverter and DC/AC distribution boxes for adequate cooling and ease of maintenance.
- g. While cabling the array, care must be taken such that no loose cables lie on the rooftops.
- h. The roof top should look clean and tidy after installation of the array.
- i. Neatness, tidiness and aesthetics must be observed while installing the systems.
- j. RCC Works - All RCC works shall be as per IS 456 and the materials used viz. Cement reinforcement, steel etc. shall be as per relevant IS standards. Reinforcement shall be high strength TMT Fe 415 or Fe 500 conforming to IS: 1786-1985.
- k. Brick Works (If any) - All brick works shall be using 1st class bricks of approved

quality as per IS 3102.

- l. Plastering - Plastering in cement mortar 1:5, 1:6 and 1:3 shall be applied to all.
- m. Display of mandatory items- Single Line Diagram and layout diagram of modules and interconnection at installation site shall be provided near the inverter.
- n. For painting on concrete, masonry and plastered surface IS:2395 shall be followed. For distempering IS 427 shall be followed referred. For synthetic enamel painting IS 428 shall be followed. For cement painting IS 5410 shall be followed.
- o. All Civil works required for the installation of the PV Plant and other civil and electrical work in evacuation infrastructure, wherever necessary, shall be within the scope of the bidder

The layout of Inverter accommodation shall be designed to enable adequate heat dissipation and availability. Mount within the existing infrastructure available in consultation with the Site in charge. String Inverters may be installed with Canopy type structure over it to protect it from frequent monsoon and weather changes.

60. TESTING & COMMISSIONING

- a. The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.
- b. Any modification in the equipment or installation that may be demanded by the inspecting authorities shall be carried out by the contractor at no additional cost to the KSEBL
- c. In accordance with the specific installation instruction as per the manufacturers drawings or as directed by the KSEBL, the successful Bidder shall unload, assemble, erect, install test, commission and hand over all electrical equipments included in this contract after O&M of 10 years.
- d. Erection materials including all consumables, tools, testing instruments or any other equipment required for successful commissioning shall be arranged by the successful Bidder in a timely manner.
- e. All equipment and instruments, indoor and outdoor, shall be marked with No. and provided with danger boards before commissioning.
- f. All Power equipments shall be handled and erected as per the relevant codes of practice and manufacturer's drawings and instruction manuals.

- g. The Contractor shall obtain the temporary Electrical connection for construction purposes and the same has to be dismantled off the premises after completion of erection of plant.

61. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:

The Weather monitoring station installed in the plant shall be in working condition for minimum 2 weeks and all the parameters shall be available for analysis and verification. The test report for the calibration shall be submitted by the Contractor for approval. After the successful verification of the initial parameters by ANERT, PR test shall be conducted. The Following factors shall be excluded for calculation;

- Generation loss due to grid outage.
- Irradiance below 250 W/m²
- The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = \frac{\text{Measured output in kW}}{\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2)}$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

62. DATE OF COMMISSIONING

After the Inspection and approval of the Electrical Inspectorate, date of Energisation to the Grid will be considered as the official Date of Commissioning (CoD) of the project. To ensure PR, the bidder will be allowed EPC contractor shall improve the quality of the plant by replacement of any components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

63. SOLAR PV SYSTEM FOR MEETING THE ANNUAL ENERGY REQUIREMENT

Key Performance Indicators (For installations above 50 kW)

The following KPIs would be monitored by the ANERT/Owner throughout the contract tenure and the contractor shall furnish monthly reports on above, without fail.

- PV Array Energy Yield
- Final System Yield
- PV System Efficiency (DC/AC)
- Performance Ratio (PR): The performance ratio test as per IS/IEC 61724 has to be carried out at site by the agency in presence of authorized officials of ANERT, deriving sample data within a period of 7 consecutive days sufficient to provide operational data representing insolation and ambient conditions as desired by the

agreement authority to prove the Performance ratio of 75%. If a Solar Plant achieves the Minimum Performance Ratio, then the ANERT will issue Commercial Operation Date Certificate.

- Capacity Utilization Factor (CUF)
- Plant uptime
- Reactive Power Consumption
- Auxiliary Energy Consumption
- CO₂ Savings
- Environment, Health & Safety

64. DANGER BOARDS AND SIGNAGES:

Danger boards should be provided as and where necessary as per IE Act. /IE rules as amended up to date. Three signage shall be provided one each at battery –cum- control room, solar array area and main entry from administrative block. Text of the signage may be finalized in consultation with ANERT/ owner.

65. DRAWINGS & MANUALS:

- i. Two sets of Electrical drawings installation and O&M manuals are to be supplied. Bidders shall provide complete technical data sheets for each equipment giving details of the specifications along with make/makes in their bid along with basic design of the power plant and power evacuation, synchronization along with protection equipment.
- ii. Approved ISI and reputed makes for equipment be used.
- iii. For complete electro-mechanical works, bidders shall supply complete design, details and drawings for approval to ANERT before progressing with the installation work

67. BILL OF MATERIAL

The bidder should provide the bill of material mentioning the quantity of each of the item consisting in the system, along with the offer in the format as show below for each capacity:

Sl. No.	Item	Make (if any)	Model & Individual Capacity (If any)	Qty (Nos)	Rating / Capacity
1.	PV Module				
2.	PCU/Inverter				
3.	DC Cables				
4.	AC Cables				
5.	AJB/SCB				
6.	Module Mounting Structure (MMS)				
7.	ACDB				
8.	Lightning Arrester				
9.	Earthing System Details and No. of Earth pits				
10.	Data Acquisition System				

68. SITE INSPECTON

It is recommended that the bidders visit all the sites listed here for the physical verification and for correctly estimating the quantity, especially related to structure and cabling, before submitting the bids. **Bidder must include all the AC/DC wiring cost, replacement of instrument transformers, panel boards etc only after visiting the proposed site. The quoted amount will be for all the site-specific works and no additional amount will be allotted for any sort of works.**

The site-specific requirement of ladders for accessing PV modules, pathway facility along with handrails in case of sheet roofs are under the scope of the bidder. The Fabrication of Permanent Ladder should be of GI (min14 SWG), coated with Epoxy steel primer with rung spacing not be more than 10 inches and rung width of min 50 inches. Side Handrails / Grab Bars welded on both sides for safety purpose with an extension of

Min 50 inches above the landing or access level. The pathway can be either of GI or FRP material and shall include handrails for safety without causing shade on the PV modules.

69. CLEANING

The bidder shall provide permanent arrangement for module washing in the SPV Plant. Water lines may be drawn to feed water from the available resources. Contractor has to provide additional facility including pipeline, motor for pumping to the additional overhead tank, if required.

70. DISPLAY BOARD

The vendor has to display a board of size at the project site of size minimum 60 cm x 30 cm including the following details

- Plant Name, Capacity, Location, Type of Renewable Energy plant (solar), Date of commissioning etc. The logo of ANERT and details of the scheme as specified in the work order.

71. INSURANCE

- i. The power plant must be insured at every stage of operation – from Material dispatch, storage, completion of installation and till 5 years after commissioning. The insurance coverage on handing over of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**.
- ii. The insurance premium for the 10 years of warranty is to be paid by the bidder. Only the system components are to be insured. On handing over of the system, the original insurance policy is to be handed over to the authorised person at the site of installation and a copy to ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the site of installation.

72. ENGINEERING DRAWINGS

The bidder should submit and get the necessary approval of the following detailed Engineering Drawings before execution of the project:

- i. Schematic drawing showing the PV panels, Power conditioning Unit(s)/Inverter, Array Junction Boxes (AJBs)/String Combiner Boxes (SJB), AC and DC Distribution Box, Net meters, MSB etc.
- ii. Layout of solar PV Array
- iii. Single Line Diagram (SLD) with specification of all components.
- iv. Design document for Module Mounting Structure (MMS) including certificate showing wind speed withstanding capacity of the structure (STAAD/Equivalent).
- v. Module Mounting Structure (MMS) drawing along with foundation details for the structure.
- vi. Sizes and specification of cables for PV Module interconnections, PV Array to Array Junction Boxes, Array Junction Boxes to Inverter, Inverter to ACDB/ Grid Connection point etc. shall be furnished.

The Vendor shall submit a PVsyst report for PV power plants from 25kWp and above. All PV plant design should contain the following details which should be approved by the concerned officer before installation.

- i. Design of strings including the number of PV modules
- ii. AC Protection (Circuit Breaker, Switches, Fuses, SPD)
- iii. DC Protection (Switches, Fuses, SPD)
- iv. AJB / SCB details
- v. DC Cable size and length from point to point
- vi. AC Cable size and length from point to point
- vii. Earthing system details and number of pits
- viii. Lightning protection details/specification
- ix. PV Syst / Any other software-based Simulation Report

73. SAFETY MEASURES

The bidder shall take entire responsibility for electrical safety of the installation(s) including connectivity with the grid and follow all the safety rules & regulations applicable as per Electricity Act, 2003 and CEA guidelines etc. Adequate firefighting equipment and extinguishing agents of sufficient capacity and quantity must always be available at site.

and kept ready for immediate use. The installation of Fire Extinguishers should confirm to BIS standards.

The fire extinguishers shall be provided in the control room housing inverters as well as on the Roof or site where the PV arrays have been installed. One liquefied CO2 fire extinguisher upright type of capacity 8 kg having IS: 2171 -7, IS: 10658 marked per installation of 100kWp shall be supplied by the Successful bidder and kept near the Inverter accommodation and shall also be responsible for periodic renewal during the maintenance period. The fire extinguisher shall be suitable for fighting fire of oils, solvents, gases, paints, varnishes, electrical wiring, live machinery fires and all flammable liquid & gas.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 4: ANNEXURES

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

FORMAT 1 - COVERING LETTER

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

I am/We are remitting herewith the required amount of Rs. towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transaction No dtd.....

Yours faithfully,

FORMAT 2 - POWER OF ATTORNEY

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

Power of Attorney to be provided by the Bidding Company in favour of its representative as evidence of authorized signatory's authority.

Know all men by these presents, We (name and address of the registered office of the Bidding Company as applicable) do hereby constitute, appoint and authorize Mr./Ms. (name & residential address) who is presently employed with us and holding the position of as our true and lawful attorney, to do in our name and on our behalf, all such acts, deeds and things necessary in connection with or incidental to submission of our Bid for Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala in response to the RFS. No dated issued by ANERT including signing and submission of the Bid and all other documents related to the Bid, including but not limited to undertakings, letters, certificates, acceptances, clarifications, guarantees or any other document which the ANERT may require us to submit. The aforesaid Attorney is further authorized for making representations to the ANERT and providing information / responses to ANERT representing us in all matters before ANERT and generally dealing with ANERT in all matters in connection with this Bid till the completion of the bidding process as per the terms of the above mentioned RFS.

We hereby agree to ratify all acts, deeds and things done by our said attorney pursuant to this Power of Attorney and that all acts, deeds and things done by our aforesaid attorney shall be binding on us and shall always be deemed to have been done by us.

All the terms used herein but not defined shall have the meaning ascribed to such terms under the RFS.

Signed by the within named

..... (Insert the name of the executant company)
through the hand of Mr.

duly authorized by the Board (vide Board Resolution No____) to issue such Power of Attorney

Notes:

The mode of execution of the power of attorney should be in accordance with the procedure, if any, laid down by the applicable law and the charter documents of the executant(s) and the same should be under common seal of the executant affixed in accordance with the applicable procedure. Further, the person whose signatures are to be provided on the power of attorney shall be duly authorized by the executant(s) in this regard.

The person authorized under this Power of Attorney, in the case of the Bidding Company / Lead Member being a public company, or a private company which is a subsidiary of a public company, in terms of the Companies Act, 1956, with a paid up share capital of more than Rupees Five crores, should be the Managing CEO / whole time CEO/manager appointed under section 269 of the Companies Act, 1956. In all other cases the person authorized should be a CEO duly authorized by a board resolution duly passed by the Company. Also, wherever required, the executant(s) should submit for verification the extract of the chartered documents and documents such as a Board resolution / power of attorney, in favour of the person executing this power of attorney for delegation of power hereunder on behalf of the executant(s).

FORMAT 3 – GENERAL PARTICULARS

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Name of the Agency	
Registered Office	
Nature of Agency (Ltd. Co., Partnership etc.) Attach Copy of partnership Deed/ Certification of Incorporation	
Year of Establishment	
Registration of Number	
Address for Communication	
Telephone number of Contact person(Mobile if any)	
Name of CEOs/ Proprietor/Partners(with address and Telephone No)	
GST Registration Number (Copy to be Attached)	
PAN Number	
TAN Number	
Whether the bidder wishes to form a project company for execution of work	
Whether any Civil Suit / Litigation arisen in the contract executed during the last five years/being executed. If yes, please furnish the name of the Contract, employer nature of work, contract value,	

work order and date and brief details of litigation.	
Details of Total Experience in general since inception(Details of similar systems installed till the date of bid)	
Details of Turnover for last Two years. (Copy Audited Statements has to be submitted for last two financial years)	
Details of offices in Kerala, India and abroad- address and contact details	

Documentary evidence for the bid qualification requirements are submitted along with this document and the details furnished above are true and correct.

FORMAT 5 - PERFORMANCE SECURITY GUARANTEE

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

BG No. :

Amount :

Date :

Valid up to :

In consideration of the Agency for New & Renewable Energy Research and Technology, therein after called "ANERT") have allotted work to M/s..... (hereinafter called the said Contractor) under the terms and conditions of Supply Order No..... issued by ANERT and the agreement dated made between (name of contractor) and ANERT for covering (hereinafter called the said agreement) of Security Deposit for the due fulfilment by the said contractor of the terms and conditions.

Contained in the said agreement, on production of the Bank Guarantee for Rs..... (Rupees..... only) we,Bank having our Head Office at (herein after referred to as "the Bank") at the request of M/s.(name of contractor) do hereby undertake to pay to the ANERT an amount not exceeding Rs..... (Rupees only), against any loss or damage caused to or suffered or would be caused to or suffered by the ANERT by reason of any breach by the said contractor of any of the terms and conditions contained in the said agreement

We,Bank, do hereby undertake to pay the amount due and payable under this Guarantee without any demur, merely on a demand from the ANERT stating that the amount claimed is due by way of loss or damage caused to or would be caused to or suffered by the ANERT by reasons of breach by the said contractor of any of the terms or conditions contained in the said agreement. Any such demand made on the Bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee. However, our liability under this guarantee shall be restricted to an amount not exceeding Rs. (Rupees only).

This guarantee will not be discharged due to change in the constitution of the bank or the contractor/supplier.

Notwithstanding anything contained hereinbefore:

- 1) Our liability under this Bank Guarantee shall not exceed Rs.....(Rupees only)
- 2) This Bank Guarantee shall be valid upto
- 3) We are liable to pay the guaranteed amount or any part thereof under this Bank Guarantee amount only and only if you serve us a written claim or demand on or before.....

Dated at this day of 2023

FORMAT 6 – COMPONENT WISE SPLIT UP OF COSTS

(On Letterhead of the respective entity for which the below details are provided.)

To be provided for all capacity quoted by the bidder

S/N	Component	Percentage (%)
1	SPV Modules	
2	Module Mounting Structure	
3	Grid Tied Inverter as per specification	
4	Balance of System	
5	Cost for 10 Year Warranty and Preventive Maintenance	
6	Installation and Commissioning Charges	
7	Insurance (From Material dispatch till 10 years warranty period)	
8	Any miscellaneous expenses required for the successful commissioning of the plant	
9	Remote Monitoring and associated costs	
Total		100%

ANNEXURE A – PRE-AGREEMENT

(To be on non-judicial Kerala stamp paper of value Rs. 200)

ARTICLES OF AGREEMENT executed on this the day of
Two thousand andbetween the **Agency for New & Renewable Energy Research and Technology** (hereinafter referred to as **ANERT**) of the one part and Sri
(Name and Address of the tenderer) hereinafter referred to as “the Bounden”) of the other part.

WHEREAS in response to the Notification No.
dated the bounden has submitted to ANERT a e-tender for the ***Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd*** specified therein subject to the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT a sum of Rs. as Earnest Money Deposit for execution of an agreement undertaking the due fulfilment of the contract in case his e-tender is accepted by ANERT. NOW THESE PRESENTS WITNESS and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract for is awarded to the bounden, the bounden shall within Fifteen days of acceptance of this e-tender, execute an agreement with ANERT incorporating all the terms and conditions under which ANERT accepts this e-tender.

In case the bounden fails to execute the agreement as aforesaid incorporating the terms and conditions governing the contract, ANERT shall have power and authority to return

Page 99 of 109

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore
Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City
Thiruvananthapuram Ltd

from the bounden any loss or damage caused to ANERT by such breach as may be determined by ANERT by appropriating the moneys inclusive of Earnest Money deposited by the bounden and if the Earnest Money is found to be inadequate the deficit amount may be recovered from the bounden and his properties movable and immovable in the manner hereinafter contained.

All sums found due to ANERT under or by virtue of this agreement shall be recoverable from the bounden and his properties movable and immovable under the provisions of the Revenue Recovery Act for the time being in force as though such sums are arrears of land revenue and in such other manner as ANERT may deem fit.

In witness whereof Sri (Name and Designation) for and on behalf of the Agency for New & Renewable Energy Research and Technology and Sri the bounden have hereunto set their hands the day and year shown against their respective signature.

ANNEXURE B – BIDDERS TECHNICAL INFORMATION

TECHNICAL PARTICULAR DATA

Solar PV Module

Sl. No	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Manufacture name to be specified	
2	PV Module type	Poly/Mono Crystalline, Mono PERC	
3	No. of PV cells per Module		
4	Total number of PV modules		
5	Max. Power, P_{mp} @STC	330 Wp or above	
6	Max. Power tolerance (%)	Not more than 3%	
7	Max. Power voltage (V_{mp}) @STC	To be specified	
8	Max. Power current (I_{mp}) @STC	To be specified	
9	Open circuit voltage, V_{oc} @ STC	To be specified	
10	Short circuit current, I_{sc} @STC	To be specified	
11	Nominal voltage	To be specified	
12	Nominal Wattage	To be specified	
13	Fill Factor	Not less than 0.7	
14	Temp. coefficient of V_{oc} (%/C)		
15	Temp. coefficient of P_{mp} (%/C)		
16	Temperature Co-efficient of I_{sc} (%/°C)		
17	Normal Operating Cell Temperature (NOCT) (°C)		
18	Operating Temperature (°C)		
19	Module efficiency	$\geq 17\%$	
20	No. of By-pass Diodes		
21	Mounting arrangement for Solar Module	Fixed Arrangement	

Sl. No	Particulars	Required	Offered
22	Solar Module frame material	Anodized Aluminium	
23	Module dimensions' cm (L x W x H)	To be specified	
24	PV panel Weight (kg)	To be specified	
25	Output Cables	Polarized, UV protected & Weather Proof DC rated multi-contact connector	
26	Output Terminal	PV Connectors	
27	Junction Box	Weather resistant HDPE (IP65)	
28	Copies of test certificates	IS 14286/IEC 61215,61730 part 1&2, IEC 61701	

INVERTER

Sl. No.	Particulars	Required	Offered
1	Manufacturer

ANNEXURE C – DECLARATION BY THE BIDDER

e-Tender Notification No:, dtd for Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No.: (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule
3. Our Bid shall be valid for a period of 6 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 5 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. Our firm has obtained the certifications from MNRE or NABL approved Test laboratories that the goods and services are satisfying the technical criteria specified in the bid.

ANNEXURE D – DECLARATION OF RELATIONSHIP WITH ANERT EMPLOYEE

(to be signed and submitted by the bidder along with the bid)

Tender Notification No.:

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

Name of the ANERT employee with Designation:

Name of the bidder related to the employee:

This is to put on record that Shri/Smt
currently working as in ANERT is related
to, who is the bidder in the bid. We are aware of
the Anti-corruption policy of ANERT and will observe the highest standards during the
procurement and the execution of contract and shall refrain from corrupt, fraudulent,
collusive or coercive practices on competing for the contract.

ANNEXURE F – CERTIFICATIONS & STANDARDS

QUALITY CERTIFICATION, STANDARDS AND TESTING FOR GRID-CONNECTED SOLAR PV POWER PLANTS

Solar PV Modules/Panels	
IEC 61215	<i>Design Qualification and Type Approval for Crystalline Silicon Terrestrial Photovoltaic (PV) Modules</i>
IS 14286	<i>Design Qualification and Type Approval for Crystalline Silicon Terrestrial Photovoltaic (PV) Modules</i>
IEC 61646	<i>Design Qualification and Type Approval for Thin-Film Terrestrial Photovoltaic (PV) Modules</i>
IS 16077	<i>Design Qualification and Type Approval for Thin-Film Terrestrial Photovoltaic (PV) Modules</i>
IEC 62108	<i>Design Qualification and Type Approval for Concentrator Photovoltaic (CPV) Modules and Assemblies</i>
IEC 61701	<i>Salt Mist Corrosion Testing of Photovoltaic (PV) Modules</i>
IEC 61725	<i>Analytical expression for Daily Solar Profiles</i>
IEC 61853-1	<i>Photovoltaic (PV) Module performance testing and energy rating Part-1: Irradiance and temperature performance measurements, and power rating</i>
IS 16170: Part 1	<i>Photovoltaic (PV) Module performance testing and energy rating Part-1: Irradiance and temperature performance measurements, and energy rating</i>
IEC 62716	<i>Photovoltaic (PV) Modules - Ammonia (NH₃) Corrosion Testing</i>
IEC 60721-2-1	<i>Classification of environmental conditions - Part 2-1 : Environmental conditions appearing in nature - Temperature and humidity</i>
IEC 61730-1	<i>Photovoltaic (PV) Module Safety Qualification - Part 1: Requirements for Construction</i>
IEC 61730-2	<i>Photovoltaic (PV) Module Safety Qualification - Part 2: Requirements for Testing</i>
IEC 60904-2	<i>Photovoltaic devices - Part 2: Requirements for photovoltaic reference devices (STC Performance, 1-V)</i>
IEC 60891	<i>Photovoltaic devices - Procedures for temperature and irradiance corrections to measured I-V characteristics (STC Performance)</i>
IEC TS 62548	<i>Photovoltaic (PV) Arrays - Design requirements</i>
IEC 61829	<i>Crystalline silicon photovoltaic (PV) array- on-site measurement of characteristics</i>

Solar PV String Inverters/INVERTERS	
IEC 62109-1, IEC 62109-2	<i>Safety of power converters for use in photovoltaic power systems- Part 1: General requirements, and Safety of power converters for use in photovoltaic power systems - part 2 : Particular requirements for inverters. Safety compliance (Protection degree IP 65 for outdoor mounting, IP 54 for indoor mounting)</i>
IEC/IS 61683	<i>Photovoltaic systems - Power conditioners: Procedure for measuring Efficiency (10%, 25%, 50%, 75% & 90-100% loading conditions)</i>
IEC 62093	<i>Balance-of-system components for photovoltaic systems – Design qualification natural environments for solar inverters (grid-connected)</i>
IEC 62116	<i>Utility-interconnected photovoltaic inverters- Test procedure of Islanding prevention measures Standard for Inverters, Converters, Controllers and</i>
UL1741	<i>interconnection system Equipment for use with Distributed Energy Resources</i>
IEEE 1547	<i>Standard for interconnecting Distributed Resources with Electric Power Systems</i>
IEEE 1547.1	<i>Standard for Conformance Test procedures for</i>
	<i>Equipment interconnecting Distributed Resources with Electric Power Systems</i>
IEC 60255-27	<i>Measuring relays and protection equipment - Part 27 : Product safety requirements</i>
IEC 60068-2 (1,2,14,27,30 & 64)	<i>Environmental Testing of PV System – Power Conditioners and Inverters</i>
	<i>IEC 60068 -2-1: Environmental testing - part 2-1: Tests - Test A: Cold</i>
	<i>IEC 60068 -2-2: Environmental testing - part 2-2: Tests - Test B: Dry heat</i>
	<i>IEC 60068 -2-14: Environmental testing - part 2-14: Tests - Test N: Change of temperature</i>
	<i>IEC 60068 -2-27: Environmental testing - part 2-27: Tests - Test Ea and guidance: shock</i>
IEC 61727	<i>Photovoltaic (PV) systems - characteristics of the utility interface (Parallel operation)</i>
	<i>Technical standards for connectivity of the distributed Generation Resources at Voltage - level of below 33kV</i>
CEA Guidelines / Regulations	
IEC 62103	<i>Electronic equipment for use in power installations</i>
BS EN 50438	<i>Requirements for micro-generating plants to be connected in parallel to public low-voltage distribution networks</i>

	<i>Requirements for earthing enhancing compounds</i>
<i>Junction Boxes</i>	
<i>IEC 529</i>	<i>Junction boxes and solar panel terminal boxes shall be of the thermo plastic type with IP 65 protection for outdoor use, and IP 54 protection for indoor use</i>
<i>IE 62208, IP 54 as per IEC 529</i>	<i>General requirements for junction boxes, charge controllers</i>
<i>CEA Regulations</i>	<i>Energy Meter Installation and operation of Energy Meters Regulations 2006, and as amended in 2010 & 2014</i>
<i>IS 13779</i>	<i>AC Static watt-hour Meters Class 1 and 2 - specification</i>
<i>IS 14697</i>	<i>AC Static Transformer Operated Watt-hour and Var- hour Meters, Class 0.2 S and 0.5 S - specification</i>
<i>IS 15884</i>	<i>Alternating Current Direct connected static Prepayment Meters for Active Energy (Class 1 and 2) - Specification</i>
<i>IS 15959</i>	<i>Data exchange for electricity meter reading, tariff and load control-companion specification</i>
<i>IS 16444</i>	<i>AC Static direct connected watt-hour Smart Meter Class 1 and 2 specifications (with Import & Export/Net energy measurements)</i>
<i>System Performance Monitoring</i>	
<i>IS/IEC 61724</i>	<i>Guidelines for PV System Performance Monitoring- measurement, Data Exchange, and Analysis</i>
<i>Rooftop PV System/Power Plant inspection</i>	
<i>IEC 62446</i>	<i>Grid connected Solar PV Systems-Minimum requirements for system Documentation, Commissioning Tests, and Inspection</i>
<i>IEC 61557-1</i>	<i>Electrical Safety in low voltage distribution systems up to 1000 V AC. and 1500 V DC - Equipment for testing, measuring or monitoring of protective measures – Part 1: General requirements</i>
<i>IEC 60364-6</i>	<i>Low-voltage electrical installations - part 6: Verification</i>
<i>IEC 61829</i>	<i>Crystalline silicon photovoltaic (PV) array- on-site measurement of I-V characteristics</i>

FORMAT 4 – FINANCIAL CRITERIA

(Financial Qualification Certificate)

S/N	Financial Parameter	FY 17-18	FY 18-19	FY 19-20	FY 20-21	FY 21-22
1	Net Worth					
a.)	Paid up Capital	0.015	0.015	0.015	0.015	0.015

TO WHOM IT MAY CONCERN

It is hereby certified that M/s Oakridge Energy Private Limited has successfully commissioned 121 rooftop solar projects with a cumulative capacity of 1537 kWp under "Rooftop Solar Scheme" of Solar Energy Corporation of India. All the projects were commissioned within the validity of the scheme, i.e. between November 2016 and 30 June 2018.

The complete list of projects has been enclosed as Annexure- 1.

With regards,

For and Behalf of Solar Energy Corporation of India

for Aile

Date: 03rd April 2023.

To Whom It May Concern

This is to certify that M/s. Oakridge Energy Pvt. Ltd. has been allocated work of Supply, Erection & Commissioning of 1000 KWp Rooftop Solar Power Project at OPJSTPP, Tamnar, Raigarh, CG (India) issued by Jindal Power Limited vide PO No. 4100027119 & SO No. 4400015470, dated 17th March 2022 which has been successfully installed and commissioned on 23rd August 2022.

Brief Details of Solar PV Power project commissioned are:

- | | | | |
|---|-----------------------|---|--|
| 1 | Name of work | : | Supply, Erection & Commissioning of 1000 KWp Rooftop Solar Power Project at OPJSTPP, Tamnar, Raigarh, CG (India) |
| 2 | Project Capacity | : | 1000 kWp |
| 3 | Date of Commissioning | : | 23 rd August 2022 |
| 4 | Location | : | Jindal Power Limited, Tamnar, Raigarh, Chhattisgarh. |
| 5 | Project Cost | : | Rs. 4,36,43,908/- (Rupees Four Crore Thirty-Six Lakhs Forty-Three Thousand Nine Hundred Eight Only) (As per the PO dated 17 th March 2022-Purchase and Service order) |

The project is commissioned on 23rd August 2022.

This certificate has been issued with reference to the request letter (Oakridge/Solar/JPL/CC/03042023, dated 03rd April 2023) from Contractor M/s Oakridge Energy Pvt. Ltd- New Delhi for tender purpose only which shall have no financial implication on JPL.

MMC/F/011

Ver. : 0 (17.03.2022)

Order No. : 4100027119

Order Date : 17.03.2022

a) Invoice of 5% of the Total Contract Price of goods.

b) Unconditional acceptances of LOA.

[B].85% of the Supply Contract price along-with 100% taxes and duties shall be released against pro-rata supply through irrevocable without recourse Letter of Credit (LC) against shipment of equipment and following documents at site:

a) Invoices :- 1 set of original + 3 set of copies

b) LR/GR/RR :- 3 copies

c) Packing List :- 3 copies

d) Copy of Transit Insurance Cover Note:-3 copies

e) Test Certificates, wherever applicable:- 3 copies

f) Material dispatch Clearance Certificate (MDCC) issued by Owner prior to dispatch :- 2 copies

[C].10% of the Supply Contract Price of goods shall be paid on successful commissioning and PG test of Goods after receipt of invoice of equivalent amount from the Contractor. This payment shall be released within 30 days after receipt of Invoice.

GST, as applicable, shall be payable extra against documentary evidence.

Bank Charges applicable, if any, shall be in Vendor's Account.

Other Contractual Stipulations :

1) Scope of work:

The scope of the Contractor shall include but not limited to Design, Engineering, Procurement, Supply, Testing, Packing & Forwarding, Transit Insurance, Transportation, Unloading, Storage, Intra-site transportation, Erection, Testing & Commissioning of Solar Photovoltaic (SPV) modules, cables, Inverters, structures, civil work, electrical balance of system and all other work so as required to handover the complete Project to Jindal Power Limited at OPJSTPP, Tamnar, Raigarh, Chattisgarh as per technical specification.

2) TECHNICAL SPECIFICATION:

2.1 The Technical Specification and Scope of Work shall be as per enclosed document in Annexure A and Conditions of Contract as per enclosed document in Annexure-B, and various correspondences referred above.

2.2 In case of any discrepancy between various documents referred above and the clauses indicated in this Letter of Award, the later shall prevail.

2.3 No other deviations on Bid documents Section- I, "Condition of Contract" & Section-II "Technical Specification for 1000 KWp Rooftop Solar PV Project except those specifically mentioned and agreed in this Letter of Award are applicable.

3) Total Contract Price:

3.1 The Total Contract price for the scope mentioned above for the 1000 KWp Rooftop Solar Photovoltaic Power Project shall be Rs 3,83,68,080.00 (Rupees Three Crore Eighty Three Lacs Sixty Eight Thousand Eighty Only). The detailed break up of Supply and Service shall be submitted by the Contractor within 7 days from the EDC.

3.2 The total prices as in Clause No.3.1 above is inclusive of packing and forwarding, freight & transit insurance up to site but exclusive of taxes & duties, Octroi /Entry tax and any other levies, which if levied by Central, State/local authorities shall be paid/reimbursed at actual by JPL in full along with the payment for supplies against the documentary evidence to be furnished by Oakridge Energy Pvt. Ltd. As indicated by you, GST @ 12% shall be applicable on Module and Inverters and 18% GST shall be applicable on Bought Outs and Services.

3.3 The above-mentioned Total Contract price shall remain firm throughout the execution of this Order.

3.4 If there is any delay in completion/commissioning on account of Contractor and there is any statutory increase in duties/taxes/levies or introduction of new tax during the period of delay, in such case, the differential shall be on account of Contractor.

4) WARRANTY / GUARANTEE/DEFECT LIABILITY:

Defect Liability

4.1 The Contractor warrants that the Project or any part thereof shall be free from any defects for a period of 1 (one) year from Date of Handover ("Defect Liability Period"). For purposes clarity, Date of Handover shall be the date when the project is handed over to the Solar Power Plant Owner in a working condition along-with all the necessary documents with respect to design, engineering and warranty of equipment.

4.2 During the Defect Liability Period, the Contractor shall, upon notifying by the Solar Power Owner, at its own cost and within reasonable time as prescribed by the Solar Power Owner, promptly repair, replace or otherwise make good any defects that may cause to the Project.

Project Warranties

4.3 Project components warranty can essentially be construed as guarantees /warranties provided by the project component manufacturers beyond the ones covered under defects liability period, performance warranty period and extended warranties. Best in Class OEM warranty to be provided for all equipment and all such warranty for any of the project components shall be transferred to the Owner at the time of

b) LR/GR/RR :- 3 copies

c) Packing List :- 3 copies

d) Copy of Transit Insurance Cover Note :- 3 copies

e) Test Certificates, wherever applicable :- 3 copies

f) Material dispatch Clearance Certificate (MDCC) issued by Owner prior to dispatch :- 2 copies

8.2.3 10% of the Services Contract Price after successful commissioning and submission of invoice duly certified by EIC and against submission of Performance Bank Guarantee of 10% of the Contract Price.

8.2.4 All the Bank Guarantees shall have a claim period of 3 months

8.2.5 100% of the operation and maintenance contract price as indicated in clause 3.5 above along with taxes and duties shall be released after completion of 1 year O&M period and against submission of invoice duly certified with EIC within 30 days.

9) Liquidated Damages (LD):

9.1 In case Contractor fails to deliver the goods/services for completion of commissioning as per the schedule mentioned in Clause No 6.0 above due to reasons not attributable to JPL, Contractor shall be liable to pay LD @0.5% of the Total Contract price indicated in Clause No 3.1 above for each completed week of delay or part thereof subject to a maximum of 5% of the Total Contract price indicated in Clause no 3.1 above.

9.2 LD for shortfall in Performance Guarantees shall be as indicated in technical specifications for maximum of 10%.

9.3 The combined maximum ceiling of LD on account of delayed delivery/Commissioning and Shortfall in Performance shall be limited to 10% of the Contract Price.

9.4 Contractor shall undertake to pay the LD at the rates stipulated above without requiring JPL to prove actual loss or damage

9.5 LD payable by Contractor shall be deducted by JPL from any outstanding payments due to Contractor.

10) Quality Assurance Plan (QAP)

Contractor shall furnish a complete procedure indicating various components which are to be inspected for stages and final inspection. The procedure shall be furnished and finalized mutually. Contractor shall furnish Quality Assurance Plan (QAP) for JPL's review and approval and inspection / test documents shall be furnished accordingly after approval of QAP.

11) Dispatch Instruction / Dispatch Clearance

For materials / equipment requiring inspection / test witnessing and /or the approval of test certificates, as per Quality Assurance plan (QAP) agreement, the dispatches shall be effected only after the dispatch clearance (MDCC) is given or MDCC waiver (based on necessary test certificates) issued by JPL.

12) Safety

Contractor shall observe strictly the general health, safety and security rules and regulations, as mentioned in the General Condition of Contract (GCC).

13) Inspection and Testing

13.1 The inspection and testing of equipment / materials shall be carried out as per standards prescribed in the specifications / agreed mutually as per QAP. The tests shall be offered with calibrated test grade accuracy instruments as specified by Standards / Good Engineering Practices.

13.2 Contractor shall proceed from one stage to another only after the inspection is completed by JPL / JPL's authorized Third Party Inspection (TPI) and written permission given to proceed further.

13.3 A clear notice of minimum 07 days for domestic and 30 days for imported supply shall be given by Contractor for inspecting the material and equipment or witnessing the tests of indigenous items. On visit of JPL's engineers, if it is found that the materials / equipment are not ready and the inspection of the materials and equipment or witnessing tests thereof is not possible, then such costs of unproductive visits shall be recovered from supplier's bills.

14) In case there are multiple units, all auxiliary/Bought out items shall be sourced / procured from common Vendor/Sub-vendor for all units.

15) For auxiliary/Bought out items, in case there is a requirement to change vendor/sub-vendor after award of work, the Contractor shall necessarily take approval from Owner's Engineering and Commercial Department for the same.

Order Date : 17.03.2022

16) The Contractor shall manufacture, procure and deliver all the materials in an expeditious and Sequential manner to the Site. The Contractor shall take specific approval from Owner prior to dispatch of any perishable items (items with specified shelf life).

17) The Contractor shall submit the detailed Billing Break Up (BBU) within seven (07) days after award of contract for the necessary approval from Engineering and Commercial Departments. While submitting this BBU contractor shall ensure the reasonability of prices which should be a reflection of prevailing market prices. BBU shall cover but not be limited to the actual requirement for the completeness of the scope of work.

18) In case of any contradictions, the clauses mentioned in this Contract shall supersede the respective clauses mentioned in Bidding Document (Section- I, "Condition of Contract", and Section-II "Technical Specification for 1000 KWp Rooftop Photovoltaic Solar Power Project") and all other subsequent correspondence. All other terms & conditions mentioned in Bid document (Section- I, "Condition of Contract", and Section-II "Technical Specification for 1000 KWp Rooftop Photovoltaic Solar Power Project") shall prevail.

Please sign and return the duplicate copy of this Contract as a token of your acceptance to the same. If acceptance is not received from Contractor within one (01) week from the date of release of this Contract, it will be considered that the various terms & conditions indicated in this Contract are acceptable to Contractor.

Annexure A (Scope of Work & Technical Specification)

1 SCOPE OF CONTRACTOR

1.1 The scope of the Contractor will include engineering/designing, procurement and supply, handling, erection, installation, testing & commissioning of Solar Photovoltaic (SPV) modules, cables, Inverters, structures, civil work, electrical balance of system and all other work so as to require to handover the complete Project to the Solar Power Owner.

" Supply and installation of HDG module mounting structure

" Supply and installation of Solar Modules

" Supply and installation of Inverters

" Supply and Installation of cable trays and conduits

" Supply and installation of AC/DC cable

" Supply and installation of LT panels and metering cubicles

" Supply and installation of earthing system with ESE LA

" Supply & Installation of Data logging with remote monitoring

" Supply & Installation of Fire Fighting System

" Supply and installation of Module cleaning sytem with pump

" Supply and installation of online monitoring system

" Testing and commissioning of solar project

b) Procure PV panels & other allied equipment keeping in mind the location, performance, size of the available area and all other relevant details.

c) At all times maintain a communication with the Solar Power Plant Owner regarding the progress of the project by providing daily progress report through email

d) Exercise reasonable caution and safety during the execution of work. All Insurances, liabilities would be in the scope of the Contractor before the Date of Handover of the complete project as per the satisfaction of the Solar Power Owner.

e) Maintain all insurance policies, ESI for Manpower at the site etc. that are required for compliances.

f) Keep the site clean always of work.

g) After installation testing and commissioning, handing over the plant to the Solar Power Plant Owner with complete O&M manuals, close out report, learnings, documents pertaining to equipment guarantees & warranties and other relevant documents related to the Project.

h) Be responsible for the labor laws and its compliance with respect to its employees and sub-contractors and shall keep the Solar Power Plant Owner indemnified all times against all such losses or damages that may cause to the Solar Power Plant Owner in that regards.

i) Ensure that no loss or damage would happen to the factory roof or any other part of the factory due to Project work and Contractor shall be responsible for all and any such losses/damages that may cause at factory site till the COD of the project.

j) Take all necessary steps and comply with all applicable Laws, relevant permits, consents and approvals to protect the environment (both on and off the Site) and to limit damage and nuisance to people and property resulting from pollution, noise and other results of his operations.

1.3 The Contractor agrees to co-operate with Solar Power Plant Owner during the term of this Contract and beyond and provide all such assistance, information and support as is reasonably necessary to enable Solar Power Plant Owner to have minimum down time.

1.4 In addition to anything stated hereinbefore, the Contractor shall carry out the following services, leading to complete installation and operationalization of the Solar PV Rooftop Project:

a) Design works, including providing design documents in 1 set of softcopy

2 SCOPE OF Contractor SOLAR POWER OWNER

2.1 Pre-Requisite:

The Solar Power Plant Owner shall acknowledge to the Contractor that the followings are the pre-requisites for the Plant on behalf of owner and therefore shall ensure the same:

a) Clear shadow free area for the installation of PV panels

b) Space for the installation and commissioning of electrical panels.

c) An open area for storage of supplied equipments till commissioning.

d) Proper access to roof in terms of having proper ladder to access the roof.

e) Proper roof having good load bearing capacity to withstand solar panels weight. Any existing structure retrofitting repair to be done by Solar Power Plant Owner before start of solar works.

Facilities to be arranged by the Solar Power Owner:

The Solar Power Plant Owner shall be responsible to provide the following facilities at site:

i) Electricity - Construction power shall be arranged by the Solar Power Plant Owner at its own cost at single point.

j) Water - Construction water will be made available by the Solar Power Plant Owner with suitable storage arrangement at single point.

k) Statutory fees required to be paid for setting up solar project.

l) Water for module cleaning

2.2 The Solar Power Owner agrees to co-operate with Contractor during the term of this Contract and provide all such assistance, information and support as is reasonably necessary to enable Contractor to provide the Service to the Solar Power Owner.

3 Performance Guarantee

The bidder is liable to guarantee the Assured Delivered Energy as per table below at the end of 1st Year.

For any shortfall of energy generated below this value, Contractor shall pay penalty to the Owner @ Rs 4.00 per Kwh.

ANNEXURE I

Vendor Memo (General) :

ENGINEER - IN- CHARGE:

Mr. Ajit Kumar Rai, AVP (Power Control) - Mobile No. 07898905013 or his authorized representative shall be Engineer In charge of the said work. Kindly contact him for further action.

Special Terms in Order :

For materials / equipment requiring inspection / test witnessing and /or the approval of test certificates, as per Quality Assurance plan (QAP) agreement, the dispatches shall be effected only after the dispatch clearance (MDCC) is given or MDCC waiver (based on necessary test certificates) issued by JPL.

In case Contractor fails to deliver the goods/services for completion of commissioning as per the schedule mentioned in Clause No 6.0 above due to reasons not attributable to JPL, Contractor shall be liable to pay LD @0.5% of the Total Contract price.

Terms & Conditions :

GENERAL CONDITIONS OF PURCHASE ORDER

1. Scope # Acknowledgement of Order

The present General Conditions shall be applicable to purchase orders placed by JPL, unless otherwise specified in the order. The vendor shall return to JPL, the acknowledgement of the order, duly signed, within one week from the date of dispatch of the purchase order as a token of acceptance through courier/post/fax/scanned email. JPL reserves the right to cancel the order should the vendor make any alteration to the Acknowledgement. Any action taken to execute the order from JPL, even if there has been no acknowledgement of the order, shall be deemed to constitute acceptance of the present General Conditions.

2. Execution of Orders

The vendor shall be solely responsible for the execution of the order in every respect, in accordance with the normal customs of the trade. He shall draw JPL's attention to any element likely to impede the satisfactory execution of the order, in particular by providing JPL at all times with all relevant information for this purpose.

3. Price

Unless otherwise stated, the unit prices as indicated in Purchase Order are the Ex-Works/ shop / depot prices. Prices mentioned in the order

Registered Office: Jindal Power Limited, Tamnar - 496107, District: Raigarh, Chhattisgarh

Order No. : 4100027119

Order Date : 17.03.2022

shall remain firm and not subject to escalation till the execution of the order even though the completion/execution of the order may take longer time than the delivery period specified and accepted in the purchase order.

4. Price Revisions

Price revisions, if applicable, will be effective only if agreed and confirmed by the buyer in writing and shall not remain effective beyond the specified time limits if the delay is due to the vendor.

5. Packing & Forwarding

Unless otherwise stated explicitly in Purchase Order, P&F expenses will be deemed as Inclusive in the unit price.

6. Packing Conditions

You are requested to reduce packaging waste and minimize utilization of wood items for the packaging without affecting the quality. Any damage to material at the time of delivery at site, due to improper packing shall be the responsibility of vendor. Vendor has to ensure prompt replacement of such damaged items failing which appropriate actions will be taken as deemed fit.

7. Taxes

GST shall be shown separately in the invoice if payable extra. Any increase in the rates of taxes, levies and duties beyond delivery period stipulated in the purchase order shall be to Vendors# account.

Vendor will furnish your GST Registration Number in all your invoices. The registration number indicated in the invoices shall have to be in force on the date of sale of goods.

8. Declaration

We are in the business of Generation, Transmission and Distribution of Electricity, which are non-excisable goods. Therefore we do not have Excise Control Code (ECC) number /Excise Registration No. If you are a SSI, please specify Notification Number and the Concessional duty applicable thereto. If duty is paid under protest then the Notification Number and date should be mentioned.

9. Delivery & invoices

Time is the essence of this order. Material shall be delivered within stipulated date in the order / delivery-schedule.

The invoices shall be made in triplicate (3 copies) and shall accompany the material. The material along with the Original bill/Invoice shall be delivered to the following address;

MANAGER # CENTRAL STORES

Jindal Power Limited,

O.P.Jindal Super Thermal Power Plant(4x250 MW)

P.O. Tamnar,

Dist. Raigarh(C.G.) PIN # 496107

10. Delivery Timings

09.00 to 13.00 hrs & 14.30 to 17.00 Hrs. except Sundays & Public Holidays.

11. Mode of Delivery

a. F.O.R. JPL Central Stores: Vendor will send the materials through any reputed Bank approved transporter as mentioned below and will book the consignment on "Freight prepaid basis" for door delivery.

b. F.O.R. Ex works: Vendor will book the consignment through any reputed Bank approved transporter as mentioned below on "Freight prepaid / Freight to be billed basis" for door delivery.

c. Freight charges are payable by JPL against documentary evidence.

d. Tax at Source (TDS) shall be deducted at source as per statute and applicable government laws. Our preferred transporters: M/s Associated Road Carriers (ARC), M/s Transport Corporation of India Limited, XPS.

12. Insurance

Insurance for the material in transit would be as per the terms agreed and mentioned in the Purchase Order. If this is agreed on #Vendor#s Scope#, vendor shall ensure suitable coverage of the material on warehouse to warehouse basis. If, Insurance is in #JPL Scope#, then vendor shall endorse the Open Marine Policy number, as mentioned in Purchase Order, in all the relevant dispatch documents, viz; Challan/invoice/ LR copy etc. or else the materials will be received at Vendor#s risk.

13. Acceptance of the Supplies

Acceptance of the supplies shall always take place on the JPL site, after due checking, even when the goods are invoiced "ex Works" or "ex Warehouse.

14. Payment

Invoices shall be settled only to the value of the goods accepted, and on condition that all the relevant and other necessary documents have been received at JPL .Provided the invoiced goods have been accepted by JPL after inspection, payment will be made within 30 days from the date of acceptance of the supplies at JPL site, unless otherwise specified in Purchase Order.

15. Liquidated Damages

Delivery period should be guaranteed. In case of delays, the vendor shall be liable to pay the purchaser by way of liquidated damages @

Order Date : 17.03.2022

0.5% of the undelivered value of the order for each week's delay subject to maximum of 5% of the total value of the order. In specific cases this general standard LD clause may be modified and shall be indicated in order /delivery schedule.

16. Risk Purchase

In the event you fail to supply the material on order, JPL will have the right to buy the material from other sources at market rates and the extra cost incurred in such procurement along with Company Overheads will be recovered from your future bills against subsequent supplies/bills.

17. Quality and Inspection

The Materials supplied hereunder shall be of good quality, free from any faults and defects and in conformance with the Purchase Order, and shall at all times be subject to inspection before acceptance by JPL / JPL's Inspection Agency, who will carry out inspection at site. JPL reserve the right to reject part or full consignment received in defective condition. In case JPL representative would like to inspect the item at your site prior to dispatch, the same will be communicated to vendor in advance against intimation of readiness received from vendor's end.

18. Return of Non-Conforming Product

In case of Non-conforming product/ rejection, vendor shall have to arrange for replacement on immediate basis. Vendor shall also arrange to lift the non-conforming/rejected material from our plant within 15 days of the date of Rejection Note, till then the Non-conforming material will remain at Central Stores - JPL at vendor's risk. Further, if vendor fails to lift such materials within 60 days without any intimation to us, it will be presumed that you are not interested to lift the same and in that case JPL reserves the right to shift the non-conforming/ rejected materials to scrap yard at the vendor's risk without any further communication for which no further communication will be entertained.

19. Suitability / Compatibility Certificate

You would be required to furnish at the time of supply, a certificate confirming the suitability with the parent equipment in use, of the material offered by you. In case of any modification in design or manufacture of the spares, which result in not meeting our end use requirement, such spares shall be replaceable by you at no extra cost.

20. Guarantee

Equipment/Material shall be guaranteed for satisfactory performance for a period of 12 months from the date of commissioning or 18 months from the date of receipt whichever

is earlier against faulty design, material and workmanship and shall be replaced free of cost in the event of failure during the guaranteed period, unless otherwise specified and agreed in your offer and our purchase order subsequently.

21. Health & Safety

Vendor will provide complete information regarding the usage, for which the product has been designed, and any restrictions and safeguards which should be observed in all stages of its handling, operation and disposal. This may be in the form of technical specification, leaflet/ brochure, MSDS (Material Safety Data Sheet), instructions for safe Material handling and Storage instructions etc.

22. Compliance to Environment Laws

Please indicate whether your organization is ISO 14001 certified. If not, please certify that the handling, use and disposal of your product consider practices consistent with sound environmental management. We prefer environment friendly products and processes.

23. Grievance Redressal

In case of any grievance the vendor shall bring the same to the notice of the Head -Materials & Contracts. Vendor may also drop his concerns at the drop-box available for this purpose at the reception of Administrative Building, JPL, Tamnar or may send the same through post or electronic mail.

24. Vendor Rating

Vendor is requested to ensure compliance to the terms of the individual orders with regards to timely delivery, provision of all applicable documents / challans / test certificate, quality of the material etc. Vendor performance with respect to these factors will be taken into consideration during rating of vendors for future business.

25. Order Manager

This order will be managed by the Buyer as mentioned in the Purchase Order. All future correspondence related to this order shall be addressed to the above officer.

26. Payment Manager

AGM (F&A) will be the payment manager as per the Purchase Order terms. All future correspondences related to payment shall be addressed to the above officer under copy to the order manager.

27. Indemnity against Patent Rights

The equipment, system, drawings, and other materials supplied by the vendor against this order will become sole property of JPL and JPL management and any individual engaged in this business shall remain indemnified against any claim for infringement or breach of any of the statutes, rules & regulations by the use of or sale of any article or material supplied by the vendor. This indemnity shall include any infringement of patent, trademark, design, copyright or other property rights whether in Country of origin, or elsewhere resulting from vendor's design, manufacture, use, supply or re-supply & would also cover use or sale of any article or material supplied by vendor to JPL

Registered Office: Jindal Power Limited, Tamnar - 496107, District: Raigarh, Chhattisgarh

Ver. : 0 (17.03.2022)

Order No. : 4100027119

Order Date : 17.03.2022

under this order. This Indemnity shall cover any claim/action taken by a third party either directly against JPL or Any claim/action made against the vendor & where under we are made liable. The Indemnity shall be for loss, damages, and cost including litigation costs incurred by us under this order.

28. Arbitration

Any disputes and differences arising out of or relating to this Purchase Order including interpretation of its terms will be resolved through joint discussion of the designated officials of the concerned parties. However, if the disputes are not resolved by Joint discussions then the matter will be referred for adjudication to the arbitration of a person appointed by the parties in Raigarh (C.G.) in accordance with the Indian Laws. The decision of the arbitrator shall be final and binding on the parties.

29. Jurisdiction

This Purchase Order shall in all respect be subject to the jurisdiction of courts at Raigarh(C.G.). Any dispute relating to this order shall be deemed to have arisen in Raigarh (C.G.) and subject to jurisdiction of Raigarh (C.G.) courts only.

30. Suspension / Termination.

The Buyer shall have the right, even if there is no delay in execution of the order, to suspend or terminate the Purchase Order with prior intimation to the vendor. If, the vendor defaults in his obligations under the Purchase Order, payment shall be limited to such part of the Purchase Order price corresponding to the order executed until such suspension or termination. The vendor may only claim reimbursement of its proven suspension or termination cost, if the Purchase Order was suspended or cancelled for reasons attributable to Buyer.

31. Breach of Contract.

If Vendor breaches any obligation resulting from or in connection with the Purchase Order, the Buyer shall be entitled to claim full compensation of his damages suffered due to such breach including but not limited to damages arising outside the Goods, except where such breach is not due to Vendor's fault. However, Buyer will not hold Vendor liable for loss of production or loss of profit except to the extent damages or losses are due to Vendor's gross negligence or wilful misconduct.

32. Order Validity

The Purchase Order shall stand CLOSED automatically after the expiry of One Year beyond the scheduled completion date, pending in full or partial.

33. Force Majeure

Neither party shall be liable for failure to perform its obligations under the Contract if such failure results from circumstances which were not in the contemplation of the parties at the time of the Contract and which are beyond the reasonable control of the party in breach.

Specific Instructions to Supplier

1 TEST Quality to supplies must be as defined in Our Purchase order

2 Quantity to supplies must be as defined in Our Purchase order

3 if JINDAL POWER LTD weight and Lab report in Final for billing then credit note required for weight and lab report difference along with excise invoice.

4.GST (where applicable):

(A)For the purposes of this Clause the following expressions shall have the meaning given as under:

(i)GST - means any tax imposed on the supply of goods or services or both under applicable GST Law.

(ii)Cess-means any applicable cess, existing as on date or applicable in future on the supply of goods or services or both.

(iii)GST LAW - means IGST Act 2017, GST (Compensation to the States for Loss of Revenue) Act 2017, CGST Act 2017, SGST/ UTGST Act 2017 and all related ancillary legislations.

(B)The rates quoted by the Vendor shall be inclusive of all taxes, duties, levies and Cess except GST and compensation cess. Vendor has to clearly show the amount of GST/compensation cess separately in the Tax Invoices raised by them. Further, it is the responsibility of the Vendor to make all possible efforts to make their Accounting/IT system GST compliant in order to ensure timely availability of Input Tax Credit (ITC) to JINDAL POWER LTD.

(C)In case of variation (increase/decrease) in the rate of GST after the date of agreement, the said revised rate shall be reimbursed or recovered on production of relevant statutory documentary evidence. This provision shall be applicable only during the original period of

Registered Office:Jindal Power Limited,Tamnar - 496107,District:Raigarh,Chhattisgarh

PURCHASE ORDER

MMC/F/011
Ver. : 0 (17.03.2022)

Order No. : 4100027119
Order Date : 17.03.2022

contract. However, during the extended period of contract, if any, this provision shall be applicable as follows:

(i) If input tax credit (ITC) is available, the said revised rate shall be reimbursed or recovered.

(ii) In other cases (i.e. where input tax credit is not available), the said revised rate shall be reimbursed or recovered only if the reasons for extension of the contract is attributable to JINDAL POWER LTD

(D) In cases where GST is leviable on any supplies / facilities provided by JINDAL POWER LTD and used by Vendors and the consideration for which is recovered by JINDAL POWER LTD in the form of reduction in the value of invoice raised by Vendor, then JINDAL POWER LTD shall raise GST invoices on such transactions and the same will be borne by Vendors.

(E) Vendor agrees to do all things not limited to providing GST compliant invoices, debit notes, credit notes or other documentation as per GST law relating to the above supply, payment of taxes, timely filing of valid statutory returns / statements for the tax period on the Goods and Service Tax Portal etc. that may be necessary to match the invoice on GSTN common portal and enable JINDAL POWER LTD to claim input tax credit in relation to any GST payable under this Agreement or in respect of any supply under this Agreement. GST charged on debit notes shall be reimbursed only if such debit notes are issued within the prescribed time limit for availing of credit.

(F) In the event Vendor issues a credit note to the JINDAL POWER LTD, such credit note shall include GST component only in circumstances set out under the GST law and upon mutual agreement between Vendor and JINDAL POWER LTD. This shall be subject to the condition that Vendor shall comply with the procedural requirements relating to issuance of credit notes under the GST law.

(G) In case the Input Tax Credit of GST is denied or demand is recovered from JINDAL POWER LTD on account of any non-compliance by the Vendor, including non-payment of GST charged and recovered, the Vendor shall indemnify JINDAL POWER LTD in respect of all claims of tax, penalty and/or interest, loss, damages, costs, expenses and liability that may arise due to such non-compliance. JINDAL POWER LTD, of its discretion, may also withhold/recover such disputed amount from the pending payments of the Vendor.

The above action can be initiated even when the timelines / thresholds as prescribed by the Government in the GST law, rules, circulars, public announcements, etc. have been breached (e.g. Government portal does not allow filing of GSTR 1 statement if the periodic GST returns, GSTR 3B, are not filed for a prescribed period). In other words recovery from JINDAL POWER LTD by the concerned Revenue / Government authority will not be a criteria to enable JINDAL POWER LTD to withhold / recover such amount. Such amount can be withheld / recovered where it is visible or established that Vendor has breached / non-complied with the timelines under the GST law, rules, circular, public announcements, etc. which will disentitle JINDAL POWER LTD to take ITC or delay the ITC, as the case may be.

(H) Vendor shall maintain high GST compliance rating track record at any given point of time.

(I) Vendor is required to pass on the benefit arising out of GST, including seamless flow of Input Tax Credit, reduction in Tax Rate on inputs as well as final goods by way of reduction of price.

(J) Vendor shall avail the most beneficial notifications, abatements, exemptions etc., if any, as applicable for the supplies under the Goods and Service Tax.

(K) For the purposes of the above-mentioned requirements, the Vendor shall provide documents as may be necessary and shall allow inspection of the same to JINDAL POWER LTD

(L) JINDAL POWER LTD shall charge GST (where applicable) over and above on the liquidated damages and other deductions reduced from the price payable to the Vendor against supply of goods or services or both (To be mentioned if applicable)

5. Excise duty and CST / State sales tax (where applicable):

A. The rates quoted by the Vendor shall be inclusive of all taxes, duties, levies and Cess except GST and compensation cess.

B. The vendor will issue proper Excise and Sales tax invoice under the respective laws which will enable JINDAL POWER LTD to avail ITC / refund (where applicable).

Ver. : 0 (17.03.2022)

Order No. : 4100027119

Order Date : 17.03.2022

C.Vendor will ensure submission of duplicate copy (Transporter's copy) of Excise invoice under rules II of the central Excise rules 2002 and or cenvat credit rules 2002

D.In case the Vendor fails to submit the requisites documents, then the amount of duties/taxes / levies as indicated in the quotation /Invoice/purchase order shall be deducted from the bills /Invoice.

6.Income Tax

Applicability of TDS provision u/s 194Q from 1st July 2021

(i)With effect from 1st July 2021, TDS provision u/s 194Q of the Act will be applicable on purchase transaction @ 0.10% on aggregate purchases during the year is over and above INR 50 Lakhs from a supplier. The TDS shall be applicable on payment or booking of invoice expense, whichever is earlier.

(ii)Further, the provision of section 194Q of the Act overrides the TCS provision U/s 206C (1H) of the Act. Therefore, in case provisions of both the sections are applicable, JINDAL POWER LTD shall deduct the TDS U/s 194Q of the Act.

(iii)Furthermore, as per the Provisions of Section 206AB of the Income tax Act, if the supplier has not filed its Income Tax Return (ITR) for preceding 2 previous years and in his/ her/ its case the TDS & TCS is INR 50,000 or more in each of the two previous years then in such case, the said supplier is to be considered as Specified Person and applicable rate of TDS will be 5%.

(iv)As soon as the supplier/ vendor becomes unspecified person from Specified person in compliance with the provisions of section 206AB of the Income Tax Act, it will be the responsibility of the supplier to intimate the fact to JINDAL POWER LTD so that JINDAL POWER LTD can deduct TDS at normal rates instead of higher rates as mentioned in the above clause.

Applicability of TCS provision u/s 206C(1H) up to 30th June 2021

In order to comply with the TCS provision u/s 206C (1H) of the Income tax Act 1961, JINDAL POWER LTD is disclosing its PAN "AAACJ7097D" in the P.O so that TCS will be collected by vendor at the rate of 0.10% prescribed under this section. In case of collection of TCS from JINDAL POWER LTD, Vendors are required to file TCS Return (i.e. Form 27EQ) timely and also duly issue the TCS Certificate (i.e. Form 27D). In case there is any delay and the amount of TCS does not get reflected in form 26AS then the vendor shall reimburse back the amount to JINDAL POWER LTD. "

In case of any changes in law/clarification issued by the Income Tax Authorities on TDS/TCS the same shall be applicable as per the law.

SPECIAL INSTRUCTIONS

A.Quality to supplies must be as defined in Our Purchase order

B.Quantity to supplies must be as defined in Our Purchase order

C.If JINDAL POWER LTD weight and Lab report in Final for billing then credit note required for weight and lab report difference along with Tax / excise invoice.

Bank Charges applicable, if any, shall be in Vendor's Account.

Other Contractual Stipulations :

1)Scope of work:

The scope of the Contractor shall include but not limited to Design, Engineering, Procurement, Supply, Testing, Packing & Forwarding, Transit Insurance, Transportation, Unloading, Storage, Intra-site transportation, Erection, Testing & Commissioning of Solar Photovoltaic (SPV) modules, cables, Inverters, structures, civil work, electrical balance of system and all other work so as required to handover the complete Project to Jindal Power Limited at OPJSTPP, Tamnar, Raigarh, Chhattisgarh as per technical specification.

2)TECHNICAL SPECIFICATION:

2.1The Technical Specification and Scope of Work shall be as per enclosed document in Annexure A and Conditions of Contract as per enclosed document in Annexure-B, and various correspondences referred above.

2.2In case of any discrepancy between various documents referred above and the clauses indicated in this Letter of Award, the later shall prevail.

2.3No other deviations on Bid documents Section- I, "Condition of Contract" & Section-II "Technical Specification for 1000 KWp Rooftop Solar PV Project except those specifically mentioned and agreed in this Letter of Award are applicable.

3)Total Contract Price:

3.1The Total Contract price for the scope mentioned above for the 1000 KWp Rooftop Solar Photovoltaic Power Project shall be Rs 3,83,68,080.00 (Rupees Three Crore Eighty Three Lacs Sixty Eight Thousand Eighty Only). The detailed break up of Supply and Service shall be submitted by the Contractor within 7 days from the EDC.

3.2The total prices as in Clause No.3.1 above is inclusive of packing and forwarding, freight & transit insurance up to site but exclusive of taxes & duties, Octroi /Entry tax and any other levies, which if levied by Central, State/local authorities shall be paid/reimbursed at actual by JPL in full along with the payment for supplies against the documentary evidence to be furnished by Oakridge Energy Pvt. Ltd. As indicated by you, GST @ 12% shall be applicable on Module and Inverters and 18% GST shall be applicable on Bought Outs and Services.

3.3The above-mentioned Total Contract price shall remain firm throughout the execution of this Order.

3.4If there is any delay in completion/commissioning on account of Contractor and there is any statutory increase in duties/taxes/levies or introduction of new tax during the period of delay, in such case, the differential shall be on account of Contractor.

4)WARRANTY / GUARANTEE/DEFECT LIABILITY:

Defect Liability

4.1 The Contractor warrants that the Project or any part thereof shall be free from any defects for a period of 1 (one) year from Date of Handover ("Defect Liability Period"). For purposes clarity, Date of Handover shall be the date when the project is handed over to the Solar Power Plant Owner in a working condition along-with all the necessary documents with respect to design, engineering and warranty of equipment.

4.2 During the Defect Liability Period, the Contractor shall, upon notifying by the Solar Power Owner, at its own cost and within reasonable time as prescribed by the Solar Power Owner, promptly repair, replace or otherwise make good any defects that may cause to the Project.

Project Warranties

4.3 Project components warranty can essentially be construed as guarantees /warranties provided by the project component manufacturers beyond the ones covered under defects liability period, performance warranty period and extended warranties. Best in Class OEM warranty to be provided for all equipment and all such warranty for any of the project components shall be transferred to the Owner at the time of handover.

Modules10 years product warranty and 25 years linear performance warranty

Inverters5 years product warranty

Balance of System1 year

Workmanship1 year

5)Effective Date of Contract (EDC):

Effective date of contract shall be date of release of LOA i.e. 03.03.2022.

SERVICE ORDER

MMC/F/010

Ver. : 0 (17.03.2022)

Order No. : 4400015470

Order Date : 17.03.2022

- a)Invoices :- 1 set of original + 3 set of copies
b)LR/GR/RR :- 3 copies
c)Packing List :- 3 copies
d)Copy of Transit Insurance Cover Note:-3 copies
e)Test Certificates, wherever applicable:- 3 copies
f)Material dispatch Clearance Certificate (MDCC) issued by Owner prior to dispatch :- 2 copies
8.2.310% of the Services Contract Price after successful commissioning and submission of invoice duly certified by EIC and against submission of Performance Bank Guarantee of 10% of the Contract Price.
8.2.4All the Bank Guarantees shall have a claim period of 3 months
8.2.5100% of the operation and maintenance contract price as indicated in clause 3.5 above along with taxes and duties shall be released after completion of 1 year O&M period and against submission of invoice duly certified with EIC within 30 days.
9)Liquidated Damages (LD):
9.1In case Contractor fails to deliver the goods/services for completion of commissioning as per the schedule mentioned in Clause No 6.0 above due to reasons not attributable to JPL, Contractor shall be liable to pay LD @0.5% of the Total Contract price indicated in Clause No 3.1 above for each completed week of delay or part thereof subject to a maximum of 5% of the Total Contract price indicated in Clause no 3.1 above.
9.2LD for shortfall in Performance Guarantees shall be as indicated in technical specifications for maximum of 10%.
9.3The combined maximum ceiling of LD on account of delayed delivery/Commissioning and Shortfall in Performance shall be limited to 10% of the Contract Price.
9.4Contractor shall undertake to pay the LD at the rates stipulated above without requiring JPL to prove actual loss or damage
9.5LD payable by Contractor shall be deducted by JPL from any outstanding payments due to Contractor.
10)Quality Assurance Plan (QAP)
Contractor shall furnish a complete procedure indicating various components which are to be inspected for stages and final inspection. The procedure shall be furnished and finalized mutually. Contractor shall furnish Quality Assurance Plan (QAP) for JPL's review and approval and inspection / test documents shall be furnished accordingly after approval of QAP.
11)Dispatch Instruction / Dispatch Clearance
For materials / equipment requiring inspection / test witnessing and /or the approval of test certificates, as per Quality Assurance plan (QAP) agreement, the dispatches shall be effected only after the dispatch clearance (MDCC) is given or MDCC waiver (based on necessary test certificates) issued by JPL.
12)Safety
Contractor shall observe strictly the general health, safety and security rules and regulations, as mentioned in the General Condition of Contract (GCC).
13)Inspection and Testing
13.1The inspection and testing of equipment / materials shall be carried out as per standards prescribed in the specifications / agreed mutually as per QAP. The tests shall be offered with calibrated test grade accuracy instruments as specified by Standards / Good Engineering Practices.
13.2Contractor shall proceed from one stage to another only after the inspection is completed by JPL / JPL's authorized Third Party Inspection (TPI) and written permission given to proceed further.
13.3A clear notice of minimum 07 days for domestic and 30 days for imported supply shall be given by Contractor for inspecting the material and equipment or witnessing the tests of indigenous items. On visit of JPL's engineers, if it is found that the materials / equipment are not ready and the inspection of the materials and equipment or witnessing tests thereof is not possible, then such costs of unproductive visits shall be recovered from supplier's bills.
14)In case there are multiple units, all auxiliary/Bought out items shall be sourced / procured from common Vendor/Sub-vendor for all units.
15)For auxiliary/Bought out items, in case there is a requirement to change vendor/sub-vendor after award of work, the Contractor shall necessarily take approval from Owner's Engineering and Commercial Department for the same.
16)The Contractor shall manufacture, procure and deliver all the materials in an expeditious and Sequential manner to the Site. The Contractor shall take specific approval from Owner prior to dispatch of any perishable items (items with specified shelf life).
17)The Contractor shall submit the detailed Billing Break Up (BBU) within seven (07) days after award of contract for the necessary approval from Engineering and Commercial Departments. While submitting this BBU contractor shall ensure the reasonability of prices which should be a reflection of prevailing market prices. BBU shall cover but not be limited to the actual requirement for the completeness of the scope of work.
18)In case of any contradictions, the clauses mentioned in this Contract shall supersede the respective clauses mentioned in Bidding Document (Section- I, "Condition of Contract", and Section-II "Technical Specification for 1000 KWp Rooftop Photovoltaic Solar Power

Project") and all other subsequent correspondence. All other terms & conditions mentioned in Bid document (Section- I, "Condition of Contract", and Section-II "Technical Specification for 1000 KWp Rooftop Photovoltaic Solar Power Project") shall prevail.

Please sign and return the duplicate copy of this Contract as a token of your acceptance to the same. If acceptance is not received from Contractor within one (01) week from the date of release of this Contract, it will be considered that the various terms & conditions indicated in this Contract are acceptable to Contractor.

Annexure A (Scope of Work & Technical Specification)

1SCOPE OF CONTRACTOR

1.1The scope of the Contractor will include engineering/designing, procurement and supply, handling, erection, installation, testing & commissioning of Solar Photovoltaic (SPV) modules, cables, Inverters, structures, civil work, electrical balance of system and all other work so as to require to handover the complete Project to the Solar Power Owner.

"Supply and installation of HDG module mounting structure

"Supply and installation of Solar Modules

"Supply and installation of Inverters

"Supply and Installation of cable trays and conduits

"Supply and installation of AC/DC cable

"Supply and installation of LT panels and metering cubicles

"Supply and installation of earthing system with ESE LA

"Supply & Installation of Data logging with remote monitoring

"Supply & Installation of Fire Fighting System

"Supply and installation of Module cleaning sytem with pump

"Supply and installation of online monitoring system

"Testing and commissioning of solar project

1.2The Contractor shall, inter alia:

- a)Provide most optimum design based on best engineering practices.
- b)Procure PV panels & other allied equipment keeping in mind the location, performance, size of the available area and all other relevant details.
- c)At all times maintain a communication with the Solar Power Plant Owner regarding the progress of the project by providing daily progress report through email
- d)Exercise reasonable caution and safety during the execution of work. All Insurances, liabilities would be in the scope of the Contractor before the Date of Handover of the complete project as per the satisfaction of the Solar Power Owner.
- e)Maintain all insurance policies, ESI for Manpower at the site etc. that are required for compliances.
- f)Keep the site clean always of work.

g)After installation testing and commissioning, handing over the plant to the Solar Power Plant Owner with complete O&M manuals, close out report, learnings, documents pertaining to equipment guarantees & warranties and other relevant documents related to the Project.

h)Be responsible for the labor laws and its compliance with respect to its employees and sub-contractors and shall keep the Solar Power Plant Owner indemnified all times against all such losses or damages that may cause to the Solar Power Plant Owner in that regards.

i)Ensure that no loss or damage would happen to the factory roof or any other part of the factory due to Project work and Contractor shall be responsible for all and any such losses/damages that may cause at factory site till the COD of the project.

j)Take all necessary steps and comply with all applicable Laws, relevant permits, consents and approvals to protect the environment (both on and off the Site) and to limit damage and nuisance to people and property resulting from pollution, noise and other results of his operations.

1.3The Contractor agrees to co-operate with Solar Power Plant Owner during the term of this Contract and beyond and provide all such assistance, information and support as is reasonably necessary to enable Solar Power Plant Owner to have minimum down time.

1.4In addition to anything stated hereinbefore, the Contractor shall carry out the following services, leading to complete installation and operationalization of the Solar PV Rooftop Project:

a)Design works, including providing design documents in 1 set of softcopy

- f) Supply and connection of electrical cables
- g) Commissioning of system and trial run
- h) CEIG and net metering approvals

2 SCOPE OF Contractor SOLAR POWER OWNER

2.1 Pre-Requisite:

The Solar Power Plant Owner shall acknowledge to the Contractor that the followings are the pre-requisites for the Plant on behalf of owner and therefore shall ensure the same:

- a) Clear shadow free area for the installation of PV panels
- b) Space for the installation and commissioning of electrical panels.
- c) An open area for storage of supplied equipments till commissioning.
- d) Proper access to roof in terms of having proper ladder to access the roof.
- e) Proper roof having good load bearing capacity to withstand solar panels weight. Any existing structure retrofitting repair to be done by Solar Power Plant Owner before start of solar works.

Facilities to be arranged by the Solar Power Owner:

The Solar Power Plant Owner shall be responsible to provide the following facilities at site:

- i) Electricity - Construction power shall be arranged by the Solar Power Plant Owner at its own cost at single point.
- j) Water - Construction water will be made available by the Solar Power Plant Owner with suitable storage arrangement at single point.
- k) Statutory fees required to be paid for setting up solar project.
- l) Water for module cleaning

2.2 The Solar Power Owner agrees to co-operate with Contractor during the term of this Contract and provide all such assistance, information and support as is reasonably necessary to enable Contractor to provide the Service to the Solar Power Owner.

3 Performance Guarantee

The bidder is liable to guarantee the Assured Delivered Energy as per table below at the end of 1st Year.

For any shortfall of energy generated below this value, Contractor shall pay penalty to the Owner @ Rs 4.00 per Kwh.

Vendor Memo (General) :

ENGINEER - IN- CHARGE:

Mr. Ajit Kumar Rai, AVP (Power Control) - Mobile No. 07898905013 or his authorized representative shall be Engineer In charge of the said work. Kindly contact him for further action.

Terms & Conditions :

GENERAL CONDITIONS OF CONTRACT

1. Agreement:

Contractor's acceptance of the work order in writing shall constitute contract between him and JPL. If acceptance/ comments (if any) is not received from contractor, within one week from the date of this order, it will be considered that the various terms and conditions indicated in the order is acceptable to the contractor.

2. Offloading & Subletting of Job: Contractor shall not offload/ sublet the job given to him without prior approval and permission in written from M/s JPL for any contract in full/ partial.

3. Measurement of Work: Work shall be supervised, inspected and measured as directed by Engineer-in-charge and entered in the measurement book for the Scope of Work with signature of both contractor and Engineer-in-charge or their representative as token of acceptance. Payment shall be made as per actual quantity executed. For all labor intensive jobs, it is mandatory to maintain and submit daily report of workmen attendance duly verified by EIC.

4. Submission and Payment of Bill:

a. The invoice/ RA bills for the Scope of Work as defined earlier should be submitted within 2 weeks of completion of job to Engineer-in-charge in triplicate for verification, on monthly basis or as specified complete in all respect and acceptable.

b. The invoice must be supplemented with the work measurement sheet and workmen attendance sheet duly attested by Engineer in-charge.

c. In case, the job is associated with the supply of materials, the invoice must be supplemented with the material challan duly stamped with Gate Entry number, Packing list, Tax invoice, Quality assurance & test certificates.

d. The workmen payment sheet and PF challan, if applicable, must be submitted with invoice after verification and attestation by in-charge (P&A). If applicable and specified explicitly in the work order, PF and Insurance shall be reimbursed at actual on producing documentary evidence.

e. JPL will release the payment after all deductions as per specified conditions and statutory rules within 15 days after receipt of the invoice. HOD (Finance & Accounts), JPL shall be the paying officer.

5. Taxes & Duties:

a. Unless otherwise specified, all taxes, duties, levies, charges etc. that may be applicable to this contract is deemed to have been included in the contract price. GST, as applicable, must be indicated in the bills separately. This will be paid only if supported by documentary proof of payment. The bills shall be prepared & raised along with following information:

i. Tax Credit documents should be original. The document should be serially numbered either with numbering machine, or pre-printed stationery or computer printed with date.

- ii. The document should contain the name, address and GST Registration Number of the service provider.
- iii. The document should contain our name & address as "Jindal Power Limited, P.O. & Tehsil - Tamnar, Raigarh (C.G.) - 496107".
- iv. The document should contain classification of services, for example "Engineering Consultancy Services", "Erection, Commissioning & Installation services" etc.
- v. The document should contain description of service provided, value of taxable service provided, the amount of GST payable.
- b. As regards Indian Income Tax, Surcharge on Income Tax, Withholding Tax or any Corporate Tax, JPL shall not bear any Tax liabilities whatsoever. The contractor shall be liable and responsible for payment of all such taxes, if attracted under the provisions of law. JPL shall however, deduct applicable taxes at source like TDS under Income Tax Rules and Work Contract Tax under C.G. VAT Act as per law from time to time from bills / payments to be made to the contractor and will issue the TDS Certificate for the same to the contractor.
- c. As regards the payment of Welfare Cess under Building and other Construction worker (RE & CS) Act 1996, all the Building and Construction Contractor whose contract value is more than Rs 10 Lac or more, shall be liable to pay welfare cess @ 1% of the contract value and submit the documentary evidence with P&A department.
- d. In case any contractor fails to meet the above statutory requirement, the same will be deducted from its bills directly.
6. Deductions and Penalties:
 - a. JPL shall be entitled to recover from contractor's bills all cost, damages, expenses which may have to incur or become liable to incur as a result of contractor's negligence or any other action that may originate such cost, charges, expenses etc.
 - b. In case contractor's bill amount is not sufficient to cover such recovery amount the balance shall be deducted from any sum which may become due to contractor at any time thereafter under this or any other contract contractor may have with us. Should this sum also not be sufficient to cover the full amount recoverable, then we reserve our right to recover the same as remedies available under the law.
 - c. If there is any delay in completion of work on the part of the contractor and there is any statutory increase in duties / taxes / levies during the period of delay, in such cases the differential shall be on account of the contractor. In case of failure to execute the work within due date, Security Deposit, if any may be forfeited and JPL reserves the rights to offload the same (complete/ partial) and get it done through other agencies at the cost and risk of the default contractor.
 - d. Any intentional delay, or delay due to improper mobilization of men and material for executing the work by Contractor or any unprofessional attitude of Contractors causing delay, penalty @ 1% of the contract value for each week of delay shall be imposed subject to a maximum of 10% of the contract value.
 - e. In case in delay in completion of work due to reasons attributable to Contractor, he is liable to pay the liquidated damages @ 1% of the Total Order Value, for each completed week of delay or part thereof subjected to a maximum of 10% the Total Order Value.
 - f. In case of non-performance /continuous poor performances, the contract shall be terminated and the work shall be done by any other means at Contractor cost and risk. If the price of contract for the balance work shall be higher, the additional amount shall be recovered from Contractor's security deposit or any dues of this contract or any other contract that the Contractor may have taken in JPL.
 - g. The Contractor shall be solely responsible for any loss or damage to JPL property during the currency of this contract due to negligence, fraud etc. on the part of their personnel and will be liable to make the damages in good condition. In case of any JPL material is lost or damaged during execution of work due to Contractor negligence or wrong workmanship, the cost of the same as per prevailing market rate plus departmental expenses shall be recovered from Contractor bills.
 - h. For any accident due to the negligence of the contractor/ contractor's deployed agencies/workers or subcontractors, following penalties shall be levied.
 - i. For fatal accident - Rs. 5,00,000/-
 - ii. For reportable accident (Permanent disability) - Rs. 1,00,000/-
7. Statutory and Labor Regulations:
 - a. Contractor and his workmen shall abide by all statutory rules and regulations, including but not limited to Contract Labor Act, Workmen's Compensation Act, Minimum Wages Act, Employee Insurance Act, Group Personal Accident Insurance, Provident Fund Act, and any other laws, rules and regulations etc. that may be applicable to this type of work, including any licenses like labor license etc. that may be required to be obtained by the contractors.
 - b. Contractor shall comply & maintain all statutory records, registers and displays as required under various labor laws. Any deviation or fine levied by the Govt. authorities while their inspection will be recovered with penalty from contractor's running bills or security deposit.
 - c. Coverage under Employee Provident Fund & Miscellaneous Provisions Act is mandatory. You must obtain a new PF Code for all your workmen and staff from RPFC, Raipur only.
8. Safety, Health & Environment:
 - a. Contractor and his workmen shall abide by all Safety, Health and Environment rules and regulations of JPL. Any violation of the safety rule shall be viewed seriously and contractor shall be penalized as per JPL rule.
 - b. Contractor workmen shall have to obtain Gate pass before commencement of work, which shall be issued only after getting safety training

3. Safety Belt IS : 3521 (Only Double lanyard and full body harness type safety belt shall be provided by the contractor to their workers while working at height in plant premises.)

4. Welding Helmet IS : 1179

5. Face Shield IS : 8521

6. Ear Plug/ Ear Muff IS : 9167

7. Rubber Hand Gloves (Electrical) IS : 4770

8. Rubber / PVC Hand Gloves IS : 4770

9. Rubber/ PVC Coated Fabric Hand Gloves IS : 4501

10. Leather, Cotton and Canvas Hand Gloves IS : 2573

11. Rubber / PVC Coated Fabric Apron/ Clothing IS : 6110

12. Canister Type Gas Mask IS : 8523

13. Cartridge Type Gas Mask IS : 8522

14. Dust Mask IS : 9473

15. Eye - Protector IS : 5983

All personnel employed by you for working inside the factory premises shall abide by all the safety, health, and environmental rules and regulations of JPL. Minimize pollution at source through environment friendly process, techniques and processes. Reduce fugitive emission from loading / unloading and transportation of material (where applicable).

-Your mobile equipment should possess valid and current P.U.C certificate, vehicle Registration paper, Insurance and vehicle fitness certificates before obtaining gate Pass.

- Contractor/agency shall submit the following papers/certificates before obtaining gate pass of vehicles.

" Registration paper of the vehicle.

" P.U.C. certificate

" Valid insurance paper

" Vehicle fitness certificate

Contractor/agency shall also submit renewed/ new certificates on expiry of PUC, insurance and fitness certificates timely.

9. Discipline:

The contractor and his workmen shall have to follow JPL's standard Code of Conduct and the Law of the Land. It shall be Contractor's responsibility to maintain and keep the deployed manpower in specified area only. If the contractor or his workmen is found violating the same or participating in unlawful activities, or influencing JPL staff by any offerings or other inducements, the contract shall stand terminated with immediate effect.

10. Manpower/ Material/Consumable/Tools & Tackles:

a. Contractor has to ensure availability of all the resources required for the job as follows:

o Skilled / Semi-skilled / Un-skilled Manpower

o Site-In-charge / Supervisors

o Drawing and Design

o Material

o Tools & Tackles

o Plants & Machineries

Registered Office: Jindal Power Limited, Tamnar - 496107, District: Raigarh, Chhattisgarh

Corporate Office: Jindal Centre, 12, Bhikaji Cama Place, New Delhi: 110066, Phone: 26188360, Fax: 26161271, 41659152

E-Mail: info@jindalpower.com, Website: www.jindalpower.com

JINDAL POWER LIMITED

P.O.Tamnar District: Raigarh - 496107
Phone : 07767 302000 Fax : 07767 281993

CIN NO : U04010CT1995PLC008985

SERVICE ORDER

MMC/F/010

Ver. : 0 (17.03.2022)

Order No. : 4400015470

Order Date : 17.03.2022

- o General Purpose Consumables
- o Commissioning Consumables and Spares
- o Maintenance Consumables and Spares
- o Measuring Instruments
- o Scaffolding / Working Platforms Material
- o Material Handling & Transportation Equipments
- b. Lighting at work site will be Contractor's responsibility for which power supply of 220V will be provided by JPL free of cost. Only 24V supply will be permitted for lighting in confined spaces. Contractor has to ensure availability of 220V/24V transformers and bulbs for the purpose.
- c. For the material / spares issued by JPL and used by contractor, record is to be maintained and submitted at the time of billing. The damaged spares replaced are to be kept in Contractor's custody and should be deposited to JPL stores immediately after the completion of work. The stock of the damaged spares / consumed material will be reconciled with the quantity issued. If the Contractor fails to do so, the cost of the same will be deducted from the Contractor's bill. The Contractor must return the unused spares / material issued.

11. Insurance:

The jobs wherein the entire scope of supply and service lies with contractor, he will have to take Insurance policy for Contract value including taxes for Storage cum Erection Policy for the period of contract. The contractor will provide third party insurance at the time of commencement of work or before release of any payment other than mobilization advance, valid for the contract period including extended contract period if any.

12. Manpower Competency:

a. In addition to the site-in-charge, the Contractor has to ensure supervision of work in progress by deploying atleast one technically competent site supervisor. The site-in-charge of the Contractor shall authorize his representative to collect/return materials from/to JPL as per requirement of work.

b. The job is of skilled nature and manpower with suitable requisite skill & experience only shall be permitted to be deployed. Contractor has to ensure that the credentials and certificates of the workmen deployed are submitted to JPL and shall be vetted by them before the start of work.

13. Indemnity:

Contractor shall keep JPL indemnified from all liabilities resulting out of this contract and act of Contractor workman, including but not limited to taxes & duties, damages, penalties, fines, punitive measures, lawyer fees etc. of whatever nature due to non compliance by contractor in his scope of the applicable statutory laws, rules, notifications etc.

14. Force Majeure:

In case force majeure is established and one party informs the other promptly of such occurrences, no increase in price and / or any claim shall be made by the contractor. In case of very prolonged force majeure condition the parties shall mutually discuss and agree to the future course of action.

15. Termination of the contract:

For reasons covered elsewhere in this contract document, if the Contract is to be terminated, Fifteen (15) Days' prior notice shall be given by JPL. In such an eventuality, the Security Deposit and Outstanding payments, if any may also be forfeited at the sole discretion of JPL. However, if the Contractor desires to quit the Contract or JPL decides to short-close the contract, one month's prior notice shall be given by either party.

16. Dispute Settlement:

a. Any dispute or difference arising out of in connection of this contract shall be referred to the sole arbitrator Executive Director, OP Jindal Super Thermal Power Plant, Jindal Power Ltd., Tamnar, Raigarh (CG) and the decision given by the sole arbitrator will be conclusive and final and be binding on both the parties.

b. Arbitration, if arise, shall be resolved in accordance to the Indian Arbitration & Conciliation Act with latest revisions. This agreement being executed at Raigarh & the parties agreed that any dispute or differences arising out of this agreement would be subject to the jurisdiction of only Raigarh court.

STATUTORY AND SAFETY COMPLAINE

The statutory and legal conditions shall be applicable to all labour intensive jobs and the contractor shall have to strictly comply with all the clauses mentioned hereby:

1.Labor Act: Contractor shall abide by all provision of contract labor (R&A) act 1970 and other applicable labor laws and rules made there under from time to time.

2.Labor License: Before commencement of work, Contractor shall submit labor license (if applicable) from competent authority to the JPL's P&A officer through Engineer-In charge.

SERVICE ORDER

MMC/F/010
 Ver. : 0 (17.03.2022)

Order No. : 4400015470

Order Date : 17.03.2022

3. Gate Pass: Before commencement of work, Contractor has to arrange gate pass for his workmen from JPL's P&A officer as per JPL's standard norms.

4. PF registration: Before commencement of work, Contractor shall submit the Provident Fund Registration No. and ensure to recover provident fund amount from wages of all workmen and deposit to the Provident fund authorities and submit a copy of the same by 20th of every month to the JPL's P&A officer through Engineer-In-charge. In case, contractor fails to produce documentary evidence of PF recovery and deposition, JPL will arrange to deposit the same to the Provident fund authorities and the amount along with overheads @30% will be recovered from the contractors bill.

5. Workmen Insurance: Before commencement of work, Contractor shall obtain Insurance policies under Group Personal Accident Policy & Workmen's Compensation Policy covering employment accidental benefit upto Rs. 4.0 Lacs through each policy (total 8 Lacs) and furnish the copy of it to the JPL's P&A officer through Engineer-In charge. In case of non submission of Insurance Policies before start of work, 5 % (Five percent) of the Monthly Bill values shall be retained by JPL until the Contractor presents the copy of Policy document.

6. Wage Payment: Payment to contractor's workmen shall be disbursed on or before seventh day of the wage period in presence of the JPL's P&A officer & Engineer-In charge or their duly authorized representative who shall certify on the payment sheet/register for fulfillment of provision of law. In case of failure to make payment to the workmen within 07(seven) days after wage period, JPL will arrange for labor payment and the amount along with overheads @30% will be recovered from the contractors bill.

7. Bonus & Retrenchment: Contractor shall have to pay its workmen the bonus as per applicable act. Moreover, retrenchment benefits to workmen under Inter State Migrant act if being retrenched shall be paid by contractor.

8. Records, Register and Display Notices: Contractor must maintain statutory registers and records as applicable under various labour laws. Contractor must displays notices in front of his office in Hindi & English as required under various labour laws.

9. Statutory Reimbursement: Any payment against statutory obligations, if applicable and specified explicitly under JPL's scope, such as PF, ESIC, Insurance etc. shall be reimbursed at actual by JPL on producing documentary evidence by the contractor.

10. Code of Conduct: The contractor shall have to follow JPL's standard Code of Conduct. If the contractor is found violating the same or influencing JPL staff by any offerings or other inducements, the contract shall stand terminated with immediate effect and the contractor may be debarred to work for a period as decided by JPL.

11. Work Permit: Work on any equipment or in any area should be started only after ensuring valid permit. Before starting the work, contractor shall submit detailed work program, milestone of different activities, safety & quality plan and any other relevant documents required for the work to the Engineer-in-charge for his approval, after which work shall be started as per the approved program.

12. Tools & Tackles: Contractor will have to produce fitness test certificate of all lifting tools and tackles being used by him from any outside competent person.

13. Vehicle: All the vehicles (except used by specific person) to be deployed by contractor shall be fit for use in all respect. The Vehicle must be commercially registered with the transport authority and must carry all statutory documents (valid Driving license, Insurance policy, P.U.C. certificate etc.)

14. Labor Health & Hygiene: Contractor shall have to ensure periodical cleaning and disposal of waste from workers residential colonies. Contractor must ensure the hygiene, potable drinking water and regular housekeeping in his workers colony. Non compliance of the same would be viewed seriously by the company and suitable action would be initiated to ensure proper living conditions. During summer this area becomes very hot and prone to the cases of dehydration. Contractor must ensure the provision of ORS drink to all the workers during summer.

To Whom it May Concern

This is to certify that **M/s. Oakridge Energy Pvt. Ltd.** has been allocated work of **Design, Supply, Installation, Testing, Commissioning, Operation and Maintenance of Grid Connect Rooftops Solar Plant of capacity 1000 kWp at FC Warehouse (Amazon Warehouse) in Devanahalli, Bangalore, Karnataka (India)** issued by **APG Industrial Conglomerate Private Limited** vide Agreement dated 24th November 2020 which has been successfully installed and commissioned on 21st March 2022.

Brief Details of Solar PV Power project commissioned are:

1. Name of work : **Establishment of 1000 kWp Solar Rooftop Project on FC Warehouse in Devanahalli, Bangalore.**
2. Project Capacity : **1000 kWp**
3. Date of Commissioning : **21st March 2022.**
4. Location : **BLR 8, FC Warehouse (Amazon Warehouse), Devanahalli, Bangalore, Karnataka (India).**
5. Project Cost : **Rs. 3,25,37,445/- (Rupees Three Crore Twenty-Five Lakhs)**
Thirty-Seven Thousand Four Hundred Forty-Five Only)
(As per the agreement dated 24th November 2020)

The project is commissioned on 21st March 2022 and the plant is performing satisfactorily as on the date of issuance of this certificate.

Signature and Stamp**Date: 28th April 2022****Place: New Delhi**LAI Investment Manager Private Limited

Project Design Brief Report

Project Snapshot

1. Name of the Company	AMAZON INDIA
2. Proposed Project Location	AMAZON WAREHOUSE BANGALURU, KARNATAKA,
3. District Name	UDAYAGIRI, DEVANHALLI TALUK, BAGALURU RURAL
4. State	KARNATAKA
5. Proposed Power Plant capacity	1 MWp (aggregate capacity)
6. Technology	Solar Photovoltaic with zero export system
7. Location of place on Earth	(i) Latitude : 13.209761 (ii) Longitude : 77.666007
8. Altitude	888m
9. Average annual solar isolation	5.6-5.4 kWh/m ² /day
10. Nearest Town	Devanahalli, Bangaluru
11. Nearest airport	Kempegowda International Airport
12. Nearest Railway station	Devanahalli Railway Station
13. Type of Module proposed	Multi/Mono Crystalline
14. Type of Inverter proposed	String

Glossary

Photovoltaic	The physical effect of direct Conversion of light (sunlight) to electrical energy
PV Cell	The smallest photovoltaic (PV) element that generates electricity from light.
PV Module	A collection of interconnected PV cells encapsulated between protective materials such as glass and back sheet (Poly Vinyl Fluoride) or glass and glass and mounted in an aluminium frame. This is a hermetically sealed unit.
String	Multiple PV modules connected in series electrically.
Array	Several strings of modules with the same orientation and tilt angle, located together.
Inverter	An electronic device that converts direct current electricity into alternating current electricity suitable for feeding directly to the electrical grid or to normal AC loads.
Insolation	It is a measure of solar radiation energy received on a given surface area in a given time. It is commonly expressed as average irradiance in watts per square meter (W/m^2) or kilowatt-hours per square meter per day ($kWh/(m^2 \text{ day})$) (or hours/day)
Solar Irradiation	The total electromagnetic radiation emitted by the Sun.
STC	“Standard Test Conditions” - Incident Solar Irradiance of 1000 Watts/ m^2 , at a spectral density of AM1.5 and cell temperature of 25°C.
Mounting Structure	Device used to hold modules in place, at desired angle & direction
Power Evacuation	Power generated from Solar PV Power Plant is transmitted to a point (sub-station) where it is distributed for consumer use.
Sub-station	The place where the generated power from solar is synchronized with utility grid and metered.
Control Room	A room housing control equipment.
Cable	A conductor with one or more strands bound together, used for transmitting electrical energy.
Efficiency	The ratio of the output to the input of any system.
Junction boxes	Inputs of several strings are connected to this box and taken as single output.
Current	A flow of electricity through a conductor measured in Amps.

Voltage	Energy required to move charge from one point to another, expressed in volts It is the difference of electrical potential between two points of an electrical or electronic circuit, expressed in volts. It is the measurement of the potential for an electric field to cause an electric current in an electrical conductor.
Lightning Arrestor	Device used to protect human along with components as per risk assessment from lightning strikes
Earthing	Described as a system of electrical connections to the general mass of earth,
Transformer	A static device, keeping the frequency same by which one voltage is changed to another voltage.
Grid	A system of high/low tension conductor by which electrical power is distributed throughout a region.

Abbreviations

AB	Air Breaker
ACB	Air Circuit Breaker
AC	Alternate current
ACSR	Aluminium Conductors Steel Reinforced
BOS	Balance of the System
CDM	Clean Development Mechanism
CER	Carbon Emission Reduction
CO ₂	Carbon Dioxide
CT	Current Transformer
DAS	Data Acquisition System
DC	Direct Current
DP	Double Pole
DPR	Detailed Project Report
HT	High Tension
LT	Low Tension
LV	Low Voltage
MNRE	Ministry of New and Renewable Energy
kWh	Kilo Watt Hour
NO ₂	Nitrous Oxide
MCB	Main Combiner Box / Miniature Circuit Breaker
MFM	Multi-Function Meters
PLF	Plant Load Factor
PFC	Power Finance Corporation
PPA	Power Purchase Agreement
PV	Photo Voltaic
PT	Power Transformer
SEB	State Electricity Board
SO ₂	Sulphur Dioxide
SP	Single Pole
UNFCCC	United Nations Framework Convention on Climate Change
VCB	Vacuum Circuit Breaker
XLPE	Cross Linked Polyethylene

Introduction

India is both densely populated and has high solar insolation, providing an ideal combination for Solar Power in India. Power is the lifeline of any development of the nation. At present the power requirement is being met by three main sources viz., Thermal, Hydel and Nuclear. While Hydel and Nuclear have their inherent limitations, Thermal Power is often confronted by the challenge associated with the availability of fuel. Currently Thermal Power stations which meet the major part of the power demand use coal as fuel. Conventional fuels such as oil, gas and coal cannot meet the increasing demand forever. In addition to the requirement of huge funds, the implementation of more such projects using conventional means of power generation will also involve issues of growing environmental concern, with depletion of fossil fuels. In order to bring down the dependence of finite fossil fuel for power generation, it is necessary to look into the viability of generating power locally using renewable energy sources.

Fortunately, India lies in sunny regions of the world. Most parts of India receive 4.7 kWh of solar radiation per square meter per day with 300-325 sunny days in a year. India has abundant solar resources, as it receives about 3000 hours of sunshine every year, equivalent to over 5,000 trillion kWh. India can easily utilize the solar energy.

Under the Paris Agreement of UNFCCC, India has made a strong commitment towards mitigating climate change. The three commitments are - reducing greenhouse gas emission intensity of its GDP by 33-35 per cent below 2005 levels by 2030, 40 per cent of India's power capacity would be based on non-fossil fuel sources and create an additional 'carbon sink' of 2.5 to 3 billion tonnes of CO₂ equivalent through additional forest and tree cover by 2030.

Ministry of New and Renewable Energy(MNRE), Government of India (GoI), has been facilitating the implementation of broad spectrum program's including harnessing renewable power/ Energy(make use of one), renewable energy to rural areas for lighting, cooking and motive power, use of renewable energy in urban, industrial and commercial applications and development of alternate fuels and applications. With regards to solar energy, the Government of India has set a target of 100,000 MW of installed solar capacity by 2022, out of which 40000 MW shall be rooftop solar. Accordingly, MNRE has announced multiple schemes to encourage rooftop solar, being implemented through multiple nodal agencies like Solar Energy Corporation of India (SECI), Indraprastha Power Generation Company (IPGCL, Nodal agency for Delhi), Haryana Renewable Development Agency (HAREDA, nodal agency for Haryana) and similar nodal agencies in various states.

Amazon is setting up warehouses in Bangalore which would serve as Sorting Centre, Fulfilment centre and Receiving Centre. The proposal is for setting up solar power plant on the rooftop of the warehouse to meet the internal power demand. As per the regulations of the Karnataka Electricity Regulatory Commission, net-metering has not been permitted, and hence it is important to size the plant to get only the necessary generation as per the day-time requirement of the facility.

Sl No	Projects	Capacity (kW)	Status
1	Amazon 600kW	600	Capacity is under execution- on (RC+SC) rooftop
2	Amazon 1000kW	1000	Capacity to be executed- on FC /BLR-8 rooftop.
Total		1600	

Irradiation Data

Bangaluru irradiation level is in the level of 5.4 to 5.6 kWh / sq m, which is excellent for solar generation, the solar project is within Bangaluru, Karnataka, and hence the radiation data of Bangaluru has been considered. The solar irradiation map of India and the monthly solar irradiation in Bangaluru are provided below -

Figure 1- Indian solar irradiation Map

Month	Daily solar radiation-Horizontal (kwh/m ² /d)
January	5.85
February	6.53
March	6.92
April	6.87
May	6.60

June	5.69
July	5.21
August	5.16
September	5.65
October	5.07
November	5.15
December	5.39
Annual	5.32

Location and Infrastructure Facilities

The project is in Bangalore, Karnataka, has excellent connectivity by rail, road and air. The project has excellent availability of infrastructure. The Amazon location has two buildings, one with the fulfilment centre (FC), and one with the receiving centre (RC) and sorting centre (SC). Since it is observed that RC and SC has the lower electrical load, it is proposed to set up the first phase plant (600kWp) on the roof of the receiving centre and sorting centre and in second phase plant (1000kWp) on the roof of fulfilment centre.

Selection of PV Technology

Crystalline silicon (c-Si) is the crystalline forms of silicon, either multi-crystalline silicon (multi-Si) consisting of small crystals, or monocrystalline silicon (mono-Si), a continuous crystal. Crystalline silicon is the dominant semiconducting material used in photovoltaic technology to produce solar cells.

Basic features from different solar cell types can be found below.

The advantages & disadvantages of each technology are discussed in the following section.

Crystalline Silicon PV (Preferred by Amazon)

- **Longevity:** Crystalline solar panels are first generation solar technology and have been around a long time, providing evidence of their durability and longevity.
- **Efficiency:** PV panels made from crystalline solar cells are able to convert the highest amount of solar energy into electricity of any type of flat solar panel.
- **Embodied Energy:** While thin-film solar panels offer a lower level of embedded energy per panel, the fact that more panels are needed somewhat negates this aspect, especially given the extra mounting rails sometimes needed.
- **Environmental Friendly:** Crystalline solar panels are not hazardous to the environment. Some thin film solar products use cadmium telluride (CdTe). Cadmium is a heavy metal that accumulates in plant and animal tissues. Cadmium is a 'probable carcinogen' in humans and animals.

Thin Film

- Better performance in weak sunlight environment
- Silicon thin film PV with high absorption coefficient also brings the benefit of module installation against any direction of sunlight.
- Silicon thin film PV with low temperature coefficient has much better capability in hot environment.
- More resistant against Shading.
- Silicon thin film PV outputs power robustly even in shading condition. Oppositely, crystalline silicon PV doesn't work well due to some cells without output.

Keeping in view the fact that in small projects, c-Si panels have a demonstrated record of performance and that the number of manufacturers is large, c-Si panels are being used in the projects.

Power Plant Scheme

Figure 2 - Schematic diagram of a rooftop solar plant

Basic System Description

Solar Photovoltaic power generator consists of solar modules in series and parallel connections, that convert solar radiations into DC electrical power at the pre-determined range of Voltages whenever

sufficient solar radiation is available. The individual crystalline solar cells are connected together in a module (in series connection), which are hermetically sealed to survive in rugged weather conditions and ensures optimum performance during its long life.

In order to achieve a higher system voltage, modules are installed in a row arrangement, called a string. A higher system voltage has the advantage of lesser installation work, higher efficiency of the entire plant and usage of smaller cross section cables. Calculated no. of strings is connected in parallel by cables in Junction Boxes. Outputs from many such junction boxes are connected in parallel in the Main Combiner Box (MCB). This Main Combiner Box output is fed to the central inverters/Power Control Unit (PCU) to invert solar generated DC power in to conventional 3 phase AC power.

AC power from inverters will be fed to LV panel.

Power Plant Design Philosophy

The Power Plant is sized on the following major criteria:

- Solar Power (average insolation available)
- Power evacuation facility in the vicinity of the proposed site along with Grid availability on 24 Hours a day basis.

The following methodology shall be adopted for design of the rooftop solar project

- Detailed survey of the rooftop
- Preparation of PV layout so that there is no shadow on any panels between 9 am to 3 pm on any day of the year
- Shadow Analysis (using Sketchup)
- Generation Analysis (using PV Syst) to keep the projected generation above the specified
- Solar Project Design in strict compliance with the Technical Specifications spelled out in the bid document.
- Preparation of Bill of Quantity
- Preparation of SLD minimizing the Voltage Drop Calculations.
- Preparation of the design of the module mounting structure designed as per the specifications of the bid document and designed to withstand a wind speed of 150 km / hr.

Sl. No.	Item	Make	Description
1	Solar Module	ReneSola/Trina/ Vikram	335-500Wp Poly/Mono-crystalline modules
2	Module Mounting Structure	GI/Aluminum	Clip Lock Mechanism structure
3	Inverter	Sungrow	String Inverter for 550kW for 1 st phase, 770 kW for 2 nd phase
4	Combiner box	Polycarbonate/Metal sheet	Array Junction Boxes/DC Distribution Box with each Inverter
5	Control Panels	Metal Sheet	LT (Low Tension) Panel

6	Cables	Polycab	PVC/XLPE Copper/Aluminum Cables Accessories for cable interconnection, As per Amazon EHS guidelines
7	Accessories	Standard	installation kit & cable Tray/Conduit
8	Lightning	Conventional	Lightning Protection Units

Power Plant Component Description

As indicated the following are the major components of the Power Plant.

Solar PV Panel

Solar cells produce Direct Current (DC) electricity from light, which can be used to power equipment or to recharge a battery. Cells require protection from the environment and are usually packaged tightly behind a glass sheet. When more power is required than a single cell can deliver, cells are electrically connected together to form photovoltaic modules, or solar panels. A photovoltaic module is a packaged, interconnected assembly of photovoltaic cells, which converts sunlight into electrical power. The cells are hermetically sealed between glass and back cover to protect them from harsh environments.

Crystalline Module

Technical Specifications for Crystalline Modules	
Capacity of PV Modules	440Wp (Mono)
Output power – Pmax (Watts)	440Wp
Voltage at Pmax	41.5V
Current at Pmax	10.62A
Open-circuit voltage	48.8V
Short circuit current	11.56A
Module Efficiency (%)	19.79%
Maximum system voltage (Volts)	1500V
Type of solar PV cell	Mono PERC
Solar cells	72 MON PERC (144 Half-Cell)
Module output	MC 4 terminations

Certification	IEC61215 & EN IEC 61730 Class A, Safety Class II
---------------	--

- 25-year limited warranty on power output & 5-year product warranty

Power warranty	• 25-year performance warranty - 10 years: 90% minimum performance - 25 years: 80% minimum performance
----------------	---

Module Mounting Structure

The module mounting structure is designed for holding suitable number of modules in series. The frames and leg assemblies of the array structures is made of MS hot dip galvanized of suitable sections of Angle, Channel, Tubes or any other sections conforming to IS:2062 for steel structure to meet the design criteria. All nuts & bolts considered for fastening modules with this structure are of very good quality of Stainless Steel. The array structure is designed in such a way that it will occupy minimum space without sacrificing the output from SPV panels at the same time it will withstand severe wind speed up to maximum 100 kmph.

Technical Specification – Module Mounting Structures

Material	GI/Aluminum
Overall dimension	As per design
Wind rating	as per site location
Tilt angle	5 degree along the roof (Flush Mount)
Fixing type	Clip Lock Mechanism on standing seam rooftop

Junction Boxes

In the Junction boxes, individual module strings are bundled and safely routed to the inverter. It is a combination of an exact, well-organized string monitoring system and a safety concept adapted to the PV technology.

The junction boxes will have suitable cable entry points fitted with cable glands of appropriate sizes for both incoming and outgoing cables. They monitor the output of solar PV arrays. If difference between string outputs is too large, the operator is informed through monitoring system. Active disconnection allows string voltages to be measured separately.

These junction boxes are enclosed in an IP 65 rated plastic housing, making it ideal for long-term use in PV systems. In addition, the direct connection between the strings and the spring clamp connectors ensures a durable and safe installation.

Technical Specification – Combiner Boxes

Material	Polycarbonate
Type	Dust, Vermin & Waterproof

Hardware	SS-Rail
Cable Gland	Polycarbonate/Metal sheet
Protection	IP 65

String Inverter

A multi-function power conditioning system combining the functionality of a grid-interactive solar inverter with a highly efficient conversion unit. The inverters achieve their distinguished efficiency factor through the use of IGBTs (Insulated Gate Bipolar Transistors) with Trench Gate Structure, and through the use of iron powder chokes and high-quality transformers with losses less than 1 %.

String / Central inverters operate on MPPT (Maximum Power Point Tracking) mode to ensure maximum output from the solar generators at different ambient conditions. String inverters use higher system voltages to reach very high plant efficiency. Furthermore, installations can be expanded with additions of more modules without problems.

The design of the technical parameters has been optimized with regard to the operating time of the inverter. For example, the IGBTs not only increase the efficiency factor, but their high dielectric strength inhibits the transmission of voltage spikes. The intelligent minimum-performance recognition system protects the AC contactors and a fast-over-current recognition system for all transistors protects the IGBTs.

With a wide range of input voltages from 350 to 1000 V, the inverter allows the largest possible range of module connection possibilities. For larger installations, the proposed inverters can be easily combined to provide higher performance.

Cables

The size of the cables between array interconnections, array to junction boxes, junction boxes to PCU etc shall be so selected to keep the voltage drop and losses to the minimum (Voltage drop calculation will be shared).

The bright annealed 99.97% pure bare copper conductors that offer low conductor resistance, they result in lower heating thereby increase in life and savings in power consumption. These wires are insulated with a special grade PVC compound formulated. The skin coloration offers high insulation resistance and long life.

The connectors/lugs of copper material with high current capacity and easy mode of assembly are proposed.

Technical Specification – Cables	
Type	PV Insulated, sheath & UV resistant
Material	Copper/Aluminum
Voltage	Max: 1100V for DC and AC
Temperature	10 – 70 °C
Colour	Red/ Black /Yellow/Green

Power Evacuation

The Direct Current (DC) from modules will be converted into Alternating Current (AC) by Inverters. The inverter outputs are given to a Low Voltage (LT) panels installed within the project premises.

Monitoring System

Monitoring systems is mainly used to monitor the performance of the Inverters, energy yield, temperature, irradiance level etc. It provides an extremely flexible interface to facilitate PC-based inverter monitoring via analog modem, GSM, Ethernet, or Internet connections.

Protection System

Earthing: The array structure of the PV yard will be grounded properly using adequate number of earthing kits. All metal casing / shielding of the plant shall be thoroughly grounded to ensure safety of the power plant.

Lightning Protection: The SPV Power Plant shall be provided with lightning & over voltage protection. The main aim in this protection shall be to reduce the over voltage to a tolerable value before it reaches the PV or other sub system components. The source of over voltage can be lightning, atmosphere disturbances etc. Metal oxide variators / SPDs shall be provided inside the Array Junction Boxes. In addition, suitable SPDs type-2 also shall be provided in the Inverter to protect the inverter from over voltage.

Bill of Components – 1000kWp project (Phase 2)

Tentative bill of components for a 1000kWp project is provided below

S/N	DESCRIPTION	MAKE	QUANTITY
1	SOLAR INVERTER (110kW)	Sungrow	07 Nos
2	SOLAR MODULE (440Wp)	Renesola/Trina / Vikram	2273 Nos
3	MODULE MOUNTING STRUCTURE	GI/Aluminium	LOT
4	AC CABLE (PVC/XLPE insulated)	POLYCAB	AS PER SITE REQUIREMENT
5	DC CABLE (TYPE-I, 4SQMM&6sqmm COPPER)	POLYCAB	AS PER SITE REQUIREMENT
6	AC SWITCHGEAR Isc-25kA/36kA/50kA	L&T/Schneider	AS PER SITE REQUIREMENT
7	EARTHING Heavy duty GI Bonded 20mm,2m long	GI rod	AS PER SITE REQUIREMENT
8	AC Distribution Box (IP65)	Metal Sheet/Polycarbonate	As per specification mentioned below
9	DC Distribution Box (IP65)	Polycarbonate	As per specification mentioned below
10	LIGHTNING ARRESTER	Conventional Type	AS PER SITE REQUIREMENT
11	CONNECTORS (1000VDC, 15A/30A)	Jainson/Elmex	AS PER SITE REQUIREMENT
12	REMOTE MONITORING SYSTEM 1. Smart data logger with zero export controlling and DG reverse power protection controlling. 2. UPS	1. Intello/Standard 2. Numeric/Microtek/Sukam	AS PER SITE REQUIREMENT

**Annexure Part B2-I
Project Specification**

SL No.	Technical details	Description
i. SPV MODULE		
1	Actual capacity of SPV system (kWp)	1000.12KWp
2	Wattage of each module (Minimum 300Wp and above)	440Wp
3	Number of modules	2273 Nos.
4	Type of modules (Mono /Multi/Thin film)	Mono-crystalline Solar Module
5	Make of Modules and year of manufacturing	Renesola/Trina/Vikram
6	Data sheet of modules	ATTACHED
7	RFID Tag	INSIDE
ii. INVERTER		
8	Make of Inverter	Sungrow
9	Type of Inverter	String
10	Model No. of Inverters	SG110CX
11	Rating of each inverter (Rated AC output)	7x110kW
12	No. of Inverters (Rating wise)	7x110kW and (Single inverter can be overload up to 50%, Please refer the datasheet)
13	wattage of inverters (rated AC output)	7x110kW
14	Data Sheet of Inverter	ATTACHED
15	MPPT is integrated in the PCU/inverter	YES
16	Protection of Enclosure (IP level) /Location of Inverters	IP 65
17	Phase of inverter	THREE-PHASE
iii. STRUCTURE		
18	Type of Roof	Tin-shed (Standing Seam)
19	Type of structure & material of structure	Clip lock mechanism Fluo-PMGlet & GI/Aluminium

Sl. No.	Technical details	Description
iv. DC DISTRIBUTION BOARD		
20	DC Distribution Board material	POLYCARBONATE
21	IP Protection (Level)	IP65
22	Disconnection (MCB/FUSE) Rating & Specification	32A/15A & ATTACHED
v. AC DISTRIBUTION BOARD		
23	Disconnection (MCBs/MCCBs/ACB's) Rating & Specification	4Px200A, 800A as per site requirement
24	IP Protections (All indoor panels will have protection of IP54 or better. All outdoor panels will have protection of IP65 or better)	IP 65
25	Material of ACDB panel	Metal Sheet
vi. LIGHTNING PROTECTION		
26	Technology	Conventional Type
vii. EARTHING CABLE/STRIP		
27	cross sectional area of conductor (≥ 1.6 sq mm) & Make	16sq mm (Al) for AC and DC, 35sqmm (Al) for LA
viii. CABLE AND CONNECTIONS		
28	DC Cable Make & Data Sheet	POLYCAB & ATTACHED
29	Conductor Material, Insulation materials, sheath material of DC cable	COPPER, POLYVINYL CHLORIDE (PVC), UV PROTECTED
30	Size of DC cable & Material, Insulation Material	4 SQMM & 6sqmm Copper, UV protected, PVC
31	AC Cable Make & data sheet	POLYCAB & ATTACHED
32	Conductor Material, Insulation materials, sheath material of AC cable	ALUMINIUM, PVC/XLPE
33	Size of AC cable	3.5C*70SQMM and as per site Requirement
ix. SCADA SYSTEM		
34	Type of Data Acquisition System 1. Smart/Logic power data logger with zero export controlling and DG reverse power protection controlling.	1. Logic power/Intello/standard

Sl. No.	Technical details	Description
x.	MISCELLANEOUS

Sir/Madam,

Sub: Allotment of Tax Deduction Account Number (TAN)
as per the Income Tax Act, 1961.

Kindly refer to your application (Form 49B) dated Sep 26, 2017 for allotment of Tax Deduction Account Number. In this connection, the following TAN has been issued to you/your organisation:

TVDW00206D

Please quote the same in all TDS challans, TDS certificates, TDS returns, Tax Collection at Source (TCS) returns as well as other documents pertaining to such transaction.

Quoting of TAN on all TDS returns and challans for payment of TDS is necessary to ensure credit of TDS paid by you and faster processing of TDS returns.

The above TAN should also be used as Tax collection at Source Account Number under Section 206CA.

Kindly note that it is mandatory to quote TAN while furnishing TDS returns, including e-TDS returns. e-TDS return will not be accepted if TAN is not quoted.

This supersedes all the TAX Deduction/Collection Account Number, allotted to you earlier.

Income Tax Department

This is a computer-generated letter. Hence, signature is not required.

Caution: Income Tax Department does not send e-mails regarding refunds and does not seek any taxpayer information like user name, password, details of ATM, bank accounts, credit cards, etc. Taxpayers are advised not to part with such information on the basis of emails.

INDEPENDENT AUDITORS' REPORT

To
The Members
WattSun Energy India Private Limited
TC: 36/38(1), Alswarya Tower, First Floor, Chackai
TRIVANDRUM - 695 024

Report on the Financial Statements

We have audited the accompanying standalone financial statements of **WattSun Energy India Private Limited** ("the Company"), which comprise the Balance Sheet as at 31st March 2018, the Statement of Profit and Loss and the Cash Flow Statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters in sub-section (5) of Section 134 of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes the maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these standalone financial statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under sub-section (10) of Section 143 of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India;

- a) in the case of the Balance Sheet, of the state of affairs of the Company as at 31st March, 2018;
- b) in the case of the Statement of Profit and Loss, of the profit for the year ended on that date; and
- c) in the case of the Cash Flow Statement, of the cash flows for the year ended on that date.

Emphasis of Matters

There are no matters in the Notes to the financial statements requiring specific emphasis.

Report on Other Legal and Regulatory Requirements

- 1) As required by the Companies (Auditor's Report) Order, 2018 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- 2) As required by sub-section (3) of Section 143 of the Act, we report, to the extent applicable, that:
 - a) We have sought and obtained all the information and the explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

- b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c) The Balance Sheet and the Statement of Profit and Loss dealt with by this Report are in agreement with the books of account.
- d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
- e) On the basis of the written representations received from the Directors of the Company as on 31st March, 2018 taken on record by the Board of Directors, none of the Directors is disqualified as on 31st March, 2018, from being appointed as a Director in terms of sub-section (2) of Section 164 of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, the provisions of Section 143(3)(i) of the Act is not applicable to the Company in terms of Notification dated 13-06-2017 of the Ministry of Corporate Affairs, Government of India.
- g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us :
- i. The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses requiring provision as required under the applicable law or accounting standards.
 - iii. There were no amounts which required to be transferred to the Investor Education and Protection Fund by the Company during the year under audit.

(i) (a) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

(b) According to the best of our information and the explanations given to us, all the fixed assets of the Company have been physically verified by the management at reasonable intervals during the year. No material discrepancies were noticed on such verification.

(c) According to the best of our information and the explanations given to us, the title deeds of immovable properties, to the extent applicable, owned by the Company are held in the name of the Company.

(ii) The inventory of the Company has been physically verified during the year by the management. In our opinion, the frequency of verification is reasonable. The discrepancies noticed on verification between the physical stocks and the book records were not material in so far as it appears from our examination of the books.

(iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the Register maintained under Section 189 of the Companies Act, 2013.

(iv) In our opinion and according to the information and the explanations given to us, in respect of loans, investments, guarantees and security, the provisions of Sections 185 and 186 of the Companies Act, 2013 have been complied with.

(v) According to the information and the explanations given to us, the Company has not accepted any deposit as defined under Sections 73 to 76 of the Companies Act, 2013 and the rules framed there under, during the year under review.

(vi) As far as we are aware, the Central Government has not specified the maintenance of cost records by the Company under sub-section (1) of Section 148 of the Companies Act, 2013.

(vii) (a) In our opinion and according to the information and the explanations given to us, the Company has been generally regular during the year under review in depositing the undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities, wherever applicable. On the basis of the verification of the books of account and other relevant records, the scheme and rules cess are not applicable to the Company.

(b) According to the information and the explanations given to us, there are no dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax which have not been deposited on account of any dispute.

(b) According to the information and the explanations given to us, there are no dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax which have not been deposited on account of any dispute.

(viii) In our opinion and according to the information and the explanations given to us, the Company has not defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders.

(ix) In our opinion and according to the information and the explanations given to us, moneys raised by way of term loans were applied for the purposes for which those are raised. The Company has not raised any monies by way of initial public offer or further public offer (including debt instruments).

(x) According to the information and the explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.

(xi) In our opinion, managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Companies Act, 2013, wherever applicable.

(xii) The Company is not a Nidhi Company and hence the question of compliance with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and also the maintenance of ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability, does not arise.

(xiii) In our opinion, all transactions with the related parties are in compliance with Sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the financial statements etc., as required by the applicable accounting standards.

(xiv) According to the information and the explanations given to us, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with Directors or persons connected with him during the year under review in terms of Section 192 of Companies Act, 2013.

(xvi) In our opinion and according to the information and the explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

INDEPENDENT AUDITORS' REPORT

To
The Members
WattSun Energy India Private Limited
TC: 36/38(1), Aiswarya Tower, First Floor, Chackai
TRIVANDRUM - 695 024

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **WattSun Energy India Private Limited** ("the Company"), which comprise the Balance Sheet as at 31 March, 2019, the Statement of Profit and Loss, the Cash Flow Statement for the year then ended and notes to the financial statement including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of state of affairs of the Company as at 31st March, 2019 and the profit and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of

appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is included in **Annexure A** of this Auditor's Report. This description, which is located at page number 4, forms part of our Auditor's Report.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2017 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the **Annexure B** a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable. This statement, which is located at page number 5, forms part of our Auditor's Report.
2. As required by Section 143(3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) According to the information and explanations given to us, the Company has no Branch Offices within the meaning of Section 143(8) of the Act.

- (d) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
- (e) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
- (f) On the basis of the written representations received from the Directors of the Company as on 31st March, 2019 taken on record by the Board of Directors, none of the Directors is disqualified as on 31st March, 2019 from being appointed as a director in terms of Section 164(2) of the Act.
- (g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, the provisions of Section 143(3)(i) of the Act is not applicable to the Company in terms of Notification dated 13-06-2017 of the Ministry of Corporate Affairs, Government of India.
- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us :
- i. The Company does not have any pending litigations which would impact its financial position.
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses requiring provision as required under the applicable law or accounting standards.
 - iii. There were no amounts which required to be transferred to the Investor Education and Protection Fund by the Company during the year under audit.

As part of an audit in accordance with Standards on Auditing (SAs), we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. Our conclusions are based on the audit evidence obtained up to the date of our Auditors' Report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

(i) (a) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

(b) According to the best of our information and the explanations given to us, all the fixed assets of the Company have been physically verified by the management at reasonable intervals during the year. No material discrepancies were noticed on such verification.

(c) According to the best of our information and the explanations given to us, the title deeds of immovable properties, to the extent applicable, owned by the Company are held in the name of the Company.

(ii) The inventory of the Company has been physically verified during the year by the management. In our opinion, the frequency of verification is reasonable. The discrepancies noticed on verification between the physical stocks and the book records were not material in so far as it appears from our examination of the books.

(iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the Register maintained under Section 189 of the Companies Act, 2013.

(iv) In our opinion and according to the information and the explanations given to us, in respect of loans, investments, guarantees and security, the provisions of Sections 185 and 186 of the Companies Act, 2013 have been complied with.

(v) According to the information and the explanations given to us, the Company has not accepted any deposit as defined under Sections 73 to 76 of the Companies Act, 2013 and the rules framed there under, during the year under review.

(vi) As far as we are aware, the Central Government has not specified the maintenance of cost records by the Company under sub-section (1) of Section 148 of the Companies Act, 2013.

(vii) (a) In our opinion and according to the information and the explanations given to us, the Company has been generally regular during the year under review in depositing the undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. On the basis of the verification of the books of account and other relevant records, the scheme and rules cess are not applicable to the Company.

(b) According to the information and the explanations given to us, there are no dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax which have not been deposited on account of any dispute.

(viii) In our opinion and according to the information and the explanations given to us, the Company has not defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders.

(ix) In our opinion and according to the information and the explanations given to us, moneys raised by way of term loans were applied for the purposes for which those are raised. The Company has not raised any monies by way of initial public offer or further public offer (including debt instruments).

(x) According to the information and the explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.

(xi) In our opinion, managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Companies Act, 2013, wherever applicable.

(xii) The Company is not a Nidhi Company and hence the question of compliance with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and also the maintenance of ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability, does not arise.

(xiii) In our opinion, all transactions with the related parties are in compliance with Sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the financial statements etc., as required by the applicable accounting standards.

(xiv) According to the information and explanations given to us, the Company has allotted 90,000 Equity Shares of Rs.10 each of the Company to its existing member. The company has not made any other preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with Directors or persons connected with him during the year under review in terms of Section 192 of Companies Act, 2013.

(xvi) In our opinion and according to the information and the explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

Place of Signature: Trivandrum.
Date : 29-06-2019.

INDEPENDENT AUDITORS' REPORT

To the Members of 'WattSun Energy India Private Limited'

Opinion

We have audited the financial statements of **WattSun Energy India Private Limited** ("the Company") which comprise the Balance Sheet as at 31st March, 2020, the Statement of Profit and Loss, the Cash Flow Statement for the year then ended and notes to the financial statement including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- i) In the case of Balance Sheet, of the state of affairs of the Company as at 31st March, 2020; and
- ii) In the case of Statement of Profit and Loss, of the profit for the year ended on that date; and
- iii) In the case of Cash Flow Statement, of the cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted company.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Emphasis of matter

We draw attention of the shareholders to Note No.22 of the accompanying financial statements regarding outbreak of the COVID-19 pandemic and the consequential lock-down restrictions imposed by the Government, which, as per the assessment of the management, has not significantly impacted the operations and financial position of the Company.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is included in **Annexure A** of this Auditor's Report. This description, which is located at page number 4, forms part of our Auditor's Report.

Report on Other Legal and Regulatory Requirements

1. As required by Companies (Auditor's Report) Order, 2017 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the "**Annexure B**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable. This statement, which is located at page number 5, forms part of our Auditor's Report.
2. As required by Section 143 (3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) According to the information and explanations given to us, the Company has no Branch Offices within the meaning of Section 143(8) of the Act.
 - (d) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
 - (e) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

- (f) On the basis of the written representations received from the Directors of the Company as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164(2) of the Act.
- (g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, the provisions of Section 143(3)(i) of the Act is not applicable to the Company in terms of Notification dated 13-06-2017 of the Ministry of Corporate Affairs, Government of India.
- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- i) The Company does not have any pending litigations which would impact its financial position.
 - ii) The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses requiring provision as required under the applicable law or accounting standards.
 - iii) There were no amounts which required to be transferred to the Investor Education and Protection Fund by the Company during the year under audit.

INDEPENDENT AUDITORS' REPORT

To the Members of 'Wattsun Energy India Private Limited'

Opinion

We have audited the financial statements of **Wattsun Energy India Private Limited** ("the Company") which comprise the Balance Sheet as at 31st March, 2021, the Statement of Profit and Loss, the Cash Flow Statement for the year then ended and notes to the financial statement including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- i) In the case of Balance Sheet, of the state of affairs of the Company as at 31st March, 2021; and
- ii) In the case of Statement of Profit and Loss, of the profit for the year ended on that date; and
- iii) In the case of Cash Flow Statement, of the cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules

there under and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted company.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexure to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Emphasis of matter

We draw attention of the shareholders regarding outbreak of the COVID-19 pandemic and the consequential lock-down restrictions imposed by the Government, which, as per the assessment of the management, has not significantly impacted the operations and financial position of the Company.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is included in **Annexure A** of this Auditor's Report. This description forms part of our Auditor's Report.

Report on Other Legal and Regulatory Requirements

1. As required by Companies (Auditor's Report) Order, 2017 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the "**Annexure B**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable. This statement, which is located at page number 5, forms part of our Auditor's Report.
2. As required by Section 143 (3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) According to the information and explanations given to us, the Company has no Branch Offices within the meaning of Section 143(8) of the Act.
 - (d) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
 - (e) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

- (f) On the basis of the written representations received from the Directors of the Company as on 31st March, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2021 from being appointed as a director in terms of Section 164(2) of the Act.
- (g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, the provisions of Section 143(3)(i) of the Act is not applicable to the Company in terms of Notification dated 13-06-2017 of the Ministry of Corporate Affairs, Government of India.
- (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
- i) The Company does not have any pending litigations which would impact its financial position.
 - ii) The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses requiring provision as required under the applicable law or accounting standards.
 - iii) There were no amounts which required to be transferred to the Investor Education and Protection Fund by the Company during the year under audit.

“ANNEXURE A” TO THE AUDITORS’ REPORT
(Referred to in Audit Report of even date)

To the Members of ‘Wattsun Energy India Private Limited’

As part of an audit in accordance with Standards on Auditing (SAs), we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

“ANNEXURE B” TO THE AUDITORS’ REPORT
(Referred to in Audit Report of even date)

To the Members of ‘Wattsun Energy India Private Limited’

1. (a) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

(b) According to the best of our information and the explanations given to us, all the fixed assets of the company have been physically verified by the management at reasonable intervals during the year. No material discrepancies were noticed on such verification.

(c) According to the best of our information and the explanations given to us, the title deeds of immovable properties, to the extent applicable, owned by the Company are held in the name of the Company.
2. The inventory of the Company has been physically verified during the year by the management. In our opinion, the frequency of verification is reasonable. The discrepancies noted on verification between the physical stocks and the book records were not material in so far as it appears from our examination of the books.
3. The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the Register maintained under Section 189 of the Companies Act, 2013.
4. In our opinion and according to the information and explanations given to us, in respect of loans, investments, guarantees and security, the provisions of Sections 185 and 186 of the Companies Act, 2013 have been complied with.
5. According to the information and explanations given to us, the company has not accepted any deposit as defined under Sections 73 to 76 of the Companies Act, 2013 and the rules framed there under, during the year under review.
6. As far as we are aware, the Central Government has not specified the maintenance of cost records by the Company under sub-section (1) of Section 148 of the Companies Act, 2013.

7. (a) In our opinion and according to the information and the explanations given to us, the Company has been generally regular during the year under review in depositing the undisputed statutory dues including provident fund, employees' state insurance, income-tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and any other statutory dues to the appropriate authorities. On the basis of the verification of the books of account and other relevant records, the scheme and rules cess are not applicable to the Company.
- (b) According to the information and the explanations given to us, there are no dues of income tax or sales tax or service tax or duty of customs or duty of excise or value added tax which have not been deposited on account of any dispute.
8. In our opinion and according to the information and the explanations given to us, the Company has not defaulted in repayment of loans or borrowing to a financial institution, bank, Government or dues to debenture holders.
9. In our opinion and according to the information and the explanations given to us, moneys raised by way of term loans were applied for the purposes for which those are raised. The Company has not raised any monies by way of initial public offer or further public offer (including debt instruments).
10. According to the information and the explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.
11. In our opinion, managerial remuneration has been paid or provided in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Companies Act, 2013, wherever applicable.
12. The Company is not a Nidhi Company and hence the question of compliance with the Net Owned Funds to Deposits in the ratio of 1:20 to meet out the liability and also the maintenance of ten per cent unencumbered term deposits as specified in the Nidhi Rules, 2014 to meet out the liability, does not arise.
13. In our opinion, all transactions with the related parties are in compliance with Sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the financial statements etc., as required by the applicable accounting standards.

14. According to the information and explanations given to us, the Company has not entered into any non-cash transactions with Directors or persons connected with him during the year under review in terms of Section 192 of Companies Act, 2013.
15. In our opinion and according to the information and the explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

INDEPENDENT AUDITORS' REPORT

To the Members of 'Wattsun Energy India Private Limited'

Opinion

We have audited the financial statements of **Wattsun Energy India Private Limited** ("the Company") which comprise the Balance Sheet as at 31st March, 2022, the Statement of Profit and Loss, the Cash Flow Statement for the year then ended and notes to the financial statement including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- i) In the case of Balance Sheet, of the state of affairs of the Company as at 31st March, 2022; and
- ii) In the case of Statement of Profit and Loss, of the profit for the year ended on that date; and
- iii) In the case of Cash Flow Statement, of the cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the

relevant to our audit of the financial statements under the provisions of the Act and the Rules there under and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted company.

Information other than the financial statements and auditors' report thereon

The Company's board of directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexure to Board's Report, Business Responsibility Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an Auditor's Report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is included in **Annexure A** of this Auditor's Report. This description forms part of our Auditor's Report.

Report on Other Legal and Regulatory Requirements

1. As required by Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the "**Annexure B**" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable. This statement, which is located at page number 5, forms part of our Auditor's Report.
2. As required by Section 143 (3) of the Act, we report that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - (c) According to the information and explanations given to us, the Company has no Branch Offices within the meaning of Section 143(8) of the Act.
 - (d) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
 - (e) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
 - (f) On the basis of the written representations received from the Directors of the Company as on 31st March, 2022 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2022 from being appointed as a director in terms of Section 164(2) of the Act.
 - (g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, the provisions of Section 143(3)(i) of the Act is not applicable to the Company in terms of Notification dated 13-06-2017 of the Ministry of Corporate Affairs, Government of India.
 - (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

- i) The Company does not have any pending litigations which would impact its financial position.
- ii) The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses requiring provision as required under the applicable law or accounting standards.
- iii) There were no amounts which required to be transferred to the Investor Education and Protection Fund by the Company during the year under audit.

The management has represented that, to the best of its knowledge and belief, other than as disclosed in the notes to the accounts, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the company to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;

Based on the audit procedures which we considered reasonable and appropriate in the circumstances, nothing has come to their notice that has caused them to believe that the representations under sub-clause (i) and (ii) contain any material mis-statement.

The company has not declared or paid any dividend during the year in contravention of the provisions of section 123 of the Companies Act, 2013.

With respect to the matter to be included in the Auditors' Report under Section 197(16) of the Act, in our opinion and according to the information and explanations given to us, the limit prescribed by section 197 for maximum permissible managerial remuneration is not applicable to a private limited company.

“ANNEXURE A” TO THE AUDITORS’ REPORT
(Referred to in Audit Report of even date)

To the Members of ‘Wattsun Energy India Private Limited’

As part of an audit in accordance with Standards on Auditing (SAs), we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company’s ability to continue as a going concern. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements including the disclosures and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

“ANNEXURE B” TO THE AUDITORS’ REPORT
(Referred to in Audit Report of even date)

To the Members of ‘Wattsun Energy India Private Limited’

Report as required by the Companies (Auditor’s Report) Order, 2020 (“the Order”), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013 (Refer to in paragraph 1 under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date) With reference to the Annexure A referred to in the Independent Auditors’ Report to the members of the Company on the financial statements for the year ended March 31, 2022, we report the following:

- (i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, plant and equipment and proper records relating to Intangible assets.
- (b) According to the information and explanations given to us, all the Property, plant and equipment were physically verified at reasonable intervals. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.
- (c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, there are no immovable properties held in the name of the Company.
- (d) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not revalued its Property, plant and equipment (including Right-of-use assets) or Intangible assets or both during the year.
- (e) According to the information and explanations given to us and on the basis of our examination of the records of the Company, there are no proceedings initiated or pending against the Company for holding any benami property under the Prohibition of Benami Property Transactions Act, 1988 and rules made there under.

(ii) (a) As explained to us the management has conducted physical verification of inventories at reasonable intervals. Based on the information and explanation given to us we are of the opinion that the coverage and procedure of such verification by the management is appropriate. We were informed that that no discrepancies in excess of 10% or more in the aggregate for each class of inventory were noticed.

(b) The company has not been sanctioned with any working capital limits from banks or financial institutions and therefore this clause is not applicable.

(iii) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any investments, provided guarantee or security or granted any loans or advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnerships or any other parties during the year and hence Clauses (iii) (a) to (iii) (f) are not applicable to the company.

(iv) According to the information and explanations given to us and on the basis of our examination of the records, the Company has not given any loans, investments or provided any guarantee or security as specified under Section 185 of the Companies Act, 2013 and the Company has not provided any guarantee or security as specified under Section 186 of the Companies Act, 2013.

(v) The Company has not accepted any deposits or amounts which are deemed to be deposits from the public as per the provisions of sections 73 to 76 or any other relevant provisions of the Companies Act and the rules made thereunder. Accordingly, clause 3(v) of the Order is not applicable.

(vi) The Company is not a manufacturing concern and hence clause 3(vi) of the Order is not applicable.

(vii) (a) The Company is generally regular in depositing undisputed applicable statutory dues to the appropriate authorities during the year. According to the information and explanations given to us, no undisputed amounts payable in respect of the statutory dues were in arrears as at March 31, 2022 for a period of more than six months from the date on when they become payable.

(b) As informed, there are no dues of Income Tax, Sales Tax, Service Tax, Customs Duty, Excise Duty, VAT, GST, etc. outstanding on account of any dispute.

(viii) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not been assessed in any of the tax assessments U/s 1961 with incomes/expenses that were not accounted in the Books of account.

(ix) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company did not have any loans or borrowings from any lender other than the loans repayable on demand from the Directors. Considering the working capital requirements of the Company, the Directors had not demanded the loans as on 31st March 2022.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not been declared a wilful defaulter by any bank or financial institution or government or government authority.

(c) According to the information and explanations given to us by the management, the Company has not obtained any term loans. Accordingly, clause 3(ix)(c) of the Order is not applicable.

(d) the company has not raised funds on short term basis and utilised for long term purposes.

(e) The Company does not have any subsidiaries, associates or joint ventures and accordingly, clause 3(ix)(e) and (f) of the Order are not applicable.

(x) (a) The Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) during the year. Accordingly, clause 3(x)(a) of the Order is not applicable.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year as per requirements of the section 42 and section 62 of the Companies Act, 2013. Accordingly, clause 3(x)(b) of the Order is not applicable.

(xi) (a) Based on the examination of the books and records of the Company and according the information and explanations given to us, considering the principles of materiality outlined in Standards on Auditing, we report that no fraud by the Company or on the Company has been noticed or reported during the course of the audit.

(b) According to the information and explanations given to us, no report under sub-section (12) of Section 143 of the Companies Act, 2013 has been filed by the auditors in Form ADT-4 as prescribed under Rule 13 of Companies (Audit and Auditors) Rules, 2014 with the Central Government.

(c) According to the information and explanations given to us, no whistle blower complaints were received by the Company during the year and hence clause (xi)(c) is not applicable.

(xii) According to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, clauses 3(xii) (a) to (c) of the Order are not applicable.

(xiii) In our opinion and according to the information and explanations given to us, the transactions with related parties are in compliance with Sections 177 and 188 of the Companies Act, 2013, where applicable, and the details of the related party transactions have been disclosed in the standalone financial statements as required by the applicable Indian Accounting Standards.

(xiv)(a) The company does not maintain an internal audit system, therefore clause (xiv)(a) is not applicable.

(b) No internal audit reports were issued during the fin./yr. and hence clause (xiv) (b) is not applicable.

(xv) In our opinion and according to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected to its directors and hence, provisions of Section 192 of the Companies Act, 2013 are not applicable to the Company.

(xvi) (a) The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, clauses 3(xvi)(a) and 3(xvi)(b) of the Order are not applicable.

(c) The Company is not a Core Investment Company (CIC) as defined in the regulations made by the Reserve Bank of India. Accordingly, clause 3(xvi)(c) of the Order is not applicable.

(d) According to the information and explanations provided to us during the course of audit, the Group does not have any CIC. Accordingly, the requirements of clause 3(xvi)(d) are not applicable.

(xvii) The Company has not incurred any cash losses during the fin./yrs. 2020-21 and 2021-22.

(xviii) There has been no resignation of the statutory auditors during the year. Accordingly, clause 3(xviii) of the Order is not applicable.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information accompanying the financial statements, our knowledge of the Board of Directors and management plans and based on our examination of the evidence supporting the assumptions, there does not exist a material uncertainty as on the date of the audit report that the Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the Balance Sheet date.

(xx) In our opinion and according to the information and explanations given to us, subsection (5) of Section 135 of the Companies Act, 2013 is not applicable to the company. Accordingly, clauses 3(xx)(a) and 3(xx)(b) of the Order are not applicable.

(xxi) Consolidated Financial Statements are not applicable to this Company. Accordingly, clause 3(xxi) of the Order is not applicable.

 Name of Related Parties and Description of Relationship:
 Key Management Personnel: Terance Alex (DIN: 06808744)
 Jimmy Siluvayyan (DIN: 06808773)

- (xiii) The input tax credit available to the Company under the Goods and Services Tax Act, 2017 is not fully claimed in the accounts of the Company due to the non-availability of relevant data with the Company and also reportedly due to the non-filing of the data by the concerned suppliers and service providers. The amount of purchases and the relevant expenditure are over-stated to the extent of such input tax credits and the amount so involved are not determined by the Company.
- (xiv) Dues to Micro, Small and Medium enterprises could not be identified as the Company did not get any notification to that effect.
- (xv) (a) The Fixed Deposit for Rs. 3,50,000 with State Bank of India has a lien in favour of Kerala Financial Corporation towards security.
 (b) The Fixed Deposit for Rs. 2,00,000 with State Bank of India has a lien in favour of The Director, ANERT towards security.
 (c) The Fixed Deposit for Rs. 12,188 with the Treasury Savings Bank has a lien in favour of Kerala Irrigation Infrastructure Development Corporation Ltd towards security.
 (d) The Bank Guarantee for Rs. 4,75,000 with State Bank of India has a lien in favour of ANERT towards security.
- (xvi) Balances of parties other than Banks are pending confirmation.
- (xvii) Since there are no dilutive options or other dilutive potential equity shares of the Company, the basic and diluted Earnings Per Share of the Company are the same.
- (xviii) Previous year figures have been re-grouped or recast wherever necessary to suit current year's disclosure and lay out.

29 JUN 2019

**SIGNIFICANT ACCOUNTING POLICIES AND NOTES
FORMING PART OF BALANCE SHEET AS AT 31st MARCH, 2019 AND
STATEMENT OF PROFIT AND LOSS FOR THE YEAR ENDED ON THAT DATE**

1 SIGNIFICANT ACCOUNTING POLICIES

- The following significant accounting policies have been adopted by the Company during the year:-
- Mercantile system of accounting is followed and revenue is recognized on accrual basis.
 - Depreciation is provided on Property, Plant and Equipment on written down value method at the rates prescribed in Schedule II of Companies Act, 2013.
 - No provision has been made in the accounts for Provident Fund, Employees State Insurance, Employees Gratuity and Bonus, as the relative provisions are not applicable to the Company.
 - Tax on income for the current period is determined on the basis of taxable income and tax credits computed in accordance with the provisions of Income Tax Act, 1961 and based on the expected outcome of assessments. Deferred tax is recognized on timing difference, in respect of depreciation on fixed assets, between the income accounted in financial statements and the taxable income for the year and quantified using the tax rates and laws enacted as on date of the Balance Sheet and in accordance with the Accounting Standard - 22 issued by the Council of the Institute of Chartered Accountants of India.
 - All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products of the Company and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.
 - The financial statements have been prepared under the historical cost convention, in accordance with the generally accepted accounting principles and the provisions of the Companies Act, 2013 as consistently adopted by the Company.
 - Preliminary expenses are amortised annually at 10%.

22 NOTES TO BALANCE SHEET AND STATEMENT OF PROFIT AND LOSS**1 Share Capital**

- (a) The number and amount of shares authorized:

Number	Amount (Rs. Ps.)
100,000	1,000,000.00

Current Year	Previous Year
100,000	100,000
1,000,000.00	1,000,000.00

- (b) (1) The number of shares issued, subscribed and fully paid

Number	Amount (Rs. Ps.)
100,000	1,000,000.00

Current Year	Previous Year
100,000	100,000
1,000,000.00	1,000,000.00

- (2) The number of Equity Shares, issued & subscribed but not fully paid

Number	Amount (Rs. Ps.)
0	0

Current Year	Previous Year
0	0

- (c) Par value per Equity Share

Amount (Rs. Ps.)
10.00

Current Year	Previous Year
10.00	10.00

- (d) Reconciliation of shares:

Number of Equity Shares at the beginning of the period	Number of Equity Shares allotted as fully paid during the period	Number of Equity Shares at the end of the period
10,000	90,000	100,000

Current Year	Previous Year
10,000	10,000
90,000	0
100,000	10,000

- (e) The rights, preferences and restrictions attaching to each class of shares including restrictions on the distribution of dividends and the repayment of capital

Current Year	Previous Year
Nil	Nil

- (f) Shares in respect of each class in the Company held by its holding company or its ultimate holding company including shares held by or by subsidiaries or associates of the holding company or the ultimate holding company in aggregate

Current Year	Previous Year
0	0

- (g) Shares in the Company held by each shareholder holding more than 5 percent shares specifying the number of shares held:

1) Terence Alex	2) Jimmy Siluvayyan
99,000	1,000

Current Year	Previous Year
99,000	9,000
1,000	1,000

- (h) Shares reserved for issue under options and contracts/commitments for the sale of shares/disinvestment, including the terms and amounts

Current Year	Previous Year
0	0

- (i) For the period of five years immediately preceding the date as at which the Balance Sheet is prepared:

Aggregate number and class of shares allotted as fully paid up pursuant to contract(s) without payment being received in cash	Aggregate number and class of shares allotted as fully paid up by way of bonus shares	Aggregate number and class of shares bought back
0	0	0

Current Year	Previous Year
0	0
0	0
0	0

- (j) Terms of any securities convertible into equity/preference shares issued along with the earliest date of conversion in descending order starting from the farthest such date.

Current Year	Previous Year
Not Applicable	Not Applicable

- (k) Calls unpaid:-

Aggregate value of calls unpaid by Directors	Aggregate value of calls unpaid by other officers
0.00	0.00

Current Year	Previous Year
0.00	0.00
0.00	0.00

- (l) Forfeited shares (amount originally paid up)

Current Year	Previous Year
0.00	0.00

3 Reserves and Surplus

- Capital Reserves
- Capital Redemption Reserve
- Securities Premium
- Debt Redemption Reserve
- Revaluation Reserve
- Share Options Outstanding Account
- Other Reserves

Total

Key Management Personnel: Terence Alex (DIN: 06808744)
Jimmy Siluvayyan (DIN: 06808773)

Relatives of Key Management Personnel:

- (xiii) The input tax credit available to the Company under the Goods and Services Tax Act, 2017 is not fully claimed in the accounts of the Company due to the non-availability of relevant data with the Company and also reportedly due to the non-filing of the data by the concerned suppliers and service providers. The amount of purchases and the relevant expenditure are over-stated to the extent of such input tax credits and the amount so involved are not determined by the Company.
- (xiv) Dues to Micro, Small and Medium enterprises could not be identified as the Company did not put any notification to that effect.
- (xv) (a) The Fixed Deposit for Rs.3,50,000 with State Bank of India has a lien in favour of Kerala Financial Corporation towards security.
- (b) The Fixed Deposit for Rs.2,00,000 with State Bank of India has a lien in favour of The Director, ANERT towards security.
- (c) The Bank Guarantee for Rs.4,75,000 with State Bank of India has a lien in favour of ANERT towards security.
- (xvi) Balances of parties other than Banks are pending confirmation.
- (xvii) Since there are no dilutive options or other dilution potential equity shares of the Company, the basic and diluted Earnings Per Share of the Company are the same.
- (xviii) Previous year figures have been re-grouped or recast wherever necessary to suit current year's disclosure and lay out.

22.Impact of COVID-19

Following the global outbreak of Coronavirus (COVID-19) pandemic, lock-down restrictions were imposed by the Government during the last week of the financial year ended March 31, 2020. However, as per the assessment of the management, there has been no significant impact on the operations and financial position of the Company for the year due to the lock-down restrictions.

(i) Net profit ratio	Net Profit	Sales	0.34%	0.65%	-48%	One major project executed during the year resulted in loss
(j) Return on Capital employed	Earnings before interest and tax	Capital Employed (Fixed Assets + Working Capital)	8.16%	4.97%	64%	Improved earnings due to increase in turnover by nearly 3 times
(k) Return on investment	Net Profit after Tax	Total Assets including Debt Balance in Reserves & Surplus	0.24%	0.61%	-60%	Reduction in RoI is mainly on account of Deferred Tax Expense factor

Ratios not applicable since the numerator or denominator to calculate the ratio does not exist in financial statements.

13. Compliance with approved Scheme(s) of Arrangements

No Scheme of Arrangement till date

14. Utilisation of Borrowed funds and share premium:

The company has not advanced or loaned or invested funds in any of the intermediar

For and on behalf of the Board

	iii	Expenditure wholly and exclusively in connection with transfer	biii	0
	iv	Total (bi + bii + biii)	biv	0
c	Balance (aiii – biv)			1c 0
d	Deduction under section 54D/ 54G/54GA (Specify details in item D below)			
	S. No.	Nature	Amount	
	Total			1d 0
e	Short-term Capital Gains on Immovable property (1c - 1d)			A1e 0
2	From slump sale			
a	Full value of consideration			2a 0
b	Net worth of the under taking or division			2b 0
c	Short term capital gains from slump sale(2a-2b)			A2c 0
4	For NON-RESIDENT, not being an FII- from sale of shares or debentures of an Indian company (to be computed with foreign exchange adjustment under first proviso to section 48)			
a	STCG on transactions on which securities transaction tax (STT) is paid			A4a 0
b	STCG on transactions on which securities transaction tax (STT) is not paid			A4b 0
5	For NON-RESIDENTS- from sale of securities (other than those at A3 above) by an FII as per section 115AD			
a	i	In case securities sold include shares of a company other than quoted shares, enter the following details		
	a	Full value of consideration received/receivable in respect of unquoted share	5aia	0
	b	Fair market value of unquoted shares determined in the prescribed manner	5aib	0
	c	Full value of consideration in respect of unquoted shares adopted as per section 50CA for the purpose of Capital Gains (higher of a or b)	5aic	0
	ii	Full value of consideration in respect of securities other than unquoted shares	5aia	0
	iii	Total (ic + ii)	5aiii	0
b	Deductions under section 48			
	i	Cost of acquisition without indexation	bi	0

1627

	ii	Cost of improvement without indexation			bii	0	
	iii	Expenditure wholly and exclusively in connection with transfer			biii	0	
	iv	Total (i + ii + iii)			biv	0	
c	Balance (5aiii – biv)			5c	0		
d	Loss to be disallowed u/s 94(7) or 94(8)- for example if security bought/acquired within 3 months prior to record date and dividend/income/bonus units are received, then loss arising out of sale of such security to be ignored (Enter positive value only)			5d	0		
e	Short-term capital gain on securities (other than those at A3 above) by an FII (5c +5d)			A5e	0		
6	From sale of assets other than at A1 or A2 or A3 or A4 or A5 above						
a	i	In case assets sold include shares of a company other than quoted shares, enter the following details					
		a	Full value of consideration received/receivable in respect of unquoted share		6aia	0	
		b	Fair market value of unquoted shares determined in the prescribed manner		6aib	0	
		c	Full value of consideration in respect of unquoted shares adopted as per section 50CA for the purpose of Capital Gains (higher of a or b)		6ic	0	
	ii	Full value of consideration in respect of assets other than unquoted shares			6aii	0	
	iii	Total (ic + ii)			6aiii	0	
b	Deductions under section 48						
	i	Cost of acquisition without indexation			bi	0	
	ii	Cost of Improvement without indexation			bii	0	
	iii	Expenditure wholly and exclusively in connection with transfer			biii	0	
	iv	Total (i + ii + iii)			biv	0	
c	Balance (6aiii – biv)			6c	0		
d	In case of asset (security/unit) loss to be disallowed u/s 94(7) or 94(8)- for example if asset bought/acquired within 3 months prior to record date and dividend/income/bonus units are received, then loss arising out of sale of such asset to be ignored (Enter positive value only)			6d	0		
e	Deemed short term capital gains on depreciable assets (6 of schedule- DCG)			6e	0		
f	Deduction under section 54D/54G/54GA			6f			
	S. No.	Nature			Amount		
	Total			6f	0		
g	STCG on assets other than at A1 or A2 or A3 or A4 or A5 above (6c + 6d + 6e – 6f)			A6g	0		
7	Amount Deemed to be short-term capital gains						
a	Whether any amount of unutilized capital gain on asset transferred during the previous years shown below was deposited in the Capital Gains Accounts Scheme within due date for that year? If yes, then provide the details below					NA	
	Sl.No.	Previous year in which asset transferred	Section under which deduction claimed in that year	New asset acquired/constructed		Amount not used for new asset or remained unutilized in Capital gains account (X)	
				Year in which asset acquired/constructed	Amount utilised out of Capital Gains account		
b	Amount deemed to be short term capital gains u/s 54D/54G/54GA, other than at 'a'						

Amount deemed to be short term capital gains (Xi + b)										A7	0	
8	Amount of STCG included in A1-A7 but not chargeable to tax or chargeable at special rates in India as per DTAA											
	Sl. No.	Amount of income	Item no. A1 to A7 above in which included	Country Name, Code	Article of DTAA	Rate as per Treaty (enter NIL, if not chargeable)	Whether TRC obtained (Y/N)	Section of I.T. Act	Rate as per I.T. Act	Applicable rate [lower of (6) or (9)]		
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)		
	a	Total amount of STCG not chargeable to tax under DTAA								A8a	0	
	b	Total amount of STCG chargeable at special rates in India as per DTAA								A8b	0	
9	Total short term capital gain (A1e+ A2c+ A3e+ A4a+ A4b+ A5e+ A6g+A7-A8)										A9	0
B	Long-term capital gain (LTCG) (Sub-items 5 & 6 are not applicable for residents)											
1	From sale of land or building or both											
	a	i	Full value of consideration received/receivable							ai	0

15	Proportionate aggregate depreciation allowable in the event of succession, amalgamation, demerger etc. (out of column 14)							
16	Expenditure incurred in connection with transfer of asset/ assets							

17	Capital gains/ loss under section 50 (5 + 8 -3-4 -7 -16)* (enter negative only if block ceases to exist)						
18	Written down value on the last day of previous year* (6+ 9 -12)(enter 0 if result is negative)						

Schedule DEP - Summary of depreciation on assets(Other than assets on which full capital expenditure is allowable as deduction under any other section)

1	Plant and machinery			
	a	Block entitled for depreciation @ 15 per cent (Schedule DPM - 17i or 18i as applicable)	1a	525317
	b	Block entitled for depreciation @ 30 per cent (Schedule DPM - 17ii or 18ii as applicable)	1b	0
	c	Block entitled for depreciation @ 40 per cent (Schedule DPM - 17iii or 18iii as applicable)	1c	49792
	d	Total depreciation on plant and machinery (1a + 1b + 1c)	1d	575109
2	Building (not including land)			
	a	Block entitled for depreciation @ 5 per cent (Schedule DOA- 14ii or 15ii as applicable)	2a	0
	b	Block entitled for depreciation @ 10 per cent (Schedule DOA- 14iii or 15iii as applicable)	2b	0
	c	Block entitled for depreciation @ 40 per cent (Schedule DOA- 14iv or 15iv as applicable)	2c	0
	d	Total depreciation on building (total of 2a + 2b + 2c)	2d	0
3	Furniture and fittings (Schedule DOA- 14v or 15v as applicable)		3	0
4	Intangible assets (Schedule DOA- 14vi or 15vi as applicable)		4	0
5	Ships (Schedule DOA- 14vii or 15vii as applicable)		5	0
6	Total depreciation (1d+2d+3+4+5)		6	575109

Schedule DCG - Deemed Capital Gains on sale of depreciable assets

1	Plant and machinery			
	a	Block entitled for depreciation @ 15 per cent (Schedule DPM - 20i)	1a	
	b	Block entitled for depreciation @ 30 per cent (Schedule DPM – 20ii)	1b	
	c	Block entitled for depreciation @ 40 per cent (Schedule DPM - 20iii)	1c	
	d	Total (1a +1b + 1c)	1d	
2	Building (not including land)			
	a	Block entitled for depreciation @ 5 per cent (Schedule DOA- 17ii)	2a	
	b	Block entitled for depreciation @ 10 per cent (Schedule DOA- 17iii)	2b	
	c	Block entitled for depreciation @ 40 per cent (Schedule DOA- 17iv)	2c	
	d	Total (2a + 2b + 2c)	2d	
3	Furniture and fittings (Schedule DOA- 17v)		3	
4	Intangible assets (Schedule DOA- 17vi)		4	
5	Ships (Schedule DOA- 17vii)		5	
6	Total (1d+2d+3+4+5)		6	

Schedule ESR - Expenditure on scientific Research etc. (Deduction under section 35 or 35CCC or 35CCD)							
Sl.No.	Expenditure of the nature referred to in section (1)		Amount, if any, debited to profit and loss account (2)	Amount of deduction allowable (3)	Amount of deduction in excess of the amount debited to profit and loss account (4) = (3) - (2)		
i	35(1)(i)						
ii	35(1)(ii)						
iii	35(1)(ia)						
iv	35(1)(iii)						
v	35(1)(iv)						
vi	35(2AA)						
vii	35(2AB)						
viii	35CCC						
ix	35CCD						
x	Total						
Schedule CG-Capital Gains							
A	Short-term capital gain (Sub-items 4 & 5 are not applicable for residents)						
	1	From sale of land or building or both (fill up details separately for each property)					
	a	i	Full value of consideration received/receivable			ai	0
		ii	Value of property as per stamp valuation authority			aii	0
		iii	Full value of consideration adopted as per section 50C for the purpose of Capital Gains [in case (aii) does not exceed 1.05 times (ai), take this figure as (ai), or else take (aii)]			aiii	0
	b	Deductions under section 48					
		i	Cost of acquisition without indexation			bi	0
		ii	Cost of Improvement without indexation			bii	0
		iii	Expenditure wholly and exclusively in connection with transfer			biii	0
		iv	Total (bi + bii + biii)			biv	0
	c	Balance (aiii – biv)				1c	0
	d	Deduction under section 54D/ 54G/54GA (Specify details in item D below)					
		S. No.	Nature		Amount		
		Total				1d	0
	e	Short-term Capital Gains on Immovable property (1c - 1d)				A1e	0
	f	In case of transfer of immovable property, please furnish - the following details (see note)					
	Sl No	Name of Buyer(s)	PAN of Buyer(s)	Percentage share	Amount	Address of Property	Pincode
Note 1 : Furnishing of PAN is mandatory, if the tax is deduced under section 194-IA. Note 2 : In case of more than one buyer, please indicate the respective percentage share and amount.							
2	From slump sale						
	a	Full value of consideration				2a	0

1693

	b	Net worth of the under taking or division	2b	0
	c	Short term capital gains from slump sale(2a-2b)	A2c	0
4	For NON-RESIDENT, not being an FII- from sale of shares or debentures of an Indian company (to be computed with foreign exchange adjustment under first proviso to section 48)			
	a	STCG on transactions on which securities transaction tax (STT) is paid	A4a	0
	b	STCG on transactions on which securities transaction tax (STT) is not paid	A4b	0
5	For NON-RESIDENTS- from sale of securities (other than those at A3 above) by an FII as per section 115AD			
	a	i	In case securities sold include shares of a company other than quoted shares, enter the following details	
		a	Full value of consideration received/receivable in respect of unquoted share	5aia 0
		b	Fair market value of unquoted shares determined in the prescribed manner	5aib 0
		c	Full value of consideration in respect of unquoted shares adopted as per section 50CA for the purpose of Capital Gains (higher of a or b)	5aic 0
		ii	Full value of consideration in respect of securities other than unquoted shares	5aia 0
		iii	Total (ic + ii)	5aiii 0
	b	Deductions under section 48		
		i	Cost of acquisition without indexation	bi 0
		ii	Cost of improvement without indexation	bii 0
		iii	Expenditure wholly and exclusively in connection with transfer	biii 0
		iv	Total (i + ii + iii)	biv 0
	c	Balance (5aiii – biv)		5c 0
	d	Loss to be disallowed u/s 94(7) or 94(8)- for example if security bought/acquired within 3 months prior to record date and dividend/income/bonus units are received, then loss arising out of sale of such security to be ignored (Enter positive value only)		5d 0
	e	Short-term capital gain on securities (other than those at A3 above) by an FII (5c +5d)		A5e 0
6	From sale of assets other than at A1 or A2 or A3 or A4 or A5 above			
	a	i	In case assets sold include shares of a company other than quoted shares, enter the following details	
		a	Full value of consideration received/receivable in respect of unquoted share	6aia 0
		b	Fair market value of unquoted shares determined in the prescribed manner	6aib 0
		c	Full value of consideration in respect of unquoted shares adopted as per section 50CA for the purpose of Capital Gains (higher of a or b)	6ic 0
		ii	Full value of consideration in respect of assets other than unquoted shares	6aia 0
		iii	Total (ic + ii)	6aiii 0
	b	Deductions under section 48		
		i	Cost of acquisition without indexation	bi 0
		ii	Cost of Improvement without indexation	bii 0
		iii	Expenditure wholly and exclusively in connection with transfer	biii 0
		iv	Total (i + ii + iii)	biv 0

1694

	c	Balance (6aiii – biv)						6c	0				
	d	In case of asset (security/unit) loss to be disallowed u/s 94(7) or 94(8)- for example if asset bought/acquired within 3 months prior to record date and dividend/income/bonus units are received, then loss arising out of sale of such asset to be ignored (Enter positive value only)						6d	0				
	e	Deemed short term capital gains on depreciable assets (6 of schedule- DCG)						6e	0				
	f	Deduction under section 54D/54G/54GA (Specify details in item D below)						6f					
	S. No.	Nature					Amount						
	Total						6f	0					
	g	STCG on assets other than at A1 or A2 or A3 or A4 or A5 above (6c + 6d + 6e – 6f)						A6g	0				
7	Amount Deemed to be short-term capital gains												
	a	Whether any amount of unutilized capital gain on asset transferred during the previous years shown below was deposited in the Capital Gains Accounts Scheme within due date for that year? If yes, then provide the details below									NA		
		Sl.No.	Previous year in which asset transferred	Section under which deduction claimed in that year	New asset acquired/constructed		Amount not used for new asset or remained unutilized in Capital gains account (X)						
					Year in which asset acquired/constructed	Amount utilised out of Capital Gains account							
	b	Amount deemed to be short term capital gains u/s 54D/54G/54GA, other than at 'a'											
	Total Amount deemed to be short term capital gains (aXi + b)									A7	0		
8	Pass Through Income in the nature of Short Term Capital Gain, (Fill up schedule PTI)(A8a + A8b + A8c)											A8	0
	a	Pass Through Income in the nature of Short Term Capital Gain, chargeable @ 15%									A8a	0	
	b	Pass Through Income in the nature of Short Term Capital Gain, chargeable @ 30%									A8b	0	
	c	Pass Through Income in the nature of Short Term Capital Gain, chargeable at applicable rates									A8c	0	
9	Amount of STCG included in A1-A8 but not chargeable to tax or chargeable at special rates in India as per DTAA												
	Sl. No.	Amount of income	Item no. A1 to A8 above in which included	Country Name,Code	Article of DTAA	Rate as per Treaty(enter NIL, if not chargeable)	Whether TRC obtained (Y/N)	Section of I.T. Act	Rate as per I.T. Act	Applicable rate [lower of (6) or (9)]

Proceedings of the
 Deputy Chief Electrical Inspector
 Thiruvananthapuram
Present: Rafiyuddin K K

Subject: Installation of 200 kWp Grid connected solar installation at the premises of M/s PMS COLLEGE OF DENTAL SCIENCE AND RESEARCH,, Vattappara, Thiruvananthapuram, 695028 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B5-08104/22/EIT dated 27.08.2022
2. Completion report submitted by WATTSUN ENERGY INDIA PVT. LTD., INTERNATIONAL AIRPORT ROAD, CHACKAI, Kerala, 695024 dated received on 27.10.2022
3. Inspection conducted on 03.11.2022

Order No: B5-08104/22/EIT Dated 09-11-2022

Sanction under Section 54 of The Electricity Act-2003, Regulation 32 of the CEA (Measures relating to Safety and Electric Supply) Regulations-2010, Central Electricity Authority (Technical Standards for connectivity of the Distributed Generation Resources) Regulations-2013 and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 is hereby accorded for energisation of the electrical installation covered under the Completion Report read as (2) above and installed at the premises of M/s PMS COLLEGE OF DENTAL SCIENCE AND RESEARCH,, Vattappara, Thiruvananthapuram, 695028 subject to following conditions and as detailed in the annexure appended

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply is absent should be ensured by the owner of solar system and he/she would be solely responsible for any accident in case of failure violation of the same
5. Only authorised person shall be in charge of the operation and maintenance of the installation
6. Consent from licensee shall be obtained for this Solar installation

Phone: 0471 2322934, Email: deci@vsnl.com

**Proceedings of the
Electrical Inspector, Thiruvananthapuram**

(Present: - P.K. Uthakumari)

Subject:- Installation of 1 No. 50KWp on Grid Solar Power Plant with 1 No. 50KVA Solar inverter and connected electric to the existing HT installation at the premise of M/s. Christ Nagar Senior Secondary School, Thiruvananthapuram - Sanction for energisation - orders issued - /EG/

Read:-

1. Scheme Approval No. BS-03983/2021/EIT dated 16/11/2021
2. Completion report No. 441 dated 05/07/2021 of M/s. Wattsun Energy (India) Pvt.Ltd. FF, Adawaya Towers, International Airport Road, Chekka, Thiruvananthapuram (CB-7809)
2. Inspection conducted on 09/12/2021
3. Balance fee remittance on 16/12/2021

Order No. BS-03983/2021/EIT dated 17/12/2021

Sanction under Section 54 of The Electricity Act, 2003 (Regulation 32 and 43(7) of the CEA (Measures relating to Safety and Electric Supply) Regulations-2010, Central Electricity Authority (Technical Standards for connectivity of the Distributed Generation Resources) Regulations-2013 and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 is hereby accorded for energisation of the electrical installation covered under the Completion Report read as 2nd above and installed at the premises of M/s. Christ Nagar Senior Secondary School, Thiruvananthapuram with the following specifications subject to the conditions mentioned here under

Conditions -

1. Supply from the Solar Panel should not be extended out of the premises
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Electricity duty for the units produced from this solar energy system should be remitted to the government.
5. Only authorised person shall be in charge of the operation and maintenance of the installation.
6. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee.
7. Consent from licensee shall be obtained for this Solar installation.
8. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar inverter, switching off the output when grid supply is absent should be ensured by the owner of solar system and hence he would be safety responsible for any accident in case of failure violation of the same.

Load Details: Appended.

Electrical Inspector

To,

The Principal,

Proceedings of the
 Electrical Inspector
 Palakkad
Present: ARIA O K

Subject: MV addition of 240kWp On-Grid Solar Power Plant at the premises of M/s Indian Products Private Limited, Pathinalangal, Palakkad, Pin-678624 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B1-02550/21/EIP dated 29.04.2021
2. Completion report submitted by M/s. WATTSUN ENERGY (INDIA) PVT. LTD., International Airport Road, Chackai, Kerala, Pin- 695024 dated 30.06.2021 and received on 05.07.2021
3. Inspection conducted on 19.07.2021
4. Non conformity report dated 19.07.2021
5. Compliance report submitted by M/s. WATTSUN ENERGY (INDIA) PVT. LTD., International Airport Road, Chackai, Kerala, Pin- 695024 dated 13.08.2021 and received on 17.08.2021

Order No: B1-02550/21/EIP Dated 02-09-2021

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 and 43(7) of the Central Electricity Authority (Measures Relating to Safety and Electric Supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (2) above, installed at the premises of M/s Indian Products Private Limited, Pathinalangal, Palakkad, Pin-678624 subject to following conditions and as detailed in the annexure appended.

Specifications:

PV Modules : Make: WAAREE, 335Wp, 46.8 Voc, 9.3 Isc, 8.8 Imp, 38.1 Vmp, Total no. of strings per Inverter: 14, No. of PV modules in Inverter-1&2: 308 each , No. of PV modules in Inverter-3: 294.

Solar Inverter-1: Make: GOODWE, 80kW, 1100 Vdc, S/N. 9080KMTU211W0087.

Solar Inverter-2: Make: GOODWE, 80kW, 1100 Vdc, S/N. 9080KMTU211W0187.

Solar Inverter-3: Make: GOODWE, 80kW, 1100 Vdc, S/N. 9080KMTU211W0185.

1. Date of energization shall be intimated.
2. Operation and maintenance of electrical installation shall be done only by authorized persons.
3. All the maintenance works shall be recorded in the maintenance register.
4. Addition/alteration in the existing installation shall be carried out only with prior approval from the electrical inspectorate.
5. Consent from the Licensee shall be obtained.

6. M.V Installation should conform to I.S.732.
7. Installation of all cables should be as per standards.
8. Only materials with I.S certification as required under Quality Control Order should be used.
9. Only energy efficient equipments shall be used in the installation.
10. The validity of the scheme approval is upto 31.10.2023.
11. The acoustic enclosure of DG set shall be of CPCB approved type.
12. Energy meters should be provided in the generators circuits which may be tested and sealed with CTs, if any by the KSEB / Meter Testing and Standards Laboratory attached to this Department and copy of the test report shall be forwarded to the Office of the Deputy Chief Electrical Inspector, Thiruvananthapuram.
13. All relays & meters shall be tested in Meter Testing and Standards Laboratory Thiruvananthapuram / Labs in District Office and test certificate shall be submitted along with completion report.
14. Completion report should be submitted to the Office of the Deputy Chief Electrical Inspector, Thiruvananthapuram for arranging inspection.

If the installation is found defective in actual practice such additions or alterations as may be found necessary by the Electrical Inspectorate at the time of inspection or subsequently shall be carried out by the owner.

Yours Faithfully

Deputy Chief Electrical Inspector

P.K.SUKUMARAN
 POORNNA PRINTING & PUBLISHING HOUSE PALACHIRA, VARKALA

Sir,

Subject: Scheme for the installation of 50KW solar power plant and connected electric at the premises of M/s. POORNNA PRINTING & PUBLISHING HOUSE, VARKALA, Thiruvananthapuram, 695143 - Issue of scheme approval - regarding.

Reference:

1. Scheme submitted by WATTSUN ENERGY INDIA PVT. LTD., INTERNATIONAL AIRPORT ROAD, CHACKAL, Kerala, 695024 received on 17.09.2021
2. Non conformity report dated 12.10.2021
3. Compliance report submitted by WATTSUN ENERGY INDIA PVT. LTD., INTERNATIONAL AIRPORT ROAD, CHACKAL, Kerala, 695024 dated 19.10.2021

Scheme for the installation of 50KW solar power plant and connected electric at the premises of M/s. POORNNA PRINTING & PUBLISHING HOUSE, VARKALA, Thiruvananthapuram, 695143 is approved subject to following conditions:

1. Power allocation sanction should be obtained from the Kerala State Electricity Board/Licensee and a copy of the same forwarded to the Office of the Deputy Chief Electrical Inspector, Thiruvananthapuram.
2. Installation of all switch boards and distribution boards should be in conformity with Regulation 37 (iii) of the Central Electricity Authority (Measures relating to safety and Electric Supply) Regulation, 2010.
3. Fuses should be graded properly and selected based on the rating of cables. Low sun loss fuses shall be selected.
4. Earthing of the installation should conform to IS 3043/1987.
5. Isolation facility should be provided for all equipments within a distance of 3 meters from equipments conforming to Regulation 35(5) of the Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulation, 2010.

COVERING LETTER

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

I am/We are remitting herewith the required amount of Rs. towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transaction No dtd.....

Yours faithfully

ANNEXURE A – BIDDERS TECHNICAL INFORMATION

TECHNICAL PARTICULAR DATA

Solar PV Module

Sl. No	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Manufacture name to be specified	RAYZON & India
2	PV Module type	Poly/Mono Crystalline, Mono PERC	Mono PERC
3	No. of PV cells per Module		144(12X6 / 12X6)
4	Total number of PV modules		
5	Max. Power, P_{mp} @STC	330 Wp or above	545
6	Max. Power tolerance (%)	Not more than 3%	0~ +or-5W
7	Max. Power voltage (V_{mp}) @STC	To be specified	42.01V
8	Max. Power current (I_{mp}) @STC	To be specified	12.98A
9	Open circuit voltage, V_{oc} @ STC	To be specified	49.91V
10	Short circuit current, I_{sc} @STC	To be specified	13.59A
11	Nominal voltage	To be specified	38.68V
12	Nominal Wattage	To be specified	403W
13	Fill Factor	Not less than 0.7	80.39%
14	Temp. coefficient of V_{oc} (%/C)		-0.02355%/C
15	Temp. coefficient of P_{mp} (%/C)		-0.3164%/C
16	Temperature Co-efficient of I_{sc} (%/°C)		0.0271%/C
17	Normal Operating Cell Temperature (NOCT) (°C)		20 Degree Celsius
18	Operating Temperature (°C)		-40 Degree Celsius to +85 Degree Celsius
19	Module efficiency	$\geq 17\%$	21/13%
20	No. of By-pass Diodes		
21	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed
22	Solar Module frame material	Anodized Aluminium	Silver Anodized Aluminium Alloy

SG3K-D/SG5K-D

Residential Single Phase Inverter

SUNGROW

Clean power for all

HIGH YIELD

- Higher yield with Max. efficiency 98.4 %, European efficiency 98.0 %
- Wide MPPT voltage range

SMART MANAGEMENT

- Easy local and online monitoring via App or Web
- Export power control with smart energy meter

SAFE AND DURABLE

- Built-in surge arresters and residual current protection
- High anti-corrosion with aluminum alloy die casting

EASY AND USER FRIENDLY

- 11.5 kg compact design, plug and play installation
- Fast commissioning via LCD

Max. PV input current	25 A (12.5 A / 12.5 A)		37.5 A (25 A / 12.5 A)		
Max. DC short-circuit current	32 A (16 A / 16 A)		48 A (32 A / 16 A)		
Output (AC)					
Nominal AC power (@230 V, 50 Hz)	5000 W	6000 W	8000 W	10000 W	12000 W
Max. AC output power	5500 VA	6600 VA	8800 VA	11000 VA	13200 VA
Max. AC output current	8.3 A	10 A	13.3 A	16.7 A	20 A
Nominal AC voltage	3 / N / PE, 220 / 380 V 3 / N / PE, 230 / 400 V 3 / N / PE, 240 / 415 V				
AC voltage range	180 V – 276 V				
Nominal grid frequency /	50 Hz / 45 – 55 Hz				
Grid frequency range	60 Hz / 55 – 65 Hz				
Harmonic (THD)	<3 % (at nominal power)				
Power factor at nominal power /	>0.99 / 0.8 leading – 0.8 lagging				
Adjustable power factor					
Feed-in phases / AC connection	3 / 3				
Efficiency					
Max. efficiency	98.40%	98.40%	98.50%	98.50%	98.50%
European efficiency	97.40%	97.40%	97.80%	97.90%	97.90%
Protection&Function					
Grid monitoring	Yes				
DC reverse connection protection	Yes				
AC short-circuit protection	Yes				
Leakage current protection	Yes				
Surge Protection	DC Type II / AC Type II				
DC switch	Yes				
General Data					
Dimensions (W*H*D)	370*480*195 mm				
Mounting method	Wall-mounting bracket				
Weight	18 kg				
Topology	Transformerless				
Degree of protection	IP65				
Night power consumption	< 1 W				
Operating ambient temperature range	-25℃ to 60 ℃				
Allowable relative humidity range (non-condensing)	0% – 100%				
Cooling method	Natural cooling				
Max. operating altitude	4000 m (> 2000 m derating)				
Noise(Typical)	35 dB (A)				
Display	LED				
Communication	WLAN, Ethernet, RS485, DI, DO				
DC connection type	MC4				
AC connection type	Plug and play				
Compliance	EN 61000-6-1/-3, EN 61000-3-11/-12, IEC62109-2, IEC 61727, IEC 62116, IEC 61683, IEC 60068, EN 50530				

*: The inverter enters the standby state when the input voltage ranges between 1,000V and 1,100V. If the maximum DC voltage in the system can exceed 1000V, the MC4 connectors included in the scope of delivery must not be used. In this case MC4 Evo2 connectors must be used.

SG15/20RT

Multi-MPPT String Inverter for 1000 Vdc System

HIGH YIELD

- Lower startup & wider MPPT voltage
- Compatible with bifacial modules

SMART MANAGEMENT

- Optional Smart IV curve scanning
- Remote firmware updates

SAFE AND DURABLE

- Build-in Type II DC&AC SPD
- High anti-corrosion rating C5

EASY AND USER FRIENDLY

- 21kg compact design
- Fast and easy commissioning via App

CIRCUIT DIAGRAM

EFFICIENCY CURVE

Type designation	SG15RT	SG20RT
Input (DC)		
Recommended max. PV input power	22.5kW	30 kW
Max. PV input voltage		1100 V *
Min. PV input voltage / Start-up input voltage		180V / 180V
Nominal input voltage		600 V
MPP voltage range		160V-1000V
No. of independent MPP inputs		2
No. of PV strings per MPPT		2 / 2
Max. PV input current		50 A (25 A / 25 A)
Max. DC short-circuit current		64 A (32 A / 32 A)
Output (AC)		
Nominal AC power (@230 V, 50 Hz)	15000 W	20000 W
Max. AC output power	16500 VA	22000 VA
Max. AC output current	25 A	31.9 A
Nominal AC voltage		3 / N / PE, 220 / 380 V 3 / N / PE, 230 / 400 V 3 / N / PE, 240 / 415 V
AC voltage range		180 V – 276 V
Nominal grid frequency /		50 Hz / 45 – 55 Hz
Grid frequency range		60 Hz / 55 – 65 Hz
Harmonic(THD)		<3 % (at nominal power)
Power factor at nominal power /		>0.99 / 0.8 leading – 0.8 lagging
Adjustable power factor		
Feed-in phases / AC connection		3 / 3
Efficiency		
Max. efficiency		98.50 %
European efficiency		98.10 %
Protection&Function		
Grid monitoring		Yes
DC reverse connection protection		Yes
AC short-circuit protection		Yes
Leakage current protection		Yes
Surge Protection		DC Type II / AC Type II
DC switch		Yes
General Data		
Dimensions (W*H*D)		370*480*195 mm
Mounting method		Wall-mounting bracket
Weight		21 kg
Topology		Transformerless
Degree of protection		IP65
Night power consumption		< 1 W
Operating ambient temperature range		-25°C to 60 °C
Allowable relative humidity range (non-condensing)		0% – 100%
Cooling method		Smart forced air cooling
Max. operating altitude		4000 m (>2000 m derating)
Noise(Typical)		45 dB(A)
Display		LED
Communication		WLAN, Ethernet, RS485, DI, DO
DC connection type		MC4
AC connection type		Plug and play
Compliance		EN 61000-6-1/-3, EN 61000-3-11/-12, IEC62109-2, IEC 61727, IEC 62116, IEC 61683, IEC 60068, EN 50530

*: The inverter enters the standby state when the input voltage ranges between 1,000V and 1,100V. If the maximum DC voltage in the system can exceed 1000V, the MC4 connectors included in the scope of delivery must not be used. In this case MC4 Evo2 connectors must be used.

SG15KTL-M/SG20KTL-M

Multi-MPPT String Inverter for 1000 Vdc System

High Yield

- Max. efficiency 98.6 %, European efficiency 98.3 %
- 1.1 overload capacity, 10% more yield under high irradiance
- Adapt to complex power grid, extend the grid-connected generation time
- Patented PID recovery function optional

Easy O&M

- 24kg, easy O&M
- Plug and play design, easy installation
- String current monitoring function for fast trouble shooting
- Fast commissioning, easy local and on-line monitoring

Safe and Reliable

- High power quality, no interference for electrical equipment
- Low radiation, compliance with household equipment standards
- High anti-corrosion with aluminum alloy die casting
- Built-in surge arresters and residual current protection

SG15KTL-M/SG20KTL-M

Input (DC)	SG15KTL-M	SG20KTL-M
Max. PV input voltage	1100 V	
Min. PV input voltage / Start-up input voltage	200 V / 250 V	
Nominal PV input voltage	600 V	
MPP voltage range	200 V – 1000 V	
MPP voltage range for nominal power	380 V – 850 V	480 V – 850 V
No. of independent MPP inputs	2	
Max. number of PV strings per MPPT	2	
Max. PV input current	44 A (22 A / 22 A)	
Max. current for input connector	15 A	
Max. DC short-circuit current	60 A (30 A / 30 A)	
Output (AC)		
AC output power	16500 VA @ 35 °C / 15000 kVA @ 45 °C	22000 VA @ 35 °C / 20000 kVA @ 45 °C
Max. AC output current	24.0 A	31.9 A
Nominal AC voltage	3 / N / PE, 230 / 400 V	
AC voltage range	270 V – 480 V	
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz	
THD	< 3 % (at nominal power)	
DC current injection	< 0.5 % In	
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging	
Feed-in phases / Connection phases	3 / 3	
Efficiency		
Max. efficiency / Euro. efficiency	98.6 % / 98.3 %	
Protection		
DC reverse connection protection	Yes	
AC short-circuit protection	Yes	
Leakage current protection	Yes	
Grid monitoring	Yes	
DC switch / AC switch	Yes* / No	
PV string current monitoring	Yes	
PID recovery function	Optional	
Overvoltage protection	DC Type II / AC Type II	
General Data		
Dimensions (W*H*D)	370*485*210 mm	
Weight	24 kg	
Isolation method	Transformerless	
Degree of protection	IP65	
Night power consumption	< 1 W	
Operating ambient temperature range	-25 to 60 °C (> 45 °C derating)	
Allowable relative humidity range (non-condensing)	0 – 100 %	
Cooling method	Smart forced air cooling	
Max. operating altitude	4000 m (> 3000 m derating)	
Display / Communication	LED, Bluetooth + APP / RS485 (Optional: WiFi / Ethernet)	
DC connection type	MC4 (Max. 6 mm ²)	
AC connection type	Plug and play connector (Max. 16 mm ²)	
Compliance	EN 62109-1, EN 62109-2, EN 61000-3-11, EN 61000-3-12, IEC 61727, IEC 62116, VDE0126-1-1/4105, AS 4777.2, IEC 60068, IEC 61683, EN 50530, CEI 0-21,NB/T32004-2013, UNE 206007-1, G59/3, UTE C15-712-1	
Grid support	Active & reactive power control and power ramp rate control	
Type designation	SG15KTL-M-10	SG20KTL-M-10

*:Devices for Australia are not equipped with DC switches

SG33CX/SG40CX/SG50CX New

Multi-MPPT String Inverter for 1000 Vdc System

High Yield

- 5 MPPTs with max. efficiency 98.7%
- Compatible with bifacial module Built-in PID recovery function

Smart O&M

- Touch free commissioning and remote firmware upgrade
- Online IV curve scan and diagnosis
- Fuse free design with smart string current monitoring

Low Cost

- Compatible with Al and Cu AC cables
- DC 2 in 1 connection enabled
- Cable free communication with optional Wi-Fi

Proven Safety

- IP66 and C5 protection
- Type II SPD for both DC and AC
- Compliant with global safety and grid code

Grid Support	Q at night function, LVRT, HVRT, active & reactive power control and power ramp rate control		

SG60KTL

String Inverter for 1000 Vdc System

High Yield

- Max. efficiency 98.9 %, European efficiency 98.7 %
- Long-time overload at 1.1 P_n
- Full power operation without derating at 50 °C

Easy O&M

- Compact design and light weight for easy installation
- Plug-in design of fan and SPD, convenient for on-site maintenance
- Integrated string current monitoring function for fast trouble shooting

Saved Investment

- Max. DC/AC ratio up to 1.4
- Integrated DC combiner box and DC/AC overvoltage protection

Grid Support

- Compliance with standards: IEC 62109, IEC 61727, IEC 62116, VDE0126-1-1, G59/3, VDE-AR-N-4105, VDE-AR-N-4120, BDEW
- Low/High voltage ride through (L/HVRT)
- Active & reactive power control and power ramp rate control

Type designation	SG250HX-IN
Input (DC)	
Max. PV input voltage	1500 V
Min. PV input voltage / Startup input voltage	600 V / 600 V
Nominal PV input voltage	1160 V
MPP voltage range	600 V – 1500 V
MPP voltage range for nominal power	860 V – 1300 V
No. of independent MPP inputs	12
Max. number of input connectors per MPPT	2
Max. PV input current	26 A * 12
Max. current for input connector	30 A
Max. DC short-circuit current	50 A * 12
Output (AC)	
AC output power	250 kVA @ 30 °C / 200 KVA @50 °C
Max. AC output current	180.5 A
Nominal AC voltage	3 / PE, 800 V
AC voltage range	680 – 880V
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz
THD	< 3 % (at nominal power)
DC current injection	< 0.5 % In
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging
Feed-in phases / connection phases	3 / 3
Efficiency	
Max. efficiency	99.0 %
European efficiency	98.8 %
Protection	
DC reverse connection protection	Yes
AC short circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
Ground fault monitoring	Yes
DC switch / AC switch	Yes / No
PV String current monitoring	Yes
Q at night function	Yes
PID protection	Anti-PID or PID recovery
Overvoltage protection	DC Type II / AC Type II
General Data	
Dimensions (W*H*D)	1051 * 660 * 363 mm
Weight	95kg
Isolation method	Transformerless
Ingress protection rating	IP66
Night power consumption	< 2 W
Operating ambient temperature range	-30 to 60 °C (> 50 °C derating)
Allowable relative humidity range (non-condensing)	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	4000 m (> 3000 m derating)
Display	LED, Bluetooth+APP
Communication	RS485 / PLC
DC connection type	Amphenol UTX (Max. 6 mm ²)
AC connection type	OT terminal (Max. 300 mm ²)
Compliance	IEC 62109, IEC 61727, IEC 62116, IEC 60068, IEC 61683, IEC 61000-6-3
Grid Support	Q at night function, LVRT, HVRT, active & reactive power control and power ramp rate control

*: Only compatible with Sungrow logger and iSolarCloud

WiFi

Smart and Flexible

- Supporting mainstream WLAN networking protocols, with favourable compatibility

Simple and Efficient

- Supporting remote operation and maintenance functions including remote upgrading, parameter setting
- Supporting direct connection configuration with APP, quickly and easily
- Plug and play, quick installation

Safe and Reliable

- Professional design in wireless communication, and high quality signal
- IP65, wide temperature range

Basic Data

Supported device number	1
Display	LED * 3
Configuration	APP

Max. Communication Range

RS485	1
WLAN	2.4 GHz 802.11 b/g/n

Power Supply

Input voltage	5.0 ± 0.25 Vdc
Power consumption	Typ. 2 W

Ambient Parameters

Operating temperature	-25 °C to 60 °C
Allowable relative humidity range (non-condensing)	≤ 95 %
Max. operating altitude	≤ 4000 m
Protection class	IP65

Mechanical Parameters

Dimensions (W*H*D)	48*97*36 mm
Installation	Plug-in type

Simple and Flexible

- One-click access to iSolarCloud
- One module can manage up to 10 inverters for remote maintenance and control
- Plug and play, easy installation

Convenient O&M

- Built-in Web server for monitoring and configuration, by PC or smartphone browser; no APP required
- Support of plant maintenance by remote Web access, optimized OPEX
- Support of local and remote parameter setting and firmware updates

Communication

Max. number of devices	10
LED display	LED × 3

Wireless communication

4G communication	LTE(FDD): B1, B3, B5, B8
	LTE(TDD): B38, B39, B40, B41
WiFi communicatoin	TD-SCDMA: B34, B39
	CDMA: BC0
	GSM:900MHz / 1800MHz
	WCDMA:B1, B8
WiFi communicatoin	802.11 b / g / n / ac
	HT20 / 40 / 80 MHz
	2.4 GHz / 5 GHz

Ordering information

EyeM4A	Support of 4G and WiFi wireless communication Apply to China, India, Malaysia
EyeM4B	Support of 4G wireless communication Apply to China
EyeM4C	Support of WiFi wireless communication Apply to Global

Power Supply

DC input	5 VDC, 0.8 A
Power consumption	<4 W

Ambient conditions

Operating Temperature	-30 °C ~ 60 °C
Relative air humidity	≤95 % (non-condensing)
Elevation	≤4000 m
Protection class	IP66

Mechanical parameters

Dimensions (W * H * D)	48 mm * 130 mm * 36 mm
Mounting type	Plug and Play

COM100D

Smart Communication Box

SUNGROW
Clean power for all

SMART AND FLEXIBLE

- Support of RS485, Ethernet and WiFi communication
- Support of energy meter, meteo station, sensors and other equipment

CONVENIENT O&M

- Inverter batch parameter settings and firmware updates
- PV-Plant maintenance via remote Web access for optimized OPEX
- Active and reactive power control
- Local monitoring

EASY OPERATION

- Night light for maintenance
- Robust enclosure, easy to install

Type designation		COM100D	
Communication		Mechanical parameters	
Max. number of devices	30	Dimensions (W * H * D)	460 mm * 315 mm * 126 mm
RS485 interface	3	Weight	6 kg
Ethernet	1 * RJ45, 10 / 100 / 1000 Mbps	Mounting type	Wall mounted, outdoor and indoor
Digital input	5, Max. 24 VDC	Box material	PC
Analog input	4, support 4 ~ 20 mA or 0~10 VDC	Cable specification	AC cable: outdoor UV protection cable of 1~1.5 mm2, outside diameter 13~18mm RS485 cable: outdoor UV protection shielded twisted pair (STP) of 0.75~1.5 mm, outside diameter 6~18mm Ethernet: CAT5 cable, outdoor UV protection shielded, outside diameter 6~18mm AI, DI: outdoor UV protection cable of 1~1.5 mm2, outside diameter 4.5~6mm
Wireless Communication		Ordering information	
4G communication	LTE (FDD): B1, B3, B5, B8 LTE (TDD): B38, B39, B40, B41 TD-SCDMA: B34, B39 CDMA: BC0 GSM:900MHz / 1800MHz WCDMA:B1, B8	COM100D	The COM100D includes Logger1000A, AC adapter, SPD, Air switch, Night light Support of 4G and WiFi wireless communication Apply to China, India, Malaysia
WiFi communication	802.11 b / g / n / ac HT20 / 40 / 80 MHz 2.4GHz / 5GHz		
Power Supply			
AC input	100 VAC ~ 300 VAC, 50 / 60 Hz		
Power consumption	Typ. 20 W, Max. 30 W		
Night light for maintenance	<1 W		
Ambient Conditions			
Operating Temperature	30 °C ~ 60 °C		
Storage Temperature	-40 °C ~ 80 °C		
Relative air humidity	≤95 % (non-condensing)		
Elevation	≤4000 m		
Protection class	IP66

of Conformity
Low Voltage Directive 2014/35/EU

Registration No.: AN 50485653 0001

Report No.: 60388400 001

Holder: Sungrow Power Supply Co., Ltd.
No.1699 Xiyou Rd., New & High
Technology Industrial
Development Zone,
Hefei
230088 Anhui
P.R. China

Product: PV-Inverter
(Grid-connected PV Inverter)

Identification: Type Designation: SG3.0RT SG4.0RT SG5.0RT SG6.0RT SG7.0RT
SG8.0RT SG10RT SG12RT SG15RT SG17RT
SG20RT

Serial Number : Engineering Sample

Remark(s) : Issued in conjunction with TÜV Rheinland
license R 50485651 0001-0005.

This certificate of conformity is based on an evaluation of a sample of the above mentioned product. Technical Report and documentation are at the Licence Holder's disposal. This is to certify that the tested sample is in conformity with Annex I of Council Directive 2014/35/EU, referred to as the Low Voltage Directive. This certificate does not imply assessment of the series-production of the product and does not permit the use of a TÜV Rheinland mark of conformity. The holder of the certificate is authorized to use this certificate in connection with the EC declaration of conformity according to Annex IV of the Directive.

Dear Wang Kai,

The above specified equipment has been tested and found to be in accordance with the relevant requirements.

Please find enclosed your certificate as specified above.

If cancellation of the certificate is submitted by 15 November in a given year, no fee will be charged for the following year.

The certificate is issued with the reservation that the license holder applies all information required in § 6 of the ProdSG related to name and address of the manufacturer or his authorized representative / importer, including their respective contact addresses on the product prior to marketing of the product in the European Economic Area.

With kind regards,

IEC 61000-6-2:2005
IEC 61000-6-3:2006+A1
IEC 61000-6-4:2006+A1

This certificate of conformity is based on an evaluation of a sample of the above mentioned product. Technical Report and documentation are at the Licence Holder's disposal. This is to certify that the tested sample is in conformity with all provisions of Annex I of Council Directive 2014/30/EU. This certificate does not imply assessment of the production of the product and does not permit the use of a TÜV Rheinland mark of conformity. The holder of the certificate is authorized to use this certificate in connection with the EC declaration of conformity according to the a.m. Directive.

Date 04.11.2020

TÜV Rheinland LGA Products GmbH - Tillystraße 2 - 90431 Nürnberg

CE The CE marking may only be used if all relevant and effective EC Directives are complied with. **CE**

Dear Wang Kai,

We herewith confirm that a sample of the above mentioned technical equipment has been tested and was found to be in accordance with the relevant requirements.

Enclosed please find your Certificate of Conformity.

We appreciate your kind support and would like to offer our assistance and continuous services in the future.

With kind regards,

TEST REPORT ON SALT MIST CORROSION TEST OF PV MODULE

SERVICE REQUEST NO.: 145/1918

MANUFACTURED BY: M/S RAYZON GREEN ENERGIES. BLOCK NO. 105, B/H ARON PIPES, B/H HARIYA TALAV KIM MANDVI ROAD, KARANJ SURAT, GUJARAT 394110.

SUBMITTED BY: M/S RAYZON GREEN ENERGIES. BLOCK NO. 105, B/H ARON PIPES, B/H HARIYA TALAV KIM MANDVI ROAD, KARANJ SURAT, GUJARAT 394110.

NOTE

This is a report on measurements carried out on PV module (Service Request 145/1918) submitted to the National Institute of Solar Energy as per IEC 61701 specifications. The data reported in this TEST REPORT are valid at the time of and under the stipulated conditions of measurement and the test results are applicable to those items of product which have been tested and do not apply to other products even though declared to be identical. The data contents in this report do not constitute a qualification certificate under any set of specifications. NISE does not accept any liability for any consequences including commercial or otherwise arising out of the utilization of the information contained in this report. The Test Report, if reproduced for any purpose, commercial or otherwise, should be reproduced in full. The contents of the report can be published only after a written approval from the Director General, NISE. The client is requested to collect the tested sample back within 30 days from the date of issue of the report. This report consists of **03 pages**.

C. TEST RESULTS

Make : M/S RAYZON GREEN ENERGIES
 Model No. : Crystalline Si/ RGE320W72
 Cell Area : 243.36 Sq. cm.
 Module Area : 1.94 sq. m

Module Sr. No	Initial P _{max} (Wp)	Final P _{max} (Wp)	ΔP_{max} (%)	Degradation allowed	Observations
RGEAXA1P11181015	321	324	-0.93	5%	No Degradation
RGEAXA1P11181018	322	321	0.31	5%	Degradation with in limit

All the modules meet the criterion of Degradation rate, Dielectric withstand test, Bypass diode functionality test and ground continuity test as per IEC Salt mist corrosion testing of Photovoltaic (PV) modules IEC 61701: 2011 Severity 3 before and after the Salt mist corrosion test. As a result, the modules pass the Salt mist corrosion test.

ANNEXURE B – BIDDERS TECHNICAL INFORMATION

TECHNICAL PARTICULAR DATA

Solar PV Module

Sl. No	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Manufacture name to be specified	Saatvik
2	PV Module type	Poly/Mono Crystalline, Mono PERC	Mono PERC
3	No. of PV cells per Module		144
4	Total number of PV modules		3704
5	Max. Power, P_{mp} @STC	330 Wp or above	540 Wp
6	Max. Power tolerance (%)	Not more than 3%	0 to 3%
7	Max. Power voltage (V_{mp}) @STC	To be specified	41.80
8	Max. Power current (I_{mp}) @STC	To be specified	12.94
9	Open circuit voltage, V_{oc} @ STC	To be specified	50.16
10	Short circuit current, I_{sc} @STC	To be specified	13.59
11	Nominal voltage	To be specified	
12	Nominal Wattage	To be specified	
13	Fill Factor	Not less than 0.7	
14	Temp. coefficient of V_{oc} (%/C)		- 28% /° C
15	Temp. coefficient of P_{mp} (%/C)		- 36 % /° C
16	Temperature Co-efficient of I_{sc} (%/°C)		0.048 % /° C
17	Normal Operating Cell Temperature (NOCT) (°C)		45 ± 2/° C
18	Operating Temperature (°C)		40° C ~ + 85 ° C
19	Module efficiency	≥17%	20.90 %
20	No. of By-pass Diodes		
21	Mounting arrangement for Solar Module	Fixed Arrangement	

Sl. No	Particulars	Required	Offered
22	Solar Module frame material	Anodized Aluminium	Silver anodized Al.
23	Module dimensions' cm (L x W x H)	To be specified	2278* 1134* 35 mm
24	PV panel Weight (kg)	To be specified	28 kg
25	Output Cables	Polarized, UV protected &Weather Proof DC rated multi-contact connector	
26	Output Terminal	PV Connectors	MC4 connectors
27	Junction Box	Weather resistant HDPE (IP65)	IP68
28	Copies of test certificates	IS 14286/IEC 61215,61730 part 1&2, IEC 61701	IS14286/ IEC 61215/ 6130/ part 1&2 61701

INVERTER

Sl. No.	Particulars	Required	Offered
1	Manufacturer		Sungrow
2	Model name/No.		SG 110CX
3	Number of units		17
4	Nominal AC power		110 kva@45° C/ 100kva @50° C
5	Nominal AC voltage		3/N/PE, 400 V
6	Nominal AC Current		158.8 A
7	AC grid Frequency range	50Hz ± 0.5%	50 Hz/ 45-55 Hz
8	AC grid voltage range		320-460 V
9	Power Factor (+ and -)		>0.99 / 0.8 lagging-0.8 leading

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore
Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City
Thiruvananthapuram Ltd

Sl. No.	Particulars	Required	Offered
10	Total Harmonic Distortion	As per IEEE-519 2014	<3%
11	AC over / under voltage over / under frequency protection		Yes
12	Max PV input power		1100 v
13	Maximum DC voltage	Less than 1000 V	
14	MPPT voltage range		200-1000v
15	Maximum DC current		40A*9
16	No. of DC input ports		18
17	Maximum Efficiency	as per IEC61683	98.7 %
18	DC voltage ripple		
19	Ambient temperature range		-30 to 60° C
20	Humidity (non-condensing)	95%, non-condensing	0-100%
21	Protective functions - AC over/under voltage, AC over/under frequency, over temperature, AC and DC overcurrent, DC over-voltage, against Islanding		Yes
22	Communication Interface	RS485, MPI Profi-Bus/Telephone Modem/WiFi	RS 485, WLAN, Ethernet
22	User-display standard	LCD panel with membrane keypad	
23	Enclosure environment rating		IP66
24	Safety and EMC		Yes
25	Anti-islanding feature	IEEE1547/UL1741/I EC62116

15th September 2021

Subject: Addendum No. 2 to Work-Order No. MBGEPL-SECI-ETPL/EPC-Contract/01

Dear Mr. Bhairaw Kumar Mandal,

The following Addendum is being issued after mutual consent from both parties for change in overall Project Capacity for execution and Pricing Schedule as per the tables give below:

1. The Change in the Pricing Schedule as provided under Schedule 4 is revised as given below:

A. Total Contract Price: 14,47,96,653/-

A.1. Total Contract Price in Words: INR. Fourteen Crores, Forty-Seven Lakhs, Ninety-Six Thousand, Six Hundred and Fifty-Three Only.

B. Terms of Payment:

B.1. Invoicing/Milestone Payment Table/Chart for Modules:

S. No.	Item Description	Unit	Qty.	Unit Rate/kWp (INR)	GST (INR)	Total Amount (INR)
1	CSK - AU	kWp	1,000	18.66	1.66	20.33
2	ICAR - DMR		160			
3	Dr. YSP		640			
4	ICAR - CPRI		100			
5	ICAR - Fisheries		100			
6	Uttarakhand O. U		120			
7	ARIES		100			
8	IISW Dehradun		160			
9	CRPF - Haldwani		500			
10.	HNB Garhwal University		850			
Total Module Contract Amount						7,58,15,308

Amount in words: Indian Rupees Seven Crores, Fifty-Eight Lakhs, Fifteen Thousand, Three Hundred and Eight Only.

Addendum No. 1 to MBGEPL-SECI-ETPL/EPC-Contract/01

Page 2 of 4

2166

B.2. Invoicing/Milestone Payment Table/Chart for Inverter:

S. No.	Item Description	Unit	Qty.	Unit Rate/kWp (INR)	GST (INR)	Total Amount (INR)
1	CSK - AU	kWp	1,000	3.84	0.34	4.18
2	ICAR - DMR		160			
3	Dr. YSP		640			
4	ICAR - CPRI		100			
5	ICAR - Fisheries		100			
6	Uttarakhand O. U		120			
7	ARIES		100			
8	IISW Dehradun		160			
9	CRPF - Haldwani		500			
10	HNB Garhwal University		850			
Total Module Contract Amount						1,55,98,565

Amount in words: Indian Rupees One Crore, Fifty-Five Lakhs, Ninety-Eight Thousand, Five Thousand and Sixty-Five Only.

B.3. Invoicing/Milestone Payment Table/Chart for Balance of System:

S. No.	Item Description	Unit	Qty.	Unit Rate/kWp (INR)	GST (INR)	Total Amount (INR)
1	CSK - AU	kWp	1,000	13.14	1.17	14.31
2	ICAR - DMR		160			
3	Dr. YSP		640			
4	ICAR - CPRI		100			
5	ICAR - Fisheries		100			
6	Uttarakhand O. U		120			
7	ARIES		100			
8	IISW Dehradun		160			
9	CRPF - Haldwani		500			
10	HNB Garhwal University		850			
Total Balance of System Contract Amount						5,33,82,780

Amount in words: Indian Rupees Five Crores, Thirty-Three Lakhs, Eighty-Two Thousand, Seven Hundred and Eighty Only.

C. Terms and Conditions:

- C.1. The above price includes all applicable taxes, duties, transportation, and installation charges.
C.2. Payment Terms:

- 1. For Modules & Inverter 100% Advance against PI & MDCC
- 2. For BOS:

Addendum No. 1 to MBGEPL-SECI-ETPL/EPC-Contract/01

S. No.	Payment Terms	Amount (in INR)
1.	10% Advance against equivalent PDC valid till 3 months or Plant Handover which-ever is earlier after submission of engineering survey, design, layout drawings, and details of BOQ material for each site.	53,38,278
2.	60% up on Material Delivery at site (against proof of dispatch) on pro rata	3,20,29,668
3.	15% up on Commissioning of sites (against testing and charging report) on pro rata	80,07,417
4.	10% up on net metering connectivity, opening of Escrow account in bank for each site and raising first bill on pro rata	53,38,278
5.	5% up on hand-over (against equivalent UDC/PBG valid for 2 years – 6.5% for 1 st Year and 5% for 2 nd Year)	26,69,139
6.	Total	5,33,82,780

This Addendum No. 2 shall be read in conjunction with MBGEPL-SECI-ETPL/EPC-Contract/01 and this Addendum No 2 shall be an integral part of MBGEPL-SECI-ETPL/EPC-Contract/01.

All other terms & conditions of EPC-Contract No. MBGEPL-SECI-ETPL/EPC-Contract/01 shall remain unchanged.

IN WITNESS WHEREOF, the parties hereto have duly executed and delivered this Addendum as of the date set forth above.

MB GREEN ENERGY PRIVATE LIMITED

H. No. 6-3-902/2, Maruthi Apartment, Somajiguda,
Hyderabad – 500 082. Telangana

Date: 17.12.2021

To Whomsoever It May Concern

It is certified that **M/s Enerture Technologies Pvt Ltd**, New Delhi has supplied & installed 3.73 MW Solar Rooftop Plant against the order no. MBGEPL-SECI-ETPL/EPC-Contract/01 of value Rs. 14,47,96,653/- at SECI projects of Himachal & Uttarakhand. The work has been completed with Satisfactory remarks in given timeline and agreed terms & condition of SECI.

Work Completion Certificate

This is to certify that M/s Enerture Technologies Pvt Ltd, New Delhi has successfully supplied, installed and commissioned Ground Mount Solar Power plant at below mentioned site details as Sub contractor of M/s Hero Rooftop Energy Private Limited.

S. No.	Particulars	Description
1	Name of Project	16.06 MWP GROUND MOUNT DALMIA SOLAR PV PROJECT
2	Owner of Project	Dalmia Cement (Bharat) Ltd
3	EPC Contractor	Hero Rooftop Energy Private Limited, 201, First Floor, Okhla Industrial Estate, Phase III Plot No.201 New Delhi-110020, Delhi, India.
4	EPC Sub Contractor	Enerture Technologies Pvt. Ltd., K-27A, Marwaha Bhawan, Main vasant kunj road Mahipalpur-110037 Delhi, India.
5	Location Of Project	Chinnakomerla (Village), Mylavaram Mandal, Jammaiamadugu (Tq), Kadapa-516434, Andhra Pradesh, India
6	Ref. Contract/ Work order No. / PO/ SO	4100001253, 5100001331 & 5100001335
7	Project Capacity	16,059,600 WP
8	Order Release Date	24 th June 2021
09	Commissioning Date	10 August 2022 (Including CEIG , Metering & synchronisation Permission)

The Work has been executed as per the contract specifications and standards. The project was completed successfully to the level of our satisfaction and agreed terms of PO & SO.

Thanks & Regards,

For Hero Solar Energy Pvt. Ltd

Work Completion Certificate

It is certified that **M/s Enerture Technologies Pvt Ltd**, New Delhi has supplied & installed 3.61550 MW Solar Rooftop Plant against the order no. 4100003257 of project value INR 13,35,33,097.00 at Howrah Railway Station, Howrah, West Bengal. The work has been completed with Satisfactory remarks in given timeline and agreed terms & condition.

POWER PURCHASE AGREEMENT

THIS POWER PURCHASE AGREEMENT (the "Agreement") is made and entered into at Delhi on this 7th April, 2022 (the "Signing Date"):

BETWEEN:

Enerture Solar One Pvt Ltd, a private limited company incorporated under the Companies Act, 2013, having its registered office at 815 ,Udyog Vihar Phase 5,Gurgaon,Haryana INDIA and its Corporate Office at, **Abl Workspace, Celebration Gardens Nh 8, Avenue Bouganvillea, Mahipalpur, New Delhi, Delhi 110037, India**, (hereinafter referred to as "**Power Producer**", which expression shall, unless repugnant to the context or meaning thereof, include its successors and assigns) as party of the FIRST PART.

AND

M/S Victora Auto Ltd a company incorporated under the Companies Act, 1956, and having its Corporate office at **Plot No. 42, Sec 20A , Near ICAI Bhawan Faridabad, 121001 , Haryana . (CIN no. U34300DL1991PTC203627) India** (hereinafter

1. The authenticity of this Stamp Certificate should be verified at 'www.shcheStamp.com' or using e-Stamp Mobile App of Stock Exchange of India. Any discrepancy in the details on this Certificate and as available on the website / Mobile App renders it invalid.

2. In case of any discrepancy please inform the Competent Authority.

referred to as "Offtaker", which expression shall, unless repugnant to the context or meaning thereof, include all its successors and permitted assigns) as party of the SECOND PART.

1. RECITALS

WHEREAS:

- A. The Power Producer is a company engaged in the business of developing, installing, operating, managing and maintaining solar power plants across India. (Mainly at Haryana, Uttarpradesh & Uttarakhand)
- B. The Offtaker is an industry having office at Corporate office at Plot No. 42, Sec 20A, Near ICAI Bhawan Faridabad, 121001, Haryana **having different manufacturing units at Haryana, Uttarakhand and Uttar Pradesh (As per EXHIBIT 1)**; which the Off taker agrees to make available to the Power Producer or at the Power Producer's discretion, to its assignees for the construction, operation and maintenance of a solar power generating plant having a capacity of **3020KWdc (+/- 10%)** at the roof top area within the premises (To be finalization after physical survey for optimization of generation) (hereinafter referred to as "the Plant"), and to purchase from Power Producer all the solar energy produced from the Plant. Provided that the Power Producer shall provide the Offtaker with a list of such assignees. The Parties agree that the Power Producer or its assignees shall not have any lien on the Premises provided by the Offtaker in any shape or form whatsoever and the Offtaker and its assignees shall not have any lien on the Power Plant in any shape or form whatsoever.
- C. The Power Producer has represented to the Offtaker that the Plant shall be set up by the Power Producer. Further the Parties understand that the Power Producer may create a charge on the Solar Power Plant excluding the Premises on which the plant is erected and/or assign this Agreement, but in no event the creation of charge on the Solar Power Plant or Assignment shall have any effect on this Agreement and shall not affect the business of the Offtaker. The said Assignee shall be liable for all the liabilities and obligations of the Power Producer. In case of Transfer of Ownership during or at the end of the Term of this contract as per provisions of this Agreement the Power Producer shall ensure that the Solar Power Plant is free from any charge, lien or any kind of encumbrances.
- D. The Parties by way of this Agreement wish to record the terms and conditions on the basis of which the Power Producer would set up the Solar Power Plant and supply Electricity to the Offtaker.

NOW, THEREFORE IN VIEW OF THE FOREGOING PREMISES AND IN CONSIDERATION OF THE MUTUAL COVENANTS AND CONDITIONS SET OUT BELOW, THE PARTIES HEREBY AGREE AS FOLLOWS:

2. DEFINITIONS AND INTERPRETATIONS

2.1. Definitions

In this Agreement, unless the context otherwise requires, Capitalized terms otherwise used shall have the respective meanings assigned to them in 0 ("Definitions").

2.2. Interpretations

- 2.2.1 The table of contents and headings in this Agreement are inserted for convenience only and shall not affect its interpretation or construction.

- 2.2.2 All references made in this Agreement to "Clauses", "Exhibits" and "Schedules" shall refer, respectively, to Clauses of and Exhibits and Schedules to this Agreement. The Exhibits and Schedules to this Agreement form part of this Agreement and shall be in full force and effect as though they were expressly set out in the body of this Agreement.
- 2.2.3 Clause headings are for convenience only and shall not affect the interpretation of this Agreement. References to Clauses are specifically made, and where not specifically made, shall mean a reference to the entire Clause of the Agreement along with the numbered clauses or sub-clauses falling under the main clause, which have been appropriately identified by way of numbering and indentations such that an indented clause underneath a main clause shall be construed to be a part of that main clause, if not specifically referred to.
- 2.2.4 The words "hereto", "hereof" and "hereunder" shall refer to this Agreement as a whole and not to any particular provision of this Agreement.
- 2.2.5 The word "person" shall include individuals; partnerships; corporate bodies (including but not limited to corporations, limited partnerships and limited liability companies); non-profit corporations or associations; governmental bodies and agencies; and regulated utilities.
- 2.2.6 The word "including" and "include" shall be deemed to be followed by the words "without limitations".
- 2.2.7 In the event of any conflict between the text of this Agreement and the contents of any Schedule hereto, the text of this Agreement shall govern.
- 2.2.8 Each of the representations and warranties provided in this Agreement is independent of the other representations and warranties in this Agreement and unless the contrary is expressly stated, no clause in this Agreement limits the extent or application of another clause.
- 2.2.9 Any reference to any statute or statutory provision shall include
- a) all subordinate legislation made from time to time under that statute or provision (whether or not amended, modified, re-enacted or consolidated);
 - b) such provision as from time to time amended, modified, re-enacted or consolidated (whether before, on or after the date of this Agreement) to the extent such amendment, modification, re-enactment or consolidation applies or is capable of applying to any transactions entered into under this Agreement as applicable, and (to the extent liability thereunder may exist or can arise) shall include any past statutory provision (as from time to time amended, modified, re-enacted or consolidated) which the provision referred to has directly or indirectly replaced.
- 2.2.10 Any grammatical form or variation of a defined term herein shall have the same meaning as that of such term;
- 2.2.11 The words/ expressions used in this Agreement but not defined herein, unless repugnant to the context, shall have the same meaning as assigned to them in the context in which these have been used in the Agreement provided that the respective meanings, if any, assigned to such undefined words/ expressions in the Electricity Act, 2003 shall also be taken into consideration for harmonious interpretation of the Agreement.

3. TERM

3.1. Segregation into Periods

This Agreement shall consist of an Initial Period and an Operations Period. As used herein, "Term" shall mean all of the Initial Period and the Operations Period, unless the Power Producer or Offtaker terminates the Agreement earlier in accordance with the terms of this Agreement.

3.2. Initial Period

Subject to the availability of the Project Site, the Initial Period will begin on the "Effective Date" asset forth above and will terminate on the earlier of the Commercial Operation Date or the date on which the Agreement is terminated pursuant to the provisions of Clause 4.5 hereof. The Parties agree that the Power Producer shall ensure commissioning of the Project within **180** days from the Effective Date ("**Scheduled Commissioning Date**").

In the event of a delay in achieving the Commercial Operation Date by the Scheduled Commercial Operation Date, provided that such delay was not as a result of getting the necessary government approvals from the concerned authorities or Offtaker's negligence or breach of its obligations hereunder or due to a Force Majeure Event, the Power Producer shall be provided another 30 (Thirty days) to commission the plant & if SCOD is still not achieved in those 30 (Thirty) days, the Power Producer will pay to the Purchaser delay liquidated damages ("**Delay Liquidated Damages**"), as per the following calculation:

Delay Liquidated Damages = Expected Generation during delay period * (Actual Govt. Electricity Distribution Company "Discom" rate/ kWh -demand charges/ kWh - PPA tariff @ 3.95 / kWh)

Delay Liquidated Damages shall be payable on actual basis with maximum ceiling of Rs 1/- per unit. For avoidance of doubt under any circumstance Delay Liquidated Damages shall not be more than INR1/- per kWh. The Delay Liquidated Damages shall be paid to the Offtaker through RTGS/ Cheque payment once such demand has been raised as per provisions of this Agreement by the Offtaker

The total number of Solar Power units lost shall be calculated on a pro-rata basis from the Estimated Annual Production. The Delay Liquidated Damages shall be calculated from the date falling after the Scheduled Commercial Operation Date or the extended SCOD and up to the Commercial Operation Date. The Delay Liquidated Damages shall be subject to a cap of liquidated damages payable for a maximum period of 1 (one) months of delay in achievement of the Commercial Operation Date. If the Commercial Operation Date has not been achieved within 2 (two) months after Scheduled Commercial Operation Date (including notice period), the provisions of Section 21 shall apply.

During the Initial Period, the Offtaker shall ensure that the Project Site is available to the Power Producer without any interruption.

3.3. Operations Period

The Operations Period will commence on the Commercial Operation Date and will terminate on completion of **25 Years** from the date of Commercial Operation Date.

3.4. Access Specifications

3.4.1. The Offtaker hereby grants the Power Producer and its agents, (including its contractors, subcontractors, persons responsible for implementing the Applicable Solar Plant, and the Financing Party) entry permission into the Premises, for the Term of this Agreement, at reasonable times and upon reasonable notice, for the purposes of designing, installing, inspecting, operating, maintaining, repairing and removing the Plant, and any other purpose set forth in this Agreement, and otherwise in accordance with the provisions of this Agreement.

3.4.2. Permission to work at Site of the Offtaker:

- a) Vehicular & Pedestrian Entry Permissions: Offtaker shall provide permission to enter for site vehicles and workers for the purpose of designing, installing, operating, maintaining,

repairing and removing the Plant. In exercising such access, the Power Producer shall reasonably attempt to minimize any disruption to activities occurring on the Site.

- b) **Transmission Lines & Communication Cables:** The right to locate transmission lines and communications cables across the Site. The location of any such transmission lines and communications cables outside the areas designated on Exhibit I shall be subject to the Offtaker's approval and shall be at locations that minimize any disruption to Offtaker's activities occurring on the Site.
- c) **Storage:** Adequate storage space on the Site convenient to the Premises for materials and tools used during construction, installation, and maintenance of the Plant. Offtaker shall be responsible for providing shelter and security for stored items during construction and installation.
- d) **Utilities:** water, drainage and electrical connection in the Premises for use by Power Producer in installing, operating and maintaining the Plant. Further, if the Offtaker wishes to access the plant generation data then Ethernet connections, Display and Data Storage devices in the Premises shall be arranged by the Offtaker at its own expense.
Offtaker needs to provide reasonable and adequate water supply by giving water tapping points near the roof for cleaning of modules and if required by Power Producer, 100 units of electricity monthly will be utilized for the operation and maintenance of the Plant at the account of the Offtaker.
Water tapping points shall not be more than 10 meters far from the roof's where solar modules are being installed, after tapping points module cleaning system will be installed by Power Producer.

3.5 Easement Rights, Permissions, Approvals and Authorizations

- 3.5.1 Immediately upon the commencement of the Initial Period, the Offtaker shall provide entry permissions to Power Producer to execute scope of work as defined in this Agreement.
- 3.5.2 The Offtaker will insulate Power Producer from risk arising from authorities appointed under all applicable laws in relation to usage of Roof such as, but not limited to, the Municipal Authorities, authorities responsible for urban development and regulation, Fire Safety authorities, etc. requisite permissions and approvals relating to the existing building, factory inspectors, lenders, etc. for the purposes of setting up of the Plant.
- 3.5.3 The Power Producer shall provide the relevant support for follow up as and when required by the Offtaker for obtaining the necessary permits/approvals from the relevant authorities as mentioned in clause 3.5.2 above.
- 3.5.4 Power producer shall be responsible for obtaining and maintaining all approvals relating to installation and operation of Solar Plant, all the statutory charges for above approvals will be paid by Power Producer and Offtaker will assist in completing documentation where necessary for obtaining quick approvals.

4. **PLANNING, INSTALLATION AND OPERATION OF PLANT**

4.1. Technical Specifications considerations

The Power Producer shall has considered the following assumptions based on the information provided by the Offtaker: -

- 1. The roof area mentioned in the PPA is within the premises of the Offtaker and the Offtaker has secured the rights of construction of the Solar Power Plant on the roof top area.

2. Offtaker shall provide the Power Producer a shadow free rooftop as given at the time of this Agreement and shall endeavor to make sure that it remains the same for entire PPA tenure, subject to normal wear and tear.
3. The Offtaker shall provide clear access to the roof and as per specification given by the Power Producer at various locations as per requirement of the Solar Plant

The AC cable length from solar inverter to the main LT Panel of the load points is not more than 150 meters. The Offtaker acknowledges that the Power Producer has proposed the Tariff based on the above assumptions, if any of the above conditions changes as per the actual site conditions, the Tariff will increase proportionate to the cost increase in the installation of the system or Offtaker shall pay the increased cost due to additional scope on actual basis to the Power Producer

4.2. Site Assessment and Planning

During the Initial Period, Power Producer shall have the right, at its own expense, to assess the suitability of the Premises for the Plant and shall act diligently in conducting such assessment. The assessment shall include the right to inspect the physical condition of the structures on which the Plant will be located; to apply for permits or other governmental authorizations necessary for the construction of the Plant; to arrange interconnections with the Local Electric Utility; or to make any other investigation or determination necessary for the financing, construction, operation or maintenance of the Plant.

4.3. Commencement of Construction

At any time during the Initial Period, upon at least 45 Business Days' notice to the Offtaker, the Power Producer shall have the right to commence installing the Plant on the Premises, complying to all of the Offtaker's safety norms.

4.4. Major Components of the Plant

As of the date hereof, the Power Producer anticipates that the Plant shall consist of the major components as set forth in SCHEDULE C hereof. During the project execution due to reasons not attributable to Power Producer, if there is a requirement to change the Major components for the benefit of the Project same will be notified to Offtaker by the Power Producer. Approval of such modification of design must not be unreasonably withheld by the Offtaker.

4.5. Termination of Development Activities and Agreement

Notwithstanding anything contained in this Agreement at any time during the Initial Period, Power Producer shall have the right to cease development of the Plant on the Premises, for reasons only dealing with changes in law or government regulations coming into effect after the Effective Date, which would render the Project unviable. If the Power Producer gives the Offtaker notice of such determination, this Agreement shall stand terminated effective as of the delivery of such notice without any further liability of the Parties to each other, provided that

- 4.5.1. Power Producer shall remove any equipment or materials which the Power Producer has placed on the Site;
- 4.5.2. Power Producer shall restore any portions of the Site disturbed by the Power Producer to its pre-existing condition, i.e. prior to the commencement of construction;
- 4.5.3. The Parties shall not be released from any payment or other obligations arising under this Agreement prior to the delivery of the notice; and
- 4.5.4. The confidentiality provisions of Clause 15, the indemnity obligations under Clause 16 hereof, and the dispute resolution provisions of Clause 25 hereof shall continue to apply notwithstanding the termination of this Agreement.

4.6. Contractors

Power Producer shall use contractors / independent agents to perform the work of installing, operating, and maintaining the Plant and shall notify the Offtaker through written notifications. In such Appointment of contractors / independent agents, Power Producer ensures to follow Safety, EHS and other norms as per the industry practice and Offtaker's specific norms. Provided that appointment of such Contractors shall not relieve the Power Producer from its obligations under this Agreement. The insurance and other safety related issues has to be taken care by the Power Producer.

4.7. Site Security

Offtaker will assist with security for the Plant from the commencement of construction till the time that this Agreement is in effect, to the extent of its existing security procedures, practices, and policies that apply to the Premises. Offtaker will advise Power Producer immediately upon observing any damage to the Plant. During the Operations Period, upon request by Power Producer, such as Power Producer receiving data indicating irregularities or interruptions in the operation of the Plant, Offtaker shall, as quickly as reasonably possible, send a person to observe the condition of the Plant and report back to Power Producer on such observations.

4.8. Safety codes

The Power Producer should ensure that all workers working at plant will wear IS approved safety gear as may be required such as Safety Shoes, Safety helmets, and any other safety gear require to perform safe installation and shall take care of all required measures to ensure safety measures to all workers.

4.8 The power supplied would be injected at 415 V, 50Hz, into the LT panel located within the premises of each roof where Solar Plant will be installed with Suitable provisions will be setup by Power Producer to maintain the quality of power as per the provisions of the Indian electricity codes.

5. SALE OF ELECTRIC ENERGY

5.1. Sale of Electricity

Throughout the Operations Period, subject to the terms and conditions of this Agreement, Power Producer shall sell only to Offtaker and Offtaker shall buy from Power Producer all the solar energy produced by the Plant, whether or not Offtaker is able to use all such solar energy. Title to and risk of loss with respect to the solar energy shall Re from Power Producer to Offtaker at the Point of Delivery. Tariff schedule for sale of electricity is as per SCHEDULE A.

- a. Expected Energy Supply & Performance Ratio" (PR)"
- b. Power Producer estimates the amount of solar energy to be produced by the limits on Plant on annual basis subject to Global Horizontal Irradiation ("GHI" FOR RESPECTIVE SITES.) are based on following broad assumptions
- c. Expected Energy Generation /annum= As per Schedule -F
- d. Module Degradation Factor= 0.75%
- e. Plant Capacity- As per Exhibit I – 3020kWp dc (+/-) 10%
- f. Treatment for PR :

Means the ratio of plant output versus installed plant capacity at any instance with respect to the radiation measured.

$$PR = \frac{\text{Annual Generation}}{\text{Capacity} \times \text{Annual Solar Isolation}} \times 100$$

shall mean the electrical energy output power generated from the Power Project.

g. 5.2(a) GUARANTEED PERFORMANCE

Uptime Guarantee: The Company will maintain an annual minimum system uptime of 85% for the duration of the Agreement ("Guaranteed Uptime").

- h. The Guaranteed Uptime will be calculated on an annual basis, with the first year beginning on the Commissioning Date, and each subsequent year being considered a separate Uptime Measurement Period.
- i. The System shall meet minimum guaranteed generation with Performance Ratio (PR) at the time of commissioning and related Capacity Utilization Factor (CUF) as per the daily normalized irradiance levels of the location during the O&M period. PR shall be minimum of 70% at the time of inspection for initial Project acceptance
- j. The System shall be maintained at power factor of Unity (PF = 1.000) and shall not interfere with the existing power setup of the Consumer.
- k. For the purposes of measuring the Guaranteed Uptime, the system will be considered up for a given day if the Main Meter or Check Meter, as the case may be, shows generation of power from the Solar Power Plant on that day.
- l. Exclusions from Uptime Calculation: In the event the Solar Power Plants are unable to generate power due to grid outages, force majeure events, inability of the Power User to offtake power from the Solar Power Plants, or any act or negligence of the Consumer or its employees, visitors or associates, the plant will also be deemed up during those days.

5.2. Joint Meter Reading

Monthly Meter Reading:

For every calendar month, joint meter reading (JMR) of main meter and the check meters installed at the respective locations shall be conducted on 1st working day of every calendar month @ 11:00 AM, in the presence of representatives of both the Parties. If the first day of the month is a public holiday or Sunday, then in such cases the joint meter reading shall be conducted on the immediate next day. However, in such cases, Power Producer shall inform the other Party in advance. The format for monthly joint meter reading is attached. Meter reading can also be taken through the remote monitoring provision provided remote monitoring facility is functional and is cable of reading the energy meter readings. Power Producer can submit JMR through remote monitoring system.

m. Meter Inspection & Sealing:

The energy meter shall be jointly inspected and sealed by Power Producer and shall not be opened, calibrated or tested except in the presence of the representatives of both the Parties. In each case, seal details of old and new seals installed at the meter box to be mentioned on the joint meter reading format or meter testing report. Energy Recording:

i. Difference in energy measurement between main meter and check meters:

At the time of taking monthly joint meter reading, if the electrical energy consumption reading of the main meter differs from the readings of the corresponding check meter by more than +/- 5%, in such case the main meter shall be tested first as per ISI guidelines and if on such testing, the main meter error is found to exceed specific limits prescribed in the standards, then the main meter shall be re-calibrated or replaced by correct meter, within next 7 working days from the date of testing. If the main meter is found correct, the check meter shall be tested and re-calibrated or replaced by correct meter, within next 7 working days from the date of testing. The charges for the meter testing/calibration shall be borne by Power Producer.

ii. Billing in case of faulty meter

10

In the event of variation exceeding the permissible limits, the billing should be done based on the correct meter (main or check). The joint metering should be taken after such re-calibration/testing. Tolerance shall be within the calibration of energy meter.

n. **Annual Meter Testing:**

All meters shall be checked/tested for accuracy on a yearly basis in presence of both the Parties and shall be tested as working satisfactory so long as the errors are within the limits prescribed for meters of the specific class. Energy consumption recorded in the main meter will form the basis of billing, so long as the yearly checks show that errors if any are within the permissible limits. If the check or main meter is found defective during the annual checking, the error will be rectified and it shall be immediately replaced at the cost of Power Producer.

o. **Calibration Procedure:**

All meters shall be calibrated on an annual basis by a government approved agency and the cost for the calibration shall be borne by Power Producer. Meter readings shall be taken after the completion of calibration procedure in the presence of authorized representatives of both the parties. Metering system, calibration procedure and the procedure of taking meter readings could be modified from time to time as may be decided by both the parties with mutual understanding.

- (a) The Main Metering System at the Delivery Point shall in terms of its technical standards, description, accuracy, calibration, comply fully with the requirements of the relevant standards under the Applicable Law and shall be regularly tested as per the government regulation. This will consist of main meter and a check meter.
- (b) The Main Metering System shall be installed, maintained and owned by the Power Producer. It shall be installed at a place accessible to the meter readers of both the Parties. The Offtaker shall have full access to the Main Metering System, and to any data generated thereby.
- (c) The Offtaker may install an additional meter, at its own cost, to verify the measurements of the Main Metering System.
- (d) Power Producer shall install the meter(s) to meet the technical and regulatory requirements stipulated by the Jurisdictional Authorities at the Drawal Point

The risk and title to the solar energy supplied by the Power Producer shall pass to the Offtaker at the Delivery Point

6. DAMAGE

6.1. Damage by Offtaker

In the event that the Solar Power Plant is damaged by any act, negligence or omission except Force Majeure events by the Offtaker, or any of its employees, agents, contractors or affiliates, the Offtaker:

- 6.1.1. Shall be responsible for any cost of repairing or replacing any component of the Solar Power Plant and rectifying the damage.
- 6.1.2. Shall continue to be billed as per Deemed Generation until the Solar Power Plant is restored to full capacity, and the Offtaker shall be responsible for the payment of these bills.

6.2. Damage by Power Producer

11

In the event that the Solar Power Plant or any other property of the Offtaker is damaged by any act, negligence or omission except Force Majeure events by the Power Producer, or any of its employees, contractors or affiliates, the Power Producer:

- 6.2.1. Shall be responsible for the cost of repairing the Solar Power Plant or replacing the component of the Solar Power Plant or cost of repair or replacement of such other property of the Offtaker.
- 6.2.2. Shall not bill the Offtaker for any Deemed Generation. If such Deemed Generation is billed to the Offtaker, the Offtaker shall not be obliged to pay the amount to the Power Producer.
- 6.2.3. The Power Producer has to supply **Estimated Energy As per Schedule F, each site generation number will be different based upon location** for the first year on annual basis as **Guaranteed Generation** subject to 100% grid availability.

7. RATES, BILLING AND PAYMENT SCHEDULE

7.1. Rates

Offtaker shall pay Power Producer for electricity supplied and Deemed Generation, if any, by the Plant at the rates set forth in SCHEDULE A attached hereto, which shall be exclusive of all Regulatory Charges that may become applicable during the subsistence of this Agreement in future due to any change of law.

7.2. Billing

Offtaker shall pay for the electricity supplied at delivery point, by the Solar Power Plant monthly. Promptly after the end of each calendar month, Power Producer shall provide Offtaker with an invoice setting forth the quantity of electricity produced by the Plant in such month, the applicable rates for such, and the total amount due, which shall be the product of the quantities and the applicable rates. The monthly joint reading format (signed by authorized representatives of Power Producer and Offtaker) will be attached along with the bill otherwise the invoice of the month shall not be accepted by Offtaker. However, if the remote monitoring system is implemented which has the ability of capturing the real time energy meter readings, the same may be used for billing and physical signing of energy meter records shall not be required.

7.3. Invoice Delivery

Invoices shall be in writing and shall be either (i) delivered by hand; (ii) mailed by registered or or certified mail or speed post, return receipt requested, postage prepaid; (iii) delivered by a recognized overnight or personal delivery service; (iv) transmitted by facsimile/email (such transmission to be effective on the day of receipt if received prior to 5:00 pm local time on a Business Day or in any other case as of the next Business Day following the day of transmittal)

7.4. Bank Guarantee

On the date of signing this Agreement, the Offtaker shall be obliged to submit to the Power Producer a sum as indicated in Schedule E as guarantee of payment, in the form of a **Bank Guarantee, which shall be equivalent to 3 months' payment made** towards electricity produced at the applicable rates. The Bank Guarantee shall be issued by Offtaker's scheduled bank and shall be substantially in the form set forth in Exhibit 3. The Bank Guarantee shall be for a period of One year and renewed annually till the term of this Agreement. The Power Producer shall be entitled to invoke such Bank Guarantee for its full face value or part thereof, in case of an Offtaker Event of a Default or any non-fulfillment of its obligations by the Offtaker under this Agreement. Upon such Bank Guarantee being fully or partly invoked by the Power Producer during the Term of this Agreement, the Offtaker shall be liable to replenish such Bank Guarantee to its original value within a period of thirty (30) days. Such encashment of the Bank Guarantee by the Power Producer, shall not impact in any way the recovery of any other monthly arrears that may be due on the part of the Offtaker or any payment at the time of termination of this Agreement including payment of

Buy Out value due as contemplated in this Agreement. At the end of the Term of this Agreement or on termination of this Agreement, whichever is earlier if no Offtaker Event of Default exists, the Power Producer will return to the Offtaker such Bank Guarantee within a period thirty (30) days.

7.5. Payment

Offtaker shall pay each invoice within Twenty (20) days of receipt of the invoice ("**Due Date**"). Payments shall be made by electronic funds transfer to an account designated by Power Producer in the invoice or in a written notice delivered to the Offtaker. Any payment after due date would attract an interest @ 1%/per month.

7.6. Disputed Invoices

7.6.1. If Offtaker objects to all or a portion of an invoice, Offtaker shall, on or before the date payment of the invoice is due:

- (i) Pay 100% of the undisputed portion of the invoice, and
- (ii) Provide an itemized statement of its objections setting forth in reasonable detail the basis for its objections.

7.6.2. If Offtaker does not object prior to the Due Date, Offtaker shall be obligated to pay the full amount of such invoices but Offtaker may subsequently object to such invoice and, if such objection proves to be correct, receive a refund of the disputed amount; PROVIDED, however, that Offtaker may not object to any invoice more than six (6) months after the date on which such invoice is rendered. The right to dispute or object to an invoice, shall, subject to the time limitation provided in this Clause 7.6.2, survive the expiration or termination of this Agreement.

7.6.3. Any adjustments shall be made in the invoice of the subsequent months.

7.6.4. Disputes shall only be entertained on issues pertaining to meter readings and other factual aspects and not on the Tariff for Electricity if the correct Tariff is applied for billing.

8. SUPPLEMENTAL POWER

8.1. Interconnection

8.2. Power Producer shall be responsible for arranging the interconnection of the Plant with Offtaker's Local Electric Utility at HT/LT connection level including net metering approvals and fulfilling any other requirements of the distribution licensees. Cost related to Net Metering application however will have to be borne by the Offtaker.

8.3. Entitlement to Tax Incentives

Power Producer (and/or its assignee as may be identified and appointed at its sole discretion) shall be entitled to any Tax Incentives that may arise as a result of the operation of the Plant and shall be entitled to transfer the ownership over the Plant or construct the Plant for such Financing Party who is able to utilize such Tax Incentives. Offtaker shall provide reasonable assistance to Power Producer in preparing all documents necessary for Power Producer to receive such Tax Incentives. Any tax incentives arising as a result of solar power generation shall be the right of the Power Producer or the Financing Party and any tax incentives arising due to consumption of solar power shall be the right of the Offtaker.

8.4. Environmental Attributes

Power Producer (and/or its assignee as may be identified and appointed at its sole discretion) shall be the owner of any Environmental Attributes which may arise as a result of the operation of the Plant and shall be entitled to transfer such Environmental Attributes to any person. Offtaker shall provide reasonable assistance to Power Producer in preparing all documents necessary for Power Producer to receive such Environmental Attributes, and if Offtaker is deemed to be the owner of any such Environmental Attributes, Offtaker shall assign the same (or the proceeds thereof) to Power Producer. If Offtaker receives any payments in respect of such Environmental Attributes, it shall promptly pay them over to Power Producer.

8.5. No Resale of Electricity

The electricity purchased by Offtaker from Power Producer under this Agreement shall not be resold, assigned or otherwise transferred to any other person without prior approval of the Power Producer, which approval shall not be unreasonably withheld, and Offtaker shall not take any action which would cause Offtaker or Power Producer to become a utility or public service company.

9. OWNERSHIP OF PLANT, LIENS, MORTGAGES

9.1. System Ownership

9.1.1. Except as provided in Clause 10, the Power Producer or its assignee shall be the legal and beneficial owner of the Plant at all times prior to transfer of the same to the Offtaker. The Plant is a movable property of the Power Producer or the Financing Party or their assignee as the case may be, and shall not attach to or be deemed a part of, or fixture to, the Site.

9.1.2. Offtaker covenants that it will place all persons having an interest in or lien upon the real property comprising the Premises, on notice of the ownership of the Plant and the legal status or classification of the Plant as movable and personal property of the Power Producer or its assignee as the case may be. Offtaker shall make any necessary filings to disclaim the Plant as a fixture of its respective Premises and Site with the appropriate authorities to place all interested parties on notice of the ownership of the Plant by Power Producer or its assignee as the case may be.

9.2. Liens

9.2.1. To the extent permitted by Applicable Law, each Party shall not directly or indirectly cause, create, incur, assume or suffer to exist any mortgage, pledge, lien, charge, security interest, encumbrance or claim of any nature, including claims by governmental authorities for taxes (collectively referred to as "Liens" and each, individually, a "Lien") on or with respect to the interests of the other in the Site, the Premises, and the Plant, and in the permission to enter granted hereunder.

9.2.2. Each Party shall promptly notify the other of the imposition of a Lien on the property interests of the other Party, and shall promptly discharge such lien, provided however, that a Party may seek to contest the amount or validity of any Lien affecting the property of the other Party, provided it timely complies with all procedures for contesting such Lien, posts any bond or other security necessary under such procedures, and if such procedures do not require the posting of security, the Party establishes for the benefit of the other Party a deposit, letter of credit, or other security acceptable to the other Party to indemnify the other Party against any Loss which could reasonably be expected to arise if such Lien is not removed or discharged. This clause shall be guided by standard Laws of Lien.

9.3. Non Disturbance Agreements

Offtaker shall pay for and obtain all consents required for it to enter into and perform its obligations under this Agreement from its lenders, landlord, tenants, and any other persons with interests in the Site. If there is any charge against the Premises which could reasonably be construed as prospectively attaching to the Plant, Offtaker shall promptly provide an acknowledgement and consent from such lienholder, in form and substance reasonably acceptable to the Power Producer, stating that the ownership of the property in goods over the Plant remains in the Power Producer and further acknowledging that the Plant is personal property of Power Producer and agreeing not to disturb the rights of Power Producer in the Plant and under this Agreement. Such acknowledgment and consents, or acceptable notices thereof, shall be recorded, at Offtaker's expense, with the appropriate authority. Offtaker may in the future mortgage, pledge, and grant

security interests in all or a portion of the Site and the improvements thereon, provided the mortgagee or other grantee of the encumbrance acknowledges this Agreement, the Plant, the access Permissions granted hereunder, and the priority of Power Producer's rights in the Plant and the access Permissions.

10. PURCHASE OPTIONS, REMOVAL AT END OF TERM

10.1. End of Term Purchase Option

Offtaker or any of its assignee shall have the right to purchase the Plant from Power Producer at the expiration of the Operations Period at the Buyout Value of Rs 1.0 (rupee one only) for the Plant free from any charge, lien or any kind of encumbrances. The Offtaker hereby agrees that it shall be solely liable to bear all taxes as may be applicable for the purchase of the Plant from the Power Producer. The Parties agree that such right under this clause shall be exercised by the Offtaker at least 2 months prior to the termination of this Agreement, the end of the term standard maintenance has to be performed before the handover.

10.2. Transfer of Ownership

Upon Offtaker's notice that it elects to exercise the option set forth in Clause 10.1, the Offtaker and the Power Producer shall enter into an agreement in mutually agreed terms to transfer the Plant and the rights and obligations attached thereto. In case of Transfer of Ownership during or at the end of the Term of this contract, the Power Producer shall ensure that the Solar Power Plant is free from any charge, lien or any kind of encumbrances.

10.3. Operation & Maintenance After Sale

Upon Offtaker's notice that it elects to exercise the option set forth in Clause 10.1, the Offtaker and the Power Producer shall discuss entering into an operation and maintenance agreement under which Power Producer shall perform all or a portion of the operation and maintenance requirements of the Plant following Offtaker's purchase of the Plant. However, neither Party shall be under an obligation to enter into such an agreement.

10.4. No Survival of Purchase Option

The options for Offtaker to purchase the Plant under Clause 10.1 shall not survive the termination of this Agreement.

10.5. Removal of the Plant

Subject to the buy-out/purchase of the Plant by the Offtaker, upon the expiry of the Term or early termination of this Agreement, the Power Producer shall, at its own expense, remove all of its tangible property and equipment comprising the Plant from the Premises on a mutually convenient date but in no case later than ninety (90) days after the date of expiry of the Term or early termination of this Agreement. If the Power Producer fails to remove the Plant by such agreed upon date, Offtaker shall have the right, at its option, to remove the Plant. For the purposes of the Power Producer's removal of the tangible property and equipment comprising the Plant, Offtaker's covenants in relation provision of uninterrupted access to the Power Producer shall remain in effect until the date of actual removal of the tangible property and equipment comprising the Plant.

11. SHUTDOWNS, RELOCATION; CLOSURE OR SALE OF SITE

11.1. Offtaker Requested Shutdown

11.1.1. Deleted

- 11.1.2. During any shutdown period (but not including periods of Force Majeure), Offtaker will pay Power Producer an amount equal to the payments that Offtaker would have made to Power Producer hereunder for electric energy that would have been produced by the Plant during the period of the shutdown;
- 11.1.3. Determination of the amount of energy that would have been produced during the period of the shutdown shall be based on Deemed Generation computed as per Schedule F of this Agreement.

11.2. Power Producer Shutdown

Power Producer may shut down the Plant at any time in order to perform required emergency repairs and/or maintenance to the Plant for a maximum of seven (7) days. Power Producer may shutdown the Plant with intimation to Offtaker. Power Producer agrees to notify Offtaker seven (7) days in advance.

11.3. Plant Relocation

11.3.1. If the Solar Power Plant needs to be temporarily moved or its generation suspended during site repairs or for any other reason, either at the request of the Offtaker or due to acts of negligence or omission of the Offtaker or its employees, agents or contractors, the Offtaker will be responsible for any costs arising from moving or disassembling the Solar Power Plant. In the event the Plant relocation is requested by the Power Producer for reasons solely attributable to the Power Producer, all costs arising from such moving or disassembling the Solar Power Plant shall be solely to the account of the Power Producer. Suspension of Generation

- a) Any interruption in generation of Electricity during such relocation as described hereinabove in Clause 11.3.1, and reasons attributable to the Offtaker will continue to be billed as per Deemed Generation, during the period of interruption.
- b) where the electricity generation is suspended or the Solar Power Plant is to be temporarily moved on account of any acts of negligence or omission of the Power Producer or its employees, agents or contractors, the cost for relocation / disassembling shall be to the account of the Power Producer, who will further compensate to the Offtaker @ Rs. 2.50 per unit for shortfall in solar energy for the period such event occurs.

11.3.2. In addition, during the Relocation Event, except in the circumstances envisaged under Clause 11.3.1(b) above;

- a) Offtaker shall pay Power Producer an amount equal to the payments that Offtaker would have made to Power Producer hereunder for electric energy that would have been produced by the Plant following the Relocation Event;
- b) Determination of the amount of energy that would have been produced following the Relocation Event shall be based, during the first Operations Year, on the Deemed Generation and, after the first Operations Year, based on actual operation of the Plant in the same period in the previous Operations Year, unless Power Producer and Offtaker mutually agree to an alternative methodology.

11.3.3. Premises Shutdown; Interconnection Deactivated

- a) In the event Premises are closed as a result of an event that is not:
 - (i) a Force Majeure Event or
 - (ii) caused by or related to any unexcused action or inaction of Power Producer, Offtaker shall nevertheless continue to pay Power Producer for all electricity produced by the Plant on the Premises and delivered to the Point of Delivery.
- b) If an interconnection with the Local Electric Utility becomes deactivated for reasons that are not:
 - (i) a Force Majeure Event or

- (ii) caused by or related to any unexcused action or inaction of Power Producer such that the Plant is no longer able to produce electricity or transfer electricity to its respective Premises or to the Local Electric Utility, Offtaker will pay Power Producer an amount equal to the sum of payments that Offtaker would have made to Power Producer hereunder for electric energy that would have been produced by the Plant following such clause as per Deemed Generation (Schedule F)
- c) Determination of the amount of energy that would have been produced following such closure shall be based, during the first Operations Year, on the estimated levels of production and, after the first Operations Year, based on actual operation of the Plant in the same period in the previous Operations Year, unless Power Producer and Offtaker mutually agree to an alternative methodology.
- d) If a shutdown pursuant to this Clause 11.3.3 continues for 365 days or longer, Power Producer will be entitled to ask for extension of BG for another year or Offtake has to pay the BuyoutPrice of the plant as specified in Schedule B of this agreement.

11.4. Sale of Site

- 11.4.1. The Parties hereby confirm that they are entering into the Agreement in good faith and have no current plans or discussion of plans of ceasing business operations.
- 11.4.2. In the event Offtaker transfers (by sale, lease, or otherwise) all or a portion of its interest in the Site, Offtaker shall remain primarily liable to Power Producer for the performance of the obligations of Offtaker hereunder notwithstanding such transfer.
- 11.4.3. However, if no Offtaker Event of Default has occurred and is continuing and the transferee is acceptable to Power Producer in their sole discretion and executes agreements assuming this Agreement in form and substance satisfactory to Power Producer in their sole discretion, Offtaker may be released from further obligations under this Agreement.
- 11.4.4. In the event that the Offtaker or the transferee wishes to terminate the Agreement, then they shall pay to the Power Producer applicable Buy Out value.

12. TAXES

12.1. Property Taxes

Offtaker shall be responsible for all ad valorem personal property or real property taxes levied against the Site, improvements thereto and personal property located thereon, except that Power Producer shall be responsible for ad valorem personal property or real property taxes levied against the Plant. If Offtaker is assessed any taxes related to the existence of the Plant on the Premises, Offtaker shall immediately notify Power Producer. Offtaker and Power Producer shall cooperate in contesting any such assessment; provided, however, that Offtaker shall pay such taxes to avoid any penalties or interest on such Taxes, subject to reimbursement by Power Producer. If after resolution of the matter, such tax is imposed upon Offtaker related to the improvement of real property by the existence of the Plant on the Site, Power Producer shall reimburse Offtaker for such tax.

12.2. Tax Contests

Each Party has the right to contest taxes in accordance with Applicable Law and the terms of encumbrances against the Site. Each Party shall use all reasonable efforts to cooperate with the other in any such contests of tax assessments or payments. In no event shall either Party postpone during the pendency of an appeal of a tax assessment the payment of taxes otherwise due except to the extent such postponement in payment has been bonded or otherwise secured in accordance with Applicable Law.

12.3. Payment of Delinquent Taxes

In the event either Party fails to pay any taxes that may become a lien upon the other Party's property, such Party may pay such amounts and in such event shall be entitled to recover such paid amount from the other Party, together with interest thereon at the rate of one percent (1%) per month, compounded monthly.

12.4. Reimbursement Deadline

Any reimbursement of taxes owing pursuant to this Section 12 shall be paid within twenty (20) Business Days of receiving an invoice therefor from the Party who paid the taxes.

13. INSURANCE

13.1. Coverage

Power Producer will maintain the insurance coverage in full force related to the Safety and operational hazards of Solar Power plant (Man, Machine, Milieu) and effect throughout the Term.

14. COOPERATION; SOLAR ACCESS; FUTURE IMPROVEMENTS

14.1. Cooperation

The Parties acknowledge that the performance of each Party's obligations under this Agreement will frequently require the assistance and cooperation of the other Party. Each Party therefore agrees, in addition to those provisions in this Agreement specifically providing for assistance from one Party to the other, that it will at all times during the Term cooperate with the other Party and provide all reasonable assistance to the other Party to help the other Party perform its obligations hereunder.

14.2. Unrestricted Solar Access

Offtaker, or any lessee, grantee or licensee of Offtaker, shall not erect any structures on, or make other modifications to, or plantings on, the Site which will interfere with the construction, operation or maintenance of, or solar access of, the Plant.

15. CONFIDENTIALITY

15.1. Limits on Disclosure of Confidential Information

Subject to the exceptions set forth below in Clause 15.2 each Party agrees that:

- 15.1.1. Without the consent of the other Party, it shall not disclose any Confidential Information received from the other Party to any other person and
- 15.1.2. It shall use any Confidential Information received from the other Party only for the purpose of fulfilling its obligations under this Agreement.
- 15.1.3. The terms of this Agreement also shall be confidential and shall not be disclosed to any third party without prior written approval of the other Party. However the restriction of such disclosure shall not be applicable if the disclosure is made to (i) the professional advisors, agents, employees, financing parties/lenders or to any of its group companies of such Party, which shall be disclosed on need to know basis; (ii) to any government or other similar body or authority; and (iii) pursuant to Applicable Laws.

15.2. Permissible Disclosures

- 15.2.1. Notwithstanding the foregoing, the Parties may, and shall, disclose any information required to be disclosed under rules, regulations required to be disclosed by any Governmental Authority under Applicable Law or pursuant to a validly issued summonses or required filing.
- 15.2.2. Power Producer may provide this Agreement and any correspondence, notices and other information related to this Agreement to any person who has provided or who is interested in providing construction or permanent financing, or any refinancing thereof, to Power Producer in connection with the Plant. In addition, if a receiving Party is required by Applicable Law to disclose any Confidential Information provided by the disclosing Party, the receiving Party may make disclosure as required by law, but the receiving Party shall prior to making any disclosure notify the disclosing Party of the requested disclosure and shall use its reasonable efforts to cooperate with the disclosing Party, but at the expense of the disclosing Party, in any efforts by the disclosing Party to minimize the extent of the Confidential Information disclosed and the persons to whom disclosed.

15.3. Enforcement of Confidentiality Provisions

Each Party acknowledges that it may be impossible to measure the damages which may result from a breach of this Clause 15 and agrees that the provisions of this Clause 15 may be required to be specifically performed and each Party shall have the right to obtain preliminary and permanent injunctive relief to secure specific performance of the terms of this Clause 15. The provisions of this Clause 15 shall survive until one year after the Effective date of any termination of this Agreement.

16. INDEMNIFICATION

16.1. Power Producer Indemnification

- 16.1.1. Power Producer shall indemnify, defend and hold Offtaker and its directors, officers, employees, agents, volunteers, and invitees ("**Offtaker's Indemnified Parties**"), harmless from and against all Losses incurred by the Offtaker Indemnified Parties to the extent arising from or out of the following:
- a) any claim for or arising out of any injury to or death of any Person or loss or damage to property to the extent arising out of Power Producer's (or its contractor's) negligence or willful misconduct;
 - b) Power Producer's violation of Applicable Law;
 - c) any failure to properly interconnect or comply with the procedures of the Local Electric Utility; or
 - d) any failure to properly handle or dispose of any Hazardous Materials brought onto the Site by Power Producer or by any of Power Producer's employees, agents, volunteers, and invitees.
- 16.1.2. Such duty to indemnify with respect to any injuries to persons or damage to property arising from the generation of electricity from the Plant shall not extend to incidents occurring on Offtaker's side of the Point of Delivery except to the extent caused by incidents on Power Producer's side of the Point of Delivery.
- 16.1.3. Such duty to indemnify shall not apply to any action or claim, whether in tort (including negligence and strict liability), contract or otherwise for any loss, injury, or costs resulting from interruptions in service. Power Producer shall not be obligated to indemnify Offtaker or any Offtaker Indemnified Party for any Loss to the extent such Loss is due to the negligence or willful misconduct of Offtaker or any Offtaker Indemnified Party.

16.2 Offtaker Indemnification

16.2.1 Offtaker shall indemnify, defend and hold Power Producer, its contractors, subcontractors, shareholders, directors, officers, employees, agents, and invitees, ("**Power Producer's Indemnified Parties**"), harmless from and against all Losses, damages, cost incurred by the Power Producer's Indemnified Parties to the extent arising from or out of any of the following:

- a) any claim for or injury to or death of any Person or loss or damage to property to the extent arising out of the negligence or willful misconduct of any of Offtaker's Indemnified Parties;
- b) Offtaker's violation of Applicable Law; or
- c) the presence, removal or remediation of any Hazardous Materials on the Site (other than any Hazardous Materials brought on to the Site by Power Producer's Indemnified Parties).

16.2.2 Offtaker shall not be obligated to indemnify Power Producer or any Power Producer Indemnified Parties for any Loss to the extent such Loss is due to the gross negligence or willful misconduct of Power Producer or any Power Producer Indemnified Party.

16.3. Survival of Indemnification

The obligations of indemnification as specified above shall survive termination of this Agreement.

17. REPRESENTATIONS AND WARRANTIES

17.1. Mutual Representations

17.1.1. Each Party hereby represents and warrants to the other, as of date hereof, that:

- a) **Organization.** It is duly organized, incorporated, and in good standing with limited liability and validly existing under the laws of India, of its state of incorporation and of the state in which the Premises are located, respectively, and has the power and authority to enter into, execute and deliver this Agreement and to perform its obligations hereunder.
- b) **No Conflict.** The execution and delivery of this Agreement and the performance of and compliance with the provisions of this Agreement will not conflict with or constitute a breach of or a default under
 - (i) its organizational documents;
 - (ii) any agreement or other obligation by which it is bound;
 - (iii) any law or regulation.
- c) **Enforceability.**
 - (i) all actions required to be taken by or on the part of such Party necessary to make this Agreement effective have been duly and validly taken;
 - (ii) this Agreement has been duly and validly authorized, executed and delivered on behalf of such Party; and
 - (iii) this Agreement constitutes a legal, valid and binding obligation of such Party, enforceable in accordance with its terms, subject to laws of bankruptcy, insolvency, reorganization, moratorium or other similar laws.
- d) **No Material Litigation.** There are no court orders, actions, suits or proceedings at law or in equity by or before any governmental authority, arbitral tribunal or other body, or threatened against or affecting it or brought or asserted by it in any court or before any arbitrator of any kind or before or by any governmental authority that could reasonably be expected to have a material adverse effect on it or its ability to perform its obligations under this Agreement, or the validity or enforceability of this Agreement.
- e) That they perform their obligations hereunder in accordance with all applicable anti-corruption laws and regulations.

17.2. Offtaker Representations

In addition to the representations and warranties in Clause 17.1 above, Offtaker hereby represents and warrants to Power Producer, as of date hereof, that:

- 17.2.1. Electric Usage. Offtaker has provided to Power Producer complete and correct records of its electric usage at the Site for the preceding two years.
- 17.2.2. Condition of Premises. Offtaker has provided to Power Producer Offtaker's complete and correct records of the physical condition of the Premises and the Power Producer has conducted a site visit. If it is discovered that the actual site conditions on part of, or on the entire Premises upon which all or part of the Plant is to be installed, are materially different from the information presented by Offtaker, then if practicable the rates payable by Offtaker hereunder shall be adjusted to compensate Power Producer for the cost of design and construction changes and delays incurred to adapt the Plant to the unknown conditions. If such adjustment is not practicable, Power Producer shall have other rights under this Agreement. Offtaker further agrees not to undertake any sort construction activity which will create shadow, effect performance of the system, restrict personnel to access the plant on the Premises during the subsistence of this Agreement. Any such construction activity on the part of the Offtaker, would require a prior written approval from the Power Producer. The Power Producer shall have a right to terminate this Agreement in case of any construction activity undertaken by the Offtaker on the Premises prior to seeking a written approval and shall be liable to pay the Buy Out as per the terms of this Agreement.
- 17.2.3. Financial Information. The financial statements Offtaker has provided to Power Producer present fairly in all material respects the financial condition and results of operations of Offtaker.

18. FORCE MAJEURE

18.1. Excuse of Force Majeure Event

Except as provided in Clause 18.2 or otherwise specifically provided in this Agreement, neither Party shall be considered in breach of this Agreement or liable for any delay or failure to comply with this Agreement, if and to the extent that such delay or failure is attributable to the occurrence of a Force Majeure Event; provided that the Party claiming relief as a result of the Force Majeure Event shall promptly

- 18.1.1. notify the other Party in writing of the existence and details of the Force Majeure Event, within thirty (30) days of its knowledge of commencement of such event. In case of total disruption of communication, the same must be communicated as soon as practicable after the occurrence of Force Majeure;
- 18.1.2. exercise all reasonable efforts to minimize delay caused by such Force Majeure Event and mitigate the effect of such event as soon as possible;
- 18.1.3. notify the other Party in writing of the cessation of such Force Majeure Event; and
- 18.1.4. resume performance of its obligations hereunder as soon as practicable from the date of cessation of the Force Majeure event or its consequences.
- 18.1.5. Parties shall agree to extend the PPA tenure with a mutually agreed extended period to overcome the loss of revenue to the Power Producer due to such Force Majeure Event.

18.2. No Excuse for Payment for Prior Services

Obligations to make payments for services already provided shall not be excused by a Force Majeure Event.

18.3. Termination for Force Majeure Event

- 18.3.1. Notwithstanding anything to the contrary in this Clause 18, if nonperformance on account of a Force Majeure Event continues beyond a continuous period of three hundred and sixty-five (365)

days, then the Party not claiming Force Majeure shall have the right to terminate this Agreement upon thirty (30) days' notice to the other.

- 18.3.2. In the event of such a termination of this Agreement with respect to the Plant, the Parties shall not be released from any payment or other obligation arising under this Agreement which accrued prior to the shutdown of the Plant or the Premises, and the Indemnity, Confidentiality and Dispute Resolution provisions of this Agreement shall survive the termination of this Agreement.

19. POWER PRODUCER DEFAULT AND OFFTAKER REMEDIES

19.1. Power Producer Default and Offtaker Remedies

Power Producer shall be in default of this Agreement, except for the reasons not attributable to the Power Producer, if any of the following ("Power Producer Events of Default") shall occur:

- 19.1.1. Misrepresentation: Any representation or warranty by Power Producer under Section 16 hereof, is incorrect or incomplete in any material way, or omits to include any information necessary to make such representation or warranty not materially misleading, and such defect is not cured within fifteen (15) days after receipt of notice from Offtaker identifying the defect.
- 19.1.2. Abandonment during Construction and Installation: After commencement of construction of the Plant, Power Producer abandons construction or installation of the Plant for thirty (30) days and fails to resume construction or installation within thirty (30) days after receipt of notice from Offtaker stating that, in Offtaker's reasonable determination, Power Producer has abandoned construction and installation of the Plant;
- 19.1.3. Failure to Operate: After the Commercial Operation Date, Power Producer fails to operate the Plant for a period of ninety (90) days which failure is not due to equipment failure, or damage to the Plant, act of governmental authority, or exercise of Power Producer's rights under this Agreement, or otherwise excused by the provisions of Clause 18.1 (relating to Force Majeure Events); and Power Producer fails to resume operation within thirty(30) days after receipt of notice from Offtaker stating that, in Offtaker's reasonable determination, Power Producer has ceased operation of the Plant, provided, however, that the cure period shall be extended by the number of calendar days during which Power Producer is prevented from taking curative action if Power Producer had begun curative action and was proceeding diligently, using commercially reasonable efforts, to complete such curative action.
- 19.1.4. Obligation Failure: Power Producer fails to perform any obligation hereunder, such failure is material, such failure is not excused by the provisions of Clause 18.1 (relating to Force Majeure Events), and such failure is not cured within: (A) ten (10) days if the failure involves a failure to make payment when due or maintain required insurance; or (B) sixty (60) days if the failure involves an obligation other than payment or the maintenance of insurance, after receipt of notice from Offtaker identifying the failure.
- 19.1.5. Insolvency: Power Producer (A) applies for or consents to the appointment, or the taking of possession by, a receiver, custodian, trustee or liquidator of itself or a substantial portion of its property; (B) admits in writing its inability, or is generally unable, to pay its debts as such debts become due; (C) makes a general assignment for the benefit of its creditors; (D) commences a voluntary case under any bankruptcy law; (E) files a petition seeking to take advantage of any other law relating to bankruptcy, insolvency, reorganization, winding up, or composition or readjustment of debts; (F) acquiesces in, or fails to contest in a timely manner, any petition filed against Power Producer in an involuntary case under bankruptcy law or seeking to dissolve Power Producer under other Applicable Law; or (G) takes any action authorizing its dissolution.

19.2. Oftaker Remedies

Upon an Event of Default by Power Producer, provided that Offtaker complies with its obligations under Clause 21 and Power Producer or its Assignee (Financing Party) does not cure such Event of Default by Power Producer, Offtaker may terminate this Agreement and may ask Power Producer to remove the Plant from its Premises and Power producer shall vacate and leave the site to the original state as it was been handed over at the time of installation of solar power plant subject to normal wear and tear.

20. OFFTAKER DEFAULT AND POWER PRODUCER REMEDIES

20.1. The occurrence and continuation of any of the following events, unless any such event occurs as a result of a Force Majeure event, shall constitute an Offtaker's Event of Default ("Offtaker Event of Default")

- 20.1.1. Bankruptcy, liquidation or dissolution of the Offtaker pursuant to Applicable Law, except for the purpose of a merger, consolidation or re-organization that does not affect the ability of the resulting entity to perform all its obligations under this Agreement and provided that such resulting entity expressly assumes all such obligations.
- 20.1.2. Default in payment of undisputed invoices for a continuous period of six (6) months within a period of twelve (12) months.
- 20.1.3. Failure to perform its obligations under this Agreement.
- 20.1.4. Abandonment of this Agreement by way of failure to pay under the terms of this Agreement: In case the Offtaker fails to make payments under this Agreement for a continuous period of twelve (12) months, then the Power Producer shall be at liberty to consider this Agreement as having been terminated on account of Offtaker's Event of Default. In the event of termination on account of non-payment by the Offtaker as aforesaid, the Offtaker shall be liable to pay, immediately and without demur, the Buy Out value as stated in Schedule B to the Power Producer. The payment of Buy Out value due shall be without prejudice to the rights of the Power Producer to encash the Bank Guarantee (refer clause 7.4) towards outstanding dues and payments towards the dues under this Agreement.

20.2. Default Damages

Upon an Event of Default by Offtaker, it shall pay to Power Producer the amount equivalent to the sum of Buy Out value as specified in Schedule B of this agreement. Upon termination, the Offtaker shall pay the Buy Out price for the relevant year to the Power Producer, no later than seven (7) days from the date of termination.

21. TERMINATION

21.1 Termination for Offtaker's Event of Default

The Power Producer shall have the right to terminate this Agreement if any of the following events ("Offtaker Default") occurs:

- a. Upon occurrence of an Insolvency Event in relation to the Offtaker;
- b. Unless otherwise agreed by the Parties failure of the Offtaker to meet payment obligations as set forth in this Agreement after the Due Date and the same subsists for a period of more than 6 months;
- c. Failure of the Offtaker to maintain the Security Deposit in accordance with this Agreement;
- d. Breach by the Offtaker of any of the representations and/ or warranties set forth in this Agreement;

- e. Power Producer ceasing to have access to the Premises as per the terms of this Agreement;
- f. Commencement of enforcement, attachment or similar proceedings by any mortgagee in respect of the Premises ;or

21.2 Termination for the Power Producer Even to Default

Unless otherwise agreed by the Parties, the Offtaker shall have the right to terminate this Agreement if any of the following events ("**Power Producer Default**") occurs:

- a. Upon occurrence of an Insolvency Event in relation to the Power Producer;
- b. Material breach by the Power Producer of any of the representations and/or warranties set forth in this Agreement;
- c. Failure by the Power Producer to achieve the Commercial Operation Date not later than Sixty (60) days after the Scheduled Commercial Operation Date. It is understood and agreed by the Parties that the Purchaser cannot terminate the Agreement if such delay in Commercial Operation Date is as a result of delay in receiving any government approval.
- d. failure by the Power Producer to pay the loan amount taken from any lender against pledge of the Project equipment's, due to which the Power Producer is unable to provide Solar Power for a continuous period of 6 (six) months.

21.3 If a Power Producer Default or a Offtaker Default has occurred ("**Defaulting Party**" as applicable), the Offtaker or the Power Producer (as the case may be) shall allow the Defaulting Party to cure the default for a period of thirty(30)days ("**Cure Period**").For the avoidance of doubt, it is clarified that such Cure Period shall be applicable in relation to those defaults only which can be cured.In the event the Defaulting Party is unable to cure the default within the Cure Period, then the other Party may terminate the Agreement by giving a notice of not less than sixty(60) days to the Defaulting Party ("**Termination Notice**"). Upon delivery of the Termination Notice by the other Party, this Agreement shall automatically terminate.

21.4 The right of either Party to terminate this Agreement is in addition to the remedies expressly provided herein and the terminating Party may exercise any other remedy it may have at law or equity or under the Agreement.

21.5 With out prejudice to Section 10.5, upon termination, each Party shall pay to the other Party, the amounts that have accrued prior to termination in accordance with the terms of this Agreement.

22. COLLATERAL ASSIGNMENT, FINANCING PROVISIONS

22.1. Financing Arrangements

Power Producer may mortgage, pledge, grant security interests, assign, or otherwise encumber its interests in this Agreement to any persons providing financing for the Plant. Offtaker acknowledges that Power Producer will obtain construction financing for the Plant from third party and that Power Producer may either obtain term financing secured by the Plant or sell or assign the Plant to a Financing Party or may arrange other financing accommodations from one or more financial institutions and may from time to time refinance, or exercise purchase options under such transactions. Offtaker acknowledges that in connection with such transactions Power Producer may secure Power Producer's obligations by, among other collateral, an assignment of this Agreement and a first security interest in the Plant as well as the right to supply solar power to the Offtaker under the terms of an agreement containing provisions similar to this Agreement in relation to "RATES, BILLING AND PAYMENT SCHEDULE". Power Producer agrees to serve prior

notice to Offtaker before any material change in financing arrangements and such changes will not bring any financial obligations to the Offtaker.

In order to facilitate such necessary sale, conveyance, or financing, assignment with respect to any Financing Party, as applicable, Offtaker agrees as follows:

22.1.1. Consent to Assignment

Offtaker hereby consents to both of the sale of the Plant to a Financing Party and the collateral assignment to the Financing Party of the Power Producer's right, title and interest in and to this Agreement either in full or in part.

Format for Consent of Assignment is attached as Schedule -G to this agreement.

22.1.2. Rights of Financing Party

Notwithstanding any contrary term of this Agreement, the Financing Party shall have following rights during the term of this Agreement:

(a) Step-In Rights

The Financing Party, as owner of the Plant, or as collateral assignee of this Agreement, shall be entitled to exercise, in the place and stead of Power Producer, any and all rights and remedies along with liabilities and obligation of Power Producer under this Agreement in accordance with the terms of this Agreement. The Financing Party shall also be entitled to exercise all rights and remedies of owners or secured parties, respectively, generally with respect to this Agreement and the Plant; For the avoidance of doubt, it is agreed that the Power Producer and the Financing Party shall endeavor to appoint a new operation and maintenance agent with proven credentials. If such agent is identified, the Offtaker shall not unreasonably withhold such approval.

(b) Opportunity to Cure Default

The Financing Party shall have the right, to pay all sums due under this Agreement and to perform any other act, duty or obligation required of Power Producer thereunder or cause to be cured any default of Power Producer thereunder in the time and manner provided by the terms of this Agreement. Nothing herein requires the Financing Party to cure any default of Power Producer under this Agreement or (unless the Financing Party has succeeded to Power Producer's interests under this Agreement) to perform any act, duty or obligation of Power Producer under this Agreement, but Offtaker hereby gives it the option to do so;

(c) Exercise of Remedies

Upon the exercise of remedies, including any sale of the Plant by the Financing Party, whether by judicial proceeding or under any power of sale contained herein, or any conveyance from Power Producer to the Financing Party (or any assignee of the Financing Party as defined below) in lieu thereof, the Financing Party shall give notice to Offtaker of the transferee or assignee of this Agreement. Any such exercise of remedies shall not constitute a default under this Agreement;

(d) Cure of Bankruptcy Rejection

Upon any rejection or other termination of this Agreement pursuant to any process undertaken with respect to Power Producer under the Bankruptcy laws of India including the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 at the request of Financing Party made within ninety (90) days of such termination or rejection, Offtaker shall enter into a new agreement with Financing Party or its assignee having substantially the same terms and conditions as this Agreement.

i) Right to Cure

A. Cure Period

Offtaker will not exercise any right to terminate or suspend this Agreement unless it shall have given the Financing Party prior written notice of its intent to terminate or suspend this Agreement, as required by this Agreement, specifying the condition giving rise to such right, and the Financing Party shall not have caused to be cured the condition giving rise to the right of termination or suspension within thirty (30) days after such notice or (if longer) the periods provided for in this Agreement; provided that if such Power Producer default reasonably cannot be cured by the Financing Party within such period and the Financing Party commences and continuously pursues cure of such default within such period, such period for cure will be extended for a reasonable period of time under the circumstances, such period not to exceed additional ninety (90) days. The Parties' respective obligations will otherwise remain in effect during any cure period.

B. Continuation of Agreement

If the Financing Party or its assignee (including any purchaser or transferee), pursuant to an exercise of remedies by the Financing Party, shall acquire title to or control of Power Producer's assets and shall, within the time periods described in Clause 22.1.2(d)(i) above, cure all defaults under this Agreement existing as of the date of such change in title or control in the manner required by this Agreement and which are capable of cure by a third person or entity, then such Person shall no longer be in default under this Agreement, and this Agreement shall continue in full force and effect.

23. LIMITATIONS OF DAMAGES

Except as explicitly provided in this Agreement, neither Party nor any of its indemnified persons shall be liable to the other party or its indemnified persons for any special, punitive, exemplary, indirect, or consequential damages, arising out of or in connection with this Agreement.

24. OVER RIDING CLAUSE

It is hereby understood that at any point of time Obligation and Liabilities of this Agreement shall be complied by the Solar Power Developer or its assignee/ transferee or any other party which has become the Solar Power Developer thereof due to the transfer of ownership.

25. DISPUTE RESOLUTION**25.1. Resolution through mutual discussions**

If any dispute or difference of any kind whatsoever shall arise between the Parties in connection with or arising out of this Agreement or out of the breach, termination or invalidity of the Agreement hereof, the Parties shall attempt to resolve through mutual discussions within fifteen (15) days.

25.2. Continuance of Performance

Notwithstanding the existence of any Dispute except for non-payment without justification, the Parties hereto shall continue to perform their respective obligations under this Agreement throughout the Term of this Agreement.

25.3. Negotiation Period

The Parties shall negotiate in good faith and attempt to resolve any dispute, controversy or claim arising out of or relating to this Agreement ("Dispute") within 30 days after the date that a Party gives written notice of such Dispute to the other Party.

25.4. Mediation

If, after such negotiation in accordance with Clause 25.3, the Dispute remains unresolved, either Party may require that a non-binding mediation take place. In such mediation, representatives of the Parties with authority to resolve the dispute shall meet for at least three hours with a mediator whom they choose together. If the Parties are unable to agree on a mediator, then either Party is hereby empowered to request the appropriate Courts at New Delhi to appoint a mediator. The mediator's fee or expenses shall be paid one-half by each Party.

25.5. Arbitration of Disputes

25.5.1. Disputes that remain unresolved after mediation will be resolved through binding arbitration. All such disputes that have not been satisfactorily resolved under Clause 25.4 above shall be referred to arbitration in accordance with the provisions of the Arbitration and Conciliation Act, 1996. Irrespective of the Arbitration/dispute resolution proceedings, the Parties shall continue to perform their respective obligations under this Agreement, during the Term of the Agreement, except for non-payment without justification and / or unless the nature of the dispute is such that a Party is unable to perform its obligations without the resolution of the Dispute under the Arbitration/other proceedings.

25.5.2. The arbitral tribunal shall consist of a Sole Arbitrator to be appointed upon mutual consent of the Parties. If no agreement could be reached on the appointment of the Sole Arbitrator within a reasonable period (say one month of submitting the proposal), then the Parties shall resort to the remedy provided for in the Arbitration & Conciliation Act, 1996.

25.5.3. The place of the arbitration shall be Delhi and the language of the arbitration shall be English. Each Party shall bear its respective legal and arbitration costs.

25.5.4. The award of the arbitral tribunal shall be final and binding on the Parties and shall be enforceable in accordance with its terms. The arbitral tribunal shall state reasons for its findings and the award shall be substantiated in writing. The Parties agree to be bound by the decision thereby and to act accordingly.

25.5.5. The Parties agree that either Party may seek interim measures including injunctive relief in relation to the provisions of this Agreement or the Parties' performance of it from any court of competent jurisdiction.

25.5.6. The Parties expressly waive and forego any right to punitive, exemplary, or similar damages in connection with any Dispute and no such damages shall be awarded or provided for in any Dispute resolution proceeding under or in aid of this Article.

25.6. Survival of Arbitration Provisions

The provisions of this Clause 24 shall survive any termination of this Agreement for any reason whatsoever and shall apply (except as provided herein) to any disputes arising out of this Agreement.

26. NOTICES

26.1. Delivery of Notices

All notices or other communications which may be or are required to be given by any party to any other party pursuant to this Agreement shall be in writing and shall be either:

- 26.1.1. delivered by hand;
- 26.1.2. mailed by registered post, speed post, return receipt requested, postage prepaid;
- 26.1.3. delivered by a recognized overnight or personal delivery service;
- 26.1.4. transmitted by facsimile (such transmission to be effective on the day of receipt if received prior to 5:00 pm local time on a business day or in any other case as of the next business day following the day of transmittal); or
- 26.1.5. transmitted by email if receipt of such transmission by email is specifically acknowledged by the recipient (automatic responses not being sufficient for acknowledgement), addressed as follows:

If to Power Producer:

Company Name: Enerture Solar One Pvt Ltd

Address: ABL workspaces, Celebration Gardens, NH-8, Delhi-37

Attention: Bhairaw Kumar Mandal/PS Naura

Email: -bhairaw@enerture.co.in/psnaura@enerture.co.in

If to Offtaker :

Company Name: Victora Auto Ltd

Address: Plot no 42, Sector 20A, near ICAI bhawan, Faridabad, 121001

Attention: Mr. Harbir Singh Banga

Email: harbirbanga@victora.co.in

26.2. Effectiveness of notices

- 26.2.1. Notices shall be effective when delivered (or in the case of email, when acknowledged by the recipient) in accordance with the foregoing provisions, whether or not (except in the case of email transmission) accepted by, or on behalf of, the Party to whom the notice is sent.
- 26.2.2. Each Party may designate by Notice in accordance with this section to the other Party a new address to which any notice may thereafter be given.

26.3. Change in address:

Any Party may by notice of at least fifteen (15) days to the other Party change the address and/or addresses to which such notices and communication to it are to be delivered or mailed.

27. CHANGE IN LAW

- 27.1 "Change in Law" means the occurrence of any of the following events after the Effective Date resulting into any additional recurring/non- recurring expenditure by the Power Producer or any income to the Power Producer:

- 27.1.1. the change in the taxation or solar incentives regime applicable to the Project as on the Effective Date due to which the Power Producer is entitled to a corresponding increase in Tariff or a suitable reimbursement to compensate the Power Producer for the increased cost or loss of revenue / profit.
- 27.1.2. the enactment, coming into effect, adoption, promulgation, amendment, modification or repeal (without re-enactment or consolidation) in India, of any Applicable Law, including rules and

28

regulations framed pursuant to such Applicable Law whereby the change in duties and levies payable changes including but not limited to any duties payable subsequent to signing of this agreement viz. anti-dumping duties, safeguard duties, and any other duties which are made applicable.

- 27.1.3. a change in the interpretation or application of any Applicable Law by any Government Authority having the legal power to interpret or apply such Applicable Law, or any Competent Court of Law.
 - 27.1.4. the imposition of a requirement for obtaining any Consents, Clearances and Permits from any Government authority which h was not required earlier;
 - 27.1.5. a change in the terms and conditions prescribed for obtaining any Consents, Clearances and Permits or the inclusion of any new terms or conditions for obtaining such Consents, Clearances and Permits; except due to any default of the Power Producer;
 - 27.1.6. but shall not include (i) any change in any withholding tax on income or dividends distributed to the shareholders of the Company, or (ii) any change on account of regulatory measures.
- 25.2 If there is any Change in Law affecting the Project, the Power Producer shall notify the Offtaker in writing, describing in reasonable detail the events constituting a Change in Law and the impact it has or would have on the Power Producer's revenues or profits from the Project.
- 25.3 Following such notification, the Tariff shall stand increased by an amount and for such period as would sufficiently compensate the Power Producer for the adverse effects on revenue or profits caused by the Change in Law. All additional cost on such duties and levies made applicable after the date of Signing of this Agreement shall be borne by the Offtaker.
- 25.4 The Offtaker may request the Power Producer to provide such additional information or document as it deems necessary to verify the effect of Change in Law on the Project.

28. MISCELLANEOUS

28.1. Governing Law

This Agreement shall be governed by and construed in accordance with the laws of India, including principles of good faith and fair dealing that will apply to all dealings under this Agreement.

28.2. Jurisdiction

Subject to the provisions of Clause 25.5.3, the courts of Delhi shall have exclusive jurisdiction in relation to all matters arising out of this Agreement.

28.3. Severability

If any non-material part of this Agreement is held to be unenforceable, the rest of the Agreement will continue in effect. If a material provision is determined to be unenforceable and the Party which would have been benefited by the provision does not waive its unenforceability, then the Parties shall negotiate in good faith to amend the Agreement to restore to the Party that was the beneficiary of such unenforceable provision the benefits of such provision. If the Parties are unable to agree upon an amendment that restores the Party's benefits, the matter shall be resolved under Clause 25.5 in order to restore to the Party that was the beneficiary of the unenforceable provision the economic benefits of such provision.

28.4. Amendment and Waiver

28.4.1. This Agreement may only be amended by a writing signed and duly executed by an authorized representative of both Parties. Any waiver of any of the terms hereof shall be enforceable only to

the extent it is waived in a writing signed by the Party against whom the waiver is sought to be enforced.

28.4.2. Any waiver shall be effective only for the particular event for which it is issued and shall not constitute a waiver of a subsequent occurrence of the waived event nor constitute a waiver of any other provision hereof, at the same time or subsequently.

28.5. Assignment

Neither Party may assign, sell, transfer or in any other way convey its rights, duties or obligations under this Agreement, either in whole or in part, without the prior written consent of the other Party unless it is permitted as per the provisions of this Agreement. Consent shall not be unreasonably withheld or delayed. The approval of Offtaker is not required in case the rights and/or obligations of the Power Producer are assigned, transferred or novated to any of its financing parties/lender or to its affiliates.

28.6. Agency

Unless specifically prohibited, the Parties shall be free to employ agents to perform their obligations under this Agreement, so long as the Parties remain primarily liable for the due performance of this Agreement.

28.7. No Joint Venture

This Agreement is not intended, and shall not be construed, to create any association, joint venture, agency relationship or partnership between the Parties or to impose any such obligation or liability upon either Party. Neither Party shall have any right, power, or authority to enter into any agreement or undertaking for, or act as or be an agent or representative of, or otherwise bind, the other Party.

28.8. Entire Agreement

This Agreement, together with any documents referred to in it, supersedes any and all oral and written agreements, drafts, undertakings, representations, warranties and understandings heretofore made relating to the subject matter hereof and constitutes the entire agreement and understanding of the Parties relating to the subject matter hereof.

28.9. Cooperation:

The Parties acknowledge that they are entering into a long-term arrangement in which the cooperation of both of them will be required. If, during the Term hereof, changes in the operations, facilities or methods of either Party will materially benefit a Party without detriment to the other Party, the Parties commit to each other to make reasonable efforts to cooperate and assist each other in making such change.

28.10. Third Party Beneficiaries:

This Agreement is solely for the benefit of the Parties and their respective successors and permitted assigns and shall not be construed as creating any duty, standard of care or any liability to, any person not a party to this Agreement.

28.11. Language:

All agreements, correspondences and communication between the Parties relating to this Agreement and all other documentation to be prepared and supplied under the Agreement shall be written and in English, and the Agreement shall be construed and interpreted in accordance with English language.

26.10 Erection, Commissioning and Operation:

The Power Producer will bear all costs towards staying arrangement, conveyance or any other expenses of executive, consultant, labor or any other associates, vendors or sub-contractors of the Power Producers during the installation, commissioning and operation period.

26.11 Survival of Obligations:

Expiration or early termination of this Agreement shall not relieve the Parties of obligations that by their nature should survive such expiration or termination.

28.12 Counterparts:

This Agreement may be executed in two counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Delivery of signature by fax, or scan delivered by email, receipt acknowledged, or electronic signature are effective to bind a Party hereto.

IN WITNESS WHEREOF, intending to be legally bound hereby, Power Producer and Offtaker have executed this Power Purchase Agreement as of the date first set forth above.

Exhibit II. Definitions

- 1) "Access Rights" means the rights provided in this Agreement for Power Producer and its designees, including Installer, to enter upon and cross the Site to install, operate, maintain, repair and remove the Project, and to interconnect the Project with the Local Electric Utility and to provide water, electric and other services to the Project.
- 2) "Act" means the Electricity Act, 2003 and the rules and regulations made there under from time to time along with amendments thereto and replacements thereof and any other Applicable Law related to electricity.
- 3) "Affected Party" shall mean a Party whose performance has been affected by an event of Force Majeure.
- 4) "Affiliate" means, as to any Person, any other Person which, directly or indirectly, is in control of, is controlled by, or is under common control with, such Person. For purposes of this definition, "control" of a Person means the power, directly or indirectly, to direct or cause the direction of the management and policies of such Person whether by contract or otherwise.
- 5) "Agreement" means this Power Purchase Agreement, including all its recitals and Schedules attached hereto, as the same may be amended from time to time in accordance with the provisions hereof.
- 6) "Applicable Law" means any constitutional provision, law, statute, rule, regulation, ordinance, treaty, order, decree, judgment, decision, certificate, holding, injunction, registration, license, franchise, permit, authorization, or guideline issued by a Governmental Authority that is applicable to a Party to this Agreement or the transaction described herein. Applicable Law also includes an approval, consent or requirement of any Governmental Authority having jurisdiction over such Party or its property, enforceable at law or in equity. More specifically, it means all laws, brought into force and effect by the Government of India or the State Governments including Electricity Act, 2003, rules, regulations and notifications made there under, and judgments, decrees, injunctions, writs and orders of any court of record, applicable to this Agreement and the exercise, performance and discharge of the respective rights and obligations of the Parties, as may be in force and effect during the subsistence of this Agreement, as amended from time to time.
- 7) "Business Day" means a day other than Saturday, Sunday, or other day on which Scheduled Banks as defined under the Reserve Bank of India Act, 1934 are authorized or required by law to be closed.
- 8) "Buy Out Value" means the amount as specified in SCHEDULE B of this Agreement.
- 9) "Change in Law" means that after the date of this Agreement, an Applicable Law is amended, modified, nullified, suspended, repealed, found unconstitutional or unlawful, or changed or affected in any respect by any Applicable Law or by a judicial pronouncement or by subordinate legislations, or executive orders (including circulars and notifications) issued by jurisdictional authorities, which have an impact or implication upon the mutual or individual rights and obligations under and arising out of this Agreement.
- 10) "Commercial Operation Date/COD" means the date, which shall be specified by Power Producer to the Offtaker pursuant to completion of the Initial Period when the Plant is physically complete and is ready for operations.
- 11) "Confidential Information" means information of a confidential or proprietary nature, whether or not specifically marked as confidential. Such information shall include, but not be limited to, any documentation, records, listing, notes, data, computer disks, files or records, memoranda, designs, financial models, accounts, reference materials, trade-secrets, prices, strategic partners, marketing plans, strategic or other plans, financial analyses, customer names or lists, project opportunities and the like, provided however that Confidential Information does not include information which
 - (i) was in the possession of the receiving Party before receipt from the disclosing Party;
 - (ii) is or becomes publicly available other than as a result of unauthorized disclosure by the receiving Party;

- (iii) is received by the receiving Party from a third party not known by the receiving Party with the exercise of reasonable diligence to be under an obligation of confidentiality respecting the information; or
 - (iv) is independently developed by the receiving Party without reference to information provided by the disclosing Party.
- 12) "Dispute" means a controversy or claim arising out of or relating to this Agreement.
 - 13) "Deemed Generation" As explained in SCHEDULE F
 - 14) "Buy Out" means an amount determined in accordance with SCHEDULE B.
 - 15) "Effective Date" means the later of the following dates: -
 - a. Signing date of the Agreement
 - b. Date on which the Offtaker provides in Original the Bank Guarantee in accordance with the Terms of this Agreement
 - c. Date on which the Parties agree on the sites suitable for putting up the Solar Power Plant and Clear Roof access is provided to the Power Producer.
 - 16) "Electric Service Power Producer" means any person, including the Local Electric Utility, authorized by the State of West Bengal to provide electric energy and related services to retail users of electricity in the area in which the Site is located.
 - 17) "Environmental Attributes" means, carbon trading credits, emissions reductions credits, emissions allowances, green tags, Green-e certifications, or other entitlements, certificates, products, or valuations attributed to the Project and its displacement of conventional energy generation, or any other entitlement pursuant to any central, state, or local program applicable to renewable energy sources, whether legislative or regulatory in origin, as amended from time to time, and excluding, for the avoidance of doubt, any Tax Incentives.
 - 18) "Financing Party" means an entity funding the project and is appointed by the Power Producer in its sole discretion to be the Project Owner in its stead, and the term Financing Party shall be construed in accordance with the context in and for the purpose for which it is so used.
 - 19) "Financing Agreement" shall mean any agreement/documents executed with the Financing Party.
 - 20) "Force Majeure Event" means any act or event that prevents the affected Party from performing its obligations in accordance with this Agreement, if such act or event is beyond the reasonable control, and not the result of the fault or negligence, of the affected Party and such Party had been unable to overcome such act or event with the exercise of due diligence (including the expenditure of reasonable sums). Subject to the foregoing, Force Majeure Event may include but are not limited to the following acts or events:
 - (i) natural phenomena, such as storms, hurricanes, floods, lightning and earthquakes.
 - (ii) explosions or fires arising from lightning or other causes unrelated to the acts or omissions of the Party seeking to be excused from performance.
 - (iii) acts of war or public disorders, civil disturbances, riots, insurrection, sabotage, epidemic, pandemic, terrorist acts, or rebellion; and
 - (iv) lockouts, strikes or labor disputes.

Force Majeure Events shall not include equipment failures or acts or omissions of agents, suppliers or subcontractors, except to the extent such acts or omissions arise from a Force Majeure Event. Changes in prices for electricity shall not constitute Force Majeure Events.
 - 21) "Governmental Authority" means any international, national, federal, provincial, state, municipal, county, regional or local government, administrative, judicial or regulatory entity operating under any Applicable Laws and includes any department, officers, commission, bureau, board, administrative agency or regulatory body of any government.
 - 22) "Hazardous Materials" means all hazardous or toxic substances, wastes or other pollutants, including petroleum, petroleum hydrocarbons or petroleum products, petroleum by-products, radioactive materials, asbestos or asbestos-containing materials, gasoline, diesel fuel, pesticides, radon, urea formaldehyde, lead or lead-containing materials, polychlorinated biphenyls; and any other chemicals, materials, substances or

- wastes in any amount or concentration which are now included in the definition of "hazardous substances," "hazardous materials," "hazardous wastes," "extremely hazardous wastes," "restricted hazardous wastes," "toxic substances," "toxic pollutants," "pollutants," "regulated substances," "solid wastes," or "contaminants" or words of similar import, under any Applicable Law.
- 23) "Indemnified Person" means the person who asserts a right to indemnification under Clause 16.
 - 24) "Indemnifying Party" means the Party who has the indemnification obligation under Clause 16 to the Indemnified Person.
 - 25) "Initial Period" has the meaning provided in Clause 3.2.
 - 26) "Landed Cost of Power" means sum of Energy Charges and Regulatory Charges in State of West Bengal and as specified in Electricity bill provided by State Discom.
 - 27) "Lender" means persons providing construction or permanent financing to Power Producer/Project Owner in connection with installation of the Plant.
 - 28) "Liens" has the meaning provided in Clause 9.2.
 - 29) "Local Electric Utility" means the local electric distribution owner and operator which under the laws of the State of West Bengal is responsible for providing electric distribution and interconnection services to Offtaker at Site.
 - 30) "Losses" means any and all losses, liabilities, claims, demands, suits, causes of action, judgments, awards, damages, cleanup and remedial obligations, interest, fines, fees, penalties, costs, and expenses (including all attorney's fees and other costs and expenses incurred in defending any such claims or matters or in asserting or enforcing any indemnity obligation).
 - 31) "Offtaker" means , and its successors and permitted assigns.
 - 32) "Operations Period" has the meaning provided in Clause 3.3.
 - 33) "Operations Year" means a twelve-month period beginning at 12:00 am on an anniversary of the Commercial Operations Date and ending at 11:59 pm on the day immediately preceding the next anniversary of the Commercial Operations Date, provided that the first Operations Year shall begin on the Commercial Operations Date.
 - 34) "Party" means either Offtaker or Power Producer, as the context shall indicate, and "Parties" means both Offtaker and Power Producer.
 - 35) "Point of Delivery" has the meaning where solar power interconnection has been made to existing electrical infrastructure of
 - 36) "Premises" means approximately 45000 square meter shadow free roof top with undulation of not more than 3 degrees, approximately shadow free roof and surrounding areas in the premises of Offtaker.
 - 37) "Plant" or "Project" or "Solar Plant" or "Solar Project" or "Solar Power Plant" or "Power Plant" means an integrated system for the generation of electricity from solar energy consisting of the photovoltaic panels and associated equipment to be installed on each of the Premises in accordance with this Agreement but does not include roof and its access rights.
 - 38) "Project Owner" means, if applicable, any Person to whom Power Producer transferred the ownership interest in the Project.
 - 39) "Power Producer" means Enerture Solar One Pvt Ltd and all successors and assigns.
 - 40) "Regulatory Charges" means Cross Subsidy, Electricity duty and any other charges as determined and demanded by "Local Electric Utility" or any other government Entity.
 - 41) "Relocation Event" means the relocation of the Project, starting at the shutdown of the Project pursuant to such relocation, and ending at the commercial operation of the Project when such relocated Project is reinstalled at a new location, as determined by the Power Producer in its reasonable discretion.
 - 42) "Scheduled Commercial Operation Date/ SCOD" means the expected date, when the Plant is expected to be commissioned and will be ready for operations.
 - 43) "Site" means the real property described under Exhibit I.
 - 44) "Tax Incentives" means the investment tax credits (including any grants or payments in lieu thereof) and any tax deductions or other benefits under the Income Tax Act, 1961, or applicable central, state, or local

law available as a result of the ownership and operation of the Project or the output generated by the Project (including, without limitation, tax credits, any grants or payments in lieu thereof and accelerated and/or bonus depreciation for the time being in force.)

- 45) "Term" shall have the meaning provided in Clause 3 hereof.
- 46) Transfer/Completion Date shall mean either the date on which the termination is effected as per Clause 10.1 or if the above is not applicable the expiry of the Term of this Agreement
- 47) "Energy Charges" means the sum of energy charges applicable, from time to time to users falling within the category applicable for HT consumers under Local Utility and revised time to time.

Exhibit III Bank Guarantee Format**WHEREAS:**

- (A) **Enerture Solar One Pvt Ltd** having its office at _____ (hereinafter referred to as "Power Producer"), have entered into a Power Purchase Agreement dated [to be inserted] (the "PPA") with _____ **Ltd.**, a company/educational institute/ hospital/commercial tower/ _____ - incorporated under the _____ having its registered office _____ and District _____ Rural _____ (hereinafter referred to as "Offtaker")
- (B) The PPA requires the Offtaker to furnish a Performance Guarantee to the Owner in a sum of [Rs. _____ cr. (Rupees _____ ONLY)] (the "Guarantee Amount") as security for due and faithful performance of its obligations, under and in accordance with the Purchase Order.
- (C) We, _____ through our Branch at _____ (the "Bank") have agreed to furnish this Bank Guarantee by way of Performance Security.

NOW, THEREFORE, the Bank hereby, unconditionally and irrevocably, guarantees and affirms as follows:

1. The Bank hereby unconditionally and irrevocably guarantees the due and faithful performance of the Offtaker's obligations, under and in accordance with the PPA, and agrees and undertakes to pay to the Power Producer, upon its mere first written demand, and without any demur, reservation, recourse, contest or protest, and without any reference to the Offtaker, such sum or sums upto an aggregate sum of the Guarantee Amount as the Power Producer will claim, without the Offtaker being required to prove or to show grounds or reasons for its demand and/or for the sum specified therein.
2. A letter from the Power Producer that the Offtaker has committed default in the due and faithful performance of all or any of its obligations under and in accordance with the PPA shall be conclusive, final and binding on the Bank. The Bank further agrees that the power Producer shall be the sole judge as to whether the Offtaker is in default in due and faithful performance of its obligations under the PPA and its decision that the Offtaker is in default shall be final, and binding on the Bank, notwithstanding any differences between the Power Producer and the Offtaker, or any dispute between them pending before any court, tribunal, arbitrators or any other authority or body, or by the discharge of the Offtaker for any reason whatsoever.
3. In order to give effect to this Guarantee, the Power Producer shall be entitled to act as if the Bank were the principal debtor and any change in the constitution of the Offtaker and/or the Bank, whether by their absorption with any other body or corporation or otherwise, shall not in any way or manner affect the liability or obligation of the Bank under this Guarantee.
4. It shall not be necessary, and the Bank hereby waives any necessity, for the Power Producer to proceed against the Offtaker before presenting to the Bank its demand under this Guarantee.
5. The power Producer shall have the liberty, without affecting in any manner the liability of the Bank under this Guarantee, to vary at any time, the terms and conditions of the PPA or to extend the time or period for the compliance with, fulfilment and/or performance of all or any of the obligations of the Offtaker contained in the PPA or to postpone for any time, and from time to time, any of the rights and powers exercisable by the Power Producer against the Offtaker, and either to enforce or forbear from enforcing any of the terms and conditions contained in the PPA and/or the securities available to the Power Producer, and the Bank shall not be released from its liability and obligation under these presents by any exercise by the Offtaker of the liberty with reference to the matters aforesaid or by reason of time being given to the Offtaker or any other forbearance, indulgence, act or omission on the part of the Owner or of any other matter or thing

whatsoever which under any law relating to sureties and guarantors would but for this provision have the effect of releasing the Bank from its liability and obligation under this Guarantee and the Bank hereby waives all of its rights under any such law.

6. This Guarantee is in addition to and not in substitution of any other guarantee or security now or which may hereafter be held by the Power Producer in respect of or relating to the PPA or for the fulfilment, compliance and/or performance of all or any of the obligations of the Offtaker under the PPA.
7. Notwithstanding anything contained hereinbefore, the liability of the Bank under this Guarantee is restricted to the Guarantee Amount and this Guarantee will remain in force for the period of 12 months and unless a demand or claim in writing is made by the Power Producer on the Bank under this Guarantee, no later than 6 (six) months from the date of expiry of this Guarantee, all rights of the Owner under this Guarantee shall be forfeited and the Bank shall be relieved from its liabilities hereunder.
8. The Bank undertakes not to revoke this Guarantee during its currency, except with the previous express consent of the Owner in writing, and declares and warrants that it has the power to issue this Guarantee and the undersigned has full powers to do so on behalf of the Bank.
9. Any notice by way of request, demand or otherwise hereunder may be sent by post addressed to the Bank at its above referred Branch, which shall be deemed to have been duly authorised to receive such notice and to effect payment thereof forthwith, and if sent by post it shall be deemed to have been given at the time when it ought to have been delivered in due course of post and in proving such notice, when given by post, it shall be sufficient to prove that the envelope containing the notice was posted and a certificate signed by an officer of the Power Producer that the envelope was so posted shall be conclusive.
10. This Guarantee shall come into force with immediate effect and shall remain in force and effect for a period of two years from the date hereof or until it is released earlier by the Power Producer pursuant to the provisions of the PPA.

Signed and sealed this day of, 2022 at

In case of Transfer of Ownership during or at the end of the Term of this contract as per provisions of this Agreement the Power Producer shall ensure that the Solar Power Plant is free from any charge, lien or any kind of encumbrances

The Offtaker will also need to bear all taxes as may be applicable for the purchase of the Plant from the Power Producer including but not limited to indirect and direct taxes and any and all other taxes that may be applicable upon the Offtaker.

SCHEDULE C, Major Components of Solar Power Plant.

The Solar PV power Plant is the total arrangement of PV modules in series and parallel connections. The solar array is comprised of solar modules that generate DC electricity in proportion to the amount of sunlight available, generating the most power on a clear day when the sun is at a normal angle to the array. The microprocessor control circuit shall automatically adjust the DC-DC converter to ensure that it should always match to the PV array Maximum Power Point (MPPT) under varying conditions and transfers the maximum possible power to Inverter. The inverter shall convert DC to AC and exported to the loads. The inverter output shall match the grid in voltage, frequency and phase. AC Distribution board is equipped with Meter to measure the energy generation.

Major Components of a Solar PV Power Plant

1. Solar Modules tier 1 - Mono Crystalline/Poly
2. Module Mounting Structures – Aluminium /GI
3. Array Junction Box- As per IS Standard
4. Solar Power Inverter – String Inverter
5. AC distribution board / LT Panel – As per IS Standards
6. Cables & Accessories.- As per IS Standards
7. Monitoring System – Dongle Based
8. Earthing/ Lightning Arrestors. As per IS Standards
9. Net Metering -As per state regulations

SCHEDULE D: Annual Bank Guarantee Amount
Calculated based on 3 Months Expected Generation

YR	BG AMOUNT IN INR LACS
1	

SCHEDULE E: Deemed Generation

"Deemed Generation" for the year of operation, will be calculated based on methodology as explained below. Deemed Generation settlement will be done on **Monthly basis**.

Methodology

Deemed Generation = Downtime X Expected Units Generation

Whereas:

Downtime= Duration of Downtime, as recorded by plant performance monitoring system, in minutes

Expected Units Generation =Value of energy production in kWh/Min. derived as in table 1

Illustration :Energy Production –Yearly = 14,00,000 kWh(Per MWp) for 1st Year of operation, for 2nd year and rest of the PPA tenure Energy Production values will be summation of Billed units including Deemed Generation Units in preceding year factoring the degradation for that year.

❖ **Table-1 : Methodology to Derive Expected Units Generation (1MWp).**

Description		Values for 1 st Year	Unit
Energy Production –Yearly (EPY)	Yearly Generation	14,00,000	kWh/Year
Monthly Production (MP)	MP=EPY/12	1,16,666	kWh/Month
Daily Production (DP)	DP=MP/30	3,888	kWh/Day
Hourly Production ¹ (HP)	HP=DP/6	648	kWh/Hour
Expected Units Generation (EUP)	EUP=HP/60	10.80	kWh/Min

¹ based on 6 hours of sunshine.

SCHEDULE G:**Assignment Agreement**
ASSIGNMENT AGREEMENT

This Assignment Agreement ("Agreement") is executed on this ____ day of _____, 2021, AMONGST

1. **Enerture Solar Pvt Ltd** having its office at _____
(hereinafter referred to as "**Assignor**", which expression, unless repugnant to the context or meaning thereof shall be deemed to include its successors and permitted assigns) of the First Part;
2. _____ a company incorporated under the laws of India and having its registered office at [to be inserted] (hereinafter referred to as "**Assignee**", which expression, unless repugnant to the context or meaning thereof shall be deemed to include its successors and permitted assigns) of the Second Part;

AND

3. _____, a company incorporated under the laws of India and having its registered office at _____ and (hereinafter referred to as "**Offtaker**", which expression, unless repugnant to the context or meaning thereof shall be deemed to include its successors and permitted assigns) of the Third Part;

The Assignor, Assignee and the Offtaker are individually referred to as the "**Party**" and collectively referred to as the "**Parties**".

WHEREAS:

- A. The Assignor is in the business of power generation and executed a power purchase agreement dated _____ ("**PPA**") with the Offtaker for design, engineering, manufacture, supply, erection, testing and commissioning including warranty, operation and maintenance of solar PV system in the Offtaker's facility ("**Project**"). A copy of the PPA is annexed hereto and marked as **Annexure 1** to form part of this Agreement.
- B. The Assignor is desirous of assigning the rights and obligations of the Assignor under the PPA in favour of the Assignee. The PPA provides that it shall not be assigned by any party to the PPA without the prior written consent of the other Party.
- C. Accordingly, the Assignor has sought the permission of the Offtaker and the Offtaker has agreed to assignment of the PPA by the Assignor in favour of the Assignee. Accordingly, this Agreement to assign is executed between the Parties and upon execution of this Agreement, the Assignee shall be bound by the provisions of the PPA and the terms and conditions of the business agreement, if any, executed between the Assignor and the Assignee.

NOW, THEREFORE, in consideration of the foregoing and the respective covenants and agreements set forth in this Agreement, the PPA and the commercial terms and conditions mutually agreed between the Assignee and the Assignor, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound hereby, the

48

Parties agree as follows:

1. Definitions and interpretation

Capitalized terms used but not defined in this Agreement shall, unless the context otherwise requires, have the respective meanings ascribed thereto in the PPA.

2. Assignment of PPA

2.1 The Assignor hereby and in pursuance of this Agreement unconditionally and absolutely assigns to the Assignee any and all of its rights, title and interest in the concession and obligations under the PPA. The Assignee irrevocably accepts such Assignment in favour of itself and agrees to abide by the terms of the PPA.

2.2 The Assignee hereby acknowledges that it has heretofore received a copy of, and has read and understood the covenants of the PPA and agrees and confirms that it shall be bound by all provisions of the PPA as if it was an original party thereto, including with respect to the rights and obligations of the Assignor contained therein, and the PPA shall have full force and effect on it, and shall be read and construed to be binding on Assignee.

3. Acknowledgment

The Offtaker hereby agrees to assignment of the PPA by the Assignor in favor of the Assignee and confirms that it does not have any objection to such assignment and the terms and conditions of this Agreement subject to the Assignee abiding by the terms thereof and discharging all the obligations towards the Offtaker.

4. Further Assurance

The Assignor agrees that at any time and from time to time upon the written request and at the cost of the Assignee, it will promptly and duly execute and deliver to the Assignee any and all such further instruments and documents and promptly take all such further action as the Assignee may consider desirable, acting reasonably, for it to obtain the full benefit of the assignment contained in Clause 2 of this Agreement, which the Assignee requests and the Assignor approves, such approval not to be unreasonably withheld or delay.

5. Representation

Each Party hereby represents and warrants to the other parties hereto that the execution, delivery and performance hereof by it are within its corporate powers, and have been duly authorized by all necessary corporate or other action and that this Agreement constitutes its legal, valid and binding obligation.

6. Liability

The Parties agree that all the liabilities arising from the date of this Agreement, in relation to the Project, shall be borne by the Assignee. For the avoidance of doubt, all liabilities arising prior to the execution of this Agreement shall be solely borne by the Assignor.

7. Cost

All costs including but not limited to the applicable stamp duties payable on or in connection to this Agreement or any deeds or documents executed by the Assignor or Assignee in connection with such assignment shall be borne equally by the Assignor and the Assignee.

8. Governing Law and dispute resolution

This Agreement shall be governed by and construed in accordance with the laws of the India and the court at Kolkata shall have exclusive jurisdiction. The terms and conditions of the PPA in relation to dispute resolution, the provisions regarding arbitration and other terms and conditions shall be deemed to have been incorporated in this Agreement. **Note: Stamp duty implication to be considered**

9. **Counterparts**

This Agreement may be executed in one or more counterparts, including facsimile counterparts, each of which shall be deemed to be an original copy of this Agreement, and all of which, when taken together, shall be deemed to constitute one and the same agreement.

WHEREAS:

- A. The Supplier is engaged in the business of developing, installing, operating, managing, and maintaining solar power plants across India.
- B. The Purchaser is in the business of manufacturing industrial, medical, and certain other specialty gases at various facilities across India.
- C. Pursuant to discussions held between the Parties, the Supplier has offered and the Purchaser has agreed that the Supplier shall install and set-up Solar Power Plants (*as defined herein below*), for the supply of Solar Energy (*as defined hereinbelow*), as required by the Purchaser on build, own, operate, maintain, and transfer basis on the roof or ground area of the Purchaser's premises located across India and more particularly described in Schedule I hereunder (the "**Premises**"); and
- D. The Parties are now desirous of entering into this Agreement to record the terms and conditions for sale and purchase of the Solar Energy.

NOW, THEREFORE, in consideration of the representations, promises, mutual covenants and agreements set forth herein, and other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, the Parties duly agreed upon as follows:

1. DEFINITIONS AND INTERPRETATIONS

1.1. Definitions:

"Affiliate"

in relation to any Person means any Person, who directly or indirectly (through one or more intermediaries) Controls, is Controlled by or is under common Control with that Person;

**"Agreement"/
"PPA"**

means this Power Purchase Agreement including its recitals and Schedules, amended, or modified from time to time in accordance with the terms hereof;

**"Applicable
Permits"**

means all authorisations, licenses, approvals, registrations, permits, waivers, privileges, acknowledgements, agreements, clearances, and concessions, required to be obtained from or provided by any Competent Authority for the purpose of installing, commissioning, operating, and transferring the Solar Power Plant and selling Solar Energy generated by such Solar Power Plant;

For Restricted Circulation

"Applicable Law"

means, in relation to this Agreement, all laws in force, statute, decree, ordinance, regulation, notice, circular, code, rule or direction, or any interpretation of any of them by a Governmental Instrumentality and includes all applicable rules, regulations, orders, directions, notifications by a Governmental Instrumentality pursuant to or under any of them;

"Appropriate Commission"

means the Central Electricity Regulatory Commission referred to in sub-section (1) of section 76 or the State Electricity Regulatory Commission referred to in section 82 or the Joint Commission referred to in section 83 of the Electricity Act 2003, as the case may be;

"Bill Dispute Notice"

bears the meaning as ascribed to the term in Clause 6.5 of the Agreement;

"Business Day"

means any day (other than a Sunday or public holiday) on which banks are open for business in Kolkata and Delhi;

"Change in Law"

means
(a) the enactment, bringing into effect, adoption, promulgation, amendment, modification, or repeal, after the date of this Agreement of any statute, decree, ordinance or other law, regulation, notice, circular, code, rule or direction by any Governmental Instrumentality or a change in its interpretation by a competent court, tribunal, regulatory commission, Government of India, State Governments, or other statutory authority, of any of the above regulations and

(b) the imposition by any Governmental Instrumentality of any material condition in connection with the issuance, renewal, modification (including ceasing to have full force and effect or inclusion of any

For Restricted Circulation

additional consents, permissions, approvals, or actions of similar nature).

**"Commercial
Operation
Date"/ "COD"**

means the actual commissioning date of the Solar Power Plant whereupon the Supplier starts injecting Solar Energy into the Injection Point;

**"Coordination
Committee"**

means the committee comprising of 2 (two) senior officials to be appointed by the Supplier and 2 (two) senior officials to be appointed by the Purchaser.

**"Deemed
Generation"**

means the solar power generated from the Solar Power Plant for the year of operation, shall be calculated based on methodology as explained in Annexure II, and shall be billable to the Purchaser by the Supplier at the Tariff in the event that actual generation from the Solar Power Plant is affected by any act, negligence or omission except Force Majeure events by the Purchaser, or any of its employees, agents, contractors or any of its Affiliates;

"Due Date"

bears the meaning as ascribed to the term in Clause 6.4.1 of this Agreement;

"Effective Date"

means the date on which this Agreement is entered and duly signed and executed upon by the Parties;

"Energy Charges"

means the value in INR charged by the Supplier from time to time for each kWh of energy supplied by the Supplier to the Purchaser for the respective month at the Injection Point;

"Encumbrances"

means any interest or equity of any Person (including, without limitation, any right to acquire, option or right of pre-emption or conversion) and any charge, mortgage, security interest, pledge, lien (including retention of title claims), assignment, power of sale or hypothecation or any other third party right or encumbrances of any nature whatsoever (whether or not perfected) and the term "**encumber**" shall be construed accordingly;

For Restricted Circulation

"Event of Default"	bears the meaning as ascribed to the term in Clause 16 of the Agreement;
"Force Majeure Event"	bears the meaning as ascribed to the term in Clause 15.2 of the Agreement;
"Government Instrumentality"	means the Government of India, State Governments and any ministry, department, board, authority, agency, corporation, commission under the direct or indirect control of Government of India or any of the state government(s) or both, any political subdivision of any of them including any court or Appropriate Commission(s) or tribunal or judicial or quasi-judicial body of India;
"Injection Point"	means the Solar PV Panel Board in the Solar Power Plant which is the commercial metering point at the Premises of the Purchaser where Solar Energy is injected;
"INR"/ "Rupees"/"Rs."	means Indian Rupees, the lawful currency of the Republic of India;
"Installed Capacity"	means the total capacity of the Solar Power Plant as installed at each of the Premises. The estimated installed capacity is 2,500kWp, whereas the actual capacity for each of the Solar Power Plants shall be assessed and mutually agreed upon by the Parties at the start of the COD;
"Insurances"	means the insurance cover to be obtained and maintained by the Supplier in accordance with Clause 14 of the Agreement for the term of this Agreement;
"kWh"	means Kilowatt-Hours;
"kWp"	means Kilowatt-peak;
"Law(s)"	means any constitutional provision, law, statute, rule, regulation, ordinance, treaty, order, decree, judgment, governmental approval, or any requirement of such governmental authority having the force of law and which is binding on the Parties with

For Restricted Circulation

respect to any of the transactions contemplated herein. Unless the context clearly requires otherwise, the term "Law" shall include each of the foregoing (and each provision thereof) as in effect at the time in question, including any amendments, supplements, replacements or any other modifications thereto, and whether or not in effect at the Effective Date;

"License"

bears the meaning as ascribed to the term in Clause **Error! Reference source not found.** 1 of the Agreement;

"Local Electric Utility"/ "DISCOM"

means the local electric distribution owner and operator which under the laws of that particular State is responsible for providing electric distribution and interconnection services to the Purchaser at Premises.

"LT Panel"

means the panel in the Purchaser's Premises in which control and distribution of electricity would happen as indicated in Schedule II;

"Meter"

means a device suitable for measuring, indicating, and recording the injection of Solar Energy at the Injection Point;

"Person"

shall mean any natural person, firm, the Supplier, governmental authority, joint venture, partnership, association, or other entity (whether or not having separate legal personality);

"Premises"

means the Purchaser's premises as defined in the Recital B of this Agreement;

"Prudent Utility Practices"

means methods, acts, techniques, procedures and standards and the exercise of a degree of skill, diligence and prudence which would reasonably and ordinarily be expected from a first-class reputable, recognised, skilled and experienced solar energy developer in the Solar PV power generation industry of the same or similar size and type as the Supplier and the Solar Power Plant;

"Reply Notice"

bears the meaning as ascribed to the term in

For Restricted Circulation

Clause 6.5.5 (c) of the Agreement;

"Scheduled Commercial Operation Date/ SCOD"

means the expected date, when the Solar Power Plant is expected and agreed to be commissioned and shall be ready for operations.

"Solar Photovoltaic" or "Solar PV"

means solar photovoltaic technology that directly converts sun light into electricity;

"Solar Energy"

means the electrical energy in kWh generated from the Solar Power Plant;

"Solar Power Plant(s)"

means the Solar Photo Voltaic based power generating system located at each of the Premises, and includes components like solar modules, mounting structures, inverters, cables, power management devices, related assets and ancillary equipment required for the operation of the solar energy generation facility;

"Solar PV Panel Board"

means the panel comprising of busbars, switches and electrical wires interconnecting the Solar Power Plant with the LT Panel and as indicated in Schedule II;

"Tariff"

bears the meaning as set out in Clause 5 of the Agreement;

"Taxes"

means any and all statutory taxes, duties, levies and cess, or levy of any nature (whether central, state or local) whatsoever and wherever and whenever charged, levied or imposed on the sale of the Solar Power under the Agreement together with any interest and penalties in relation thereto other than interest and penalties imposed as a result of any act or omission of the Supplier, its Affiliates, servants or agents;

"Term"

bears the meaning as set out in Clause 2 of the Agreement;

"Year"

means every period of 365 days, with the first Year commencing from the date on which the Supplier achieves COD.

For Restricted Circulation

1.2. Interpretation

Save where the contrary is indicated:

- 1.2.1. This Agreement shall be binding upon and shall inure to the benefit of the Parties and their successors. Nothing contained herein shall be construed to provide any benefit to any Person not a Party to the Agreement except as expressly provided for herein;
- 1.2.2. The singular includes the plural and vice versa and, in particular (but without limiting the generality of the foregoing), any word or expression defined in the singular has the corresponding meaning when used in the plural and vice versa;
- 1.2.3. Any reference to any gender includes the other gender;
- 1.2.4. Where a word or phrase is defined, other parts of speech and grammatical forms of that word or phrase shall have the corresponding meanings;
- 1.2.5. Any reference to an article, section, appendix, clause, sub-clause, paragraph, sub-paragraph, Schedule or Recital is a reference to an article, section, appendix, clause, sub-clause, paragraph, sub-paragraph, Schedule or Recital of this Agreement;
- 1.2.6. Any reference to any agreement, instrument or other document (a) shall include all appendices, exhibits and schedules thereto and (b) shall be a reference to such agreement, instrument or other document as amended, supplemented, modified, suspended, restated or novated from time to time;
- 1.2.7. Any reference to any statute shall be construed as including all statutory provisions consolidating, amending or replacing such statute;
- 1.2.8. A reference to a party to any document includes that party's successors;
- 1.2.9. Any reference to "writing" includes printing, typing, lithography and other means of reproducing words in visible form;
- 1.2.10. The terms "hereof", "hereby", "hereto", "hereunder" and similar terms shall refer to the Agreement as a whole;
- 1.2.11. The term, "including" shall mean "including, without limitation";
- 1.2.12. Where the consent or approval of a Party to this Agreement is required hereunder to any act, deed, matter or thing such

For Restricted Circulation

requirement shall in the absence of any express stipulation to the contrary herein mean, the prior consent or approval (as the case may be) in writing;

- 1.2.13. The headings of various Clauses, Articles and Sections in the Agreement are inserted for convenience and reference only and shall not affect the construction of the relative provisions;
- 1.2.14. A reference to a statute, ordinance, code or other law includes regulations and other instruments under it and amendments or re-enactments of any of them;
- 1.2.15. If a period of time is specified and dates from a given day or the day of an act or event, it is to be calculated exclusive of that day; and
- 1.2.16. A reference to a day is to be interpreted as the period of time commencing at midnight (00 Hrs) and ending 2400 Hrs (twenty-four) hours later.

2. **TERM OF THE AGREEMENT**

- 2.1 This Agreement shall be effective from Effective Date for a period of 15 (fifteen) Years from the date of actual Commercial Operation Date ("**COD**") as per Clause 3.1 below ("**Term**"). The Term shall exclude the duration of the Force Majeure event as per Clause 16 and shall be extended for the duration of the Force Majeure Event. The Agreement shall stand discharged before the expiry of the Term if either Party terminates the Agreement pursuant to Clause 17 below.
- 2.2 The Purchaser shall have option to extend the Term for ten (10) years to a maximum of twenty five (25) years from COD, on the same commercial terms and conditions. The Purchaser also has the option to buy the Solar Power Plants at all or selected Premises at the applicable Salvage Value as mentioned in Annexure I of this Agreement during the Term of the Agreement after COD has been satisfactorily achieved for the particular Site or Premises.

3. **SALE AND PURCHASE OF SOLAR ENERGY**

- 3.1. Immediately after the Effective Date, the Supplier shall commence the establishment of 2,500 kWp Solar Power Plants on a build, own, operate, maintain, and transfer basis at the Premises, as listed in Schedule I. It is estimated that establishment of the Solar Power Plant for all the Premises shall be completed and COD shall be achieved within seven (7) months from the Effective Date. There should not be any unreasonable delay or disruptions by the Purchaser in making the

For Restricted Circulation

Premises available to the Supplier. Should the Supplier require additional time for achieving COD at any one or all of the Premises, the Parties shall discuss and agree upon an extended date for COD for such Premises. The Parties shall cooperate to obtain all necessary Applicable Permits for the Solar Power Plants as installed in each of the Premises. Notwithstanding anything to the contrary contained hereinabove, the Parties agree that in no event the Supplier shall take more time than seven (7) months from the Effective Date to establish the Solar Power Plants and to also achieve the COD.

- 3.2. On and with effect from the COD, the Supplier shall sell and deliver Solar Energy to the Purchaser at the Injection Point and the Purchaser shall purchase from the Supplier Solar Energy injected into the Injection Point by paying the Tariff in accordance with the terms and conditions of the Agreement including the billing and terms of payment specified in Clause 5.
- 3.3. During the term of the Agreement, the Purchaser shall purchase the entire Solar Energy injected into the Injection Point by the Supplier. The Supplier shall not be entitled to sell the Solar Energy generated by the Solar Power Plants to any third parties for any reasons whatsoever, without the prior written consent of the Purchaser.

4. **PLANNING, INSTALLATION AND OPERATION OF SOLAR POWER PLANTS**

4.1. **Premises Assessment and Planning**

4.1.1. The Supplier shall have the right, at its own expense, to assess the suitability of the Premises for the Solar Power Plants and shall act diligently in conducting such assessment. The assessment shall include the right to inspect the physical condition of the structures on which the Solar Power Plants shall be located; to apply for permits or other governmental authorizations necessary for the construction of the Solar Power Plants; to arrange interconnections with the Local Electric Utility; or to make any other investigations or determination necessary for the financing, construction, operation, or maintenance of the Solar Power Plants.

4.1.2. The Supplier shall commence installation of the Solar Power Plant on the Purchaser's Premises by giving at least 15 (fifteen) days prior notice to the Purchaser immediately after the effective date after complying with all of the Purchaser's safety and security norms. Before commencement of the said construction, the Supplier shall produce complete design and drawings pertaining to Solar Power Plants' construction and shall seek approval from the Purchaser. The Supplier shall provide complete design and drawings with respect to each of the sites earmarked at each of

For Restricted Circulation

the Premises for the Solar Power Plants (hereinafter referred to as "**Site**"). The Purchaser shall provide approval/comments, for same within 7 (seven) working days on receiving same over the E-mail or by other modes in writing. On approval of the design and drawings, the construction of Solar Power Plant for that particular Premises shall begin. The Supplier shall also provide any other documents needed by the Purchaser to seek approvals for the changes at Premises arising from the installation and subsequent operations of the Solar Power Plants.

- 4.1.3. Major Components of the Solar Power Plant: As of the Effective Date hereof, the Supplier anticipates that the Solar Power Plant shall consist of the major components as set forth in Schedule II hereof. During the construction and installation of the Solar Power Plants, due to reasons not attributable to the Supplier, if there is a requirement to change or modification of the major components or design, the same shall be notified to the Purchaser by the Supplier and any change or modification shall be subject to the Purchaser's approval, which shall not be unreasonably withheld. The Purchaser's approval shall be made in writing duly acknowledged by the Supplier.

4.2. Access Specifications

- 4.2.1. The Purchaser hereby grants the Supplier and its agents, (including its contractors, subcontractors, persons responsible for implementing the Solar Power Plant, and the financing party) entry permission into the Premises, for the Term of this Agreement, at reasonable times and upon reasonable notice, for the purposes of designing, installing, inspecting, operating, maintaining, repairing and removing the Solar Power Plant, and any other purpose set forth in this Agreement, and otherwise in accordance with the provisions of this Agreement. In exercising such access, the Supplier shall reasonably attempt to minimize any disruption to activities occurring on the Premises.

- 4.2.2. Storage: Adequate storage space on the Premises convenient to the Supplier for materials and tools used during construction, installation, and maintenance of the Solar Power Plant. The Purchaser shall be responsible for providing shelter and security for stored items during construction and installation. Moreover, if shelter facility is not available at the Premises, then the Purchaser shall provide security and shall allow the Supplier to setup make-shift arrangement for storage facility.

- 4.2.3. Utilities: Water, drainage, and electrical connection in the Premises for use by the Supplier in installing, operating and maintaining the Solar Power Plant. Further, if the Purchaser wishes to access the Solar Power Plants' generation data, then

For Restricted Circulation

ethernet connections, display and data storage devices in the Premises shall be arranged by the Purchaser at its own expense.

4.2.4. The Purchaser needs to provide reasonable and adequate water supply by giving water tapping points near the Site for cleaning of modules and if required by the Supplier, a maximum of 100 units of electricity monthly shall be utilized for the operation and maintenance of the Solar Power Plant at the account of the Purchaser.

4.2.5. Water tapping points shall not be more than 10 meters far from the Sites where solar modules are being installed, after tapping points module cleaning system shall be installed by the Supplier.

4.3. **Technical Specifications considerations**

The Supplier has considered the following assumptions based on the information provided by the Purchaser:

4.3.1. The Site mentioned in this Agreement is within the Premises of the Purchaser and the Purchaser has secured the rights of construction of the Solar Power Plants on the Site at each of the Premises.

4.3.2. The AC cable length from solar inverter to the main LT Panel of the load points is not more than 100 meters.

4.3.3. Installation, operation, and maintenance of all necessary infrastructure for delivery of Solar Energy at Injection Point is within the scope of the Supplier.

4.4. The Purchaser acknowledges that the Supplier has proposed the Tariff based on the above assumptions. If any of the above conditions changes as per the actual Premises conditions, any revision to the Tariff for the particular Site or Premises shall be mutually agreed in writing and duly acknowledged by the other Party, before commencement of installation of the Solar Power Plant at that Site.

4.5. **Contractors:** The Supplier shall use contractors/ independent agents to perform the work of installing, operating, and maintaining the Solar Power Plants and shall notify the Purchaser through written notifications of such appointments. The contractors/ independent agents of the Supplier shall follow safety guidelines, EHS and other norms as per the industry practice and the Purchaser's specific norms, and the most stringent safety norm shall be applicable. However, appointment of any contractors shall not relieve the Supplier from its obligations under this Agreement. The insurance and all safety related issues must be taken care of by the Supplier.

For Restricted Circulation

- 4.6. **Premises Security:** The Purchaser shall assist with security for the Solar Power Plants from the commencement of construction during the entire term of this Agreement, to the extent of its existing security procedures, practices, and policies that apply to the Premises. The Purchaser shall notify the Supplier immediately upon observing any damage to the Solar Power Plants. During the operations period, upon request by the Supplier, such as the Supplier receiving data indicating irregularities or interruptions in the operation of the Solar Power Plant, the Purchaser shall, as quickly as reasonably possible, send a person to observe the condition of the Solar Power Plants and inform the Supplier of the same.

5. **TARIFF**

- 5.1. From the COD, the Purchaser shall pay the Supplier for Solar Energy supplied and Deemed Generation, if any, by the Solar Power Plant at the rate of Rs.3.95 kWh/ during the Term of this Agreement ("**Tariff**") The Tariff payable shall be exclusive of all Regulatory Charges that may become applicable during the subsistence of this Agreement in future due to any change of law.
- 5.2. **Absolute Energy Generation Guarantee:** The Supplier estimates the amount of Solar Energy to be produced at each of the Sites on annual basis subject to Global Horizontal Irradiation ("**GHI**"). Such assessment of expected Solar Energy generation would be carried out at each site based on Installed Capacity for each site and needs to be agreed by both the Parties. This estimate of amount of Solar Energy to be generated for each site should be considered Absolute Energy Generation Guarantee for subsequent reference when actual generation data is not available for the particular Site for that time period of year.
- 5.3. The Supplier guarantees Absolute Energy Generation Guarantee that is defined in aforementioned Clause 5.2 for each of the Premises, failing which the Supplier shall compensate the Purchaser as per the Liquidated Damage charges for the deficit as defined in Clause 9.2.4 of this Agreement.

6. **BILLING AND TERMS OF PAYMENT**

6.1. **Monthly Electricity Bills**

- 6.1.1. For the quantity of Solar Energy billable, including Solar Energy injected into the Injection Point (Metered Generation), the Supplier shall raise monthly Electricity Bill in the name of the Purchaser based on the Tariff and in accordance with this Clause for each of the Solar Power Plant at each of the Premises (the "**Monthly Bill**").
- 6.1.2. Each Monthly Bill shall state the quantity of electricity produced by the Solar Power Plant in such month, the applicable Tariff for

For Restricted Circulation

such, and the total amount due, which shall be the product of the quantities and the applicable Tariff. The monthly joint reading as stated in Clause 6.2 below (signed by authorized representatives of the Supplier and the Purchaser) shall be attached along with the Monthly Bill otherwise the invoice of that particular month shall not be accepted by the Purchaser. However, if the remote monitoring system is implemented which has the ability of capturing the real time energy meter readings, the same may be used for billing and physical signing of energy meter records shall not be required.

- 6.1.3. The Supplier shall raise and send the Monthly Bill to the person authorized by the Purchaser and intimated to the Supplier, within the first 7 (seven) Business Days from the end of the month for which the Monthly Bill pertains to, as scanned copy by E-mail.

6.2. Joint Meter Reading

- 6.2.1. Monthly Meter Reading: For every calendar month, joint meter reading (JMR) of main meter and the check meters installed at the respective locations shall be conducted on 1st working day of every calendar month @ 11:00 AM, in the presence of representatives of both the Parties. If the first day of the month is a public holiday or Sunday, then in such cases the joint meter reading shall be conducted on the immediate next day. However, in such cases, the Supplier shall inform the other Party in advance. Meter reading can also be taken through the remote monitoring provision provided remote monitoring facility is functional and is capable of obtaining instantaneous energy meter readings at a particular time, and both Parties would have agreed on the process of obtaining and subsequent confirmation of the readings. The Supplier can submit JMR based on readings obtained from remote monitoring system at 12 midnight of last day of the calendar month unless a different cut-off time is agreed between the Parties for a particular Site.

- 6.2.2. Meter Inspection & Sealing: The energy meter shall be jointly inspected and sealed by the Supplier and shall not be opened, calibrated or tested except in the presence of the representatives of both the Parties. In each case, seal details of old and new seals installed at the meter box to be mentioned on the joint meter reading format or meter testing report.

- 6.2.3. Energy Recording:

For Restricted Circulation

14 | 48

- (a) Difference in energy measurement between main meter and check meters: At the time of taking monthly joint meter reading, if the electrical energy consumption reading of the main meter differs from the readings of the corresponding check meter by more than $\pm 5\%$, in such case the main meter shall be tested first as per ISI guidelines and if on such testing, the main meter error is found to exceed specific limits prescribed in the standards, then the main meter shall be re-calibrated or replaced by correct meter, within next 7 working days from the date of testing. The main meter if found correct, the check meter shall be tested and re-calibrated or replaced by correct meter, within next 7 (seven) working days from the date of testing. The charges for the meter testing/calibration shall be borne by the Supplier.
- (b) Billing in case of faulty meter: In the event of variation exceeding the permissible limits, the billing should be done based on the correct meter (main or check). The joint metering should be taken after such re-calibration/testing. Tolerance shall be within the calibration of energy meter.

6.2.4. Annual Meter Testing: All meters shall be checked/tested for accuracy on a yearly basis in presence of both the Parties and shall be tested as working satisfactory so long as the errors are within the limits prescribed for meters of the specific class. Energy consumption recorded in the main meter shall form the basis of billing, so long as the yearly checks show that errors if any are within the permissible limits. If the check or main meter is found defective during the annual checking, the error shall be rectified, and it shall be immediately replaced at the cost of The Supplier.

6.2.5. Calibration Procedure: All meters shall be calibrated on an annual basis by a government approved agency and the cost for the calibration shall be borne by The Supplier. Meter readings shall be taken after the completion of calibration procedure in the presence of authorized representatives of both the parties. Metering system, calibration procedure and the procedure of taking meter readings may be modified from time to time as may be decided by both the parties with mutual understanding.

6.2.6. The Main Metering System at the Delivery Point shall in terms of its technical standards, description, accuracy, calibration, comply fully with the requirements of the relevant standards under the Applicable Law and shall be regularly tested as per the government regulation. This shall consist of main meter and a check meter.

For Restricted Circulation

15 | 48

6.2.7. The Main Metering System shall be installed, maintained, and owned by the Supplier. It shall be installed at a place accessible to the meter readers of both the Parties. The Purchaser shall have full access to the Main Metering System, and to any data generated thereby.

6.2.8. The Purchaser may install an additional meter, at its own cost, to verify the measurements of the Main Metering System.

6.2.9. The Supplier shall install the meter(s) to meet the technical and regulatory requirements stipulated by the Jurisdictional Authorities at the Injection Point

6.2.10. The risk and title to the solar energy supplied by the Supplier shall pass to the Purchaser at the Injection Point

6.3. **Bank Guarantee**

Within 15 (fifteen) days from the date of confirmation of the Installed Capacity and Absolute Energy Generation Guarantee (as defined in Clause 5.2 above) from the Supplier for all the sites covered under Schedule 1 of this Agreement, the Purchaser shall provide to the Supplier a Bank Guarantee equivalent to one (1) months' Tariff payable for Absolute Energy Generation Guarantee from Installed Capacity across all the Sites or Premises. The Bank Guarantee shall be issued by the Purchaser's scheduled bank. The Bank Guarantee shall be for a period of 1 (one) Year and renewed annually till the term of this Agreement. The Supplier shall be entitled to invoke such Bank Guarantee for its full face value or part thereof, in case of Purchaser's Event of a Default or any non-fulfilment of its obligations by the Purchaser under this Agreement. Upon such Bank Guarantee being fully or partly invoked by the Supplier during the Term of this Agreement, the Purchaser shall be liable to replenish such Bank Guarantee to its original value within a period of thirty (30) days. Such encashment of the Bank Guarantee by the Supplier shall not impact in any way the recovery of any other monthly arrears that may be due on the part of the Purchaser or any payment at the time of termination of this Agreement including payment of Buy Out value due as contemplated in this Agreement. At the end of the Term of this Agreement or on termination of this Agreement, whichever is earlier if no Purchaser's Event of Default exists, the Supplier shall return to the Purchaser such Bank Guarantee within a period 7 (seven) days.

6.4. **Terms of Payment**

6.4.1. The Due Date of payment shall be 15 (fifteen) days from the date of receipt of the Monthly Bill by the Purchaser (the "Due Date").

6.4.2. The Purchaser shall make payment of the Monthly Bill to the

For Restricted Circulation

Bank Account of the Supplier as specified by the Supplier in the Monthly Bill. Any payment after Due Date would attract an interest @ 1% per month of the monthly bill generated in the name of the Purchaser.

6.5. Disputed Bill

6.5.1. If the Purchaser disputes the amount payable under a Monthly Bill, then it shall within 15 (fifteen) days of receipt of the Monthly Bill, issue a written notice (the "**Bill Dispute Notice**") to the Supplier setting out:

- (a) the details of the disputed amount; and
- (b) the reasons for disputing the amount including all written material in support of its claim.

6.5.2. The Purchaser shall pay the undisputed portion of Monthly Bill thereof to the Supplier within the Due Date.

6.5.3. If the Purchaser does not object prior to the Due Date, the Purchaser shall be obligated to pay the full amount of such invoices but the Purchaser may subsequently object to such invoice and, if such objection proves to be correct, receive a refund of the disputed amount; PROVIDED, however, that the Purchaser may not object to any invoice more than 6 (six) months after the date on which such invoice is rendered. The right to dispute or object to an invoice, shall, subject to the limitation time period provided in this Clause 6.5.3, survive the expiration or termination of this Agreement.

6.5.4. If the Supplier agrees to any part of the claim raised in the Bill Dispute Notice issued pursuant to the aforementioned Clause 6.5.1, the Supplier shall forego that part of the claim from the Monthly Bill which would have been payable by the Purchaser in the usual course within the applicable Due Date.

6.5.5. If the Supplier does not agree to the claim(s) raised in the Bill Dispute Notice issued by the Purchaser pursuant to the aforementioned Clauses, it shall, within 7 (seven) Business Days of receiving the Bill Dispute Notice, furnish a notice to the Purchaser providing:

- (a) reasons for its disagreement;
- (b) its estimate of what the correct amount should be; and
- (c) all written material in support of its counterclaim (the "**Reply Notice**").

6.5.6. Upon receipt of the Reply Notice, authorized representatives of the Supplier and the Purchaser shall meet and make best endeavours to amicably resolve such dispute within 15 (fifteen)

For Restricted Circulation

2240

Business Days of receipt of such Reply Notice.

6.5.7. If the Parties do not amicably resolve the dispute within 15 (fifteen) Business Days of receipt of the Reply Notice, the matter shall be referred to dispute resolution in accordance with the Dispute Resolution Clause of this Agreement.

6.5.8. In case the amounts disputed by the Purchaser are resolved in favour of the Supplier, the Purchaser shall be required pay such disputed amounts to the Supplier within 7 (seven) days of the resolution of the matter between the Parties.

6.5.9. The Parties further agree that irrespective of any unresolved disputes regarding any of the Monthly Bills, the Supplier shall continue to perform its obligations under the Agreement to the fullest extent, without any demur.

7. LICENSE OF THE PREMISES

7.1. The Purchaser hereby grants a non-exclusive license to access to the Supplier or its representatives for the area at the Premises as may be required for the effective and efficient installation, commissioning, operation, and the maintenance of the Solar Power Plant (the "**License**") at the Site during the Term of the Agreement. Provided that all the representatives of the Supplier shall follow all the required timings, formalities, disciplinary guidelines, security, and safety requirements for visitors of the Purchaser while entering and working in the Premises of the Purchaser.

7.2. The Purchaser acknowledges that the Supplier's performance under this Agreement is dependent on the validity of the License for the Term. The License shall be valid for the Term and shall be co-terminus with the Agreement.

7.3. A controlled copy of a plan depicting the Site forming the subject-matter of the License for each Premises shall be jointly signed by the Supplier and the Purchaser.

7.4. The License to access any part of the Premises shall not create any ownership rights in favour of the Supplier and the ownership of the Premises shall always remain with the Purchaser at all times.

7.5. The Supplier shall not directly or indirectly transfer, assign, sell, encumber, or part with its interest in its business in the Premises either in part or in whole in any manner whatsoever, or sublet, underlet, or part with the possession of the licensed Premises without obtaining prior written approval from the Purchaser at any time during the term of the Agreement.

For Restricted Circulation

- 7.6. The Supplier may, subject to prior written approval of the Purchaser, hypothecate and/or charge or/and or create other encumbrances and/or mortgage the assets created, that are the Solar Power Plant installed at the Site, on the Premises for the limited purpose of offering such assets as security in favour of the lenders for securing any amount and payable by it to such lenders which may be any banking institution notified by the Central Government under Section 51 of the Banking Regulations Act, 1949 or a corresponding new bank as defined in clause (d) of Section 2 of the Banking Companies (Acquisition and Transfer of Undertakings) Act, 1970 or any of the Public Financial Institutions which may be notified by the Central Government in this behalf in consultation with the Reserve Bank of India or any other lender in India and abroad. Provided, however, all such mortgages, charges or encumbrances shall be subject to the rights of the Purchaser under this Agreement, and any modification or amendment thereof for the time being in force, and the provision of written consent by the Purchaser.
- 7.7. The Supplier undertakes to inform the Purchaser in writing the details of finance(s) raised on the security of the Solar Power Plants from time to time till the loan(s) is/are repaid to the financial agencies. The Supplier also undertakes to share the hypothecation documents with the Purchaser along with other details of hypothecation /mortgage or charge.
- 7.8. To the extent permitted by Applicable Law, each Party shall not directly or indirectly cause, create, incur, assume or suffer to exist any mortgage, pledge, lien, charge, security interest, encumbrance or claim of any nature, including claims by governmental authorities for taxes (collectively referred to as "**Liens**" and each, individually, a "**Lien**") on or with respect to the interests of the other in the Premises and the Solar Power Plant, and in the permission to enter granted hereunder.
- 7.9. Each Party shall promptly notify the other of the imposition of a Lien on the property interests of the other Party, and shall promptly discharge such lien, provided however, that a Party may seek to contest the amount or validity of any Lien affecting the property of the other Party, provided it timely complies with all procedures for contesting such Lien, posts any bond or other security necessary under such procedures, and if such procedures do not require the posting of security, the Party establishes for the benefit of the other Party a deposit, letter of credit, or other security acceptable to the other Party to indemnify the other Party against any Loss which could reasonably be expected to arise if such Lien is not removed or discharged. This clause shall be guided by standard Laws of Lien.
- 7.10. The Parties agree that the Supplier or its assignees shall not have any Lien on the Premises provided by the Purchaser in any shape or form whatsoever and the Purchaser and its assignees shall not have any lien on the Solar Power Plant in any shape or form whatsoever.

For Restricted Circulation

- 7.11. The Supplier has represented to the Purchaser that the Solar Power Plant shall be set up by the Supplier. Further the Parties understand that the Supplier may create a charge on the Solar Power Plant excluding the Site and the Premises on which the Solar Power Plant is erected and/or assign this Agreement, but in no event the creation of charge on the Solar Power Plant or assignment shall have any effect on this Agreement and shall not affect the business of the Purchaser. In case of Transfer of Ownership by the Supplier during or at the end of the Term of this contract as per provisions of this Agreement the Supplier shall ensure that the Solar Power Plant is free from any charge, lien or any kind of encumbrances. The new assignee shall carry forward the Supplier's liabilities and obligations under this Agreement.
- 7.12. Non-Disturbance Agreements: The Purchaser shall pay for and obtain all consents required for it to enter into and perform its obligations under this Agreement from its lenders, landlord, tenants, and any other persons with interests in the Premises. If there is any charge against the Premises which could reasonably be construed as prospectively attaching to the Solar Power Plant, the Purchaser shall promptly provide an acknowledgement and consent from such lienholder, in form and substance reasonably acceptable to the Supplier, stating that the ownership of the property in goods over the Solar Power Plant remains in the Supplier and further acknowledging that the Solar Power Plant is personal property of the Supplier and agreeing not to disturb the rights of the Supplier in the Solar Power Plant and under this Agreement. Such acknowledgment and consents, or acceptable notices thereof, shall be recorded, at the Purchaser's expense, with the appropriate authority. The Purchaser may in the future mortgage, pledge, and grant security interests in all or a portion of the Premises and the improvements thereon, provided the mortgagee or other grantee of the encumbrance acknowledges this Agreement, the Solar Power Plant, the access Permissions granted hereunder, and the priority of the Supplier's rights in the Solar Power Plant and the access Permissions.
- 7.13. All charges towards stamp duty, court fees & lawyer/coordinator for registration shall be completely borne by the Supplier.
- 7.14. For any dispute between the Parties, the same shall be resolved as per Dispute Resolution mechanism mentioned in this Agreement.

8. **OBLIGATIONS OF THE PARTIES**

8.1. **Obligations of the Supplier**

During the Term, the Supplier shall:

- 8.1.1 Be responsible for obtaining and maintaining all approvals relating to installation and operation of Solar Power Plant, all the

For Restricted Circulation

20 | 48

statutory charges for above approvals shall be paid by the Supplier and the Purchaser shall assist in completing documentation work where necessary for obtaining quick approvals from the concerned Authorities.

- 8.1.2. Undertake the installation and commissioning of the Solar Power Plant on the Premises at its own cost in accordance with the terms and conditions of the Agreement and the Applicable Laws;
- 8.1.3. Install and operate and maintain all necessary infrastructure for delivery of Solar Power at Injection Point;
- 8.1.4. Continue supplying Solar Energy within the agreed timelines for the Term of the Agreement;
- 8.1.5. The Solar Energy supplied would be injected at 415 V, 50Hz, into the LT panel (Injection Point). Suitable provisions shall be setup by Supplier to maintain the quality of power as per the provisions of electricity laws of India, including the Electricity Act, 2003 as amended and modified from time to time and the Electricity Rules, 2005 as amended from time to time for generation, transmission, and distribution of the electricity;
- 8.1.6. Operate and maintain the Solar Power Plant in accordance with the terms and conditions of the Agreement and the Applicable Laws during the Term;
- 8.1.7. Ensure that the Solar Power Plant shall have optimum Installed Capacity at each of the Premises and the Supplier shall ensure operation and maintenance of the Solar Power Plant to ensure smooth operation for the Term at its own cost and expense;
- 8.1.8. The Supplier shall bear all costs pertaining to installation, testing, calibration, maintenance, and repair of the Meter at the Injection Point;
- 8.1.9. Keeping complete and accurate records and all other data required for the purpose of accounting the Solar Energy supplied and consumed;
- 8.1.10. Take maximum care to protect all the assets and belongings to the Purchaser on the Premises while installing, operating, maintaining & removing the Solar Power Plant. Any damage to property of the Purchaser attributable to the Supplier shall be rectified or reimbursed by the Supplier to the Purchaser;
- 8.1.11. Indemnify and hold the Purchaser harmless against all damage and losses caused to the Purchaser arising out of any failure, malfunctioning or faulty functioning of the Solar Power Plant due to any act or omission attributable to the Supplier;

For Restricted Circulation

21 | 48

- 8.1.12. At its own cost and expense obtain and maintain all such Applicable Permits as are necessary for performing its obligations under the Agreement. The Supplier shall be responsible for procuring all the required statutory approvals and licences, including approval for supply of power to industrial establishments and net metering. The Purchaser, shall on the request of the Supplier, provide documentation support for the same;
- 8.1.13. Check the fixing of panels at the Site and give a report in a prescribed format to the Purchaser on the status of fixing on a bi-monthly basis. The Supplier shall take immediate action on any deviation observed in fixing of the PV panels;
- 8.1.14. Arranging the interconnection of the Solar Power Plant with the Purchaser's Local Electric Utility at HT/LT connection level including net metering approvals and fulfilling any other requirements of the distribution licensees. Cost related to net metering application however shall have to be borne by the Purchaser;
- 8.1.15. Produce all the supplier test certificates, inspection report and inspect all the material supplied to the project for adherence to specification specified in Annex VI; and
- 8.1.16. Always ensure and be solely responsible for complying with all the safety standards and requirements of the Purchaser for undertaking any work under this Agreement. Further, the Supplier shall be solely responsible for ensuring compliance with Clause 10 of this agreement relating to 'Safety at Workplace'.

8.2. Obligations of the Purchaser

During the Term of the Agreement, the Purchaser shall:

- 8.2.1. At its own cost and expense undertake, comply with, and perform all its obligations set out in the Agreement;
- 8.2.2. Provide all reasonable assistance necessary to the Supplier during the period of installation and commissioning of the Solar Power Plant and during the entire Term of the Agreement so that the Supplier may perform its obligations without any hindrances;
- 8.2.3. Make timely payments of the Tariff to the Supplier in the manner and in accordance with the terms and conditions set out in the Agreement;

For Restricted Circulation

22 | 48

- 8.2.4. Exercise best endeavors to provide reasonable assistance necessary to the Supplier for obtaining Applicable Permits;
- 8.2.5. Ensure that the Purchaser does not put up any permanent or temporary structure in its Premises which may cause obstruction to sun light falling on all solar modules forming part of the Solar Power Plant, provided however, this shall not prevent the Purchaser from carrying out the proposed expansion of its existing manufacturing facility;
- 8.2.6. Provide at its cost the security for the Premises and the Solar Power Plant. The Supplier and its employees shall at all times, follow the Purchaser's visitor policy and security protocols including timings, formalities, disciplinary guidelines and safety requirements while entering and working in the Premises of the Purchaser;
- 8.2.7. Indemnify and hold the Supplier harmless against all damage and losses caused to the Supplier arising out of any failure, malfunctioning or faulty functioning of the Solar Power Plant due to any act or omission solely attributable to the Purchaser.

9. **DAMAGE**

9.1. **Damage by The Purchaser**

In the event that the Solar Power Plant is damaged, except Force Majeure events, due to any reasons solely attributable to the Purchaser, or any of its employees, agents, contractors or affiliates, the Purchaser:

- 9.1.1. Shall be responsible for any cost of repairing or replacing any component of the Solar Power Plant and rectifying the damage.
- 9.1.2. Shall continue to be billed as per Deemed Generation until the Solar Power Plant is restored to full capacity, and the Purchaser shall be responsible for the payment of these bills.

9.2. **Damage by The Supplier**

In the event that the Solar Power Plant or any other property of the Purchaser is damaged by any act, negligence or omission, except Force Majeure events, by the Supplier, or any of its employees, contractors or affiliates, the Supplier:

- 9.2.1. Shall be responsible for the cost of repairing the Solar Power Plant or replacing the component of the Solar Power Plant or cost of repair or replacement of such other property of the Purchaser.

9.2.2. Shall not bill the Purchaser for any Deemed Generation. If such

For Restricted Circulation

23 | 48

Deemed Generation is billed to the Purchaser, the Purchaser shall not be obliged to pay the amount to the Supplier.

9.2.3. The Supplier shall supply a minimum quantity of Solar Energy from each Site as defined as Absolute Energy Generation Guarantee subject to 100% grid availability. The Absolute Energy Generation Guarantee as defined in Clause 5.2 above for each Site or Premises shall form the basis for the calculation of deficit in Solar Energy units generated for each Site.

9.2.4. The Supplier shall be liable to pay as and by way of liquidated damage charges for deficit against the compliance of Clause 9.2.3 of this Agreement which shall be calculated as mentioned below:
Liquidated Damage Charges for Deficit = (Weighted average rate at which Power procured from other sources per kWh - Demand charges per kWh - PPA tariff @ Rs 3.95/kWh)* Number of units deficit against the Absolute Energy Generation Guarantee for that Site

9.3. In the event of a delay in achieving the COD by the Supplier, provided that such delay was not as a result of getting the necessary government approvals from the concerned authorities or the Purchaser's negligence or breach of its obligations hereunder or due to a Force Majeure Event, the Supplier shall be provided another 30 (thirty) days to commission the respective Solar Power Plant and if SCOD is still not achieved in those 30 (thirty) days, the Supplier shall pay to the Purchaser as and by way of liquidated damages, a sum on account of delay in achieving the SCOD ("**Delay Liquidated Damages**"), as per the following calculation:

Delay Liquidated Damages = Absolute Energy Generation Guarantee during delay period * (Weighted average rate at which Power procured from other sources per kWh - demand charges per kWh - PPA tariff @ Rs 3.95/kWh)

Delay Liquidated Damages shall be payable on actual basis with maximum ceiling of Rs 3/- per kWh. For avoidance of doubt under any circumstance Delay Liquidated Damages shall not be more than Rs 3/- per kWh. The Delay Liquidated Damages shall be paid to the Purchaser through RTGS/ Cheque payment once such demand has been raised as per provisions of this Agreement by the Purchaser.

The total number of Solar Power units lost shall be calculated on a pro-rata basis from the Absolute Energy Generation Guarantee for that Site. The Delay Liquidated Damages shall be calculated from the date falling after the SCOD or the extended SCOD and up to the COD agreed by both Parties. The Delay Liquidated Damages shall be subject to a cap

For Restricted Circulation

24 | 48

of liquidated damages payable for a maximum period of 1 (one) month of delay in achievement of the COD.

- 9.4. In the event of any delay on the part of the Supplier to establish the Solar Power Plant and to also achieve the COD beyond 2 (two) months from the SCOD (including notice period), the Purchaser shall be at liberty to terminate this Agreement without any rights or claims inter-se between the Parties. The Supplier shall also be liable to pay the Purchaser as and by way liquidated damages, an amount equivalent to six (6) months of Delay Liquidated Damages as calculated as per Clause 9.3 above, and the payment of such damages shall in no way limit any other remedies that the Purchaser may have in equity and in law.

10. SAFETY AT WORKPLACE

The Supplier shall strictly comply with the following ensure that: -

- 10.1.1. It appoints a dedicated full time safety supervisor for the purposes of compliance of its obligations under this Agreement, who must be present during execution of any of the works associated with this Agreement, including when access of the Premises is required for such work, and also to ensure that the Supplier is in compliance with all the safety standards of the Purchaser;
- 10.1.2. Appropriate work permits are taken from the Purchaser's Safety Department before starting any work under the Agreement on a daily basis;
- 10.1.3. A Safety talk / briefing shall be given to all the workers of the Supplier tasked with doing any work under the Agreement before starting any work thereon. All such guidelines shall also be mailed in writing to the Supplier and duly acknowledged by the Supplier;
- 10.1.4. All the workers shall wear appropriate Personal Protection Equipment such as Safety shoes, helmets, and goggles while doing any work incidental to the Agreement;
- 10.1.5. Any worker whose work involves working at a height must wear a safety harness with double lanyard;
- 10.1.6. Any worker, whose work involves any welding processes, must wear welding shield and gloves;
- 10.1.7. Any welding machine to be used for the Project must be connected with a Residual Current Circuit Breaker (RCCB) & an industrial power socket;

For Restricted Circulation

25 | 48

- 10.1.8. The valves of any Gas cutting blowpipe must be fitted with flash back arrester and valve guard;
- 10.1.9. Any Gas cylinders required for the project must be mounted on gas trolleys with double two-level fastening system and calibrated pressure gauges must be fitted to the valves of the cylinders;
- 10.1.10. Fire extinguishers are placed at any place where any hot work, such as welding is to be carried out;
- 10.1.11. Lifelines must be provided all around the roof of the building where the Solar Power Plant is to be erected;
- 10.1.12. Industrial sockets must be provided for all electrical equipment required for use in the project;
- 10.1.13. Lifting tools and tackles are in compliance with Form 32.; and
- 10.1.14. Any other safety standards / guidelines issued by The Purchaser from time to time shall be followed and strictly adhered to by the Supplier and its workers.

11. REPRESENTATIONS AND WARRANTIES

- 11.1. The Supplier hereby represents and warrants to the Purchaser that as on the Effective Date:
 - 11.1.1. It is duly organized, validly existing and in good standing under the Laws of the Republic of India;
 - 11.1.2. It has taken all necessary corporate and other action under the Laws of the Republic of India to authorize such execution, delivery, and performance of the Agreement;
 - 11.1.3. It has the financial standing and the technical expertise and capacity to perform its obligations under the Agreement;
 - 11.1.4. It shall not breach any of its obligations under this Agreement.
 - 11.1.5. It shall ensure that it has not acted in breach or made any misstatements with respect to its compliance with the Applicable laws;
 - 11.1.6. The Agreement when executed constitutes valid and binding obligations on the Supplier and is enforceable against the Supplier in accordance with the terms of the Agreement;

For Restricted Circulation

26 | 48

11.1.7. The execution, delivery, and performance of its obligations under the Agreement does not and shall not:

- (a) Contravene any Law; or
- (b) Conflict with or result in any breach or default under any agreement, instrument, regulation, licence, or authorisation binding upon it or any of its assets.

11.2. The Purchaser hereby represents and warrants to the Supplier that as on the Effective Date:

11.2.1. It is duly organized, validly existing and in good standing under the Laws of the Republic of India;

11.2.2. It has taken all necessary corporate and other action under the Laws of the Republic of India to authorize such execution, delivery, and performance of the Agreement;

11.2.3. The Agreement when executed constitutes valid and binding obligations on the Purchaser and is enforceable against the Purchaser in accordance with the terms of the Agreement;

11.2.4. It has the financial standing and capacity for payment of the Tariff to the Supplier; and

11.2.5. The execution, delivery, and performance of its obligations under the Agreement does not and shall not:

- (a) contravene any Law; or
- (b) conflict with or result in any breach or default under any agreement, instrument, regulation, licence, or authorisation binding upon it or any of its assets.

11.3. Each of the representations and warranties mentioned above shall be construed as a separate warranty and (save as expressly provided to the contrary herein) shall not be limited or restricted by reference to or inference from the terms of any other warranty or any other term of the Agreement.

12. INSURANCES

12.1. The Supplier shall effect and maintain or cause to be effected and maintained, at its own cost and expense, throughout the term, asset Insurances and insurance for its employees working at the Solar Power Plant.

12.2. Save as expressly provided in the Agreement or the Insurances, the proceeds of any insurance claim made due to loss or damage to the Solar Power Plant, or any part of the Solar Power Plant shall be first applied to reinstatement, replacement or renewal of such loss or

For Restricted Circulation

27 | 48

damage, which shall be carried out within a period of 2 (two) months from the date of receipt of the proceeds of insurance claim. Any surplus generated out of insurance claims shall be equally shared between the Parties.

- 12.3. If a Force Majeure Event renders the Solar Power Plant no longer economically and technically viable and the insurers under the Insurances make payment on a **"total loss"** or equivalent basis, the proceeds of such payment shall be used by the Supplier to restore the Installed Capacity of Solar Power Plant at the particular Site for the benefit of the Purchaser. The differential cost arising on account of Force Majeure clause as mentioned in this Agreement in setting up a new Solar Power Plant by the supplier for the Purchaser on receipt of the insurance claims and other claims by the supplier shall be borne by the Supplier.

13. OWNERSHIP OF THE POWER PLANT

- 13.1. Subject to the terms of this Agreement, the Supplier shall be the legal and beneficial owner of the Solar Power Plant throughout the Term and the Solar Power Plant shall remain the property of the Supplier and shall not attach to or be deemed a part of, or fixture to the Premises.
- 13.2. The Purchaser covenants that it shall place all persons having an interest in or lien upon the real property comprising the Premises, on notice of the ownership of the Solar Power Plant and the legal status or classification of the Solar Power Plant as movable and personal property of the Supplier or its assignee as the case may be. The Purchaser shall make any necessary filings to disclaim the Solar Power Plant as a fixture of its respective Premises with the appropriate authorities to place all interested parties on notice of the ownership of the Solar Power Plant by The Supplier or its assignee as the case may be.
- 13.3. The Parties hereby agree that at the end of the Term or at Termination of the Agreement under any conditions, the Purchaser shall have the first right of refusal to purchase the Solar Power Plant as per the terms of this Agreement, free from any charge, lien or any kind of encumbrances. The Purchaser hereby agrees that it shall be solely liable to bear all taxes as may be applicable for the purchase of the Solar Power Plant from the Supplier. The Parties hereby agree that such right under this clause shall be exercised by the Purchaser at least 2 (two) months prior to the termination of this Agreement, the end of the term standard maintenance has to be performed before the handover.
- 13.4. Transfer of Ownership: Upon the Purchaser's notice that it elects to exercise the option set forth in Clause 13.3, the Purchaser and the Supplier shall enter into an agreement in mutually agreed terms to transfer the Solar Power Plant and the rights and obligations attached thereto. In case of Transfer of Ownership during or at the end of the

For Restricted Circulation

28 | 48

Term of this contract, the Supplier shall ensure that the Solar Power Plant is free from any charge, lien or any kind of encumbrances.

- 13.5. In the event the Purchaser wishes to purchase the Solar Power Plant at any time, then The Supplier shall transfer the Solar Power Plant to the Purchaser at a value as shown in Annexure I. If the Purchaser wishes to purchase anytime during a particular year, then the value shall be pro-rated. However, any taxes or duties applicable for such transfer shall be entirely borne by the Supplier.
- 13.6. Operation & Maintenance After Sale: Upon the Purchaser's notice that it elects to exercise the option set forth in Clause 13.3, the Purchaser and the Supplier shall discuss entering into an operation and maintenance agreement under which the Supplier shall perform all or a portion of the operation and maintenance requirements of the Solar Power Plant following the Purchaser's purchase of the Solar Power Plant. However, neither Party shall be under an obligation to enter into such an agreement.
- 13.7. Removal of the Solar Power Plant: Subject to the buy-out/purchase of the Solar Power Plant by the Purchaser, upon the expiry of the Term or early termination of this Agreement, the Supplier shall, at its own expense, remove all of its tangible property and equipment comprising the Solar Power Plant from the Premises on a mutually convenient date but in no case later than ninety (90) days after the date of expiry of the Term or early termination of this Agreement. If the Supplier fails to remove the Solar Power Plant by such agreed upon date, the Purchaser shall have the right, at its option, to remove the Solar Power Plant. For the purposes of the Supplier's removal of the tangible property and equipment comprising the Solar Power Plant, the Purchaser's covenants in relation provision of uninterrupted access to the Supplier shall remain in effect until the date of actual removal of the tangible property and equipment comprising the Solar Power Plant.

14. SHUTDOWNS, RELOCATION; CLOSURE OR SALE OF PREMISES

14.1. The Purchaser Requested Shutdown

14.1.1. During any shutdown period (but not including periods of Force Majeure), the Purchaser shall pay the Supplier an amount equal to the payments that the Purchaser would have made to the Supplier hereunder for electric energy that would have been produced by the Solar Power Plant during the period of the shutdown;

14.1.2. Determination of the amount of energy that would have been produced during the period of the shutdown shall be based on Deemed Generation computed as per Annexure II of this Agreement.

For Restricted Circulation

29 | 48

- 14.1.3. The Supplier Shutdown: The Supplier may shut down the Solar Power Plant at any time in order to perform required emergency repairs and/or maintenance to the Solar Power Plant for a maximum of seven (7) days. The Supplier may shutdown the Solar Power Plant with intimation to The Purchaser. The Supplier agrees to notify the Purchaser seven (7) days in advance.

14.2. Plant Relocation:

If the Solar Power Plant needs to be temporarily moved or its generation suspended during Premises repairs or for any other reason, either at the request of the Purchaser or due to acts of negligence or omission of the Purchaser or its employees, agents or contractors, the Purchaser shall be responsible for any costs arising from moving or disassembling the Solar Power Plant. In the event the Solar Power Plant relocation is requested by the Supplier for reasons solely attributable to the Supplier, all costs arising from such moving or disassembling the Solar Power Plant shall be solely to the account of the Supplier.

14.3. Suspension of Generation:

- 14.3.1. Any interruption in generation of Electricity during such relocation as described herein above in Clause 14.2, and reasons attributable to the Purchaser shall continue to be billed as per Deemed Generation, during the period of interruption.

- 14.3.2. where the electricity generation is suspended or the Solar Power Plant is to be temporarily moved on account of any acts of negligence or omission of the Supplier or its employees, agents or contractors, the cost for relocation / disassembling shall be to the account of the Supplier, who shall further compensate to the Purchaser as per Clause 9.2.4 for shortfall in solar energy for the period such event occurs.

- 14.3.3. In addition, during the Relocation Event, except in the circumstances envisaged under Clause 14.3.2 above:

For Restricted Circulation

30 | 48

- (a) The Purchaser shall pay the Supplier an amount equal to the payments that the Purchaser would have made to the Supplier hereunder for electric energy that would have been produced by the Solar Power Plant following the Relocation Event;
- (b) Determination of the amount of energy that would have been produced following the Relocation Event shall be based, during the first Operations Year, on the Deemed Generation and, after the first Operations Year, based on actual operation of the Solar Power Plant in the same period in the previous Operations Year, unless the Supplier and the Purchaser mutually agree to an alternative methodology.

14.4. Premises Shutdown; Interconnection Deactivated

14.4.1. In the event Premises are closed as a result of an event that is not:

- (a) a Force Majeure Event or
- (b) caused by or related to any unexcused action or inaction of the Supplier,

the Purchaser shall nevertheless continue to pay the Supplier for all electricity produced by the Solar Power Plant on the Premises and delivered to the Point of Delivery.

14.4.2. If an interconnection with the Local Electric Utility becomes deactivated for reasons that are not:

- (a) a Force Majeure Event or
- (b) caused by or related to any unexcused action or inaction of the Supplier such that the Solar Power Plant is no longer able to produce electricity or transfer electricity to its respective Premises or to the Local Electric Utility,

the Purchaser shall pay the Supplier an amount equal to the sum of payments that the Purchaser would have made to the Supplier hereunder for electric energy that would have been produced by the Solar Power Plant following such clause as per Deemed Generation (Annexure II)

14.4.3. Determination of the amount of energy that would have been produced following such closure shall be based, during the first Operations Year, on the estimated levels of production and, after the first Operations Year, based on actual operation of the Solar Power Plant in the same period in the previous Operations Year, unless the Supplier and the Purchaser mutually agree to an alternative methodology.

For Restricted Circulation

31 | 48

14.4.4. If a shutdown pursuant to this Clause 14.4 continues for 365 days or longer, the Purchaser has the option to buyout the Solar Power Plant as specified in Clause 13.3 of this Agreement.

14.5. Sale of Premises

14.5.1. The Parties hereby confirm that they are entering into the Agreement in good faith and have no current plans or discussion of plans of ceasing business operations.

14.5.2. In the event the Purchaser transfers (by sale, lease, or otherwise) all or a portion of its interest in the Premises, the Purchaser shall remain primarily liable to the Supplier for the performance of the obligations of the Purchaser hereunder notwithstanding such transfer.

14.5.3. However, if no Purchaser Event of Default has occurred and is continuing and the transferee is acceptable to the Supplier in their sole discretion and executes agreements assuming this Agreement in form and substance satisfactory to the Supplier in their sole discretion, the Purchaser may be released from further obligations under this Agreement.

14.5.4. In the event that the Purchaser or the transferee wishes to terminate the Agreement, then they shall pay to the Supplier applicable buy out value.

15. FORCE MAJEURE

15.1. For the purposes of this Clause 15, the term "**Affected Party**" means the Supplier or the Purchaser whose performance has been affected by a Force Majeure Event.

15.2. **Force Majeure:** A Force Majeure Event shall mean any event or circumstance, or combination of events stated below that wholly or partly prevents or delays unavoidably an Affected Party in the performance of its obligations under the Agreement, but only if and to the extent that such event or circumstance is not within the reasonable control, directly or indirectly, of the Affected Party and could not have been avoided if the Affected Party had taken reasonable care:

15.2.1. Act of God, including, but not limited to fire and explosion (to the extent originating from a source external to the Premises), earthquake, epidemic, pandemic, volcanic, eruption, landslide, flood, cyclone, typhoon, or tornado;

For Restricted Circulation

32 | 48

- 15.2.2. Any act of war (whether declared or undeclared), invasion, armed conflict or act of foreign enemy, blockade, embargo, revolution, riot, insurrection, terrorist or military action;
- 15.2.3. General Strikes/lockouts outside the facilities of the Purchaser and affecting the Parties;
- 15.2.4. radioactive contamination or ionising radiation originating from a source in India or resulting from another Force Majeure Event mentioned above excluding circumstances where the source or cause of contamination or radiation is brought or has been brought into or near the Solar Power Plant by the Affected Party or those employed or engaged by the Affected Party; and
- 15.2.5. Any act or event, which is unforeseeable beyond the reasonable control of and has occurred without the fault or negligence of the Affected Party.
- 15.3. **Force Majeure Exclusions:** For avoidance of doubt, Force Majeure Event shall not include the following conditions (which list is not intended to be exhaustive or limitative and is indicative):
- 15.3.1. Unavailability, late delivery, or changes in cost of the Solar Power Plant, machinery, equipment, materials, spare parts, or consumables for the Solar Power Plant;
- 15.3.2. Delay in the performance of any contractor, sub-contractor, or their agents;
- 15.3.3. Non-performance resulting from normal wear and tear typically experienced in projects generating power using Solar PV;
- 15.3.4. Insufficiency of finances or funds or the Agreement becoming onerous to perform; and
- 15.3.5. Non-performance caused by, or connected with, the Affected Party's:
- (a) Negligent or intentional acts, errors, or omissions;
 - (b) Failure to comply with Laws; or
 - (c) Breach of, or default under the Agreement.

15.4. **Notice of Force Majeure Event**

- 15.4.1. The Affected Party shall give notice to the other Party of any Force Majeure Event as soon as reasonably practicable, but not later than thirty (30) Business Days after the date on which such Party knew or should reasonably have known of the commencement of the Force Majeure Event.

15.4.2. The Affected Party shall give notice to the other Party of (i) the cessation of the relevant Force Majeure Event; and (ii) the cessation of the effects of such Force Majeure Event on the performance of its rights or obligations under the Agreement, as soon as practicable after becoming aware of each of these cessations.

15.5. **Duty to Perform and Duty to Mitigate**

To the extent not prevented by a Force Majeure Event, the Affected Party shall continue to perform its obligations pursuant to the Agreement. The Affected Party shall use its reasonable efforts to mitigate the effect of any Force Majeure Event as soon as practicable.

15.6. **Available Relief for a Force Majeure Event**

15.6.1. No Party shall be in breach of its obligations pursuant to the Agreement if the performance of its obligations was prevented, hindered, or delayed due to a Force Majeure Event;

15.6.2. Every Party shall be entitled to claim relief in relation to a Force Majeure Event in regard to its obligations.

15.6.3. For avoidance of doubt, it is categorically agreed upon between both the parties that any money outstanding due to be payable to any of the parties prior to occurrence of Force Majeure events shall not be suspended or excused due to the occurrence of a Force Majeure Event in respect of such Party.

15.7. Both the Parties shall mutually agree upon to extend the Term of the Agreement to overcome the loss of revenue incurred to the Supplier on account of such Force Majeure Event.

15.8. The Parties agree to restore the Solar Power Plant and the Premises to the Installed Capacity.

16. **EVENTS OF DEFAULT AND TERMINATION**

16.1. An Event of Default shall mean in respect to a Party ("**Defaulting Party**"), the occurrence of any one of the following, subject to the applicable opportunity to cure:

16.1.1. No Opportunity to Cure: Unless otherwise agreed to between the Parties an act of insolvency with respect to a Party to the Agreement or such Party is adjudged bankrupt shall constitute an immediate Event of Default, without the opportunity to cure;

16.1.2. Fifteen (15) Day Opportunity to Cure: Unless otherwise agreed to between the Parties, any of the following shall constitute an

For Restricted Circulation

34 | 48

immediate Event of Default, unless the Party shall have cured the same within Fifteen (15) days of receipt of notice of such Event of Default from the other Party:

- (a) The Supplier's failure to supply Solar Power to the Purchaser for any reasons in accordance with the terms of the Agreement after ninety (90) days from the Effective Date;
- (b) The revocation or cancellation or impairment of any license, approval or permit obtained by either Party which has a material adverse effect on the Solar Power Plant;
- (c) The failure or refusal by either Party to perform its material obligations under the Agreement;
- (d) A breach by the Supplier of its obligations under any of the sub-clauses to Clause 8 and/or Clause 9;
- (e) If an Event of Force Majeure has extended for a continuous period of twelve (12) months or beyond; and
- (f) Any representation or warranty made by the Supplier herein is false or misleading in any respect at the time it was made.

16.2. Termination of Development Activities and Agreement

16.2.1. Notwithstanding anything contained in this Agreement at any time before the COD, the Supplier shall have the right to cease development of the Solar Power Plant(s) on the Premises, for reasons only dealing with changes in law or government regulations coming into effect after the Effective Date, which would render the Project unviable. If the Supplier gives the Purchaser notice of such determination, this Agreement shall stand terminated effective as of the delivery of such notice without any further liability of the Parties to each other, provided that

16.2.2. The Supplier shall remove any equipment or materials which the Supplier has placed on the Premises;

16.2.3. The Supplier shall restore any portions of the Premises disturbed by the Supplier to its pre-existing condition, i.e. prior to the commencement of construction;

16.2.4. The Parties shall not be released from any payment or other obligations arising under this Agreement prior to the delivery of the notice.

For Restricted Circulation

35 | 48

16.3. Termination of the Agreement

- 16.3.1. In case of occurrence of any Event of Default with no opportunity to cure as contained in the aforementioned Clause 16.1, the non-Defaulting Party may terminate the Agreement at its own discretion, immediately on happening of such Event of Default.
- 16.3.2. In case of occurrence of any Event of Default with 15 (fifteen) Business Days' opportunity to cure as contained in Clause 16.1.2 above, the non-Defaulting Party shall serve a notice in writing to the Defaulting Party giving 30 (thirty) Business Days from date of receipt of such notice, to cure the said default. Where the Defaulting Party fails to cure the said default within the said period of 30 (thirty) Business Days or any extended period that may be mutually agreed between the Parties, the non-Defaulting Party at its sole discretion can terminate the Agreement without further notice.
- 16.3.3. If the Termination of this Agreement occurs due to default by the Supplier as per aforementioned Clause 16.1, the Supplier shall be under legal obligations to pay the Purchaser an amount equivalent to six (6) months of Delay Liquidated Damages as calculated in Clause 9.3 of this Agreement, and the payment of such damages shall in no way limit any other remedies that the Purchaser may have in equity and in law.
- 16.3.4. Upon an Event of Default by Purchaser, the Purchaser shall pay to the Supplier the amount equivalent to the sum of Buy Out value as specified in Annexure I of this Agreement. Upon termination of this Agreement, the Purchaser shall pay the Buy Out price for the relevant year to the Supplier, no later than fifteen (15) days from the date of termination of this Agreement.
- 16.3.5. In the event of Termination for any of the reasons specified in the Agreement, except for Clause 16.3.4, The Purchaser shall have the first option to Buy Out the Solar Power Plant at the mutually agreed value between the Parties. In case the Purchaser does not exercise the option to Buy Out the Solar Power Plant, the Supplier shall remove the equipment related to the Solar Power Plant within fifteen (15) days and vacate the Premises.
- 16.3.6. The expiry or termination of the Agreement due to any Event of Default shall be without prejudice to the accrued rights and liabilities of the Parties at the date of expiry or termination, unless waived in writing by the Parties.

For Restricted Circulation

36 | 48

16.3.7. The confidentiality provisions of Clause 20, the indemnity obligations under Clause 18 hereof, and the dispute resolution provisions of Clause 21 hereof shall continue to apply notwithstanding the termination of this Agreement.

17. LIMITATIONS OF LIABILITY

Neither Party nor any of its directors, officers, shareholders, partners, members, agents, employees, subcontractors or the Suppliers shall be liable for any loss of revenue, loss of profit, loss of opportunities, loss of use, loss of production, loss of contracts or for any other financial or economic loss whatsoever nor for any indirect or consequential loss of any kind arising out of their performance or non-performance hereinunder and under the law of torts, except those arising from any fraud, intentional or wilful misconduct or illegal or unlawful acts on its part. Notwithstanding however, the total liability of either Party for any default under this Agreement, shall under no circumstances exceed Rs. 50,00,000/- (fifty lacs).

18. INDEMNIFICATION

18.1. Each Party (the "**Indemnifying Party**") shall indemnify, defend, and hold harmless the other Party (the "**Indemnified Party**") and its Affiliates and their respective officers, directors, employees, agents, successors, and assigns, from and against all claims, damages, liabilities, losses and costs including reasonable attorney's fees (the "**Losses**") in connection with or relating to, any claims or proceedings to the extent arising from:

18.1.1. the Indemnifying Party's negligence or intentional act or omissions;

18.1.2. Any claims that the Indemnifying Party has acted in a manner that contravenes any Applicable Permits or Laws;

18.1.3. Any claims arising out of the Indemnifying Party's breach of its representations and warranties under this Agreement;

18.1.4. The Indemnifying Party breaching any obligation with regard to Confidential Information as set out in this Agreement; and

18.1.5. Any claims arising out of the Indemnifying Party's breach of its obligations and responsibilities under this Agreement.

18.1.6. Any failure to properly interconnect or comply with the procedures of the Local Electric Utility; or

18.1.7. Any failure to properly handle or dispose of any Hazardous

For Restricted Circulation

2260

37 | 48

Materials brought onto the Premises by any of the Parties or by any their employees, agents, volunteers, and invitees.

- 18.2. **Survival of Indemnification:** The obligations of indemnification as specified above shall survive termination of this Agreement.

19. **INDEPENDENT CONTRACTOR**

The Supplier acknowledges that it is acting as an independent contractor, and that it is solely responsible for its actions or inactions, and that nothing in this Agreement shall be construed to create an agency or employment relationship between the Purchaser and the Supplier or its employees. The Supplier is not authorized to enter into contracts or agreements on behalf of the Purchaser or to otherwise create obligations of Purchaser to third parties. The Parties hereby acknowledge and agree that any workers or personnel engaged by the Supplier and providing services on-site at the Premises shall be employees of the Supplier and not of the Purchaser or any of its subsidiaries for all purposes, including workers' compensation, taxes, compensation and employee benefits. The Supplier agrees that the Supplier shall be solely responsible for payment of all applicable workers' compensation, disability benefits, employee benefits and unemployment insurance, and for withholding and paying such employment taxes and income withholding taxes as required.

20. **CONFIDENTIALITY**

20.1. **General Obligation**

Each Party undertakes that it shall not reveal and shall use its reasonable efforts to ensure that its directors, officers, managers, partners, members, employees, legal, financial and professional advisors, consultants and bankers (collectively, the "**Representatives**") do not reveal, to any third party any Confidential Information belonging to the other Party and disclosed to it under or in connection with this Agreement, without the prior written consent of the other Party, as the case may be. The term "**Confidential Information**" as used in the Agreement means (a) any information concerning the organization, business, technology, trade secrets, know-how, finance, transactions or affairs of the Parties or any of their respective Affiliates, directors, officers or employees (whether conveyed in written, oral or in any other form and whether such information is furnished before, on or after the date hereof), (b) the contents and the subject matter of the Agreement, (c) the negotiations relating to the Agreement, (d) any information or materials prepared by a Party or its Representatives that contains or otherwise reflects, or is generated from, Confidential Information.

- 20.2. **Exception:** The provisions of the aforementioned Clause 20.1 above shall not apply to:

For Restricted Circulation

38 | 48

- 20.2.1. the disclosure of information which the recipient can reasonably demonstrate is in the public domain through no fault of the recipient Party;
- 20.2.2. disclosure of Confidential Information that is or becomes generally available to the public other than as a result of disclosure by or at the direction of a Party or any of its Representatives in violation of the Agreement;
- 20.2.3. disclosure of Confidential Information by a Person to the extent that any such information is later acquired by a Party from a source not obligated to any other Party hereto, to keep such information confidential or such information was previously known or already in the lawful possession of the Party, prior to such disclosure;
- 20.2.4. disclosure of any information, materially similar to the Confidential Information, and such information shall have been independently developed by the Party without reference to any Confidential Information furnished by any other Party hereto;
- 20.2.5. disclosure by a Party to its Representatives provided such Representatives are bound by similar confidentiality obligations; or
- 20.2.6. disclosure, after giving prior notice to the other Parties to the extent practicable under the circumstances and subject to any practicable arrangements to protect confidentiality, to the extent required under the rules of any stock exchange or under any Law or generally accepted accounting principles applicable to any Party or judicial or regulatory process or in connection with any judicial process regarding any legal action, suit or proceeding arising out of or relating to the Agreement.

21. TAXES AND DUTIES

- 21.1. All Taxes as may be applicable in respect of the Tariff on the date of raising the Monthly Bill shall be charged by the Supplier at actuals and shall be borne and paid exclusively by the Purchaser. If, after the Effective Date, the rates of any Taxes are increased or decreased, or any new Tax is introduced, an existing Tax is abolished, or any change in the interpretation or application of any Tax occurs (each, a "**Change in Tax Law**"), in each case, with respect to the sale of Solar Power under the Agreement, the Supplier shall bear such taxes, if the same are on the generation or sale of power and the Purchaser shall bear such taxes if the same are on the consumption of such power.
- 21.2. Subject to Clause 21.1 above, the adjustment in Tariff and the Monthly Bill shall be effective from the date on which the **Change in Tax Law** is

For Restricted Circulation

39 | 48

brought into force.

- 21.3. **Property Taxes:** The Purchaser shall be responsible for all ad valorem personal property or real property taxes levied against the Premises, improvements thereto and personal property located thereon, except that the Supplier shall be responsible for ad valorem personal property or real property taxes levied against the Solar Power Plant. If the Purchaser is assessed any taxes related to the existence of the Solar Power Plant on the Premises, the Purchaser shall immediately notify the Supplier. The Purchaser and the Supplier shall cooperate in contesting any such assessment; provided, however, that the Purchaser shall pay such taxes to avoid any penalties or interest on such Taxes, subject to reimbursement by the Supplier. If after resolution of the matter, such tax is imposed upon the Purchaser related to the improvement of real property by the existence of the Solar Power Plant on the Premises, the Supplier shall reimburse the Purchaser for such tax.
- 21.4. **Tax Contests:** Each Party has the right to contest taxes in accordance with Applicable Law and the terms of encumbrances against the Premises. Each Party shall use all reasonable efforts to cooperate with the other in any such contests of tax assessments or payments. In no event shall either Party postpone during the pendency of an appeal of a tax assessment the payment of taxes otherwise due except to the extent such postponement in payment has been bonded or otherwise secured in accordance with Applicable Law.
- 21.5. **Payment of Delinquent Taxes:** In the event either Party fails to pay any taxes that may become a lien upon the other Party's property, such Party may pay such amounts and, in such event, shall be entitled to recover such paid amount from the other Party, together with interest thereon at the rate of one percent (1%) per month, compounded monthly.
- 21.6. **Reimbursement Deadline:** Any reimbursement of taxes owing pursuant to this Clause 21 shall be paid within twenty (20) Business Days of receiving an invoice therefor from the Party who paid the taxes.

22. **GOVERNING LAW AND DISPUTE RESOLUTION**

22.1. **Governing Law**

The Agreement and the rights and duties of the Parties hereunder shall be governed by and construed, enforced, and performed in accordance with the laws of the Republic of India and shall be subject to the jurisdiction of courts at Kolkata.

22.2. **Dispute Resolution**

For Restricted Circulation

40 | 48

22.2.1. Any Party who claims that a claim, or dispute or difference in connection with this Agreement or the performance of any provision hereunder ("**Dispute**") has arisen must give notice seeking amicable settlement thereof amongst the Coordination Committee as soon as practicable after the occurrence of the event, matter or thing which is the subject of such Dispute and in such notice such Party shall provide particulars of the circumstances and nature of such Dispute and of its claim(s) in relation thereto to the Coordination Committee.

22.2.2. In the event the Coordination Committee fails to resolve the Dispute within fifteen (15) days from the date of notifying the Dispute to the Coordination Committee, then such Dispute shall be referred for negotiation and discussions between senior executives of the Purchaser and the Supplier (together hereinafter referred as "Representatives") who shall meet within 15 (fifteen) days of the Coordination Committee informing the Representatives, and attempt to resolve and negotiate in good faith, the Dispute between them regarding this Agreement.

22.2.3. If the Dispute is not resolved by the Representatives within 30 (thirty) days of the Representatives meeting, either Party may submit the Dispute to arbitration to be conducted in accordance with the Arbitration and Conciliation Act, 1996, including any amendments and modifications thereto, in accordance with the following procedure:

- (a) The arbitration proceedings shall be conducted by an arbitral tribunal consisting of sole arbitrator to be jointly appointed by the Parties or as appointed by the Court under the Arbitration and Conciliation Act, 1996; who shall be an experienced person of repute from the power sector to act as an arbitrator. The arbitrator shall make the award within 3 (three) months of entering upon the reference unless the time is extended by consent of both Parties;
- (b) Any arbitration under the Agreement shall be conducted in Kolkata, in the English language. The Parties shall bear their respective costs of the arbitration unless the arbitral tribunal otherwise directs; and
- (c) The award of the arbitral tribunal shall be final and binding on the Parties and shall be enforceable in accordance with its terms. The arbitral tribunal shall state reasons for its findings and the award shall be substantiated in writing. The Parties agree to be bound by the decision thereby and to act accordingly. The award shall be enforceable in any court having jurisdiction, subject to Applicable Law.

22.2.4. The Parties agree that either Party may seek interim measures

For Restricted Circulation

41 | 48

including injunctive relief in relation to the provisions of this Agreement or the Parties' performance of it from any court of competent jurisdiction.

22.2.5. The Parties expressly waive and forego any right to punitive, exemplary, or similar damages in connection with any Dispute and no such damages shall be awarded or provided for in any Dispute resolution proceeding under or in aid of this Article.

22.2.6. Survival of Arbitration Provisions: The provisions of this Clause 22 shall survive any termination of this Agreement for any reason whatsoever and shall apply (except as provided herein) to any disputes arising out of this Agreement.

22.2.7. Notwithstanding any dispute referred to arbitration, the Parties shall continue to perform their obligations.

23. NOTICES

23.1. All Monthly Bills, notices, requests, consent, or other communication shall be addressed to the other Party at the addresses noted below or such other address as shall be notified by a Party in writing to the other Party. All such Monthly Bills, notices, requests, consent, or other communication, unless otherwise specified herein, shall be in writing and may be delivered by E-mail, hand delivery, post, courier service or by facsimile.

23.2. The addresses referred to above are:

23.2.1. In case of notice to the Company

Attn: Mr. Bhairaw Kumar
 Address: 128, 2nd Floor, Kaveri Apartment, D - 6, Vasant Kunj, New Delhi - 110070
 Telephone no: 9555853152
 Email: bhairaw@enerture.co.in

23.2.2. In case of notice to Purchaser

Attn: Mrs. Anuradha Singh
 Address: Level 6 Prestige Khoday Towers, No.5 Raj Bhawan Road, Bangalore - 560001
 Telephone no: 8105586609
 Email: bs.anuradha@linde.com

23.3. Unless there is evidence that it was received earlier, a Notice or Monthly Bill shall be deemed delivered if:

23.3.1. sent by mail, except air mail, 15 (fifteen) Business Days after

For Restricted Circulation

42 | 48

posting it;

23.3.2. sent by air mail, 4 (four) Business Days after posting it;

23.3.3. sent by e-mail, 3 (three) Business Days after it was sent, provided the sender did not receive a delivery receipt failure notification or delivery receipt delay notification from the sender's internet service provider/e-mail hosting server; and

23.3.4. sent by hand delivery with date of confirmation stamp on receipt of documents; and

23.3.5. Any notices or communications to either party hereunder shall be deemed to have been given when sent to the specified email address of the party, or deposited in the mail, addressed to the then current address of such party, as the case may be.

23.3.6. Any notices or communication given by the either of the Parties pursuant to this Agreement shall be deemed to be effective only if addressed to the person/address specified herein. For the avoidance or doubt, it is clarified that any oral communication by either party or its representative to the other shall not be acceptable as effective notice or communication under the terms of this agreement.

23.3.7. Date of Effectiveness: Any such notice or communication so mailed shall be deemed delivered and effective when

(a) when a read receipt is received from the email address to which it is sent, if sent electronically,

(b) 48 (Forty-Eight) hours after mailing of the notice or communication, if sent by registered mail.

24. MISCELLANEOUS

24.1. **Entitlement to Tax Incentives:** The Supplier (and/or any of its assignee as may be identified and appointed at its sole discretion) shall be entitled to any tax incentives that may arise as a result of the operation of the Solar Power Plant and shall be entitled to transfer the ownership over the Solar Power Plant or construct the Solar Power Plant for such financing party who is able to utilize such tax incentives. The Purchaser shall provide reasonable assistance to the Supplier in preparing all documents necessary for the Supplier to receive such tax incentives, any tax incentives arising as a result of solar power generation shall be the right of the Supplier or the financing party and any tax incentives arising due to consumption of Solar Energy shall be the right of the Purchaser.

For Restricted Circulation

43 | 48

- 24.2. **Amendments:** The Agreement shall not be changed or amended unless such change or amendment is made in writing and signed by authorized representatives of both Parties.
- 24.3. **Entire Agreement:** The Agreement constitutes the entire agreement between the Parties relating to the subject matter of the Agreement and shall supersede all other prior understandings or agreements, both written and oral, between the Parties relating to the subject matter of the Agreement.
- 24.4. **Assignment:** This Agreement shall be binding upon and inure to the benefit of the Parties and their respective successors and permitted assigns. This Agreement shall not be assigned by any Party without the prior written consent of the other Party. Notwithstanding the foregoing, the Purchaser shall have the right to assign this Agreement or any of its rights and/or obligations contained herein to any of its Affiliates.
- 24.5. **Waiver:** Failure to enforce any right or obligation by any Party with respect to any matter arising in connection with the Agreement shall not constitute a waiver as to that matter or any other matter. Any waiver by any Party of its rights with respect to a default under the Agreement or with respect to any other matters arising in connection with the Agreement must be in writing. Such waiver shall not be deemed a waiver with respect to a subsequent default or other matter.
- 24.6. **Captions; Construction:** All indexes, titles, subject headings, section titles and similar items are provided for the purpose of reference and convenience and are not intended to affect the meaning of the content or scope of the Agreement.
- 24.7. **Costs:** Except as otherwise provided in the Agreement, each Party shall be responsible for its own costs, charges, and expenses (including those of its affiliates) incurred in connection with the negotiation, preparation, entering into and completion of the Agreement and the consummation of the transactions contemplated herein.
- 24.8. **Counterparts:** The Agreement may be executed in two counterparts, each of which shall be an original and all of which together shall **constitute** but one and the same instrument.
- 24.9. **Severability:** If any of the terms of the Agreement is finally held or determined to be invalid, illegal, or void, all other terms of the Agreement shall remain in effect; provided, however, that the Parties shall enter into negotiations concerning the terms affected by such decision for the purpose of achieving conformity with requirements of any Law and the intent of the Parties.
- 24.10. **Survive:** The provisions of this Agreement which expressly or by their very nature survive the Term or termination of this Agreement shall

For Restricted Circulation

44 | 48

continue and survive any termination or expiry of this Agreement.

- 24.11. **FCPA:** Each Party represents that it has knowledge and understanding of the Foreign Corrupt Practices Act of the United States of America ("FCPA") and of the Prevention of Corruption Act, 1988 of India. Each Party agrees and undertakes that it shall not, in the conduct of its performance under this Agreement, and with regard to any funds, assets, or records relating thereto, offer, pay, give, or promise to pay or give, directly or indirectly, any payment or gift of any money or thing of value to (i) any government official to influence any acts or decisions of such official or to induce such official to use his influence with the local government to effect or influence the decision of such government in order to assist that party in its performance of its obligations under this order or to benefit the other party; (ii) any political party or candidate for public office for such purpose; or (iii) any person if that party knows or has reason to know that such money or thing of value shall be offered, promised, paid, or given, directly or indirectly, to any official, political party, or candidate for such purpose. Each party shall defend, indemnify, and hold harmless the other Party, from and against any and all claims, losses, damages, expenses and liabilities, including attorney fees, arising from its failure to comply with its aforementioned obligations and undertaking.

IN WITNESS WHEREOF, the Parties hereto have duly executed this Power Purchase Agreement as of the day and year first written above.

Schedule II – Major Components of Solar Power Plant.

The Solar Power Plant is the total arrangement of PV modules in series and parallel connections. The solar array is comprised of solar modules that generate DC electricity in proportion to the amount of sunlight available, generating the most power on a clear day when the sun is at a normal angle to the array. The microprocessor control circuit shall automatically adjust the DC-DC converter to ensure that it should always match to the PV array Maximum Power Point (MPPT) under varying conditions and transfers the maximum possible power to Inverter. The inverter shall convert DC to AC and exported to the loads. The inverter output shall match the grid in voltage, frequency and phase. AC Distribution board is equipped with Meter to measure the energy generation.

Major Components of a Solar Power Plant

1. Solar Modules tier 1 - Mono Crystalline/Poly (1.50% Module Degradation for first year comprising of 12 months for each Site from COD and thereafter 0.65% per year)
2. Module Mounting Structures
3. Array Junction Box
4. Solar Power Inverter
5. AC distribution board / LT Panel
6. Cables & Accessories.
7. Monitoring System
8. Earthing/ Lightning Arrestors.
9. Net Metering (in scope of the Purchaser)

For Restricted Circulation

47 | 48

Annexure I

Salvage Value/Buy Out Value for Solar Power Plant year wise during Term of the PPA

Voluntary purchase for a period of PPA Tenure in the case of Termination or on account of default by Purchaser, the Purchaser can buy Solar Power Plant at particular Site or Premises based upon salvage value at that particular time. Buyout Values at the end of different years, on the anniversaries of 12 months from COD, are provided below and calculated for **2,500 KWdc**. Applicable Buy Out value shall be calculated on pro-rata basis for the installed capacity and the time of the buyout

Year	Salvage Value (INR)
1	101,010,000
2	97,020,000
3	93,030,000
4	89,040,000
5	85,050,000
6	81,060,000
7	77,070,000
8	73,080,000
9	69,090,000
10	65,100,000
11	61,110,000
12	57,120,000
13	53,130,000
14	49,140,000
15	45,150,000
16	41,160,000
17	37,170,000
18	33,180,000
19	29,190,000
20	25,200,000
21	21,210,000
22	17,220,000
23	13,230,000
24	9,240,000
25	NIL

In case of Transfer of Ownership during or at the end of the Term of this contract as per provisions of this Agreement the Supplier shall ensure that the Solar Power Plant is free from any charge, lien, or any kind of encumbrances. The Purchaser shall also need to bear all taxes as may be

For Restricted Circulation

48 | 48

applicable for the purchase of the Solar Power Plant from the Supplier including but not limited to indirect and direct taxes and any and all other taxes that may be applicable upon the Purchaser.

For Restricted Circulation

49 | 48

2272

Annexure II –Deemed Generation

“Deemed Generation” for the year of operation, shall be calculated based on methodology as explained below, and shall be billable to the Purchaser at the Tariff only if actual generation **Deemed Generation** settlement shall be done on **Monthly basis**.

Methodology:

Deemed Generation = Downtime X Expected Units Generation

Whereas:

Downtime = Duration of Downtime, as recorded by plant performance monitoring system, in minutes

Expected Units Generation = Value of energy production in kWh/Min derived as in Table 1

Energy Production Yearly = Absolute Energy Generation Guarantee for 1st Year of operation, for 2nd year and rest of the PPA tenure, **Energy Production** values shall be summation of Billed units including Deemed Generation Units of preceding year factoring the degradation for that year.

❖ **Table-1: Methodology to derive Expected Units Generation.**

Description		Values	Unit
Energy Production –Yearly (EPY)	Yearly Generation		kWh/Year
Monthly Production (MP)	MP=EPY/12		kWh/Month
Daily Production (DP)	DP=MP/30		kWh/Day
Hourly Production¹(HP)	HP=DP/5.5		kWh/Hour
Expected Units Generation (EUP)	EUP=HP/60		kWh/Min

¹ based on 5.5 hours of sunshine/sunlight.

ANNEXURE A – PRE-AGREEMENT

(To be on non-judicial Kerala stamp paper of value Rs. 200)

ARTICLES OF AGREEMENT executed on this the day of

Two thousand andbetween the **Agency for**

New & Renewable Energy Research and Technology (hereinafter referred to as

ANERT) of the one part and Sri

(Name and Address of the tenderer) hereinafter referred to as “the Bounden”) of the other part.

WHEREAS in response to the Notification No.

datedthe bounden has submitted to ANERT a e-tender for the **Request for**

Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at

Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar

City project funded by Smart City Thiruvananthapuram Ltd specified therein subject to

the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT a sum of Rs. as Earnest Money Deposit for execution of an agreement undertaking the due fulfilment of the contract in case his e-tender is accepted by ANERT. NOW THESE PRESENTS WITNESS and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract for

is awarded to the bounden, the bounden shall within Fifteen days of acceptance of this e-tender, execute an agreement with ANERT incorporating all the terms and conditions under which ANERT accepts this e-tender.

In case the bounden fails to execute the agreement as aforesaid incorporating the terms and conditions governing the contract, ANERT shall have power and authority to recover

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram 2274 Smart City project funded by Smart City Thiruvananthapuram Ltd

from the bounden any loss or damage caused to ANERT by such breach as may be determined by ANERT by appropriating the moneys inclusive of Earnest Money deposited by the bounden and if the Earnest Money is found to be inadequate the deficit amount may be recovered from the bounden and his properties movable and immovable in the manner hereinafter contained.

All sums found due to ANERT under or by virtue of this agreement shall be recoverable from the bounden and his properties movable and immovable under the provisions of the Revenue Recovery Act for the time being in force as though such sums are arrears of land revenue and in such other manner as ANERT may deem fit.

In witness whereof Sri(Name and Designation) for and on behalf of the Agency for New & Renewable Energy Research and Technology and Sri the bounden have hereunto set their hands the day and year shown against their respective signature.

ANERT - BG for Bid Security

SBI SME ASAF ALI ROAD NEW DELHI(62203) <sbi.62203@sbi.co.in>

Mon, Sep 11, 2023 at 4:21 PM

To: "projects@anert.in" <projects@anert.in>

Cc: "bhairaw@enerture.co.in" <bhairaw@enerture.co.in>, "info@enerture.co.in" <info@enerture.co.in>

Dear Sir,

With reference to the above and discussion we had, we advise that we are unable to issue E-BG as beneficiary PAN is not being fetched in the portal and thus we have issued physical BG.

Once Beneficiary PAN card is available in the portal and E-BG option is available, we shall be issuing fresh E-BG (subject to fulfillment Bank's terms and conditions applicable at the material time), and physical BG can be replaced with the same.

Regards,

Chief Manager
State Bank of India

SS No.: AM3170

We, State Bank Of India, do hereby undertake to pay the amount due and payable under this Guarantee without any demur, merely on a demand from the ANERT stating that the amount claimed is due by way of loss or damage caused to or would be caused to or suffered by the ANERT by reasons of breach by the said contractor of any of the terms or conditions contained in the said agreement. Any such demand made on the Bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee. However, our liability under this guarantee shall be restricted to an amount not exceeding **Rs. 33,27,990 (Rupees Thirty Three Lakh Twenty Seven Thousand Nine Hundred Ninty only)**.

This guarantee will not be discharged due to change in the constitution of the bank or the contractor/supplier.

Notwithstanding anything contrary contained in any law for this time being in force or banking practice, this guarantee shall not be assignable or transferable by the beneficiary. Notice or invocation by any person such as assignee, transferee or agent of beneficiary shall not be entertained by Bank. Any invocation of Guarantee can be made only by the beneficiary directly

Notwithstanding anything to the contrary contained herein

- 1) Our liability under this Bank Guarantee shall not exceed **Rs. 33,27,990 (Rupees Thirty Three Lakh Twenty Seven Thousand Nine Hundred Ninty only)**.
- 2) This Bank Guarantee shall be valid upto **06.03.2024. (date of expiry)**
- 3) We are liable to pay the guaranteed amount or any part thereof under this Bank Guarantee amount only and only if you serve us a written claim or demand on or before 06.09.2024.
