WORK ORDER

Sir,

Sub: ANERT – Work Order for the Design, Engineering, Manufacture, Supply, Testing, Energisation of plant and Commissioning of the 2 MWp Grid connected Solar Power Plant including 10 years warranty from Commercial Operation Date (COD) at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, under Solar City Project funded by Smart City Thiruvananthapuram Ltd - reg

Ref: 1: Tender ID: 2023_ANERT_571678_1
2: Your Bid No. 1540957 dtd 01/05/2023

Attention is invited to the references cited. Your offer for the Design, Engineering, Manufacture, Supply, Storage, Erection, Testing, Electrical Inspectorate certification for Energisation of plant and associated electrical works, Commissioning of the 2 MWp Grid connected Solar Power Plant including 10 years warranty from Commercial Operation Date (COD) at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram is accepted. You are requested to carry out the work as detailed below subject to the following terms and conditions.

SN	Site of Installation	Rate	Capacity (kW)	Total
Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram				
1	Ground Mounted Solar	55,182	1500	8,27,73,000
2	Roof Top Solar	56,320	500	2,81,60,000
TOTAL			2000	11,09,33,000 /-

Rupees Eleven Crores Nine Lakh Thirty-Three Thousand only

A tripartite agreement has to be executed by you in the prescribed form (enclosed as Annexure - I) on Kerala Stamp paper as per the Kerala Government order - G.O.(P) No.113/2019/TD dtd 24/07/2019 (One rupee for every Rs 1000 or part thereof on the contract amount, subject to a minimum of rupees 200 and a maximum of rupees one lakh) within 7 days of the receipt of this work order for the fulfilment of the contract along with a security deposit of **Rs. 33,27,990/- (Rupees Thirty-Three Lakh Twenty-Seven Thousand Nine Hundred & Ninety only)** being the 3% of contract value of **Rs. 11,09,33,000/-** on Demand Draft/Bank Guarantee/NEFT transfer in favour of CEO, ANERT. You have to pay all expenses incidental to the execution of the above agreement. Another agreement must be provided before the start of the O&M period upon issue of separate work order and the formats shall be provided during the commissioning of the SPV Power Plant.

1. SCOPE OF WORKS

The Works to be performed by the contractor shall include but not limited to

- a. Works of any kind necessary for the due and satisfactory construction, completion and maintenance of the works to the intent and meaning of the drawings adopted, technical specifications, to best Engineering standards and orders that may be issued by the Engineer from time to time, compliance by the agency with all Conditions of Contract,
- b. Design, Manufacture, Supply, Installation, Testing and Commissioning of 2 MWp Grid connected SPV power plants. All the necessary approvals from KSEBL/Electrical Inspectorate, feasibility study, necessary civil work, Mounting of Module Structures, PV Module Installation, Inverter Installation, DC/AC Cabling and interconnections, Installation of Lightning Arresters and Earthing System as per the standards, Arranging all the necessary inspections from KSEBL/Electrical Inspectorate/ANERT District Office as part of Pre-Commissioning, if any, Commissioning of the PV Power Plant along with warranty and Operation and Maintenance (O&M) of the project under CAPEX model for 10 years after Commercial Operation Date (COD)
- c. Liasoning with KSEBL for grid connectivity, Electrical Inspectorate certification for Energization of plant and associated electrical, Complete Design, Engineering, Manufacture, Supply, Storage, works excluding foundation works for MMS, Erection, Testing & Commissioning of the 2 MWp Grid connected Solar PV Power Plant for 10 years after Commercial Operation Date (COD).

2. SCHEDULE OF WORKS:

- i. The items should be delivered and installed at the Ground / Roof tops within Travancore Titanium Products Ltd as specified by ANERT/TTPL authorities, under prior intimation and supervision. The contractor to finalise the buildings/ground area and within the campus with permission of the TTPL authorities and prior approval from ANERT for installation of the above capacity
- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next bidder and penalty as decided by ANERT will be levied.

SN	Material Delivery (Days)	Completion Period (Days)
1	25	45

- iii. The detailed Engineering drawings as mentioned in the tender also be submitted prior to start of works. The rates mentioned above is inclusive of all additional works required for the successful commissioning of the power plant and no request for enhancement of rates will be entertained.
- iv. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. It is required to use Mono PERC Half cut cells – 500 Wp or above for the works. The Solar PCU and charge controller should meet the General and Technical specifications as mentioned in the tender.
- v. The agency shall submit the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of your agency.
- vi. The detailed Bill of Materials along with datasheets & Test certificates of PV Modules (Mono PERC), Grid Tie Inverter etc must be provided well in advance and must be approved by ANERT before material despatch. ANERT reserves the right to reject the materials if the same are not in compliance with the requirements of the tender. In case, the successful bidder delivers the materials without BoM approval, they may have to take back the materials at their own cost and no time extension without penalty will be provided for completion of works.
- vii. The Supply, Installation and Commissioning of the Power Plant must be completed within the timeline mentioned above. This is the time period for handing over the system to ANERT with Grid connectivity.
- viii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.

- ix. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the work order amount subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the work order amount subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

- x. Penalty for delay in supply and installation will be imposed at 0.5 % per week up to a maximum 10%. In case of delay in supply and installation, CEO, ANERT may cancel the contract and take recourse to other action as deemed appropriate.

3. INSTALLATION

- i. The Design, Engineering, Manufacture, Supply, Installation, Testing and Performance of the equipment shall be in accordance with latest appropriate IEC/Indian Standards as detailed in the tender document. Where appropriate Indian Standards and Codes are not available, other suitable standards and codes as approved by the MNRE / authorised Government agency shall be used.
- ii. Any supplies which have not been specifically mentioned in this Contract but which are necessary for the design, engineering, manufacture, supply & performance or completeness of the project shall be provided by the Bidder without any extra cost and within the time schedule for efficient and smooth operation and maintenance of the SPV plant. The installation work of the solar power plant must be in compliance with the Technical Requirements and Standards as mentioned in the Tender.
- iii. A display board with contents to be provided by the concerned official at ANERT is to be placed at the site.
- iv. The vendor is to bear the fee for KSEBL feasibility, Registration and all other expenses along with additional costs for site specific cabling works, earthing, mounting structure modifications, Electrical panel modification, access ladders, pathway facility in case required are also under the scope of the vendor. The scope of enhancing load, phase conversion wherever necessary is also under the scope.
- v. In case the installations require the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating for commissioning of the power plant, it is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items are under the vendor scope.
- vi. Any other work required for the successful commissioning of the power plant

which are not mentioned in this document and are required as per prevailing laws & regulations in the country

4. PAYMENT

4.1 No advance payment will be given. All the documents submitted should be certified by the concerned personnel of ANERT.

4.2 The terms of payment shall be:

4.2.1 EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter etc) at the site/warehouse, a maximum of 60% of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of installation of the power plant, a maximum of 20% of the contract value can be released as Running Account Bills of min 10% of the contract value. The supplier shall submit the invoice for the materials supplied and all documents related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The second part invoice can be raised only after submitting application for energization to the Electrical Inspectorate. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- iii. After the Inspection and Approval of the Electrical Inspectorate, 5% of the contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
- iv. The date of Energisation to the Grid by the DISCOM will be considered as the official Date of Commissioning (CoD) of the project and this will be treated as the commissioning of the system. On commissioning of the grid connected system, 5% of the contract value will be released after proving the Performance ratio (AC). The PR report as per standard is to be provided for release of the amount.
- v. The balance 10% shall be retained as performance security and will be released

in five equal parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and last 2% after the 10 years of warranty. For releasing these payment, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. **The plant shall be handed over at the end of 10 years after commissioning after proving the performance ratio (AC).** This period will be considered only from the date of commissioning.

- vi. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

4.2.2 Maintenance Payment

- i. The amount shall be released on annual basis after completion of the period of the previous year. The start of maintenance period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

- 4.3 Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

5. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance: A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array. Readout shall be integrated with data logging system.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- a. AC Voltage
- b. AC Output current

- c. Output Power
- d. Energy in kWh
- e. DC Input Voltage
- f. DC Input Current
- g. Temperatures (C)
- h. Invertor Status
- i. Irradiation
- j. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

6. WARRANTY

- i. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided for the Solar Power plant
- ii. The SPV modules used must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- iii. The Warranty Card to be supplied must contain all the details of the system supplied. The OEM warranty card of all the equipment must also be submitted along with the warranty certificate issued in your letter head.

7. OPERATION & MAINTENANCE

- i. The bidder shall be responsible for Operation and Maintenance of the Solar PV system for the 5-year period, during which ANERT will monitor the project for effective performance in line with conditions specified in the bid document. A separate work order will be issued for the O&M part at the rates quoted by the bidder. During this period, the bidder shall be responsible for supply of all spare parts as required from time to time for scheduled and preventive maintenance, major overhauling of the plant, replacement of defective modules, inverters, PCU's etc and maintaining log sheets for operation detail, deployment of staff for continuous operations and qualified engineer for supervision of O&M work, complaint logging & its attending.
- ii. If any Operation & Maintenance issues are not resolved within 2 days, then

complaint may be raised to ANERT, pursuant to which a penalty as decided by CEO, ANERT will be imposed.

- iii. If the outage of the plant is more than 30 days continuously, then the 50% PBG amount shall be encashed by ANERT.
- iv. If the outage is exceedingly more than 60 days than complete PBG amount shall be encashed by ANERT. (This will be applicable till 10 years of O&M)

8. PROJECT INSPECTION

The project progress will be monitored by ANERT and the projects will be inspected for quality at any time during commissioning or after the completion of the project either by officer(s) from ANERT/HFT PFT / SCTL or any authorized agency/ experts.

9. TESTING & COMMISSIONING

- a. The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.
- b. Any modification in the equipment or installation that may be demanded by the inspecting authorities shall be carried out by the contractor at no additional cost to the KSEBL
- c. In accordance with the specific installation instruction as per the manufacturers drawings or as directed by the KSEBL, the successful Bidder shall unload, assemble, erect, install test, commission and hand over all electrical equipments included in this contract after O&M of 10 years.
- d. Erection materials including all consumables, tools, testing instruments or any other equipment required for successful commissioning shall be arranged by the successful Bidder in a timely manner.
- e. All equipment and instruments, indoor and outdoor, shall be marked with No. and provided with danger boards before commissioning.
- f. All Power equipments shall be handled and erected as per the relevant codes of practice and manufacturer's drawings and instruction manuals.
- g. The Contractor, if required shall obtain the temporary Electrical connection for construction purposes and the same has to be dismantled off the premises after completion of erection of plant.

10. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and

suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT / MILMA officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:

The Weather monitoring station installed in the plant shall be in working condition for minimum 2 weeks and all the parameters shall be available for analysis and verification. The test report for the calibration shall be submitted by the Contractor for approval. After the successful verification of the initial parameters by ANERT, PR test shall be conducted. The Following factors shall be excluded for calculation;

- Generation loss due to grid outage.
- Irradiance below 250 W/m²
- The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = \frac{\text{Measured output in kW}}{(\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2))}$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

11. DATE OF COMMISSIONING

After the Inspection and approval of the Electrical Inspectorate, date of

Energisation to the Grid will be considered as the official Date of Commissioning (CoD) of the project. To ensure PR, the bidder will be allowed EPC contractor shall improve the quality of the plant by replacement of any components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

12. SCADA / PLANT MONITORING

Integrated SCADA shall be supplied which should be capable of communicating with all inverters and provide information of each PCU. The SCADA shall also provide information of the instantaneous output energy and cumulative energy for each of the inverters. The SCADA system shall perform the following operations, which include the measurement and continuous recording of:

- i. Data Logging Provision for plant control and monitoring, time and date stamped system data logs for analysis with the high quality, suitable PC, Metering and Instrumentation for display of systems parameters and status indication to be provided.
- ii. Solar Irradiance: An integrating Pyranometer / Solar cell-based irradiation sensor (along with calibration certificate) provided with the sensor mounted in the plane of the array and integrated software to readout with data logging system.
- iii. Temperature: Temperature probes for recording the Solar panel temperature and/or ambient temperature to be provided complete with readouts integrated with the data logging system
- iv. The following parameters are accessible via the operating interface display in real time separately for solar power plant:
 - a. AC Voltage.
 - b. AC Output current.
 - c. Output Power
 - d. Power factor.
 - e. DC Input Voltage.
 - f. DC Input Current.
 - g. Time Active.
 - h. Time disabled.
 - i. Time Idle.
 - j. Power produced
 - k. Protective function limits (Viz. - AC Over voltage, AC Under voltage, over frequency, under frequency ground fault, PV starting voltage, PV stopping voltage).

- v. All major parameters available on the digital bus and logging facility for energy auditing through the internal microprocessor and read on the digital front panel at any time) and logging facility (the current values, previous values for up to a month and the average values) should be made available for energy auditing through the internal microprocessor and should be read on the digital front panel.
- vi. PV array energy production: Digital Energy Meters to log the actual value of AC/DC voltage, Current & Energy generated by the PV system provided. Energy meter along with CT/PT should be of 0.5 accuracy class.
- vii. Computerized Array monitoring and AC output monitoring shall be provided as part of the inverter and/or string/array combiner box or separately.
- viii. Array DC Voltage, Current and Power, Inverter AC output voltage and current (All 3 phases and lines), AC power (Active, Reactive and Apparent), Power Factor and AC energy (All 3 phases and cumulative) and frequency shall be monitored.
- ix. Computerized AC energy monitoring shall be in addition to the digital AC energy meter.
- x. The data shall be recorded in a common work sheet chronologically date wise. The data file shall be MS Excel compatible. The data shall be represented in both tabular and graphical form.
- xi. All instantaneous data shall be shown on the computer screen.
- xii. Software shall be provided for USB download and analysis of DC and AC parametric data for individual plant.
- xiii. Provision for Internet monitoring and download of data shall be also incorporated.
- xiv. Remote Server and Software for centralized Internet monitoring system shall be also provided for download and analysis of cumulative data of all the plants and the data of the solar radiation and temperature monitoring system.
- xv. Ambient / Solar PV module back surface temperature shall be also monitored on continuous basis.
- xvi. Simultaneous monitoring of DC and AC electrical voltage, current, power, energy and other data of the plant for correlation with solar and environment data shall be provided.

SCADA shall store the daily energy produced by the plant, monthly energy and the annual energy. SCADA shall be provided with a reliable power supply and have internal reliable battery backup to record all sorts of data simultaneously round the clock. Further SCADA shall also display the Performance Ratio (PR) of the plant. All the trend and cumulative graphs shall be able to be viewed and stored. Also, all the

events including outages and faults shall be logged and stored with time and date stamped. SCADA should also have provision for off line viewing of daily, monthly and annual average of the above parameters. Representation of monitored data shall be displayed in graphics mode or in tabulation form. All instantaneous data can be shown in the computer screen. Provision should be available for remote monitoring through GPRS system.

The SCADA shall have the feature to be integrated with the Network system as well as remotely via the web using either a standard modem or a GSM/ WIFI modem. Compatible software and hardware are to be provided so that data can be transmitted via standard modem. The SCADA system shall conform to IEC 61724 (Photo voltaic system performance monitoring – Guidelines for Measurement) standard.

- **Communication Software:** Graphical user interface software for real time communication and control
- **Data acquisition & logging:** RS232/RS485. MOD Bus/WiFi

Power generation and performance of the solar power plant to be monitored through online system to capture electrical parameters from multiple devices such as meters, Inverters, String Combiner boxes to capture parameters such as AC/DC voltage, power, energy as well as monitoring of Breaker, Performance Ratio (PR) of the plant, daily, monthly, yearly generation summary etc.

13. SOLAR PV SYSTEM FOR MEETING THE ANNUAL ENERGY REQUIREMENT

Key Performance Indicators

The following KPIs would be monitored by the ANERT/Owner throughout the contract tenure and the contractor shall furnish monthly/quarterly reports on above, without fail.

- PV Array Energy Yield
- Final System Yield
- PV System Efficiency (DC/AC)
- Performance Ratio (PR): The performance ratio test as per IS/IEC 61724 has to be carried out at site by the agency in presence of authorized officials of ANERT, deriving sample data within a period of 7 consecutive days sufficient to provide operational data representing insolation and ambient conditions as desired by the agreement authority to prove the Performance ratio of 75%. If a Solar Plant achieves the Minimum Performance Ratio, then the ANERT will issue Commercial Operation Date Certificate.
- Capacity Utilization Factor (CUF)

I/17720/2023

- Plant uptime
- Reactive Power Consumption
- Auxiliary Energy Consumption
- CO₂ Savings
- Environment, Health & Safety

14. INSURANCE

- The Bidder shall be responsible and take an Insurance Policy for transit-cum-storage-cum-erection for all the materials to cover all risks and liabilities for supply of materials on site basis, storage of materials at site, erection, testing and commissioning. The bidder shall also take appropriate insurance during O&M period.
- The Bidder shall also take insurance for Third Party Liability covering loss of human life, engineers and workmen and also covering the risks of damage to the third party/material/equipment/properties during execution of the Contract. Before commencement of the work, the Bidder will ensure that all its employees and representatives are covered by suitable insurance against any damage, loss, injury or death arising out of the execution of the work or in carrying out the Contract. Liquidation, Death, Bankruptcy etc., shall be the responsibility of bidder.
- The insurance coverage of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**. In addition, the damages from wildlife and natural calamity are also to be covered.
- The insurance premium for the 5 years of warranty is to be paid by your agency. On handing over of the system, the original insurance policy is to be handed over to the authorised person at ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the District Office of ANERT.

Not Withstanding the terms and conditions stipulated above, it is to be noted that the conditions in the tender document shall prevail;

Yours faithfully

Sub: - Solarisation of TTL under Solar city scheme funded by Smart City Thiruvananthapuram Ltd

- i. The Smart City Thiruvananthapuram Ltd has accorded Administrative Sanction for the implementation of 2 MWp Solar Power plant at Travancore Titanium Ltd. The site survey was completed and there is space for 870 kWp Rooftop Solar, 250 kWp floating and 1500 kWp Ground mounted Solar Power plant.
- ii. For the tender, Ground Mounted solar of 1500 kWp can be considered and balance 500 KWp can be accommodated in the selected rooftops nearer to the 66 kV substation. Draft tender document for the 2 MWp Solar power plant at TTL is prepared and attached. The rate per kW for Ground and Rooftop may be collected and the work need to be completed before June 2023. The tender may be limited to vendors having ICRA grading of 1A, 1B, 1C, 2A, 2B, 2C & 3A along with a condition that the vendor should have completed a single plant capacity of 1 MW or 2 Nos of 500 kW or above.
- iii. Draft tender document and NIT along with abstract is attached.

For orders;

Note # 9

- i. The tender for the 2 MW Solar Power plant at Travancore Titanium Products was published in the Kerala tenders portal and there are 6 bidders - M/s Enerture Technologies, M/s INKEL Ltd, M/s Wattsun Energy, M/s Oakridge Energy, M/s Power One Micro Systems and M/s Solgen Energy. The bids are attached in the reference section.
- ii. As per tender, the bidders must have working experience of atleast 3 MW solar power plant and single plant capacity of 1 MW or above OR 2 Nos of 500 kW or above. Also, the bidder should have a Minimum Average Annual Turnover of at least 8 Crores in any two out of last 5 years or a Net worth of Rs. 10 Crores. The draft Technical evaluation sheet is prepared and attached.
- iii. Among the bidders, M/s Wattsun Energy and M/s Solgen Energy are not meeting the experience criteria, whereas M/s Wattsun doesn't also meet the Financial Criteria. They have attached the un-audited statement for the FY 2022-23, which cannot be considered as per tender and has not considered. If the same is considered, then the bidder will be meet the financial criteria. This particular tender was floated as an open tender and

since the above two vendors are registered vendors of ANERT, relaxations if any can be provided, may be considered.

- iv. If not, these two bidders will not qualify and the other 4 bidders are technically qualified (2 registered vendors and 2 others). Draft technical evaluation summary without considering the above is attached.

- i. The financial bids of the technically qualified bidders are opened and M/s Enerture Technologies, New Delhi is the L1 bidder which had quoted Rs. 48,490 per kW excl GST for Ground mounted and Rs. 49,490 per kW excl GST. The financial opening summary is attached.
- ii. The rates quoted and the total amount required for the 2 MWp Solar Power plant are as follows:

iii.

--	--	--	--	--	--

Item	Rate	Capacity	Total	Amount incl GST
Rate / kW for the Installation of Ground Mounted Solar - approx 1500 kW	48,490	1,500	7,27,35,000	8,27,72,430
Rate / kW for the Installation of Rooftop Solar - approx 500 kW	49,490	500	2,47,45,000	2,81,59,810
Total		2,000	9,74,80,000	11,09,32,240

- iv. Draft work order to be issued to the L1 bidder for Rs. 11,09,32,240/- is prepared and attached. We may also write to TTL informing the issue of work order and ask them to submit the application for connectivity under Captive consumer category.

Note # 19

- i. M/s Enerture Technologies Pvt Ltd have submitted detailed Engineering drawings and Preliminary BoM for approval. The work order of 2 MWp was split into 1.5 MWp on ground and 0.5 MWp on Rooftop, whereas they

have reassessed the there is space available for 1.7 MWp on Ground and only 0.3 MWp need to be on the Rooftop. Since, the rates quoted by them for RTS and Ground are different, the total amount will be reduced by Rs. 2,27,600/-. A revised work order may be issued to them for the same.

- ii. The PV layout proposed is already approved by Travancore Titanium Ltd and the land clearing works along with foundation works for RTS installation is started. The technical approval of the Structural diagram for RTS installation and the PV layout may be provided from our end, so that the fabrication works can be started.
- iii. We may also, ask them to submit application to the Electrical inspectorate for Scheme approval in parallel, since the metering arrangement will not be there with KSEBL and the installation will function as an internal captive generation plant without grid export. Since, the capacity is above 1 MWp, there is no provision to get Net Metering for the plant as per regulation and this will come under Captive Consumer category. For captive consumers, there is 5% grid charges, whereas the generation from this plant will be hardly 30% of their total daily consumption. Further, Special Energy Meters will need to be installed by TTL at the generation point as well as the injection points and data at 15 min interval need to be installed. Hence, the plant may be permitted to function as an Internal Captive Plant without grid export.
- iv. Permission is requested for revision of work order and approval for the proposed PV layout and Structural diagrams.

WORK ORDER

Sir,

Sub: ANERT - Work Order for the Design, Engineering, Manufacture, Supply, Testing, Energisation of plant and Commissioning of the 2 MWp Grid connected Solar Power Plant including 10 years warranty from Commercial Operation Date (COD) at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, under Solar City Project funded by Smart City Thiruvananthapuram Ltd - reg

Ref: 1: Tender ID: 2023_ANERT_571678_1
2: Your Bid No. 1540957 dtd 01/05/2023

Attention is invited to the references cited. Your offer for the Design, Engineering, Manufacture, Supply, Storage, Erection, Testing, Electrical Inspectorate certification for Energisation of plant and associated electrical works, Commissioning of the 2 MWp Grid connected Solar Power Plant including 10 years warranty from Commercial Operation Date (COD) at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram is accepted. You are requested to carry out the work as detailed below subject to the following terms and conditions.

SN	Site of Installation	Rate	Capacity (kW)	Total
Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram				
1	Ground Mounted Solar	55,182	1500	8,27,73,000
2	Roof Top Solar	56,320	500	2,81,60,000
TOTAL			2000	11,09,33,000 /-

1/17/20/2023

Rupees Eleven Crores Nine Lakh Thirty-Three Thousand only

A tripartite agreement has to be executed by you in the prescribed form (enclosed as Annexure - I) on Kerala Stamp paper as per the Kerala Government order - G.O.(P) No.113/2019/TD dtd 24/07/2019 (One rupee for every Rs 1000 or part thereof on the contract amount, subject to a minimum of rupees 200 and a maximum of rupees one lakh) within 7 days of the receipt of this work order for the fulfilment of the contract along with a security deposit of **Rs. 33,27,990/- (Rupees Thirty-Three Lakh Twenty-Seven Thousand Nine Hundred & Ninety only)** being the 3% of contract value of **Rs. 11,09,33,000/-** on Demand Draft/Bank Guarantee/NEFT transfer in favour of CEO, ANERT. You have to pay all expenses incidental to the execution of the above agreement. Another agreement must be provided before the start of the O&M period upon issue of separate work order and the formats shall be provided during the commissioning of the SPV Power Plant.

1. SCOPE OF WORKS

The Works to be performed by the contractor shall include but not limited to

- a. Works of any kind necessary for the due and satisfactory construction, completion and maintenance of the works to the intent and meaning of the drawings adopted, technical specifications, to best Engineering standards and orders that may be issued by the Engineer from time to time, compliance by the agency with all Conditions of Contract,
- b. Design, Manufacture, Supply, Installation, Testing and Commissioning of 2 MWp Grid connected SPV power plants. All the necessary approvals from KSEBL/Electrical Inspectorate, feasibility study, necessary civil work, Mounting of Module Structures, PV Module Installation, Inverter Installation, DC/AC Cabling and interconnections, Installation of Lightning Arresters and Earthing System as per the standards, Arranging all the necessary inspections from KSEBL/Electrical Inspectorate/ANERT District Office as part of Pre-Commissioning, if any, Commissioning of the PV Power Plant along with warranty and Operation and Maintenance (O&M) of the project under CAPEX model for 10 years after Commercial Operation Date (COD)
- c. Liasoning with KSEBL for grid connectivity, Electrical Inspectorate certification for Energization of plant and associated electrical, Complete Design, Engineering, Manufacture, Supply, Storage, works excluding foundation works for MMS, Erection, Testing & Commissioning of the 2 MWp Grid connected Solar PV Power Plant for 10 years after Commercial Operation Date (COD).

1/17/20/2023

2. SCHEDULE OF WORKS:

- i. The items should be delivered and installed at the Ground / Roof tops within Travancore Titanium Products Ltd as specified by ANERT/TTPL authorities, under prior intimation and supervision. The contractor to finalise the buildings/ground area and within the campus with permission of the TTPL authorities and prior approval from ANERT for installation of the above capacity
- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next bidder and penalty as decided by ANERT will be levied.

SN	Material Delivery (Days)	Completion Period (Days)
1	25	45

- iii. The detailed Engineering drawings as mentioned in the tender also be submitted prior to start of works. The rates mentioned above is inclusive of all additional works required for the successful commissioning of the power plant and no request for enhancement of rates will be entertained.
- iv. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. It is required to use Mono PERC Half cut cells – 500 Wp or above for the works. The Solar PCU and charge controller should meet the General and Technical specifications as mentioned in the tender.
- v. The agency shall submit the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of your agency.
- vi. The detailed Bill of Materials along with datasheets & Test certificates of PV Modules (Mono PERC), Grid Tie Inverter etc must be provided well in advance and must be approved by ANERT before material despatch. ANERT reserves the right to reject the materials if the same are not in compliance with the requirements of the tender. In case, the successful bidder delivers the materials without BoM approval, they may have to take back the materials at their own cost and no time extension without penalty will be provided for completion of works.
- vii. The Supply, Installation and Commissioning of the Power Plant must be completed within the timeline mentioned above. This is the time period for handing over the system to ANERT with Grid connectivity.
- viii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.

1/17/20/2023

- ix. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the work order amount subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the work order amount subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

- x. Penalty for delay in supply and installation will be imposed at 0.5 % per week up to a maximum 10%. In case of delay in supply and installation, CEO, ANERT may cancel the contract and take recourse to other action as deemed appropriate.

3. INSTALLATION

- i. The Design, Engineering, Manufacture, Supply, Installation, Testing and Performance of the equipment shall be in accordance with latest appropriate IEC/Indian Standards as detailed in the tender document. Where appropriate Indian Standards and Codes are not available, other suitable standards and codes as approved by the MNRE / authorised Government agency shall be used.
- ii. Any supplies which have not been specifically mentioned in this Contract but which are necessary for the design, engineering, manufacture, supply & performance or completeness of the project shall be provided by the Bidder without any extra cost and within the time schedule for efficient and smooth operation and maintenance of the SPV plant. The installation work of the solar power plant must be in compliance with the Technical Requirements and Standards as mentioned in the Tender.
- iii. A display board with contents to be provided by the concerned official at ANERT is to be placed at the site.
- iv. The vendor is to bear the fee for KSEBL feasibility, Registration and all other expenses along with additional costs for site specific cabling works, earthing, mounting structure modifications, Electrical panel modification, access ladders, pathway facility in case required are also under the scope of the vendor. The scope of enhancing load, phase conversion wherever necessary is also under the scope.
- v. In case the installations require the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating for commissioning of the power plant, it is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items are under the vendor scope.
- vi. Any other work required for the successful commissioning of the power plant

which are not mentioned in this document and are required as per prevailing laws & regulations in the country

4. PAYMENT

4.1 No advance payment will be given. All the documents submitted should be certified by the concerned personnel of ANERT.

4.2 The terms of payment shall be:

4.2.1 EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter etc) at the site/warehouse, a maximum of 60% of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of installation of the power plant, a maximum of 20% of the contract value can be released as Running Account Bills of min 10% of the contract value. The supplier shall submit the invoice for the materials supplied and all documents related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The second part invoice can be raised only after submitting application for energization to the Electrical Inspectorate. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- iii. After the Inspection and Approval of the Electrical Inspectorate, 5% of the contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
- iv. The date of Energisation to the Grid by the DISCOM will be considered as the official Date of Commissioning (CoD) of the project and this will be treated as the commissioning of the system. On commissioning of the grid connected system, 5% of the contract value will be released after proving the Performance ratio (AC). The PR report as per standard is to be provided for release of the amount.
- v. The balance 10% shall be retained as performance security and will be released

I/17720/2023

in five equal parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and last 2% after the 10 years of warranty. For releasing these payment, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. **The plant shall be handed over at the end of 10 years after commissioning after proving the performance ratio (AC).** This period will be considered only from the date of commissioning.

- vi. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

4.2.2 Maintenance Payment

- i. The amount shall be released on annual basis after completion of the period of the previous year. The start of maintenance period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

- 4.3 Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

5. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance: A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array. Readout shall be integrated with data logging system.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- a. AC Voltage
- b. AC Output current

I/17720/2023

- c. Output Power
- d. Energy in kWh
- e. DC Input Voltage
- f. DC Input Current
- g. Temperatures (C)
- h. Invertor Status
- i. Irradiation
- j. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

6. WARRANTY

- i. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided for the Solar Power plant
- ii. The SPV modules used must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- iii. The Warranty Card to be supplied must contain all the details of the system supplied. The OEM warranty card of all the equipment must also be submitted along with the warranty certificate issued in your letter head.

7. OPERATION & MAINTENANCE

- i. The bidder shall be responsible for Operation and Maintenance of the Solar PV system for the 5-year period, during which ANERT will monitor the project for effective performance in line with conditions specified in the bid document. A separate work order will be issued for the O&M part at the rates quoted by the bidder. During this period, the bidder shall be responsible for supply of all spare parts as required from time to time for scheduled and preventive maintenance, major overhauling of the plant, replacement of defective modules, inverters, PCU's etc and maintaining log sheets for operation detail, deployment of staff for continuous operations and qualified engineer for supervision of O&M work, complaint logging & its attending.
- ii. If any Operation & Maintenance issues are not resolved within 2 days, then

1/17/20/2023

complaint may be raised to ANERT, pursuant to which a penalty as decided by CEO, ANERT will be imposed.

- iii. If the outage of the plant is more than 30 days continuously, then the 50% PBG amount shall be encashed by ANERT.
- iv. If the outage is exceedingly more than 60 days than complete PBG amount shall be encashed by ANERT. (This will be applicable till 10 years of O&M)

8. PROJECT INSPECTION

The project progress will be monitored by ANERT and the projects will be inspected for quality at any time during commissioning or after the completion of the project either by officer(s) from ANERT/HFT PFT / SCTL or any authorized agency/experts.

9. TESTING & COMMISSIONING

- a. The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.
- b. Any modification in the equipment or installation that may be demanded by the inspecting authorities shall be carried out by the contractor at no additional cost to the KSEBL
- c. In accordance with the specific installation instruction as per the manufacturers drawings or as directed by the KSEBL, the successful Bidder shall unload, assemble, erect, install test, commission and hand over all electrical equipments included in this contract after O&M of 10 years.
- d. Erection materials including all consumables, tools, testing instruments or any other equipment required for successful commissioning shall be arranged by the successful Bidder in a timely manner.
- e. All equipment and instruments, indoor and outdoor, shall be marked with No. and provided with danger boards before commissioning.
- f. All Power equipments shall be handled and erected as per the relevant codes of practice and manufacturer's drawings and instruction manuals.
- g. The Contractor, if required shall obtain the temporary Electrical connection for construction purposes and the same has to be dismantled off the premises after completion of erection of plant.

10. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and

1/17/20/2023

suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT / MILMA officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:

The Weather monitoring station installed in the plant shall be in working condition for minimum 2 weeks and all the parameters shall be available for analysis and verification. The test report for the calibration shall be submitted by the Contractor for approval. After the successful verification of the initial parameters by ANERT, PR test shall be conducted. The Following factors shall be excluded for calculation;

- Generation loss due to grid outage.
- Irradiance below 250 W/m²
- The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = \frac{\text{Measured output in kW}}{(\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2))}$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

11. DATE OF COMMISSIONING

After the Inspection and approval of the Electrical Inspectorate, date of

Energisation to the Grid will be considered as the official Date of Commissioning (CoD) of the project. To ensure PR, the bidder will be allowed EPC contractor shall improve the quality of the plant by replacement of any components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

12. SCADA / PLANT MONITORING

Integrated SCADA shall be supplied which should be capable of communicating with all inverters and provide information of each PCU. The SCADA shall also provide information of the instantaneous output energy and cumulative energy for each of the inverters. The SCADA system shall perform the following operations, which include the measurement and continuous recording of:

- i. Data Logging Provision for plant control and monitoring, time and date stamped system data logs for analysis with the high quality, suitable PC, Metering and Instrumentation for display of systems parameters and status indication to be provided.
- ii. Solar Irradiance: An integrating Pyranometer / Solar cell-based irradiation sensor (along with calibration certificate) provided with the sensor mounted in the plane of the array and integrated software to readout with data logging system.
- iii. Temperature: Temperature probes for recording the Solar panel temperature and/or ambient temperature to be provided complete with readouts integrated with the data logging system
- iv. The following parameters are accessible via the operating interface display in real time separately for solar power plant:
 - a. AC Voltage.
 - b. AC Output current.
 - c. Output Power
 - d. Power factor.
 - e. DC Input Voltage.
 - f. DC Input Current.
 - g. Time Active.
 - h. Time disabled.
 - i. Time Idle.
 - j. Power produced
 - k. Protective function limits (Viz. - AC Over voltage, AC Under voltage, over frequency, under frequency ground fault, PV starting voltage, PV stopping voltage).

1/7/20/2023

- v. All major parameters available on the digital bus and logging facility for energy auditing through the internal microprocessor and read on the digital front panel at any time) and logging facility (the current values, previous values for up to a month and the average values) should be made available for energy auditing through the internal microprocessor and should be read on the digital front panel.
- vi. PV array energy production: Digital Energy Meters to log the actual value of AC/DC voltage, Current & Energy generated by the PV system provided. Energy meter along with CT/PT should be of 0.5 accuracy class.
- vii. Computerized Array monitoring and AC output monitoring shall be provided as part of the inverter and/or string/array combiner box or separately.
- viii. Array DC Voltage, Current and Power, Inverter AC output voltage and current (All 3 phases and lines), AC power (Active, Reactive and Apparent), Power Factor and AC energy (All 3 phases and cumulative) and frequency shall be monitored.
- ix. Computerized AC energy monitoring shall be in addition to the digital AC energy meter.
- x. The data shall be recorded in a common work sheet chronologically date wise. The data file shall be MS Excel compatible. The data shall be represented in both tabular and graphical form.
- xi. All instantaneous data shall be shown on the computer screen.
- xii. Software shall be provided for USB download and analysis of DC and AC parametric data for individual plant.
- xiii. Provision for Internet monitoring and download of data shall be also incorporated.
- xiv. Remote Server and Software for centralized Internet monitoring system shall be also provided for download and analysis of cumulative data of all the plants and the data of the solar radiation and temperature monitoring system.
- xv. Ambient / Solar PV module back surface temperature shall be also monitored on continuous basis.
- xvi. Simultaneous monitoring of DC and AC electrical voltage, current, power, energy and other data of the plant for correlation with solar and environment data shall be provided.

SCADA shall store the daily energy produced by the plant, monthly energy and the annual energy. SCADA shall be provided with a reliable power supply and have internal reliable battery backup to record all sorts of data simultaneously round the clock. Further SCADA shall also display the Performance Ratio (PR) of the plant. All the trend and cumulative graphs shall be able to be viewed and stored. Also, all the

1/17/20/2023

events including outages and faults shall be logged and stored with time and date stamped. SCADA should also have provision for off line viewing of daily, monthly and annual average of the above parameters. Representation of monitored data shall be displayed in graphics mode or in tabulation form. All instantaneous data can be shown in the computer screen. Provision should be available for remote monitoring through GPRS system.

The SCADA shall have the feature to be integrated with the Network system as well as remotely via the web using either a standard modem or a GSM/ WIFI modem. Compatible software and hardware are to be provided so that data can be transmitted via standard modem. The SCADA system shall conform to IEC 61724 (Photo voltaic system performance monitoring – Guidelines for Measurement) standard.

- **Communication Software:** Graphical user interface software for real time communication and control
- **Data acquisition & logging:** RS232/RS485. MOD Bus/WiFi

Power generation and performance of the solar power plant to be monitored through online system to capture electrical parameters from multiple devices such as meters, Inverters, String Combiner boxes to capture parameters such as AC/DC voltage, power, energy as well as monitoring of Breaker, Performance Ratio (PR) of the plant, daily, monthly, yearly generation summary etc.

13. SOLAR PV SYSTEM FOR MEETING THE ANNUAL ENERGY REQUIREMENT

Key Performance Indicators

The following KPIs would be monitored by the ANERT/Owner throughout the contract tenure and the contractor shall furnish monthly/quarterly reports on above, without fail.

- PV Array Energy Yield
- Final System Yield
- PV System Efficiency (DC/AC)
- Performance Ratio (PR): The performance ratio test as per IS/IEC 61724 has to be carried out at site by the agency in presence of authorized officials of ANERT, deriving sample data within a period of 7 consecutive days sufficient to provide operational data representing insolation and ambient conditions as desired by the agreement authority to prove the Performance ratio of 75%. If a Solar Plant achieves the Minimum Performance Ratio, then the ANERT will issue Commercial Operation Date Certificate.
- Capacity Utilization Factor (CUF)

1/17/20/2023

- Plant uptime
- Reactive Power Consumption
- Auxiliary Energy Consumption
- CO₂ Savings
- Environment, Health & Safety

14. INSURANCE

- The Bidder shall be responsible and take an Insurance Policy for transit-cum-storage-cum-erection for all the materials to cover all risks and liabilities for supply of materials on site basis, storage of materials at site, erection, testing and commissioning. The bidder shall also take appropriate insurance during O&M period.
- The Bidder shall also take insurance for Third Party Liability covering loss of human life, engineers and workmen and also covering the risks of damage to the third party/material/equipment/properties during execution of the Contract. Before commencement of the work, the Bidder will ensure that all its employees and representatives are covered by suitable insurance against any damage, loss, injury or death arising out of the execution of the work or in carrying out the Contract. Liquidation, Death, Bankruptcy etc., shall be the responsibility of bidder.
- The insurance coverage of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**. In addition, the damages from wildlife and natural calamity are also to be covered.
- The insurance premium for the 5 years of warranty is to be paid by your agency. On handing over of the system, the original insurance policy is to be handed over to the authorised person at ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the District Office of ANERT.

Not Withstanding the terms and conditions stipulated above, it is to be noted that the conditions in the tender document shall prevail;

Yours faithfully

NARENDRA NATH VELURI I F S
CEO ANERT

Dear Sir,

Please find herewith attached open points sheet along with Enerture responses. Kindly have a look.

Furthermore, please also find herewith attached following drawings & documents for your kind approvals:

1. Module mounting structure layouts for rooftop & Ground mount solar plants.
2. Inverters datasheet, Sungrow – For Ground Mount Projects & Growatt – For Rooftop Projects.
3. Modules Datasheet – Vikram 540 / 545 wp

Also, as per our discussion, please find below mentioned BBU (Bill Breakup Units) for your kind considerations:-

Supply:-

1. On Modules deliveries – 40% of contract value amount will be release.
2. On Inverters deliveries – 20% of contract value amount will be release.

Service:-

3. Installation – 20% on pro-rata basis on submission of RA bills.
4. CEIG Approval – 5%
5. Discom approval & COD – 5%
6. On submission of Performance Bank Guarantee (PBG) – 10%

We kindly request your confirmation / approval regarding the aforementioned design, documents, and statements.

CELLS (HALF CUT)

M10 144

CYLINDRICAL TABBING WIRE is used to reduce the shadow on cell active area

Implementation of bypass diodes in split JB series-parallel connections enable the module to perform in **PARTIAL SHADOW CONDITIONS** with respect to full-cell module

HIGHER NUMBER OF BUSBAR makes the PV modules less prone to loss in efficiency and increase tolerance to micro cracks

FIELD RELIABILITY is improved due to multiple contact points on the cell which lowers the cell stress during module fabrication

LCOE IS CUT BACK by using M10 size solar cell with adding more power output than lower size cell module

LOWER INTERNAL RESISTANCE boosts module power helping to achieve minimal power loss with respect to previous variant modules

SHADE TOLERANCE

HALF-CELL MODULE

Functions like two parallel modules, enabling the half-cell string to work in partial shading which is absent in full cell module

APPLICATIONS

- On-grid large scale utility systems
- On-grid rooftop industrial and commercial systems
- Rooftop residential systems

SG250HX-IN

Multi-MPPT String Inverter for 1500 Vdc System

SUNGROW

Clean power for all

HIGH YIELD

- 12 MPPTs with max. efficiency 99%
- 30A MPPT compatible with 500Wp+ module
- Built-in Anti-PID and PID recovery function

LOW COST

- Compatible with Al and Cu AC cables
- DC 2 in 1 connection enabled
- Power line communication (PLC)

SMART O&M

- Touch free commissioning and remote firmware upgrade
- Smart IV Curve diagnosis*
- Fuse free design with smart string current monitoring

PROVEN SAFETY

- IP66 and C5 anti-corrosion
- Type II SPD for both DC and AC
- Compliant with global safety and grid code

CIRCUIT DIAGRAM

EFFICIENCY CURVE

Type designation	SG250HX-IN
Input (DC)	
Max. PV input voltage	1500 V
Min. PV input voltage / Startup input voltage	500 V / 500 V
Nominal PV input voltage	1160 V
MPP voltage range	500 V – 1500 V
MPP voltage range for nominal power	860 V – 1300 V
No. of independent MPP inputs	12
Max. number of input connector per MPPT	2
Max. PV input current	30 A *12
Max. DC short-circuit current	50 A *12
Output (AC)	
AC output power	250 kVA @ 30 °C / 200 kVA @50 °C
Nominal AC output current	144.3 A
Nominal AC voltage	3 / PE, 800 V
AC voltage range	680 – 880V
Nominal grid frequency / Grid frequency range	50 Hz / 45 – 55 Hz, 60 Hz / 55 – 65 Hz
THD	< 3 % (at nominal power)
DC current injection	< 0.5 % In
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging
Feed-in phases / connection phases	3 / 3
Efficiency	
Max. efficiency	99.0 %
European efficiency	98.8 %
Protection	
DC reverse connection protection	Yes
AC short circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
Ground fault monitoring	Yes
DC switch/ AC switch	Yes / No
PV String current monitoring	Yes
Anti-PID and PID recovery function	Yes
Overvoltage protection	DC Type II / AC Type II
General Data	
Dimensions (W*H*D)	1051 * 660 * 363 mm
Weight	99kg
Isolation method	Transformerless
Ingress protection rating	IP66
Night power consumption	< 2 W
Operating ambient temperature range	-30 to 60 °C (> 50 °C derating)
Allowable relative humidity range (non-condensing)	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	5000 m (> 4000 m derating)
Display	LED, Bluetooth+APP
Communication	RS485 / PLC
DC connection type	MC-Evo2 (Max. 6 mm ² , optional 10mm ²)
AC connection type	OT / DT terminal (Max. 300 mm ²)
Compliance	IEC 62109, IEC 61727, IEC 62116, IEC 60068, IEC 61683
Grid Support	LVRT, HVRT, active & reactive power control and power ramp rate control

*: Optional. Only compatible with Sungrow logger and iSolarCloud

SG320HX

Multi-MPPT String Inverter for 1500 Vdc System

HIGH YIELD

- Up to 16 MPPT with 99% efficiency
- 40A MPPT compatible with 500Wp+ module
- DC 2 in 1 connection

LOW COST

- Compatible with Al and Cu AC cables
- Less than 30ms reactive power response
- PLC communication to save the cable cost

SMART O&M

- Touch free commissioning and remote firmware upgrade
- Smart string detection and IV scanning
- Fuse free design with smart string current monitoring

PROVEN SAFETY

- IP66 protection and C5 anti-corrosion grade
- Type II SPD for both DC and AC

THD	< 3 % (at nominal power)
DC current injection	< 0.5 % In
Power factor at nominal power / Adjustable power factor	> 0.99 / 0.8 leading – 0.8 lagging
Feed-in phases / Connection phases	3 / 3
Efficiency	
Max. efficiency / European efficiency	99.02 % / 98.8 %
Protection	
DC reverse connection protection	Yes
AC short circuit protection	Yes
Leakage current protection	Yes
Grid monitoring	Yes
Ground fault monitoring	Yes
DC switch / AC switch	Yes / No
PV string current monitoring	Yes
Q at night function*	Yes
Surge protection	DC Type II / AC Type II
General Data	
Dimensions (W*H*D)	1136 * 870 * 361 mm
Weight	≤116 kg
Isolation method	Transformerless
Degree of protection	IP66
Power consumption at night	< 6 W
Operating ambient temperature range	-30 to 60 °C
Allowable relative humidity range	0 – 100 %
Cooling method	Smart forced air cooling
Max. operating altitude	4000 m (> 3000 m derating)
Display	LED, Bluetooth+APP
Communication	RS485 / PLC
DC connection type	MC4-Evo2 (Max. 6 mm ² , optional 10mm ²)
AC connection type	Support OT/DT terminal (Max. 400 mm ²)
Compliance	IEC 62109, IEC 61727, IEC 62116, IEC 60068, IEC 61683
Grid Support	Q at night function*, LVRT, HVRT, active & reactive power control and power ramp rate control

* Need uninterrupted grid supply

MAC 30~60KTL3-X LV

- 3 MPPTs
- Smart diagnosis
- High efficiency up to 98.8%
- Local WIFI connection
- OLED display and touch button
- AC&DC type II SPD
- Data storage up to 25 years
- DC side 2 in 1 connection enabled

- NOTES :-**
1. ALL DIMENSIONS ARE IN MM.
 2. EL.±0.0 CORRESPONDS TO FGL
 3. WHEN WATER IS ENCOUNTERED DURING EXCAVATION, WELL POINT SYSTEM OR OTHER SUITABLE METHOD SHALL BE EMPLOYED BY DENATURING IN ORDER TO ENSURE DRY CONDITION AND IN TO AVOID SLUSHY CONDITION.
 4. BACK FILLING SHALL BE MORRUM HAVING PI LESS THAN 5 IS COMPACTED TO 90% MODIFIED PROCTOR DENSITY.
 5. M25 CONCRETE SHALL BE AS PER IS 456
 6. BRICK MASONRY SHOULD BE CONSTRUCTED WITH CM 1:6
 7. CLEAR COVER TO REINFORCEMENT SHALL BE MINIMUM AS FOLLOWS
 - a) PEDESTAL/WALL = 40MM
 - b) BASE SLAB = 50MM & TOP SLAB = 25MM
 - c) FOUNDATION = 50MM
 8. HYSD BARS CONFORMING TO IS:1786 (GRADE FE500)
 9. LAP LENGTH SHALL BE 50TIMES BAR DIA AND LAPS SHALL BE STAGGERED.
 10. NOT MORE THAN 50% OF THE BARS SHALL BE LAPPED IN ONE LOCATION
 11. GRADE OF PCC SHALL BE M15
 12. FOUNDATION BOLTS SHALL BE PLACED IN POSITION DURING CONCRETING.
 13. MINOR ADJUSTMENTS MAY BE DONE AT SITE IN CONSULTATION WITH ENGINEER IN CHARGE.
 14. FOUNDATION BOLT SHALL BE CONFORM TO IS:5624-1993
 15. FOUNDATION BOLT GALVANISATION SHALL BE AS PER IS:1367(PART 13)-1983
 16. THE MECHANICAL & ELECTRICAL PROPERTIES OF ANCHOR BOLTS(4.6 GRADE) SHALL BE CONFORM TO IS 1367(PART-3)-2002.
 17. 12MM THICK PLASTERING TO BE DONE FOR ALL THE BRICKWORK SURFACES.
 18. PLEASE REFER VENDOR DRAWINGS FOR LV & HV CABLE SUPPORTS DETAILS.
 19. SAFE BEARING CAPACITY OF SOIL IS 40 T/M2 AT 1.5M. IN BELOW F.G.L.

ALL DIMENSIONS ARE IN mm.															
GENERAL NOTES:-															
1. ALL DIMENSIONS ARE IN mm.															
2. ALL PANELS ARE FREE STANDING, DOUBLE DOOR , DOUBLE FRONT, FORM 3B AND SUITABLE FOR OUTDOOR INSTALLATION (IP55).															
3. THE PANEL IS FABRICATED WITH:-															
a. MAIN FRAME AND LOAD BEARING MEMBERS - 2.0 mm CRCA TOP CANOPY															
b. OUTER DOORS (FRONT AND REAR) - 2.0 mm CRCA															
c. INNER MCCB DOORS INNER PARTITION - 1.6 mm CRCA															
d. BASE FRAME - ISMC (ISI) (75X40X40X5MM)															
e. REMOVABLE UNDRILLED GLAND PLATE - 3.0 mm MS															
4. THE PANEL WILL HAVE NEOPRENE GASKET ON OUTER FRAMES TO MAKE IT DUST & VERMIN PROOF & SUITABLE FOR IP-55 DEGREE OF PROTECTION															
5. THE PANEL IS SUITABLE FOR 3-PHASE 3-WIRE OPERATIONAL VOLTAGE 800V AC, 50Hz SUPPLY OPERATION.															
6. THE PANEL IS POWDER COATED WITH:-															
a. MAIN FRAME, DOORS & COVERS - SIEMENS GREY RAL 7032															
b. MOUNTING PLATE - SIEMENS GREY RAL 7032															
c. BASE FRAME - BLACK															
d. PAINT THICKNESS - MIN 80. MICRONS															
7. ELECTROLYTIC GRADE ALUMINIUM BUS BAR WITH RED, YELLOW, & BLUE COLOUR CODED HEAT SHRINKABLE SLEEVES															
8. THE MINIMUM CLEARANCE IN MAIN BUSBAR SHALL BE AS FOLLOWS															
a. BETWEEN PHASE TO PHASE : 30mm															
b. BETWEEN PHASE TO EARTH : 30mm (PHASE BARRIERS ARE USED WHEREVER NOT POSSIBLE TO MAINTAIN THE REQUIRED CLEARANCE)															
9. ALL CABLE ENTRIES SHALL BE FROM BOTTOM OF PANEL AS DESCRIBED IN THE GA DRAWING.															
10. ALUMINIUM EARTH BUS IS PROVIDED THROUGHOUT THE LENGTH OF PANEL.															
11. ALL HARDWARE FOR ASSEMBLY BUSBAR WILL BE SS304 ZINC FLAKE 10.9 GRADE FOR CABLE LUGS TERMINATION															
12. CONTROL WIRING ARE CARRIED OUT WITH FRLS CABLE AS PER POWER & CONTROL SCHEMATICS DRAWING															
13. ALL HINGED DOORS ARE EARTHED TO MAIN FRAME WITH 2.5sqmm COPPER FLEXIBLE WIRE PROVIDED WITH LUGS AT BOTH ENDS.															
14. ALL INVERTER INCOMING MCCB'S ARE PROVIDED WITH DOOR INTERLOCKED OPERATING HANDLE.

Subject: Re: Request for Virtual Pre-Dispatch Inspection Call for Solar Modules on December 22nd or 23rd

Dear Akshay,

The PDI may be arranged on 22/12/2023, preferably afternoon. Kindly share the list of modules with serial numbers.

On Wed, 20 Dec 2023 at 15:53, Akshay Raj <akshayraj.k@enerture.co.in> wrote:

Dear Madam

I hope this message finds you well. We are excited about the upcoming dispatch of the solar modules of 1.7 Mw, and as part of our quality assurance process, we would like to schedule a virtual pre-dispatch inspection call. We propose conducting the inspection on either December 22nd or 23rd, and we would appreciate it if you could confirm your availability for this important stage of the process.

Furthermore, we understand the significance of the flash test report in assuring the quality of the solar modules. Rest assured, once we receive the report, we will promptly share it with you for your review.

Your participation in the virtual inspection call is vital to ensuring that the solar modules meet and exceed your expectations. **Kindly confirm your availability for either of the proposed dates, and we will coordinate the details accordingly.**

Thank you for your attention to this matter, and we look forward to your confirmation.

Thanks and Regards,

Akshay Raj Kulshreshtha

Dear Sir

We have arranged a virtual PDI on **10th Oct 2023 sharp 2:45PM**. Link of the inspection will be shared with you before inspection.

I am mentioning manufacturer QC head details

Mr. Jainesh Shah

Mob. - 7600512728

Also, mentioning of your details from Enerture side

Mr. Akshay Raj Kulshreshtha

Sr. Manager - Procurement

Mob. - 9999399307

PDI will be done on the following parameters

1. Visual Inspection Test
2. Flash Test
3. Dimension Verification
4. Dielectric / HV Test
5. Electro Lumenese Test

6. Insulation Resistance Test
7. Light Induced Degradation Test
8. Robustness Test
9. Wet Leakage Test

FTR Attached

Dear Shubham,

The Online FAT can be scheduled on 09/10/2023 (Monday) afternoon. The link for the same may be shared in the first half and the following tests are to be conducted on selected modules from the lot provided.

1. Visual Inspection Test
2. Flash Test
3. Dimension Verification
4. Dielectric / HV Test
5. Electro Lumenese Test
6. Insulation Resistance Test
7. Light Induced Degradation Test
8. Robustness Test
9. Wet Leakage Test

Dear Sir,

Building on our previous email thread, we have attached the modules FTR (Factory Test Report) sheet as per your request.

We kindly request that you provide us with the details for the modules' inspection, including the contact information for the responsible individual and a suggested time slot that is convenient for you.

Your prompt response in this regard will be greatly appreciated.

Thank you for your cooperation.

Dear Akshay & Shubham,

In continuation to the telecon with Mr. Shubham, Pls see the responses for the below mentioned:

1. The Factory Acceptance Test will be online through Google Meet/Zoom
2. The details of the lot along with serial numbers of Solar Modules to be shared in advance and ANERT will select a few modules in random for various tests
3. Please share a few tentative date and time slots, we will confirm the same based on availability of our QT team

Dear Sir,

Request you to kindly confirm the below

1. Inspection Type – Virtual/Offline
2. Product inspection/Factory Inspection
3. Date we are planning is 29th September – Please confirm suitable date and time

Also share the documents required for inspection.

Please confirm your presence so that we can confirm to our supplier and raise inspection call accordingly.

Thanks and Regards,

Akshay Raj Kulshreshtha

Dear Shubham,

Please share the updated schedule of work. Also, we would like to conduct a Factory Acceptance Test (Online/Offline) of PV modules before dispatch and hence arrange for the same on an immediate date. Further, only PV modules with Dispatch Clearance Certificate issued by ANERT will be accepted by Smart City Thiruvananthapuram Ltd for release of payment. Accordingly, you are requested to make arrangements for the FAT on a sooner date.

On Mon, 26 Jun 2023 at 17:13, ANERT Projects <projects@anert.in> wrote:

Dear Shubham,

As discussed over the phone, the make and model of PV modules and Inverters are approved. Also, the structure layout for Rooftop is approved;

In case of Ground Mounted systems, the soil test reports done from ANERT end are attached. You can rely on the same, or do a detailed soil survey from your end. The required modification, site wise in the structure foundation may be done and get it certified by a Certified Structural Engineer / Professor from any National level institute along with STAAD report. The same may be forwarded for approval before fabrication.

On Sat, 24 Jun 2023 at 16:47, <shubham@enerture.co.in> wrote:

Dear Sir,

Please find herewith attached open points sheet along with Enerture responses. Kindly have a look.

Furthermore, please also find herewith attached following drawings & documents for your kind approvals:

1. Module mounting structure layouts for rooftop & Ground mount solar plants.
2. Inverters datasheet, Sungrow – For Ground Mount Projects & Growatt – For Rooftop Projects.
3. Modules Datasheet – Vikram 540 / 545 wp

Also, as per our discussion, please find below mentioned BBU (Bill Breakup Units) for your kind considerations:-

Supply:-

1. On Modules deliveries – 40% of contract value amount will be release.
2. On Inverters deliveries – 20% of contract value amount will be release.

Service:-

3. Installation – 20% on pro-rata basis on submission of RA bills.
4. CEIG Approval – 5%
5. Discom approval & COD – 5%
6. On submission of Performance Bank Guarantee (PBG) – 10%

We kindly request your confirmation / approval regarding the aforementioned design, documents, and statements.

Dear Mr. Shubham,

Please see the responses marked in the sheet attached and also the project schedule mentioned is also accepted. For the BoM, you may submit the particular **make and model of PV modules and Inverters** proposed for the project. The rest of the items in the Preliminary BoM are accepted.

Dear Sir,

We would like to inform you that we are planning to commence land cleaning work within the project land premises starting tomorrow. To ensure smooth progress without any work stoppages due to documentation issues, please let us know if there are any gate pass or approval processes in place that we need to comply with. This will enable us to complete the necessary documentation and avoid any unnecessary delays. Your prompt response in this matter would be greatly appreciated.

Furthermore, we are waiting for your important response regarding the **Project schedule, Project Preliminary BOM, and Customer Open Points sheet**, as mentioned in the previous email. Please provide your approval on these documents so that we can proceed with the next steps.

Additionally, we kindly ask you to share the ANERT communication matrix with us. This will facilitate the sharing and discussion of information with the designated personal involved individually.

Dear Sir,

Greeting from Enerture Technologies.....!!

Following our previous email thread, please find attached the **Project schedule** and **Project Preliminary BOM** for your reference and perusal. Enerture kindly requests your approval to proceed with further processing.

We have also attached an excel sheet titled "**Customer Open Points**" that lists the open points requiring ANERT's approval / response to finalize matters and proceed accordingly.

Additionally, in adherence with trail mail, we are eagerly awaiting the detailed AC SLD of TRAVANCORE TITANIUM PRODUCTS LTD. This information is essential for our reference and to proceed with our work. We kindly request you to provide the same also, as soon as it becomes available.

We would greatly appreciate your prompt response to these documents.

If you have any questions or need any clarification, please let us know.

	RAYZON SOLAR	DATE: 10-10-2023
--	---------------------	-------------------------

FACTORY ACCEPTANCE TEST REPORT

	RAYZON SOLAR	DATE: 10-10-2023
--	---------------------	-------------------------

1. Inspection Information and Conclusion

INSPECTION INFORMATION	
Customer	SOLVEIG SOLAR
Inspection Agency	ANERT
Inspector Name	Radhika J M
Factory Address	Rayzon Solar Pvt Ltd Block No 105, B/H Aron Pipes, Kim Mandvi Road, Karanj, Surat -394110, Gujarat
Factory Contact Person	Mr.Jainesh Shah Phone: 7600512729 Email:qc@rayzonenergies.com
Date of Inspection	10/10/2023
Inspection Mode	Video Call
CONCLUSION	
FAT conducted of PV modules conducted on 10.10.2023 was found Satisfactory and in accordance with the approved QAP. Hence Rayzon Solar Pvt. Ltd. Is eligible for supplying solar panels to SOLVEIG SOLAR.	

2. Inspection Summary

M/s.ANERT has made an inspection call for 2 Nos of RS545WC modules on 10.10.2023. Considering the extra-ordinary situation that has arisen across the country due to COVID-19, it was decided to conduct an online inspection on the PV modules and to give dispatch clearance with the condition that the final acceptance shall be made based on the physical inspection at the site.

The online inspection for the offered modules of M/s Rayzon Solar Pvt Ltd was done on 10.10.2023 and the ANERT officials witnessed the test online through Google zoom Platform. All the tests were done at the manufacturing plant of Rayzon Solar Pvt Ltd, in accordance with the approved

QAP. 2 modules from the offered lot had been selected randomly for the inspection.

3. Instrument Calibration Details

All instruments used in the testing are calibrated from NABL accredited lab and the calibration details of all instruments is provided in Annexure III.

RAYZON SOLAR
DATE: 10-10-2023

4. Test Summary

The summary of tests has given in Annexure S4.

5. Maximum Power Determination Detailed Results

Flash test have been done on 2 samples, which were selected for testing. The test was done using sun simulator at standard test conditions. The flash test gives the electrical parameters of a module like Vmp, Imp, Voc, Isc, Pmp, efficiency, fill-factor, series and shunt-resistance etc. All the samples meet the technical requirements of ANERT of efficiency greater than 20% and fill factor greater than 0.8 with maximum power tolerance within 2%.

6. Insulation Resistance, Wet Leakage & Dielectric Withstand Test

The insulation resistance test is an electrical safety test and shows whether a solar module offers adequate insulation. As per approved QAP, the module insulation resistance will be greater than $40\text{M}\Omega\text{m}^2$ when applied a high DC voltage of 1.5 KV for 2 min The test has been conducted for Two sample holding number. While conducting test, a high DC voltage of 4.5kV has been applied for 1 min and the insulation resistance of each module is noted as $> 1\text{G}\Omega$

Wet leakage test has been conducted for two sample on which insulation resistance test was conducted. Pre-condition for this test was done by immersing the sample in water and then applied a voltage of 1.5kV between the terminals of the module and the insulation resistance of each module is noted as $> 1\text{G}\Omega$. As per the approved QAP the insulation resistance required is $40\text{M}\Omega\text{m}^2$.

7. Dimension Verification

Dimension verification was done and measured length as 2.278m, width 1.133m and thickness as 40 mm.

CALIBRATION CERTIFICATE

Calibration Certificate No :	ENP2301040164-L	ULR NO :	CC295923000000164F
Date of Receipt :	03/01/2023	Name of Customer and Address Rayzon Green Energy 105, B/H Aron Pipes, Kim Mandavi Road, Karjan, Surat-394110	
Date of Calibration :	04/01/2023		
Due Date of Calibration : (Recommended by Customer)	03/01/2024		
Date of Issue :	06/01/2023		
Format No :	QR/7.8/01		

Details of UUC to be Calibrate :

Nomenclature of UUC	I.D. No. / Sr. No.	Make / Model	Least Count	Range	Accuracy	Type
Coating Thickness Gauge	16264 / 16261	ACCURATE / CTM-16FN	0.1 μ m	0 to 2000 μ m	NA	Digital

Description of Standard Instrument Used :

Nomenclature	I.D. No. / Sr. No.	Certificate No	Certified By	Valid Up To
Coating Thickness Foils	ENP/FOILS/01--	2022/08/022	ACTC	07/08/2023

Environmental Condition :		CSR No :	230103005-L
Temperature (° C) :	20.4	Condition of Item :	OK
Relative Humidity (% RH) :	55	Calibration Location :	In Lab
Parameter :	Dimension	Calibration Procedure :	ENP/WI/M-11
Location/Department :	Quality Lab	Calibration Standard Used :	Comparison Method

Result of Calibration

SrNo	Nominal Value in mm	UUC Value in mm	Error in mm
1	10.0	10.2	0.2
2	25.0	25.3	0.3
3	51.0	51.2	0.2
4	126.0	126.5	0.5
5	261.0	261.4	0.4
6	499.0	499.8	0.8
7	690.0	690.5	0.5

Expanded Uncertainty ($\pm$) : 16.5 μ m

Notes :

- The reported expanded uncertainty is at coverage factor k=2 which corresponds to a coverage probability or level of confidence of approximately 95.45% for a normal distribution.
- The Certificate is issued subject to conditions stated overleaf.
- Standards are Traceable to National/International Standard
- Recommended due date is suggested by customer.
- The calibration results reported in the certificate are valid at the time of and under stated condition of measurement.
- This Document is Digitally Signed and does not require Signature

Dear Sir,

Kindly find the link for meeting, request you to please join for module inspection,

Topic: Enerture PDI

Time: Oct 10, 2023 02:45 PM Mumbai, Kolkata, New Delhi

Join Zoom Meeting

<https://us04web.zoom.us/j/9214495255?pwd=ZVBvc0NEQ3R3VjJnU1U4dnkvR2I1UT09>

Meeting ID: 921 449 5255

Passcode: pqrW7d

Please share the Module serial number from FTR which was shared with you so that we can ready the module at inspection place to save precious time.

Thanks and Regards,

Akshay Raj Kulshreshtha

Subject: RE: !! Solar Modules Virtual Inspection Regd. !! TRAVANCORE TITANIUM PRODUCTS LTD

Dear Sir

We have arranged a virtual PDI on **10th Oct 2023 sharp 2:45PM**. Link of the inspection will be shared with you before inspection.

I am mentioning manufacturer QC head details

Mr. Jainesh Shah

Mob. - 7600512728

Also, mentioning of your details from Enerture side

Mr. Akshay Raj Kulshreshtha

Sr. Manager - Procurement

Mob. - 9999399307

PDI will be done on the following parameters

1. Visual Inspection Test
2. Flash Test
3. Dimension Verification
4. Dielectric / HV Test
5. Electro Lumesense Test
6. Insulation Resistance Test
7. Light Induced Degradation Test
8. Robustness Test
9. Wet Leakage Test

FTR Attached

Thanks and Regards,

Akshay Raj Kulshreshtha

Dear Shubham,

Please share the updated schedule of work. Also, we would like to conduct a Factory Acceptance Test (Online/Offline) of PV modules before dispatch and hence arrange for the same on an immediate date. Further, only PV modules with Dispatch Clearance Certificate issued by ANERT will be accepted by Smart City Thiruvananthapuram Ltd for release of payment. Accordingly, you are requested to make arrangements for the FAT on a sooner date.

On Mon, 26 Jun 2023 at 17:13, ANERT Projects <projects@anert.in> wrote:

Dear Shubham,

As discussed over the phone, the make and model of PV modules and Inverters are approved. Also, the structure layout for Rooftop is approved;

In case of Ground Mounted systems, the soil test reports done from ANERT end are attached. You can rely on the same, or do a detailed soil survey from your end. The required modification, site wise in the structure foundation may be done and get it certified by a Certified Structural Engineer / Professor from any National level institute along with STAAD report. The same may be forwarded for approval before fabrication.

On Sat, 24 Jun 2023 at 16:47, <shubham@enerture.co.in> wrote:

Dear Sir,

Please find herewith attached open points sheet along with Enerture responses. Kindly have a look.

Furthermore, please also find herewith attached following drawings & documents for your kind approvals:

1. Module mounting structure layouts for rooftop & Ground mount solar plants.
2. Inverters datasheet, Sungrow – For Ground Mount Projects & Growatt – For Rooftop Projects.
3. Modules Datasheet – Vikram 540 / 545 wp

Also, as per our discussion, please find below mentioned BBU (Bill Breakup Units) for your kind considerations:-

Supply:-

1. On Modules deliveries – 40% of contract value amount will be release.
2. On Inverters deliveries – 20% of contract value amount will be release.

Service:-

3. Installation – 20% on pro-rata basis on submission of RA bills.
4. CEIG Approval – 5%
5. Discom approval & COD – 5%
6. On submission of Performance Bank Guarantee (PBG) – 10%

We kindly request your confirmation / approval regarding the aforementioned design, documents, and statements.

Dear Sir,

We would like to inform you that we are planning to commence land cleaning work within the project land premises starting tomorrow. To ensure smooth progress without any work stoppages due to documentation issues, please let us know if there are any gate pass or approval processes in place that we need to comply with. This will enable us to complete the necessary documentation and avoid any unnecessary delays. Your prompt response in this matter would be greatly appreciated.

Furthermore, we are waiting for your important response regarding the **Project schedule, Project Preliminary BOM, and Customer Open Points sheet**, as mentioned in the previous email. Please provide your approval on these documents so that we can proceed with the next steps.

Additionally, we kindly ask you to share the ANERT communication matrix with us. This will facilitate the sharing and discussion of information with the designated personal involved individually.

Dear Sir,

Greeting from Enerture Technologies.....!!

Following our previous email thread, please find attached the **Project schedule** and **Project Preliminary BOM** for your reference and perusal. Enerture kindly requests your approval to proceed with further processing.

We have also attached an excel sheet titled "**Customer Open Points**" that lists the open points requiring ANERT's approval / response to finalize matters and proceed accordingly.

Additionally, in adherence with trail mail, we are eagerly awaiting the detailed AC SLD of TRAVANCORE TITANIUM PRODUCTS LTD. This information is essential for our reference and to proceed with our work. We kindly request you to provide the same also, as soon as it becomes available.

We would greatly appreciate your prompt response to these documents.

Enerture Technologies Pvt Ltd

Annexure B				
Vikram Solar Ltd. IR Continuity Inspection Result SPV Modules Customer : Enerture Technologies Pvt Ltd Lot No.: O1 Date: 27.12.2023				
IR Continuity Inspection Result SPV Modules		WET LEAKAGE		
Serial No	Module ID	IR @ 1.5 kV (MΩ)		Remarks
		Measured Value MΩ	Pass Criteria >40 MΩ/m ²	
1	51195797	466	181	PASS
				
 Mr. Syed Ziaul Haque Vikram Solar Limited			Enerture Technologies Pvt Ltd	

VIKRAM SOLAR LIMITED								1.701 MWp				
FLASHING TEST REPORT OF SOLAR PHOTOVOLTAIC MODULES								 vikramsolar CREATING CLIMATE FOR CHANGE				
Customer :												
DO No.:						Module Wp :					545 Wp	
Invoice No.:						Total Quantity :					3121 Nos

TENDER ABSTRACT

Ref. No.	ANERT-TECH/99/2022-T2
Document Description	Implementation of 2 MWp Grid Connected Solar PV Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram
Name of Work	Design, Supply, Engineering, Erection Testing, Commissioning of SPV Power Plant of cumulative capacity of 1 MWp with Grid connectivity along with 10 years of Operation & Maintenance at various
Site	Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram
Download of Tender Form	http://www.etenders.kerala.gov.in
Last date of submission of Tender	26/04/2023 @ 03.00 PM
Date and Time of Bid opening (Techno-Commercial)	27/04/2023 @ 03.30 PM
Cost of Tender form	Rs. 11,800/- (Including GST)
EMD	Rs. 2,00,000/-
Warranty period	10-year warranty and complete Operation & Maintenance. Minimum guaranteed PR and CUF of the plant as specified in the Technical Specification to be maintained.
Availability of Tender Forms	Website http://www.etenders.kerala.gov.in
Place of opening of tender	Office of CEO, ANERT Law College Road, Vikas Bhavan. PO, Thiruvananthapuram – 695 033, Kerala
Thiruvananthapuram 12/04/2023	Sd/- CEO

Important Note: Prospective Bidders are requested to remain updated for any notices/amendments/clarifications etc. to the RFS document through the website www.anert.gov.in/www.etenders.kerala.gov.in. No separate notifications will be issued for such notices/amendments/clarification etc. in the print media or individually.

DISCLAIMER

1. Though adequate care has been taken while preparing the NIT document, the Bidders shall satisfy themselves that the document is complete in all respect. Intimation regarding any discrepancy shall be given to this office immediately. If no intimation is received from any Bidder within Ten (10) days from the date of notification of NIT / issuance of e-Tender documents, it shall be considered that the document is complete in all respect and has been received / acknowledged by the Bidder(s).
2. Agency for New and Renewable Energy Research and Technology (ANERT) reserves the right to modify, amend or supplement this document.
3. While this tender document has been prepared in good faith, neither ANERT nor their employees or advisors make any representation or warranty, express or implied, or accept any responsibility or liability, whatsoever, in respect of any statements or omissions herein, or the accuracy, completeness or reliability of information, and shall incur no liability under any law, statute, rules or regulations as to the accuracy, reliability or completeness of this document, even if any loss or damage is caused by any act or omission on their part.

GENERAL TERMS AND CONDITIONS FOR E-PROCUREMENT

This e-Tender is being published as the Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd. The tender is invited in two cover system from experienced manufacturers / EPC contractors through e-procurement portal of Government of Kerala (www.etenders.kerala.gov.in). Prospective bidders willing to participate in this tender shall necessarily register themselves with above mentioned e-procurement portal.

The tender timeline is available in the critical date section of this tender published in www.etenders.kerala.gov.in

1. ONLINE BIDDER REGISTRATION PROCESS:

- 1.1 Bidders should have a Class III or above Digital Signature Certificate (DSC) to be procured from any Registration Authorities (RA) under the Certifying Agency of India. Details of RAs will be available on www.cca.gov.in. Once, the DSC is obtained, bidders have to register on www.etenders.kerala.gov.in website for participating in this tender. Website registration is a one-time process without any registration fees. However, bidders have to procure DSC at their own cost.
- 1.2 Bidders may contact e-Procurement support desk of Kerala State IT Mission over telephone at 0471- 2577088, 2577188, 2577388 or 0484 – 2336006, 2332262 - through email: helpetender@gmail.com/etendershelp@kerala.gov.in for assistance in this regard

2. ONLINE TENDER PROCESS:

The tender process shall consist of the following stages:

- i. Downloading of tender document: Tender document will be available for free download on www.etenders.kerala.gov.in. However, tender document fees shall be payable at the time of bid submission as stipulated in this tender document.

- ii. Publishing of Corrigendum: All corrigenda shall be published on www.etenders.kerala.gov.in and shall not be available elsewhere.
- iii. Bid submission: Bidders have to submit their bids along with supporting documents to support their eligibility, as required in this tender document on www.etenders.kerala.gov.in. No manual submission of bid is allowed and manual bids shall not be accepted under any circumstances.
- iv. In case bidder encounters any technical issues pertaining to e-Procurement system while acting on the tender, computer screen shot of the error message with date & time stamp on the web-browser along with the query shall be e-mailed by the bidder to the help desk (**helpetender@gmail.com/etendershelp@kerala.gov.in**), for resolution of the problem. At the same time, problem must be intimated to the concerned Tender Inviting Authority via email.
- v. The time taken to ascertain, evaluate and suggest a solution for the problem reported by bidder may vary from case to case. Hence bidders are advised to submit the bid **at least 2 working days before the due date** and time of bid submission to avoid any last-minute issues that may come up.
- vi. Opening of Bid and Bidder short-listing: The single cover bids will be opened, evaluated and shortlisted as per the eligibility. Failure to submit the required documents online will attract disqualification. Price bids of the qualified bidders will open on the day to be intimated to all bidders and the work will be awarded.

3. DOCUMENTS COMPRISING BID:

- 3.1 The 2-cover bid shall contain the scanned copies of the following documents which every bidder has to upload:
- i. The tender document duly signed and sealed downloaded from the website.
 - ii. Pre-Agreement in the prescribed format (Annexure A) on Govt. of Kerala stamp paper worth Rs. 200/-
 - iii. Copy of Registration Certificate of the bidder firm
 - iv. Copy of PAN card

- v. The bidder must have an experience of successful commissioning of at least 5 MW SPV Power Plants in India.
 - vi. Documentary evidence to support the bidders experience in any completed or ongoing SPV contract with a Govt. Department / Govt. undertaking / PSU / Private sector for having a single plant capacity not less than 1 MW. The plant shall be in operation at least 3 months before the date of opening of this bid proposal.
 - vii. Documents to prove the annual Turnover of the bidder (audited statement)
 - viii. Certifications required for proving technical compliance
 - ix. Summary of bidders Technical Information (Annexure B)
 - x. Declaration by the Bidder (format as in Annexure C)
 - xi. Declaration of relationship with ANERT employee (format as in Annexure D)
 - xii. The Price Schedule as per BOQ in Excel format for this tender to be downloaded from e-tender website, duly digitally signed by the tenderer/authorized signatory of the tender.
 - xiii. Bill of Material
- 3.2 The department doesn't take any responsibility for any technical snag or failure that has taken place during document upload.
- 3.3 The Bidder shall complete the Price bid as per format given for download along with this tender.

Note: The blank price bid should be downloaded and saved on bidder's computer without changing file-name otherwise price bid will not get uploaded. The bidder should fill in the details in the same file and upload the same back to the website.

4. TENDER DOCUMENT FEES AND EARNEST MONEY DEPOSIT (EMD)

- 4.1 The Bidder shall pay, a tender document fee of Rs. 17,850/- and Earnest Money Deposit or Bid Security or Bid Bond of Rs. 2,00,000/-. The Bid security is required to protect the purchaser against risk of Bidder's conduct, which would warrant the forfeiture of security.

4.2 Online Payment modes: The tender document fees and EMD can be paid in through e-Payment facility provided by the e-Procurement system. Bidders can make payment only via Internet banking facility

State Bank of India Multi Option Payment System (SBI MOPS Gateway): Bidders are required to avail Internet Banking Facility in any of below banks for making tender remittances in eProcurement System.

9. BIDDER'S LOCATION

- 9.1 The tenderers are requested to furnish the exact location of their factories/godown with detailed postal address and pin code, telephone and fax nos. etc. in their tenders to arrange inspection by ANERT, if considered necessary.
- 9.2 All communication shall be made to the registered email of the bidder in the e-tendering systems and ANERT shall not be responsible for non-receipt or delay of any such communication.

CONDITIONS OF CONTRACT

10. GENERAL CONDITIONS

- 10.1 The tenders should be submitted online at www.etenders.kerala.gov.in.
- 10.2 The tenders should be as per the prescribed form which should be downloaded from the e-tender website. The cost of tender forms should be paid online, and once paid will not be refunded. Tender forms are not transferable. Tenders that are not in the prescribed form are liable to be rejected.
- 10.3 Intending tenderers should submit their tenders on or before the due date and time mentioned in the tender abstract. Late tender will not be accepted.
- 10.4 The rates quoted should be only in Indian currency. Tenders in any other currency are liable to rejection. The rates quoted should be for the unit specified in the schedule attached.
- 10.5 The tenderer shall submit a copy of PAN card of the authorised signatory along with tender.
- 10.6 Tenders subject to conditions will not be considered. They are liable to be rejected on that sole ground.
- 10.7 The tenders will be opened on the specified day and time in the office of the CEO, ANERT in the presence of such of those tenderer's representatives who may be present with proper authorisation issued by the tenderer.
- 10.8 Every tenderer should send along with his tender an Earnest Money Deposit. This may be paid online at the e-tenders website.
- 10.9 If any tenderer withdraws from his e-tender before the expiry of the period fixed for keeping the rates firm for acceptance, the earnest money if any, deposited by him, will be forfeited.
- 10.10 The final acceptance/rejection of the tenders rests entirely with CEO, ANERT who do not bind themselves to accept the lowest or any tender.
- 10.11 In the case of materials of technical nature, the successful tenderer should be prepared to guarantee satisfactory performance for a period of guarantee under a definite penalty. Communication of acceptance of the e-tender normally constitutes a concluded contract. Nevertheless, the successful tenderer shall also

execute an agreement for the due fulfilment of the contract within the period to be specified in the letter of acceptance. The contractor shall have to pay all stamp duty, Lawyer's charges and other expenses incidental to the execution of the agreement. Failure to execute the agreement within the period specified will entail the penalties set out below:

- 10.11.1 The successful tenderer shall **a) deposit a sum @ 3% of the contract till the completion of Installation works. The deposit shall be in the form of a BG which shall be returned after COD (Commercial Operation Date).** There will be no exemption for MSE's in depositing this security amount. If the successful bidder fails to deposit the security and execute the agreement as stated above, the earnest money deposited by him will be forfeited to ANERT; and contract arranged elsewhere at the defaulter's risk and any loss incurred by ANERT on account of the purchase will be recovered from the defaulter who will however not be entitled to any gain accruing thereby.
- 10.11.2 In cases where a successful tenderer, after having made partial supplies fails to fulfil the contracts in full, all or any of the materials not supplied may at the discretion of the Purchasing Officer be purchased by means of another tender/quotation or by negotiation or from the next higher tenderer who had offered to supply already, and the loss if any caused to ANERT shall thereby together with such sums as may be fixed by ANERT towards damages be recovered from the defaulting tenderer.
- 10.12 Return the Security deposit shall, subject to the conditions specified herein to the contractor within three months after the expiration of the contract. But in the event of any dispute arising between ANERT and the contractor, ANERT shall be entitled to deduct out of the deposits or the balance thereof, until such dispute is determined the amount of such damages, costs, charges and expenses as may be claimed. The same may also be deducted from any other sum, which may be due at any time from ANERT to the contractor. In all cases where there are guarantee for the goods supplied, the security deposit will be released only after the expiry of the guarantee period.

(a) All payments to the contractors will be made by CEO ANERT in due course by NEFT transfer only

(b) All incidental expenses incurred by ANERT for making payments outside the State in which the claim arises shall be borne by the contractor.

10.13 The contractor shall not assign or make over the contract on the benefits or burdens thereof to any other person or body corporate. The contractor shall not underlet or sublet to any person or persons or body corporate the execution of the contract or any part thereof without the consent in writing of the purchasing officer who shall have absolute power to refuse such consent or to rescind such consent (if given) at any time if he is not satisfied with the manner in which the contract is being executed and no allowance or compensation shall be made to the contractor or the subcontractor upon such rescission. Provided always that if such consent be given at any time, the contractor shall not be relieved from any obligation, duty or responsibility under this contract.

10.14 In case the contractor becomes insolvent or goes into liquidation, or makes or proposes to make any assignment for the benefit of his creditors or proposes any composition with his creditors for the settlement of his debts, carries on his business or the contract under inspection or behalf of or his creditors or in case any receiving order(s) for the administration of his estate are made against him or in case the contractor shall commit any act of insolvency or in case in which under any clause or clauses any act of insolvency or in case in which under any clause(s) of this contract the contractor shall have rendered himself liable to damages amounting to the whole of his security deposits, the contract shall, thereupon, after notice given by the Purchasing Officer to the contractor, be determined and ANERT may complete the contract in such time and manner and by such persons as ANERT shall think fit. But such determination of the contract shall be without any prejudice to any right or remedy of ANERT against the contractor or his sureties in respect of any breach of contract committed by the contractor. All expenses and damages caused to ANERT by any breach of contract by the contractor shall be paid by the contractor to ANERT and may be recovered from him under the provisions of the Revenue Recovery Act in force in the State.

- 10.15 Any sum of money due and payable to the contractor (including security deposit returnable to him) under this contract may be appropriated by the CEO or any other person authorised by ANERT and set off against any claim of ANERT for the payment of a sum of money arising out of or under any other contract made by the contractor with ANERT or any other person authorised by ANERT. Any sum of money due and payable to the successful tenderer or contractor from ANERT shall be adjusted against any sum of money due to ANERT from him under any other contracts.
- 10.16 Every notice hereby required or authorised to be given may be either given to the contractor personally or left at his residence or last known place of abode or business, or may be handed over to his agent personally, or may be addressed to the contractor by post at his usual or last known place of abode or business and if so addressed and posted, shall be deemed to have been served on the contractor on the date on which in the ordinary course of post, a letter so addressed and posted would reach his place of abode or business.
- 10.17 The tenderer shall undertake the installation and commissioning of the system according to the standards and specification.
- 10.18 No representation for enhancement of rate once accepted will be considered.
- 10.19 Special conditions, if any, of the tenderers attached with the tenders will not be applicable to the contract unless they are expressly accepted in writing by the purchaser.
- 10.20 The tenderer should send along with this tender an agreement executed and signed in Kerala Stamp Paper of value Rs.200/-. A specimen form of agreement is given as Annexure A to this tender. Tenders without the agreement in stamped paper will be rejected outright.
- 10.21 Conditions in the technical document, technical specifications and special conditions of this tender document would override these general conditions, wherever applicable.
- 10.22 ANERT, by notice sent to the Supplier, may terminate the contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination be for ANERT's convenience, the extent to which performance of the

Supplier under the contract is terminated, and the date upon which such termination becomes effective.

- 10.23 The E-tender shall be opened at the time and date announced in the tender notice, and the price bid will be evaluated as intimated vide auto generated email only.
- 10.24 In case any difference or dispute arises in connection with the contract, all legal proceedings relating to the matter shall be instituted in the Court within whose jurisdiction the CEO, ANERT voluntarily resides.
- 10.25 The Courts situated at the place where the headquarters of ANERT is situated viz, Thiruvananthapuram alone will have jurisdiction to entertain civil suits and all other legal pertaining to this contract.

11. SPECIAL CONDITIONS

- 11.1 Each bidder should submit only one (1) bid. Any bidder who submits/participates in more than one bid for the work shall be disqualified.
- 11.2 The tenders will be opened at the date and time advised in the Bidding Document. If the due date for receiving and opening the tender happens to be declared holiday, then the tender will be received and opened on the very next day, for which no prior intimation will be given.
- 11.3 If the bidder has NOT submitted the requisite EMD OR Agreement, OR if the price bid is not submitted along with the tender, such tenders will be summarily rejected.
- 11.4 During the tender evaluation, ANERT may seek more clarifications/details from any or all of the tenderers, if felt necessary.
- 11.5 The price bids of the tenderers, which submitted the required documents only will be opened and the L1 bidder will be awarded the work of supply and installation of items after fulfilling all the requirements.
- 11.6 If found essential, ANERT reserves the right, in the interest of completion of work within the time limit, to award portion/portions of the Work order to next higher bidders, called for negotiation in the increasing order of their price offers, if they agree to supply at the L1 price.

- 11.7 **The rate quoted should be all-inclusive including delivery of materials at the location to be specified, and the cost of materials and labour for the civil works, installation and commissioning, Warranties, Application fees, O&M charges, GST and all other expenses.**
- 11.8 The tender offer shall be kept valid for acceptance for a period of 6 months from the date of opening of bid. The offers with lower validity period are liable for rejection.
- 11.9 The evaluation of the price bid will be based on the grand total of all-inclusive amount quoted excluding GST.

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd.,
Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 2: SCHEDULE AND SCOPE OF WORKS

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

REQUEST FOR SELECTION (RFS)

FOR

12. Implementation of 2 MWp Grid Connected Solar PV System to be installed at multiple locations within the Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram

- 12.1 ANERT, therefore, invites bids from eligible bidders to participate in the Request for Selection in the e-tendering platform for Design, Manufacture, Supply, Erection, Testing and Commissioning including Warranty, Operation and Maintenance of Solar PV Power System at proposed location.
- 12.2 For the implementation of above-mentioned work, Bidders should submit their bid proposal online complete in all aspect on or before Last date of Bid Submission.
- 12.3 Bid documents, which include Eligibility Criteria, Technical Specifications, various Conditions of Contract, and Formats etc., can be downloaded from website www.anert.gov.in. It is mandatory to download official copy of E-TENDER Document from Kerala Tenders Portal. Any amendment(s)/corrigendum/clarification(s) with respect to this Bid shall be uploaded on www.etenders.kerala.gov.in. The Bidder should regularly check for any Amendment(s)/Corrigendum/Clarification(s) on the above website only.
- 12.4 The scope of work includes:
- 12.4.1 Design, Engineering, Manufacture, Supply, Storage, Civil work, Erection, Testing & Commissioning of the Grid connected PV Project including Power evacuation, Operation and Maintenance (O & M) of the project for a period of 10 years for after commissioning of project.

13. DEFINITIONS & ABBREVIATIONS

a) In this “Bid / RFS Document” the following words and expression will have the meaning as herein defined where the context so admits:

13.1 **“Affiliate”** shall mean a company that either directly or indirectly

- a. controls or
 - b. is controlled by or
 - c. is under common control with
- 13.2 A Bidding Company and **“control”** means ownership by one company of at least twenty-six percent (26%) of the voting rights of the other company.
- 13.3 **“B.I.S”** shall mean specifications of Bureau of Indian Standards (BIS);
- 13.4 **“Bid”** shall mean the Techno Commercial and Price Bid submitted by the Bidder along with all documents/credentials/attachments annexure etc., in response to this RFS, in accordance with the terms and conditions hereof.
- 13.5 **“Bidder/Bidding Company”** shall mean Bidding Company submitting the Bid. Any reference to the Bidder includes Bidding Company / including its successors, executors and permitted assigns as the context may require;
- 13.6 **“Bid Deadline”** shall mean the last date and time for submission of Bid in response to this RFS as specified in the Tender Abstract;
- 13.7 **“Bid Capacity”** shall mean capacity offered by the bidder in his Bid.
- 13.8 **“CEA”** shall mean Central Electricity Authority.
- 13.9 **“Chartered Accountant”** shall mean a person practicing in India or a firm whereof all the partners practicing in India as a Chartered Accountant(s) within the meaning of the Chartered Accountants Act, 1949;
- 13.10 **“Competent Authority”** shall mean (Designation of Competent Authority) of [Name of the Organization] himself and/or a person or group of persons nominated by MD for the mentioned purpose herein;
- 13.11 **“Commissioning,”** means Successful operation of the Project / Works by the Contractor, for carrying out Performance Test(s) as defined in RFS.
- 13.12 **“Company”** shall mean a body incorporated in India under the Companies Act, 1956 or Companies Act, 2013 including any amendment thereto;
- 13.13 **Commercial Operation Date:** The date of successful conducting field acceptance tests and injection of power at delivery point shall be the "Commercial Operation Date"
- 13.14 **“Capacity Utilization Factor” (CUF)** shall mean the ratio of actual energy generated by SPV project over the year to the equivalent energy output at its

rated capacity over the yearly period.

$$CUF = \frac{\text{actual annual energy generated from the plant in kWh}}{(\text{installed plant capacity in kW} * 365 * 24)}$$

13.15 **"Eligibility Criteria"** shall mean the Eligibility Criteria as set forth in Clause 16 of this RFS;

13.16 **"Financially Evaluated Entity"** shall mean the company which has been evaluated for the satisfaction of the Financial Eligibility Criteria set forth in Clause 16.3 hereof;

13.17 **"IEC"** shall mean specifications of International Electro-Technical Commission;

13.18 **"kWp"** shall mean kilo-Watt Peak;

13.19 **"kWh"** shall mean kilo-Watt-hour;

13.20 **"MNRE"** shall mean Ministry of New and Renewable Energy, Government of India;

13.21 **"O&M"** shall mean Operation & Maintenance of Solar PV system for PPA period.

13.22 **"Owner of the project"** shall mean MILMA Ernakulam Dairy, shall mean anyone who has ownership (including lease ownership also) of the land / roof and is the legal owner of all equipments of the project. Owner of the project can enter into a PPA with the consumer (s) of power for supply of solar power for agreed time (years) from the date of Commissioning of project.

13.23 **"Project Cost / Project Price"** shall mean the price offered by the Bidder for the Scope of work as per RFS document for the site.

13.24 **"Project capacity"** means Capacity in kWp offered by the Bidder. The project capacity specified is on "DC" output Side only.

13.25 **"Performance Ratio" (PR) means**

"Performance Ratio" (PR) means the ratio of plant output versus installed plant capacity at any instance with respect to the radiation measured.

$$PR = \frac{\text{Measured output in kW}}{\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2)}$$

13.26 **"Parent"** shall mean a company, which holds more than 51% equity either directly or indirectly in the Bidding Company or Project Company or a Member in a Consortium developing the Project

13.27 **"Project Company"** shall mean Company incorporated by the bidder as per

Indian Laws in accordance with Clause no 16.1.

13.28 **"Price Bid"** shall mean BoQ, containing the Bidder's quoted Price as per the Volume- IV of this RFS;

13.29 **"Qualified Bidder"** shall mean the Bidder(s) who, after evaluation of their Techno Commercial Bid stand qualified for opening and evaluation of their Price Bid;

13.30 **"RFS"** shall mean Request for Selection (RFS)/Bid document/Tender document

13.31 **"Statutory Auditor"** shall mean the auditor of a Company appointed under the provisions of the Companies Act, 1956 or under the provisions of any other applicable governing law;

13.32 **"Successful Bidder(s) /Contractor/Project Developers(s)"** shall mean the Bidder(s) selected by Owner pursuant to this RFS for Implementation of Grid Connected Ground mounted Solar PV System as per the terms of the RFS Documents, and to whom an Allocation Letter has been issued;

13.33 **"Site"** shall mean the project location at the address mentioned below.

MILMA Ernakulam Dairy, Thrippunithura PO., Ernakulam-682 301

13.34 **"SNA"** shall mean State Nodal Agency, ANERT.

13.35 **"Tendered Capacity"** shall mean the Total aggregate capacity in MW proposed to be tendered by ANERT to the Successful Bidder through this bidding process as per terms and conditions specified therein;

13.36 **"Ultimate Parent"** shall mean a company, which owns at least more than fifty percent (51%) equity either directly or indirectly in the Parent and Affiliates.

13.37 **"Wp"** shall mean Watt Peak.

13.38 **2MWp** for the purpose of conversion in **kWp** shall be considered as 2000kWp.

b) INTERPRETATIONS

- i. Words comprising the singular shall include the plural & vice versa
- ii. An applicable law shall be construed as reference to such applicable law including its amendments or re-enactments from time to time.
- iii. A time of day shall save as otherwise provided in any agreement or document be construed as a reference to Indian Standard Time.
- iv. Different parts of this contract are to be taken as mutually explanatory and

supplementary to each other and if there is any differentiation between or among the parts of this contract, they shall be interpreted in a harmonious manner to give effect to each part.

- v. The table of contents and any headings or sub headings in the contract has been inserted for case of reference only & shall not affect the interpretation of this agreement.

INTRODUCTION, BID DETAILS AND INSTRUCTIONS TO THE BIDDERS

14. INTRODUCTION

- 14.1 ANERT, on behalf of Smart City Thiruvananthapuram Ltd, hereby invites interested companies to participate in the bidding process for the selection of Successful Bidder(s) for implementation of grid-connected Solar Photovoltaic Project under CAPEX model in Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram.
- 14.2 The Bidders are advised to read carefully all instructions and conditions appearing in this document and understand them fully. All information and documents required as per the bid document must be furnished. Failure to provide the information and / or documents as required may render the bid technically unacceptable.
- 14.3 The bidder shall be deemed to have examined the bid document, to have obtained his own information in all matters whatsoever that might affect the carrying out the works in line with the scope of work specified elsewhere in the document at the offered rates and to have satisfied himself to the sufficiency of his bid. The bidder shall be deemed to know the scope, nature and magnitude of the works and requirement of materials, equipment, tools and labour involved, wage structures and as to what all works, he has to complete in accordance with the bid documents irrespective of any defects, omissions or errors that may be found in the bid documents.

15. BID DETAILS

- 15.1 The bidding process under this RFS is for a 2 MWp cumulative capacity of SPV Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram. This includes 1.5 MWp installation to be done in Ground and 500 kWp in the Rooftop of various buildings within TTL campus.

BID QUALIFICATION REQUIREMENTS

16. ELIGIBILITY CRITERIA

16.1 General

- i. The Bidder should be either a body incorporated in India under the Companies Act, 1956 or 2013 including any amendment thereto, Sole Proprietorship, Partnership company and engaged in the business of Solar Power.
- ii. A copy of certificate of incorporation shall be furnished along with the bid in support of above.

16.2 Technical Eligibility Criteria:

The Bidder should have installed & commissioned Grid connected Solar PV Power Project having a capacity of single plant not less than 1 MW and cumulative capacity of above 5 MW, which should have been commissioned at least two months prior to Techno-Commercial Bid Opening date. The list of projects commissioned at least 2 months prior to Techno-Commercial Bid Opening date, indicating whether the project is grid connected, along with a copy of the Commissioning certificate and Work order / Contract / Agreement/ from the Client/Owner shall be submitted in support of Clause 16.2.

16.3 Financial eligibility criteria

The Bidder should have an Annual Turnover or Net worth as indicated below.

- i. The Minimum Average Annual turnover of Rupees 8 Crores in any two of the last 5 financial years preceding the Bid Deadline subject to the condition that the Bidder should at least have completed two financial years.

OR

- ii. Net worth equals to or greater than the value calculated at rate of Rs. 10 Crores. The Computation of Net worth shall be based on unconsolidated audited annual accounts of the last financial year immediately preceding the Bid Deadline. Share

premium can be included in the Net-worth calculation in case of listed companies in India only.

The formula of calculation of net-worth shall be as follows:

Net-worth = (Paid up share capital) + {(Free reserves - Share premium) + Share premium of listed companies}} - (Revaluation of reserves)- (Intangible assets) - (Miscellaneous expenditure to the extent not written off and carry forward losses).

For the purposes of meeting financial requirements, only unconsolidated audited annual accounts shall be used. Bidders shall furnish documentary evidence as per the Format - 5, duly certified by Authorized Signatory and the Statutory Auditor / Practising Chattered Accountant of the Bidding Company in support of their financial capability.

16.4 Bid submission by the bidder

16.4.1 The Bidder shall submit the information and/or documents as per the formats specified in Volume-IV.

16.4.2 Strict adherence to the formats wherever specified, is required. Wherever, information has been sought in specified formats, the Bidder shall refrain from referring to brochures /pamphlets. Non-adherence to formats and / or submission of incomplete information may be a ground for declaring the Bid as non-responsive. Each format has to be duly signed and stamped by the authorized signatory of the Bidder.

16.4.3 The Bidder shall furnish documentary evidence in support of meeting Eligibility Criteria as indicated in Clause no. 16.1, 16.2 and 16.3 to the satisfaction of ANERT. They shall also furnish unconsolidated/consolidated audited annual accounts in support of meeting financial requirement, which shall consist of balance sheet, profit and loss account, profit appropriation account, auditors report, etc., as the case may be of Bidding Company or Financially Evaluated Entity for any of the last three(3) financial years immediately preceding the Bid Deadline which are used by the bidder for the purpose of calculation of Annual Turnover or of last Financial Year in case of Net Worth.

16.4.4 In case the annual accounts for the latest financial year are not audited and therefore the bidder cannot make it available, the applicant shall give certificate to this effect from their CEOs. In such a case, the Applicant shall provide the Audited Annual Reports for 3 (Three) years preceding the year or from the date of incorporation if less than 3 years for which the Audited Annual Report is not being provided.

16.5 Amendments to RFS

16.5.1 At any time prior to the deadline for submission of Bids, ANERT may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, modify the RFS document by issuing clarification(s) and/or amendment(s).

16.5.2 The clarification(s) / amendment(s) (if any) may be notified on Kerala Tenders website www.etenders.kerala.gov.in at least Two (2) days before the proposed date of submission of the Bid. If any amendment is required to be notified within Two (2) days of the proposed date of submission of the Bid, the Bid Deadline may be extended for a suitable period.

16.5.3 ANERT will not bear any responsibility or liability arising out of non-receipt of the information regarding Amendments in time or otherwise. Bidders must check the website for any such amendment before submitting their Bid.

16.5.4 In case any amendment is notified after submission of the Bid (prior to the opening of Techno-Commercial Bid.

16.5.5 All the notices related to this Bid which are required to be publicized shall be uploaded on website www.etenders.kerala.gov.in

16.6 Bidding process

16.6.1 Bid formats

The Bid shall comprise of the following:

(A) Cover I - Techno-Commercial documents

i. Covering Letter as per the prescribed Format-1

- ii. Copy of PAN and TAN certificates of Bidding company
- iii. Original power of attorney issued by the Bidding Company in favour of the authorized person signing the Bid, in the form attached hereto as Format-2 or standard power of attorney in favour of authorized person signing the Bid. (Power of Attorney must be supplemented by Board Resolution to above effect for the company). However, ANERT may accept general Power of Attorney executed in favour of Authorised signatory of the Bidder, if it shall conclusively establish that the signatory has been authorized by the Board of CEOs to execute all documents on behalf of the Bidding Company.
- iv. General particulars of bidders as per Format-3
- v. Document in support of meeting Eligibility Criteria as per Clause no. 16.1 & 16.2.
- vi. Certificates of incorporation of Bidding company
- viii. Details for meeting Financial Eligibility Criteria as per Clause no. 16.3 along with documentary evidence for the same as per Format -4
- ix. Board resolution for Authorised signatory
- x. Signed and stamped Copy of RFS Documents including amendments & clarifications by Authorised signatory on each page.

(B) Cover II- Price bid

The Bidder shall inter-alia take into account the following while preparing and submitting the Price Bid digitally signed by the authorized signatory. The Bidder shall submit Price Bid in excel BoQ file downloaded from the e-tender website.

16.7 Validity of Bid

- 16.7.1 The bid and the Price Schedule included shall remain valid for a period of 3 months from the date of techno-commercial bid opening, with bidder having no right to withdraw, revoke or cancel his offer or unilaterally vary the offer submitted or any terms thereof. In case of the bidder revoking or cancelling his offer or varying any term & conditions in regard thereof or not accepting letter of allocation, ANERT shall forfeit the Bid Bond furnished by him.

16.7.2 In exceptional circumstances when letter of acceptance is not issued, ANERT may solicit the Bidder's consent to an extension of the period of validity. The request and the responses thereto shall be made in writing. The EMD provided shall also be suitably extended. A Bidder may refuse the request without forfeiting its Bid Bond. A Bidder granting the request will neither be required nor permitted to modify its Bid in any manner.

16.8 Cost of bidding

The bidder shall bear all the costs associated with the preparation and submission of his offer, and ANERT will in no case be responsible or liable for those costs, under any conditions. The Bidder shall not be entitled to claim any costs, charges and expenses of and incidental to or incurred by him through or in connection with his submission of bid even though ANERT may elect to modify / withdraw the invitation of Bid.

16.9 Performance Security / Performance Bank Guarantee (PBG)

16.9.1 Within 30 days from the date of issue of Allocation letter, Successful Bidder shall furnish the Performance Security @ 3% of the total contract value.

16.9.2 The Performance Security shall be denominated in Indian Rupees and shall be in one of the following forms:

- a. A demand draft, or a bank guarantee in the format given in Format-4 from any nationalised bank.
- b. Be confirmed for payment by the branch of the bank giving the bank guarantee at Thiruvananthapuram.

16.9.3 The PBG shall be forfeited as follows without prejudice to the Bidder being liable for any further consequential loss or damage incurred to ANERT, if the Successful Bidder is not able to commission the projects to the satisfaction of ANERT.

16.9.4 The Performance Security shall be valid for a minimum period of 6 months from the date of issue of LoA

16.10 Right to withdraw the RFS and to reject any bid

16.10.1 This RFS may be withdrawn or cancelled by ANERT at any time without assigning any reasons thereof. ANERT further reserves the right, at its

complete discretion, to reject any or all of the Bids without assigning any reasons whatsoever and without incurring any liability on any account.

16.10.2 ANERT reserve the right to interpret the Bid submitted by the Bidder in accordance with the provisions of the RFS and make its own judgment regarding the interpretation of the same. In this regard ANERT shall have no liability towards any Bidder and no Bidder shall have any recourse to ANERT with respect to the selection process. ANERT shall evaluate the Bids using the evaluation process specified in Volume - III, at its sole discretion. ANERT's decision in this regard shall be final and binding on the Bidders.

16.10.3 ANERT reserves its right to vary, modify, revise, amend or change any of the terms and conditions of the Bid before submission. The decision regarding acceptance or rejection of bid by ANERT will be final.

16.11 Zero Deviation

This is a ZERO Deviation Bidding Process. Bidder is to ensure compliance of all provisions of the Bid Document and submit their Bid accordingly. Tenders with any deviation to the bid conditions shall be liable for rejection.

16.12 Examination of Bid document

16.12.1 The Bidder is required to carefully examine the Technical Specification, terms and Conditions of Contract, and other details relating to supplies as given in the Bid Document.

16.12.2 The Bidder shall be deemed to have examined the bid document including the agreement/contract, to have obtained information on all matters whatsoever that might affect to execute the project activity and to have satisfied himself as to the adequacy of his bid. The bidder shall be deemed to have known the scope, nature and magnitude of the supplies and the requirements of material and labour involved etc. and as to all supplies he has to complete in accordance with the Bid document.

16.12.3 Bidder is advised to submit the bid on the basis of conditions stipulated in the Bid Document. Bidder's standard terms and conditions if any will not be considered. The cancellation / alteration / amendment / modification in Bid documents shall not be accepted by ANERT.

16.12.4 Bid not submitted as per the instructions to bidders is liable to be rejected. Bid shall confirm in all respects with requirements and conditions referred in this bid document.

SCOPE OF WORK

17. SCOPE OF WORKS

The scope includes the Supply, Installation, Testing and Commissioning of Rooftop On-Grid SPV power plants. All the necessary approvals from KSEBL/Electrical Inspectorate, feasibility study, necessary civil work, Mounting of Module Structures, PV Module Installation, Inverter Installation, DC/AC Cabling and interconnections, Installation of Lightning Arresters and Earthing System as per the standards, Arranging all the necessary inspections from KSEBL/Electrical Inspectorate/ANERT District Office as part of Pre-Commissioning, if any, Commissioning of the PV Power Plant along with warranty and Operation and Maintenance (O&M) of the project under CAPEX model for 10 years after Commercial Operation Date (COD) are coming under the scope of the bidder.

The total project comprises of 500 kWp Rooftop Solar Power plant and 1500 kWp Ground Mounted Solar Power plant. The successful bidder reserves the right to finalise the capacity being installed at these locations identified within the area available with due approval of ANERT/TTL authorities.

17.1 LOCATION DETAILS

The location of installation of the proposed 2 MWp Solar Power plant is at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala.

Site Name	Travancore Titanium Products Ltd., Kochuveli
Area available	Rooftop (Various buildings as listed below) and Ground of area 13000 Sqm.
District	Thiruvananthapuram
State	Kerala
Latitude	8°29'57.73"N
Longitude	76°54'5.13"E
Nearest National Highway	NH-66
Nearest Village/Town	Veli

Nearest Railway Station	Kochuveli (3 km from the site)
Nearest Airport	Trivandrum International Airport (5 km from the site)
Nearest KSEB Substation	Within the Campus

The Proposed 1.5 MW Solar Power Plant is to be installed on the area marked below

The balance 500 kWp is to be installed at the Rooftops of Buildings listed below:

#	Name of Block / Building	Capacity (kW)
1	Canteen	200
2	Locker Room	75
3	CLSS	75
4	Lime Storage Area	50
5	Filter Press	50
6	Time Office	25
7	66 kV Substation	25
TOTAL		500

The bidders are to quote the per kW cost for the successful Supply, Testing, Installation and Commissioning of the Power plants as per the capacity mentioned for Rooftop as well as Ground mounted system. The full work will be awarded to the lowest bidder for the 2000 kWp. The cost of O&M will not form part of the selection of the L1 bidder.

17.2 ADDITIONAL WORKS

- i. The successful bidder is to borne the fee for KSEBL feasibility, Registration and all other expenses. The additional costs for site specific cabling works, earthing, mounting structure modifications, required civil works etc to meet the technical criteria as detailed in this document are under the scope of the bidder.
- ii. The scope of enhancing load, phase conversion, changing of CTs, PT, modification of Panel boards, extension of bus bars, replacement of metering panel boards etc wherever necessary is under the scope of the bidder. The rates for the same are to be considered in the bid for each site.
- iii. In case of installations to be made in sites with HT connection, the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items to be quoted along with the bid.
- iv. It is mandatory that the bidders are to visit the sites and quote the rates considering all the requirements as mentioned in this tender document. No requests for revision of rates will be entertained. In case, the successful bidder is not undertaking the specific work, the work will be cancelled and disciplinary proceedings will be initiated against the bidder and all payments due will be withheld. Hence, Bidders are requested to visit the site before quoting and the rate for successful commissioning in all aspects is to be quoted.
- v. **The rate quoted should be all inclusive including delivery of materials, the cost of materials and labour for the civil works, Installation and Commissioning, 10-year Warranty, fee for approval from the KSEBL, Electrical Inspectorate if any, Solar Meter, Remote monitoring facility, Insurance, GST and all other expenses deemed necessary for the proper**

implementation of the conditions and specification as in-incorporated in the tender.

- vi. The Operation and Maintenance of the Power plant for the whole period of warranty will be duty of the vendor. The rates for O&M per year need to be quoted in the BoQ file provided.**
- vii. The Component wise split up of the costs in percentage for each capacity is to be included as part of the technical bid (included as format 6).**
- viii. Any other work required for the successful commissioning of the power plant which are not mentioned in this document and are required as per prevailing laws & regulations in the country**

17.3 SUBMITTALS

On commencement of the Project, the Contractor shall submit the following to ANERT:

- a. Prior to the technical submittals, the contractor shall submit detailed baseline program and methodology indicating the proposed overall schedule for documentation such as calculations, shop/ working drawings, plan/ procedures and records. Submission of samples, process of fabrication / delivery to site storage yard for the approval of the Employer. Also, Contractor shall submit Method statements and Quality Assurance plan for each activity to be done and get approval from ANERT before commencing the work. Contractor shall maintain the necessary Quality and Quantity documentation. All the documents shall be submitted to Employer for their review and records.
- b. Detailed work procedures and schedules shall be submitted by contractor at least one month before start of work and shall get necessary approval from ANERT authorities and various entities. If required meeting shall be called to settle all the open issues. Contractor to ensure that all issues are closed one month prior to start of work.
- c. Complete fabrication drawings, materials list, cutting lists, bolt lists, welding schedules and QC schedules, based on the design drawing furnished to him and in accordance with the approved schedule. It is highlighted that structural steel

members, dimensions thereof indicated in tender drawings are tentative only, and may be modified during final design stage.

- d. Results of any tests, as and when conducted and as required by Employer.
- e. A detailed list of all constructional Plant & Equipment, such as cranes, derricks, winches, welding sets etc. their makes, model, present condition and location, available to the contractor and the ones he will employ on the job to maintain the progress of work in accordance with the contract.
- f. The total number of experienced personnel of each category, like fitters, welders, riggers etc., which he intends to deploy on the project.
- g. The contractor shall submit complete design calculations for any alternative sections proposed by him, for the approval of Employer and records of Owner.

18. PROJECT COST

- 18.1 The Project cost shall include all the costs related to above Scope of Work. Bidder shall quote for the entire facilities on a “single responsibility” basis such that the total Bid Price covers all the obligations mentioned in the Bidding Documents in respect of Design, Supply, Erection, Testing and Commissioning including Warranty, Operation & Maintenance for a period 10 years under CAPEX model, goods and services including spares required if any during O&M period. The Bidder has to take all permits, approvals and licenses, Insurance etc., provide training and such other items and services required to complete the scope of work mentioned above.
- 18.2 The Project cost shall remain firm and fixed and shall be binding on the Successful Bidder till completion of work. No escalation will be granted on any reason whatsoever. The bidder shall not be entitled to claim any additional charges, even though it may be necessary to extend the completion period for any reasons whatsoever.
- 18.3 The cost shall be inclusive of all duties and taxes, insurance etc. The prices quoted by the firm shall be complete in all respect and no price variation /adjustment shall be payable during the 10-year period.
- 18.4 The Operation & Maintenance of Solar Photovoltaic Power Plant would include wear, tear, overhauling, machine breakdown, insurance, and replacement of

defective modules, invertors / Power Conditioning Unit (PCU), spares, consumables & other parts for a period of 10 years.

- 18.5 The cost shall be specified in sanction letter based on Successful Bidder's quote for the project. The project cost shall be in accordance with all terms, conditions, specifications and other conditions of the Contract as accepted by ANERT and incorporated into the sanction letter.

19. INSURANCE

- 20.1 The Bidder shall be responsible and take an Insurance Policy for transit-cum-storage-cum-erection for all the materials to cover all risks and liabilities for supply of materials on site basis, storage of materials at site, erection, testing and commissioning. The bidder shall also take appropriate insurance during O&M period.
- 20.2 The Bidder shall also take insurance for Third Party Liability covering loss of human life, engineers and workmen and also covering the risks of damage to the third party/material/equipment/properties during execution of the Contract. Before commencement of the work, the Bidder will ensure that all its employees and representatives are covered by suitable insurance against any damage, loss, injury or death arising out of the execution of the work or in carrying out the Contract. Liquidation, Death, Bankruptcy etc., shall be the responsibility of bidder.

20. WARRANTIES AND GUARANTEES

The Bidder shall warrant that the goods supplied under this contract are new, unused, of the most recent or latest technology and incorporate all recent improvements in design and materials. The bidder shall provide system warrantee covering the rectification of any and all defects in the design of equipment, materials and workmanship including spare parts for a period of the 10-years from the date of commissioning. The successful bidder has to transfer all the Guarantees /Warrantees of the different components to the Owner of the project. The responsibility of operation of Warrantee and Guarantee clauses and Claims/ Settlement of issues arising out of said clauses shall be

joint responsibility of the Successful bidder and the owner of the project and ANERT will not be responsible in any way for any claims whatsoever on account of the above.

21. TYPE AND QUALITY OF MATERIALS AND WORKMANSHIP

- 22.1 The Design, Engineering, Manufacture, Supply, Installation, Testing and Performance of the equipment shall be in accordance with latest appropriate IEC/Indian Standards as detailed in the Vol- III (Technical specifications) of the bid document. Where appropriate Indian Standards and Codes are not available, other suitable standards and codes as approved by the MNRE / authorised Government agency shall be used.
- 22.2 The specifications of the components should meet the technical specifications mentioned in Volume III.
- 22.3 Any supplies which have not been specifically mentioned in this Contract but which are necessary for the design, engineering, manufacture, supply & performance or completeness of the project shall be provided by the Bidder without any extra cost and within the time schedule for efficient and smooth operation and maintenance of the SPV plant.

22. OPERATION & MAINTENANCE

- i. The bidder shall be responsible for Operation and Maintenance of the Solar PV system for the 10-year period, during which ANERT will monitor the project for effective performance in line with conditions specified elsewhere in the bid document. During this period, the bidder shall be responsible for supply of all spare parts as required from time to time for scheduled and preventive maintenance, major overhauling of the plant, replacement of defective modules, inverters, PCU's etc and maintaining log sheets for operation detail, deployment of staff for continuous operations and qualified engineer for supervision of O&M work, complaint logging & its attending.
- ii. If any Operation & Maintenance issues are not resolved within 7 days, then complaint may be raised to ANERT, pursuant to which a penalty as decided by CEO, ANERT will be imposed.

- iii. If the outage of the plant is more than 30 days continuously, then the 50% PBG amount shall be encashed by ANERT.
- iv. If the outage is exceedingly more than 60 days then complete PBG amount shall be encashed by Owner. (This will be applicable till 10 years of O&M as per the Scope of the RFS.) Legal proceedings and other as deemed necessary by CEO, ANERT will be initiated against the defaulted contractor.

23. METERING AND GRID CONNECTIVITY

Metering and grid connectivity of the solar PV system under this project would be the responsibility of the Bidder in accordance with the prevailing guidelines of the concerned DISCOM and / or CEA (if available by the time of implementation). The bidder need to connectivity and the entire responsibility lies with bidder only. This particular power plant will be connected to the 11 kV bus at the 66 kV Substation under Captive consumer category.

24. PLANT PERFORMANCE EVALUATION

The successful bidder shall be required to meet minimum guaranteed generation with Performance Ratio (PR) at the time of commissioning and related Capacity Utilization Factor (CUF) as per the GHI levels of the location during the O&M period. PR should be shown minimum of 75% at the time of inspection for initial commissioning acceptance. Minimum CUF shall not be less than 21% for a period of 10 years. The bidder should send the periodic plant output details to ANERT for ensuring the CUF. The PR will be measured at Inverter output level during peak radiation conditions.

25. PROGRESS REPORT

The bidder shall submit the progress report monthly to ANERT in Prescribed Proforma. ANERT will have the right to depute his/their representatives to ascertain the progress of contract at the premises of works of the bidder.

26. SCHEDULE OF SUPPLY

- i. The items should be delivered and installed at the sites of institution for which work order shall be given and specified by ANERT, under prior intimation and supervision of ANERT. The list of sites is listed below:
- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next bidder and penalty as decided by ANERT will be levied.

#	Capacity of Solar Plant	Material Delivery (Days)	Completion Period (Days)
1	2 MWp	25	45

- iii. For any delay in Installation and Commissioning beyond the period mentioned above, the ANERT will charge penalty of 0.5% of the order value/week or part thereof, subject to the cost not exceeding 10% of the total cost. Order will be cancelled if the delay of service is more than this time period and work will be issued to the second successful bidder
- iv. Bidders are to submit their quotes only after visiting the site and the details of additional works required for the successful commissioning of the power plant is to be mentioned in the technical bid. No additional amount for any works will be provided under any circumstance, even if the site requires additional work other than quoted by the bidder. Hence, special care must be taken while submitting the bids.
- v. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. The test certificates and reports of the inverters being used for the project must be submitted along with the bid. ANERT reserves the right to reject the bid based on the non-conformity of the inverter being supplied.
- vi. The successful bidder shall submit the detailed BoM and the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of the bidder.

- vii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.
- viii. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the PAC subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the PAC subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

27. PAYMENT

- 27.1 No advance payment will be given. All the documents submitted should be certified by the concerned personnel of ANERT.
- 27.2 The quotes for the Design, Supply, Installation & Commissioning including 10 years of warranty (EPC Part) to be provided by the bidders. The L1 bidder will be selected on the basis of their quotes on the EPC part with 10-year warranty and the O&M quote will not be part of bid evaluation.
- 27.3 The terms of payment shall be:

27.3.1 EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter etc) at the site/warehouse, a maximum of 60% of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of installation of the power plant, a maximum of 20% of the contract value can be released as Running Account Bills of min 10% of the

contract value. The supplier shall submit the invoice for the materials supplied and all documents related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The second part invoice can be raised only after submitting application for energization to the Electrical Inspectorate. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.

- iii. After the Inspection and Approval of the Electrical Inspectorate, 5% of the contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
- iv. The date of Energisation to the Grid by the DISCOM will be considered as the official Date of Commissioning (CoD) of the project and this will be treated as the commissioning of the system. On commissioning of the grid connected system, 5% of the contract value will be released after proving the Performance ratio (AC). The PR report as per standard is to be provided for release of the amount.
- v. The balance 10% shall be retained as performance security and will be released in five equal parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and last 2% after the 10 years of warranty. For releasing these payment, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. **The plant shall be handed over at the end of 10 years after commissioning after proving the performance ratio (AC).** This period will be considered only from the date of commissioning.
- vi. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

27.3.2 Maintenance Payment

- i. The amount shall be released on annual basis after completion of the period of the previous year. The start of maintenance period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

27.4 Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

28. PROJECT INSPECTION

The project progress will be monitored by ANERT and the projects will be inspected for quality at any time during commissioning or after the completion of the project either by officer(s) from ANERT or any authorized agency/ experts.

29. APPLICABLE LAW

The Contract shall be interpreted in accordance with the laws of the Union of India and in the Jurisdiction of Thiruvananthapuram, Kerala.

30. SETTLEMENT OF DISPUTE

29.1 If any dispute of any kind whatsoever arises between ANERT and Successful bidder in connection with or arising out of the contract including without prejudice to the generality of the foregoing, any question regarding the existence, validity or termination, the parties shall seek to resolve any such dispute or difference by mutual consent. If the same cannot be resolved, the courts in the jurisdiction will be approached and finalised by the appropriate court after legal proceedings.

31. FORCE MAJEURE

30.1 Notwithstanding the provisions of clauses contained in this RFS document; the contractor shall not be liable to forfeit (a) Security deposit for delay and (b)

termination of contract; if he is unable to fulfill his obligation under this contract due to force majeure conditions.

30.2 For purpose of this clause, "Force Majeure" means an event beyond the control of the contractor and not involving the contractor's fault or negligence and not foreseeable, either in its sovereign or contractual capacity. Such events may include but are not restricted to Acts of God, wars or revolutions, fires, floods, epidemics, quarantine restrictions and fright embargoes etc. Whether a "Force majeure" situation exists or not, shall be decided by ANERT and its decision shall be final and binding on the contractor and all other concerned.

30.3 In the event that the contractor is not able to perform his obligations under this contract on account of force majeure, he will be relieved of his obligations during the force majeure period. In the event that such force majeure extends beyond six months, ANERT has the right to terminate the contract in which case, the security deposit shall be refunded to him.

30.4 If a force majeure situation arises, the contractor shall notify ANERT in writing promptly, not later than 14 days from the date such situation arises. The contractor shall notify ANERT not later than 3 days of cessation of force majeure conditions. After examining the cases, ANERT shall decide and grant suitable additional time for the completion of the work, if required.

32. LANGUAGE

All documents, drawings, instructions, design data, calculations, operation, maintenance and safety manuals, reports, labels and any other data shall be in English Language. The contract agreement and all correspondence between ANERT and the bidder shall be in English language.

33. OTHER CONDITIONS

32.1 The Successful bidder shall not transfer, assign or sublet the work under this contract or any substantial part thereof to any other party without the prior consent of ANERT in writing.

32.2 The Successful bidder shall not display the photographs of the work and not take advantage through publicity of the work without written permission of ANERT.

32.3 The Successful bidder shall not make any other use of any of the documents or information of this contract, except for the purposes of performing the contract.

32.4 Successors and Assigns:

In case ANERT or Successful bidder may undergo any merger or amalgamation or a scheme of arrangement or similar re-organization & this contract is assigned to any entity (ies) partly or wholly, the contract shall be binding mutatis mutandis upon the successor entities & shall continue to remain valid with respect to obligation of the successor entities.

32.5 Severability:

It is stated that each paragraph, clause, sub-clause, schedule or annexure of this contract shall be deemed severable & in the event of the unenforceability of any paragraph, clause sub-clause, schedule or the remaining part of the paragraph, clause, sub-clause, schedule annexure & rest of the contract shall continue to be in full force & effect.

32.6 Counterparts

This contract may be executed in one or more counterparts, each of which shall be deemed an original & all of which collectively shall be deemed one of the same instruments.

32.7 Rights and Remedies under the contract only for the parties

This contract is not intended & shall not be construed to confer on any person other than the ANERT & Successful bidder hereto, any rights and / or remedies herein.

BID EVALUATION

34. BID EVALUATION

The evaluation process comprises the following four steps:

Step I - Responsiveness check of Techno Commercial Bid

Step II - Evaluation of Bidder's fulfilment of Eligibility Criteria as per Clause 16

Step III - Evaluation of Price Bid

Step IV - Successful Bidders(s) selection

I. Responsiveness check of Techno Commercial Bid

The Techno Commercial Bid submitted by Bidders shall be scrutinized to establish responsiveness to the requirements laid down in the RFS subject to Clause 16.1 and Clause 16.2. Any of the following may cause the Bid to be considered "non-responsive", at the sole discretion of ANERT:

- a. Bids that are incomplete, i.e. not accompanied by any of the applicable formats inter alia covering letter, power of attorney supported by a board resolution, applicable undertakings, format for disclosure, etc.;
- b. Bid not signed by authorized signatory and /or stamped in the manner indicated in this RFS;
- c. Material inconsistencies in the information /documents submitted by the Bidder, affecting the Eligibility Criteria;
- d. Information not submitted in the formats specified in this RFS;
- e. Bid being conditional in nature;
- f. Bid having Conflict of Interest;
- g. More than one Member of a Bidding Company using the credentials of the same Parent Company /Affiliate;
- h. Bidder delaying in submission of additional information or clarifications sought by ANERT as applicable;
- i. Bidder makes any misrepresentation.

Each Bid shall be checked for compliance with the submission requirements set forth in this RFS before the evaluation of Bidder's fulfilment of Eligibility Criteria is taken up. Clause 16.2 shall be used to check whether each Bidder meets the stipulated requirement.

33.1 Preliminary Examination

33.1.1 ANERT will examine the Bids to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed and stamped and whether the Bids are otherwise in order.

33.1.2 Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total Amount that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total amount shall be corrected. If there is a discrepancy between words and figures, the amount written in words will prevail.

II. Evaluation of Bidder's fulfilment of eligibility criteria

Evaluation of Bidder's Eligibility will be carried out based on the information furnished by the Bidder as per the prescribed Formats and related documentary evidence in support of meeting the Eligibility Criteria as specified in Clause 16.2. Non-availability of information and related documentary evidence for the satisfaction of Eligibility Criteria may cause the Bid to be non-responsive.

III. Evaluation of Price Bid

The Price Bid of only the Qualified Bidders shall be opened in presence of the representatives of such Qualified Bidders, who wish to be present, on a date as may be intimated by ANERT to the Bidders through ANERT. The evaluation of Price Bid shall be carried out based on the information furnished in the BoQ. The Price Bid submitted by the Bidders shall be scrutinized to ensure conformity with the RFS. Any Bid not meeting any of the requirements of this RFS may cause the Bid to be considered "non-responsive" at the sole decision of the ANERT.

IV. Successful Bidder(s) Selection

- i. Bids qualifying in Clause 16.2 shall only be evaluated in this stage.
- ii. The Price Bids of Qualified Bidders shall be ranked from the lowest to the highest. The lowest bidder will be declared as the successful bidder.
- iii. Letter of Acceptance (LOA): The Letter of Acceptance (LOA) shall be issued to Successful Bidder selected as per the provisions of this Clause 33
- iv. The Successful Bidder shall acknowledge the LoA and return duplicate copy with signature & stamp of the authorized signatory of the Successful Bidder to ANERT within Seven (7) days of issue of LoA.
- v. If the Successful Bidder, to whom the Letter of Acceptance has been issued does not fulfil any of the conditions specified in Bid document, ANERT reserves the right to annul/cancel the award of the Letter of Acceptance of the Successful Bidder and forfeit the Bid security.
- vi. ANERT at its own discretion, has the right to reject any or all the Bids without assigning any reason whatsoever, at its sole discretion

35. NOTIFICATION TO SUCCESSFUL BIDDERS

The name of Successful Bidder shall be notified indicating the awarded project price individually through letter of acceptance.

36. REQUIREMENT OF APPROVALS ON MAKES OF THE COMPONENTS:

The modules should be manufactured in India only. Rest of the components can be procured from any source. However, these items should meet the Technical specification and standards mentioned in RFS.

37. OPERATION OF THE SYSTEM DURING WEEKENDS AND GENERAL HOLIDAYS AND CALCULATION OF CUF:

During grid failure, the SPV system stops generating. Any instances of grid failure need to be mentioned in the monthly report and those instances need to be authorised by local DISCOM. Then the period will be excluded in calculation of CUF.

38. COMMERCIAL OPERATION DATE:

38.1 Document Submission for Issue Commissioning/ Completion Certificate:

The following documents will be deemed to form the completion documents:

- a. Project completion report from successful bidder as per ANERT format
- b. Project completion/satisfaction certificate from ANERT.

38.2 Commercial Operation Date

If the results of system acceptance testing indicate that the System is capable of generating electric energy (at full rated kWp) for 3 continuous days using such instruments and meters as have been installed for such purposes, then the power producer shall send a written notice to Employer to that effect, and the date of successful conducting such tests and injection of power at delivery point shall be the "Commercial Operation Date"

39. CORRUPT OR FRAUDULENT PRACTICES

The Successful Bidders/ Contractors should follow the highest standard of ethics during the execution of contract. In pursuance of this policy, ANERT:

39.1 defines, for the purposes of this provision, the terms set forth as follows:

- a. "corrupt practice" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the bid process or in contract execution; and
- b. "fraudulent practice" means a misrepresentation of facts in order to influence a bid process or the execution of a contract to the detriment of ANERT/Govt. scheme, and includes collusive practice among Bidders (prior to or after Bid submission) designed to establish Bid prices at artificial non-competitive levels and to deprive ANERT of the benefits of free and open competition;
- c. will declare a firm ineligible/debarred, either indefinitely or for a specific period of time, a GOVT contract if at any time it is found that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government/ ANERT schemes.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 3: TECHNICAL SPECIFICATIONS

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

TECHNICAL SPECIFICATIONS

The proposed projects shall be commissioned as per the technical specifications given below.

40. DEFINITION

A Grid Tied Solar Photo Voltaic (SPV) power plant consists of SPV array, Module Mounting Structure, Power Conditioning Unit (PCU) consisting of Maximum Power Point Tracker (MPPT), Inverter, and Controls & Protections, interconnect cables and switches. PV Array is mounted on a suitable structure. Grid tied SPV system do not have battery backup and should be designed with necessary features to supplement the grid power during day time. Components and parts used in the SPV power plants including the PV modules, metallic structures, cables, junction box, switches, PCUs etc., should conform to the BIS or IEC or international specifications, wherever such specifications are available and applicable.

Solar PV system shall consist of following equipments/components.

- Solar PV modules consisting of required number of **Crystalline** PV modules.
- Grid interactive Power Conditioning Unit with Remote Monitoring System
- Mounting structures
- String Monitoring Units / Junction Boxes.
- Power evacuation system
- Earthing and lightening protections.
- IR/UV protected PVC Cables, pipes and accessories
- RTTU / Metering

The detailed list of certifications and standards to be followed are given in annexure – F

41. SYSTEM COMPONENTS - TECHNICAL COMPLIANCE FOR SYSTEM COMPONENTS

S/N	System Component	Capacity/ rating	Minimum Technical Compliance
1.	Solar panel (MONO PERC Half cut of capacity 500 Wp or above)	As per the required capacity	IS 14286 - Design Qualification and Type Approval for Crystalline Silicon Terrestrial Photovoltaic (PV) Modules
			IEC/IS 61730: Part I & II;
2.	Grid Tied Inverter (DC to AC ratio of 1.2 to be maintained at all sites)	As per the required capacity	IS 16221: Part 1 &2 - Safety of Power Converters for use in Photovoltaic Power Systems
			IS 16169 - Test Procedure of Islanding Prevention Measures for Utility-Interconnected Photovoltaic Inverters
3.	Module Mounting Structure	As per the required capacity	IS 2062 - Hot Rolled Medium and High Tensile structural Steel
			IS 4759 - Hot-dip Zinc Coatings on structural steel and other products
4.	Cables	As required	IEC 60227 / IS 694
			IEC 60502 / IS 1554 (Pt. I & II)
5.	Switches/ Circuit Breakers	As required	IEC 60947 part I, II, III / IS 60947 Part I, II, III
6.	Connectors		EN 50521
7.	Surge Protection Device		IEC 60364-5-53 / IS 15086-5
8.	Junction Boxes/Enclosures for Inverters/ Charge Controllers	As required	IP 54 (for outdoor) or IP 65 / IP 21(for indoor) as per IEC 529
9.	Energy Meter for Recording Solar Electricity Generated & Two-way meter for Distribution Licensee grid connection		As per CEA Regulations; IEC 60687/ IEC 62052-11 / IEC 62053-22 / IS 14697
10.	Lightning Protection	As required	As per IEC 62305 / IEC 62561
11.	Electrical Grounding (Earthing)	As required	As per IS 3043

42. SOLAR PHOTOVOLTAIC MODULES:

42.1 The PV modules used should be made in India and should be from the ALMM list issued by MNRE from time to time of Mono PERC type having module capacity of 500Wp or above.

42.2 The PV modules used must qualify to the latest edition BIS standards for Crystalline Silicon Solar Cell Modules - IS 14286. In addition, the modules must conform to IEC 61730 Part-2- requirements for construction & Part 2 – requirements for testing, for safety qualification or equivalent IS.

- i. For the PV modules to be used in a highly corrosive atmosphere throughout their lifetime, they must qualify to IEC 61701/IS 61701
- ii. The total solar PV array capacity should not be less than 2 MWp and should comprise of solar crystalline modules of MONO PERC type of minimum 525 Wp and above wattage. Module capacity less than minimum 525 watts shall not be accepted. Inspection of testing of PV array will be conducted by the Tendering Authority including identification of panels ready for dispatch to be confirmed with details provided in RFID tag using RFID reader at site during FAT. The RFID details of each module shall be issued to the employer during FAT.
- iii. Protective devices against surges at the PV module shall be provided. Low voltage drop bypass diodes shall be provided.
- iv. PV modules must be tested and approved by one of the BIS approved test centers.
- v. The module frame shall be made of corrosion resistant materials, preferably having anodized aluminum.
- vi. The bidder shall carefully design & accommodate requisite numbers of the modules to achieve the rated power in his bid. ANERT shall allow only minor changes at the time of execution.
- vii. Other general requirement for the PV modules and subsystems shall be the Following:
 - a. The rated output power of any supplied module shall have tolerance of $\pm 3\%$.
 - b. The peak-power point voltage and the peak-power point current of any supplied module and/or any module string (series connected modules) shall

not vary by more than 2 (two) per cent from the respective arithmetic means for all modules and/or for all module strings, as the case may be.

- c. The module shall be provided with a junction box with either provision of external screw terminal connection or sealed type and with arrangement for provision of by-pass diode. The box shall have hinged, weather proof lid with captive screws and cable gland entry points or may be of sealed type and IP-65 rated.
 - d. IV curves at STC should be provided by bidder.
- 42.3 Modules deployed must use a RF identification tag. The following information must be mentioned in the RFID used on each module (This can be inside or outside the laminate, but must be able to withstand harsh environmental conditions).
- a. Name of the manufacturer of the PV module
 - b. Name of the manufacturer of Solar Cells.
 - c. Month & year of the manufacture (separate for solar cells and modules)
 - d. Country of origin (separately for solar cells and module)
 - e. I-V curve for the module Wattage, I_m , V_m and FF for the module
 - f. Unique Serial No and Model No of the module
 - g. Date and year of obtaining BIS PV module qualification certificate.
 - h. Name of the test lab issuing BIS certificate.
 - i. Other relevant information on traceability of solar cells and module as per ISO 9001 and ISO 14001

42.4 Warranties:

A. Material Warranty:

- i. Material Warranty is defined as: The manufacturer should warrant the Solar Module(s) to be free from the defects and/or failures specified below for a period not less than five (10) years from the date of sale to the original customer ("Customer")
- ii. Defects and/or failures due to manufacturing
- iii. Defects and/or failures due to quality of materials

- iv. Non conformity to specifications due to faulty manufacturing and/or inspection processes. If the solar Module(s) fails to conform to this warranty, the manufacturer will repair or replace the solar module(s), at the Owners sole option

B. Performance Warranty:

- i. The predicted electrical degradation of power generated not more than 10% after ten years' period and not exceeding 20% of the minimum rated power over the 25-year period and of the full rated original output.

42.5 Use of advance cell technologies

- a. The Contractor shall try to maximize the output within the allocated area. The contractor is allowed to propose use of new and better technology. (Eg. Bifacial Modules)
- b. Additionally, the bidder at bidding stage may propose modern methods for maintenance & cleaning of the plant. Technology employing drone, cleaning methods without water, which will automate the maintenance and reduce the cost of maintenance may be proposed.
- c. Based on the technology employed, the contractor has to design, Electrical System Features, Architecture and Structural requirement and the same shall be implemented with the prior approval of ANERT. The tenderer at tender stage shall submit the details of the technology proposed. The tender submission shall also include the proposed modified structure also. The capacity mentioned in the tender is indicative and extra capacity over and above the indicative capacity mentioned will be permitted, based on the technology proposed and employed.

43. ARRAY STRUCTURE

43.1 For Ground Mounted:

- a. Hot dip galvanized MS as per specifications BIS 2062 or shall be cold formed light gauge structural steel sections with IS 811: 1987/IS 801: 1975 having galvanization thickness as per BIS 4759 -amended upto date; may be used for mounting the modules/ panels/arrays. Each structure should have angle of inclination as per the

site conditions to take maximum insolation. However, to accommodate more capacity the angle inclination may be reduced until the plant meets the specified performance ratio requirements.

- b. The Mounting structure shall be so designed to withstand the speed for the wind zone of the location where a PV system is proposed to be installed (min wind speed of 150 km/ hour). It may be ensured that the design has been certified by a recognized Lab/ Institution in this regard and submit wind loading calculation sheet to ANERT. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The array design shall be submitted with the STAAD structural design report for the materials used with relevant IS.
- c. Structural material shall be corrosion resistant and electrolytically compatible with the materials used in the module frame, its fasteners, nuts and bolts. Aluminium structures also can be used which can withstand the wind speed of respective wind zone. Necessary protection towards rusting need to be provided either by coating or anodization.
- d. The fasteners used should be made up of stainless steel. The structures shall be designed to allow easy replacement of any module. The array structure shall be so designed that it will occupy minimum space without sacrificing the output from the SPV panels
- e. Regarding civil structures, the bidder needs to take care of the load bearing capacity of the soil at the site of installation. The soil is fine sand and specific care is to be taken while designing the foundation. The foundation design must be submitted to ANERT duly certified by a chartered structural engineer before start of works.
- f. The minimum clearance of the structure from the ground level should be 200 mm for ground mounted installations
- g. The array will be installed on steel racking structures that are anchored in the ground. Racks will be laid out in parallel matrices allowing for individuals to access the area between the racks for cleaning and other maintenance needs. In between the row of solar panels sufficient gap need to be provided to avoid falling of shadow

of previous row on the next row. Seismic factors for the site will be considered while making the design of the foundation.

43.2 For Ground Mounted:

- a. Photovoltaic arrays must be mounted on a stable, durable structure that can support the array and withstand wind, rain, and other adverse conditions. The modules will be fixed on structures with fixed arrangement.
- b. The module mounting structures shall have adequate strength and appropriate design suitable to the locations, which can withstand the load and high wind velocities. Stationary structures shall support PV modules at a given orientation, absorb and transfer the mechanical loads to the surface properly.
- c. Wherever required, suitable number of PV panel structures shall be provided. Structures shall be of flat-plate design using minimum size of C (75 x 40 x 5mm) or L (55 x 55 x 5mm) or I (60x 40x 4mm) sections or higher dimensions for respective sections.
- d. Each structure with fixed tilt should have a tilt angle as per the site conditions to take maximum insolation which will be approximately equal to the latitude of the location facing true South with a North - South orientation. The tilt angle can vary from 9 degree to 12 degree based on the location's latitude in Kerala
- e. The PV module mounting structure shall have a capacity to withstand a wind velocity of 150 km/hr unless specified for dedicated requirements
- f. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The PV array structure design shall be appropriate with a factor of safety of min 1.5.
- g. The materials used for structures shall be Hot dip Galvanized Mild Steel conformed to IS 2062:1992 or aluminium of suitable grade minimum alloy 6063 or better.
- h. The minimum thickness of galvanization for hot dip Galvanized Mild Steel should be at least 80 microns as per IS 4759. The galvanisation thickness will be checked during inspection and the vendor is to arrange the equipment needed for the same at the site.

- i. The Bolts, Nuts, fasteners, and clamps used for panel mounting shall be of Stainless-Steel SS 304.
- j. Structures shall be supplied complete with all members to be compatible for allowing easy installation at the site. Additional Structures/Frames for required for the installation of modules if any need to be provided by the bidder.
- k. The structures shall be designed to allow easy replacement of any module, repairing and cleaning of any module. No Welding is allowed on the mounting structure. Adequate spacing shall be provided between two panel frames and rows of panels to facilitate personnel protection, ease of installation, replacement, cleaning of panels and electrical maintenance
- l. Aluminium structures used shall be protected against rusting either by coating or anodization. Aluminium frames should be avoided for installations in coastal areas.
- m. The structure shall be designed to withstand operating environmental conditions for a period of minimum 25 years. And shall be free from corrosion while installation.
- n. Screw fasteners shall use existing mounting holes provided by module manufacturer. No additional holes shall be drilled on module frames
- o. The total load of the structure (when installed with PV modules) on the roof should be less than 60 kg/m².
- p. Minimum distance between the lower level of PV Module and the ground shall be 0.6m from the ground level.
- q. The PV Panel area shall be accessible for cleaning and for any repair work.
- r. Sufficient gap needs to be provided between the rows to avoid falling of shadow of one row on the next row. Seismic factors for the site will be considered while making the design of the foundation.
- s. Adequate spacing shall be provided between any two modules secured on PV panel for improved wind resistance.
- t. Installation of structure for solar PV mounting should not tamper with the water proofing of the roofs.

43.3 The Rooftop Structures maybe classified in three broad categories as follows (drawings at **Annexure-G**). The bidders are required to quote the rates for each separately in the financial bid:

i. Ballast structure

- a. The mounting structure must be Non-invasive ballast type and any sort of penetration of roof to be avoided.
- b. The minimum clearance of the structure from the roof level should be in between 70 - 150 mm to allow ventilation for cooling, also ease of cleaning and maintenance of panels as well as cleaning of terrace.
- c. The structures should be suitably loaded with reinforced concrete blocks of appropriate weight made out of M25 concrete mixture.

ii. Tin shed

- a. The structure design should be as per the slope of the tin shed.
- b. The inclination angle of structure can be done in two ways
 - b.1. Parallel to the tin shed (flat keeping zero-degree tiling angle), if the slope of shed in Proper south direction
 - b.2. With same tilt angle based on the slope of tin shed to get the maximum output.
- c. The minimum clearance of the lowest point from the tin shade should be more than 100mm.
- d. The base of structure should be connected on the Purlin of tin shed with the proper riveting. e. All structure member should be of minimum 2 mm thickness.

iii. RCC Elevated structure: It can be divided into further three categories:

A. Minimum Ground clearance (300MM – 1000 MM)

- a. The structure shall be designed to allow easy replacement of any module and shall be in line with site requirement. The gap between module should be minimum 30MM.
- b. Base Plate – Base plate thickness of the Structure should be 5MM for this segment.
- c. Column – Structure Column should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.

- d. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side (y-axis) and 40MM in flange side (x-axis).
- e. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
- f. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
- g. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- h. For single portrait structure the minimum ground clearance should be 500MM.

B. Medium Ground clearance (1000MM – 2000 MM)

- a. Base Plate – Base plate thickness of the Structure should be Minimum 6MM for this segment.
- b. Column – Structure Column should be minimum 2MM in Lip section / 3MM in C-Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

C. Maximum Ground clearance (2000MM – 3000 MM)

- a. Base Plate – Base plate thickness of the Structure should be minimum 8 MM for this segment.
- b. Column – Structure Column thickness should be minimum 2.6MM in square hollow section (minimum 50x50) or rectangular hollow section (minimum 60x40) or 3MM in C-Channel section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 3MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

D. Super elevated structure (More than 3000 MM)

i. Base structure

- b. Base Plate – Base plate thickness of the Structure should be 10MM for this segment.
- c. Column – Structure Column minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40).
- d. Rafter - Structure Rafter minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40)

- e. Cross bracing – Bracing for the connection of rafter and column should be of minimum thickness of 4mm L-angle with the help of minimum bolt diameter of 10mm.

ii. Upper structure of super elevated structure

- a. Base Plate – Base plate thickness of the Structure should be minimum 5MM for this segment.
 - b. Column – Structure Column should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
 - c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
 - d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
 - e. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
 - f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- iii. If distance between two legs in X-Direction is more than 3M than sag angle/Bar should be provide for purlin to avoid deflection failure. The sag angle should be minimum 2MM thick, and bar should be minimum 12Dia.
- iv. Degree - The Module alignment and tilt angle shell be calculated to provide the maximum annual energy output. This shall be decided on the location of array installation
- v. Foundation – Foundation should be as per the roof condition; two types of the foundation can be done- either penetrating the roof or without penetrating the roof.
- a) If penetration on the roof is allowed (based on the client requirement) then minimum 12MM diameter anchor fasteners with minimum length 100MM can

be used with proper chipping. The minimum RCC size should be 400x400x300 cubic mm. Material grade of foundation should be minimum M20.

- b) If penetration on roof is not allowed, then foundation can be done with the help of 'J Bolt' (refer IS 5624 for foundation hardware). Proper Neto bond solution should be used to adhere the Foundation block with the RCC roof. Foundation J - bolt length should be minimum 12MM diameter and length should be minimum 300MM.

44. ARRAY JUNCTION BOXES (JBs)

- a. The junction boxes are to be provided in the PV array for termination of connecting cables. The J. Boxes (JBs) shall be made of GRP/FRP/Powder Coated Aluminum /cast aluminum alloy with full dust, water & vermin proof arrangement. All wires/cables must be terminated through cable lugs. The JB's shall be such that input & output termination can be made through suitable cable glands.
- b. Copper bus bars/terminal blocks housed in the junction box with suitable termination threads Conforming to IP65 standard and IEC 62208 Hinged door with EPDM rubber gasket to prevent water entry. Single / double compression cable glands, Provision for earthing the box must be provided.
- c. Each Junction Box shall have High quality Suitable Capacity Metal Oxide Varistors (MOVs) / SPDs, suitable Reverse Blocking Diodes. The Junction Boxes shall have suitable arrangement monitoring and disconnection for each of the groups. Each string combiner box/ junction box will have suitable Reverse Blocking Diodes of maximum DC blocking voltage of 600 / 1000V or as per the system requirement with suitable arrangement for its connecting.
- d. Suitable markings shall be provided on the bus bar for easy identification and the cable ferrules must be fitted at the cable termination points for identification
- e. The junction boxes/ enclosures should be IP 65(for outdoor)/ IP 54 (indoor) and as per IEC 529 specifications. The Junction boxes / string combiner boxes shall conform to IEC 60529 (Degrees of Protection provided by Enclosures (IP Code))

45. DC DISTRIBUTION BOARD:

- a. DC Distribution panel to receive the DC output from the array field. DC generated by the solar modules is transmitted through the appropriate cables from Array Yard to Control facility. DC bus & panel should be provided for the incoming DC supply from array yard. The panel should consist of adequate size.
- b. DC DPBs shall have sheet from enclosure of dust & vermin proof conform to IP 65 protection. The bus bars are made of copper of desired size. Suitable capacity MCBs/MCCB shall be provided for controlling the DC power output to the PCU along with necessary surge arrestors.

46. AC DISTRIBUTION PANEL BOARD:

- a. AC Distribution Panel Board (DPB) shall control the AC power from PCU/ inverter, and should have necessary surge arrestors. Output from the inverter shall be fed to the ACDB through 4 pole MCCB of suitable current rating and multifunction export solar meter.
- b. All switches and the circuit breakers, connectors should conform to IEC 60947, part I, II and III/ IS60947 part I, II and III.
- c. The changeover switches, cabling work should be undertaken by the bidder as part of the project.
- d. All the Panel's shall be metal clad, totally enclosed, rigid, floor mounted, air - insulated, cubical type suitable for operation on three phase / single phase, 415 or 230 volts, 50 Hz
- e. The panels shall be designed for minimum expected ambient temperature of 45 degrees Celsius, 80 percent humidity and dusty weather.
- f. All indoor panels will have protection of IP54 or better. All outdoor panels will have protection of IP65 or better.
- g. Should conform to Indian Electricity Act and rules (till last amendment).
- h. All the 415 AC or 230 volts' devices / equipment like bus support insulators, circuit breakers, SPDs, VTs etc., mounted inside the switchgear shall be suitable for

continuous operation and satisfactory performance under the following supply conditions

Variation in supply voltage +/- 10 %

Variation in supply frequency +/- 3 Hz

47. PCU/ARRAY SIZE RATIO:

- a. The combined wattage of all inverters should not be less than 80% of rated capacity of DC power of the plant under STC.
- b. Maximum power point tracker shall be integrated in the PCU/inverter to maximize energy drawn from the array.

48. PCU/ INVERTER:

The Power Conditioning Unit shall be String Inverter with power exporting facility to the Grid. The DC to AC ratio of 1.25 is to be maintained at all sites. (For eg. – For DC capacity of 100 kWp, the AC capacity of minimum 80 kW is to be maintained). Preferred Makes – Fronius / ABB / SMA

General Specifications:

48.1 All the Inverters should contain the following clear and indelible Marking Label & Warning Label as per IS16221 Part II, clause 5. The equipment shall, as a minimum, be permanently marked with:

- a. The name or trademark of the manufacturer or supplier.
- b. A model number, name or other means to identify the equipment.
- c. A serial number, code or other markings allowing identification of manufacturing location and the manufacturing batch or date within a three-month time period.
- d. Input voltage, type of voltage (A.C. or D.C.), frequency, and maximum continuous current for each input.
- e. Output voltage, type of voltage (A.C. or D.C.), frequency, maximum continuous current, and for A.C. outputs, either the power or power factor for each output.
- f. The Ingress Protection (IP) rating

- 48.2 The inverter output shall be 415 VAC, 50 Hz, 3 phase.
- 48.3 The inverter shall include appropriate self-protective and self-diagnostic feature to protect itself and the PV array from damage in the event of inverter component failure or from parameters beyond the inverter's safe operating range due to internal or external causes.
- 48.4 PCU shall have the dynamic and efficient MPPT algorithm behaviour which finds maximum power point even in low light conditions. The PCU Company should be able to display this feature.
- 48.5 The PCU shall be supplied with in-built advanced grid feed-in feature along with dynamic feed-in control considering self-consumption. The PCU shall also include control functions for optimum feed-in of reactive power and effective power. The amount of reactive power injection and absorption can be controlled depending upon under/over excited systems.
- 48.6 The PCU shall have a provision of external shutdown via remote signal separately with an in-built floating-point contact or similar option using any minimum interface which is to ensure the emergency stop function in the inverter
- 48.7 The PCU shall have a higher degree of ingress protection of IP 65 to handle robust environment conditions from dust and water ingress under complete outdoor installations.
- 48.8 The data logger should possess the feature of extracting the data externally with open protocols like Modbus TCP/RTU. The manufacturer should provide the Modbus register mapping file to utilise this feature
- 48.9 **The inverter shall have an efficient cooling concept with better power derating feature to handle higher temperatures and ensure the best efficiency. The inverter shall be able to provide full rated output power even at ambient temperatures of 50°C. The manufacturer to provide the power derating curves to demonstrate the same.**
- 48.10 The inverter shall be flexible in terms of the installation and should be capable for installation in a horizontal position facilitating easy installation for site specific requirements.

- 48.11 The inverter shall have an integrated feature of emergency stop to halt the inverter from operation considering safety scenarios
- 48.12 The PCU manufacturer should have an authorised service centre in Kerala. The details of the service centre along with the spare list must be submitted along with the bid.
- 48.13 **PCU should be able to respond smoothly to the voltage fluctuations on the low-tension grid via active & reactive power control/ support. The PCU should be able to respond separately to fulfil below mentioned:**
- 48.13.1 Finding out optimisation of the system**
- 48.13.2 Optimal power distribution on each phase**
- 48.13.3 Prevent PCU from unnecessary disconnections**
- 48.14 The PCU Company should have grid connected solar plants running in the country with inverters at least 7 years from the time of bidding to showcase the service reliability and long-term presence. Also, the PCU should have local presence in the county for at least last 5 years. The PCU manufacturer to provide details to authenticate the same.
- 48.15 The Technical Specification of On-Grid Inverters are summarized below:

Specifications of Inverters	
Parameters	Detailed specification
Nominal voltage	230V/415V
Voltage Band	Between 80% and 110% of V nominal
Nominal Frequency	50 Hz
Operating Frequency Range	47.5 to 50.5 Hz
Waveform	Sine wave
Harmonics	AC side total harmonic current distortion < 3%
Ripple	DC Voltage ripple content shall be not more than 1%
Efficiency	Efficiency shall be >98%
Casing protection levels	Degree of protection: Min IP-65
Operating ambient Temp range	-10 to + 60 degree Celsius
Operation	Completely automatic including wakeup, synchronization (phase locking) and shut down
MPPT	MPPT range must be suitable to individual array voltages

Specifications of Inverters	
Parameters	Detailed specification
Protection Class	1
Protections	Over voltage: both input and output Over current: both input and output Over / Under grid frequency Over temperature Short circuit Lightning Surge voltage induced at output due to external source Islanding
Ingress Protection	IP 65
Recommended LED indications	ON Grid ON Under/ Over voltage Overload Over temperature
Recommended LCD Display on front Panel	DC input voltage DC current AC Voltage (all 3 phases) AC current (all 3 phases) Frequency Ambient Temperature Instantaneous power Cumulative output energy Cumulative hours of operation Daily DC energy produced
Communication Interface	RS485/ RS232/Wi-Fi (with or without USB)

48.16 The Technical Specification for Interconnection are summarized below:

Sl No	Parameters	Requirements	Reference
1	Overall conditions of service	Reference to regulations	Conditions for Supply of Electricity
2	Overall Grid Standards	Reference to regulations	Central Electricity Authority (Grid standards) Regulations 2010

3	Equipment	Applicable industry standards	IEC/EN standards
4	Safety and Supply	Reference to regulations, (General safety requirements	Central Electricity Authority (Measures of safety and electricity supply) Regulations, 2010 and subsequent amendments
5	Meters	Reference to regulations and additional conditions issued by the commission.	Central Electricity Authority (Installation & operation of meters) regulations 2006 and subsequent amendments
6	Harmonic current	Harmonic current injections from a generating station shall not exceed the limits specified in IEEE 519	IEEE 519 relevant CEA (Technical Standards for connectivity of the distributed generation resource) Regulations 2013 and subsequent amendments
7	Synchronization	Photovoltaic system must be equipped with a grid frequency synchronization device, if the system is using synchronizer inherently built in to the inverter, then no separate synchronizer is required	Relevant CEA (Technical Standards for Connectivity of the distributed generation resources) regulations 2013 and subsequent amendments.
8	Voltage	The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage. beyond the clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid	
9	Flicker	Operation of Photovoltaic system should not cause	Relevant CEA regulations 2013 and subsequent if

		voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards if any	any, (Technical standards for connectivity of the distributed generation resource)
10	Frequency	When the distribution system frequency deviates outside the specified limits (50.5 Hz on upper side and 47.5 Hz on lower side) up to 0.2 sec, the Photovoltaic systems shall automatically disconnect from grid and be in island mode.	
11	DC injection	Photovoltaic system shall not inject DC current greater than 0.5% of full rated output at the interconnection point or 1% rated inverter output current into distribution system under any operating conditions.	
12	Power Factor	While the output of the inverter is greater than 50%, a lagging power factor greater than 0.9 shall be maintained.	
13	Islanding and Disconnection	The photovoltaic system in the event of voltage or frequency variations must island/disconnect itself with the time stipulated as per IEC standards	
14	Overload and overheat	The inverter should have the facility to automatically switch off in case of overload or overheat and should restart when normal conditions are restored	

48.17 The Certifications of On-Grid Inverters are summarized below:

Standard	Description
IS 16221-2	Safety of Power Converters for use in Photovoltaic Power Systems Part 2 (Particular Requirements for Inverters)
IEC 61683	Photovoltaic systems - Power conditioners - Procedure for measuring efficiency
IEC 61727	Photovoltaic (PV) systems- Characteristics of the utility interface
IEC/EN 62109-1	Safety of power converters for use in photovoltaic power systems - Part 1: General requirements
IEC/EN 62109-2	Safety of power converters for use in photovoltaic power systems - Part 2: Particular requirements for inverters
IEC/EN 61000-3-3/ 3-11/ 3-5	Electromagnetic compatibility (EMC) - Part 3-11; Limits; Limitation of Voltage Change, Voltage Fluctuations and Flicker in Public Low- Voltage Supply Systems; Rated Current <16A / >16A and <75A / >75A per Phase respectively
IEC/EN 61000-3-2/ -3-12/ -3-4	Electromagnetic compatibility (EMC) - Part 3-12; Limits; Limits for Harmonic Currents produced by equipment connected to the public low voltage systems with Rated Current <16A / >16A and <75A / >75A per Phase respectively
*IEC/EN 61000-6-1 / 6-2	Electromagnetic compatibility (EMC) - Part 6-2: Generic standards - Immunity standard for residential and commercial / industrial environments
*IEC/EN 61000-6-3 / 6-4	Electromagnetic compatibility (EMC) - Part 6-4: Generic standards - Emission standard for residential and commercial / industrial environments
IEC 62116 / IS 16169	Utility-interconnected photovoltaic inverters - Test procedure of islanding prevention measures
IEC 60068-2-1	Environmental testing - Part 2-1: Tests - Test A: Cold
IEC 60068-2-2	Environmental testing - Part 2-2: Tests - Test B: Dry heat
IEC 60068-2-14	Environmental testing - Part 2-14: Tests - Test N: Change of temperature
IEC 60068-2-30	Environmental testing - Part 2-30: Tests - Test Db; Damp heat, cyclic (12 h + 12 h cycle)

***Recommended but not mandatory**

49. INTEGRATION OF PV POWER WITH GRID:

The output power from SPV would be fed to the inverters which converts DC produced by SPV array to AC and feeds it into the main electricity grid after synchronization. In case of grid failure, or low or high voltage, solar PV system shall be out of synchronization and shall be disconnected from the grid.

50. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance:

A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- i. AC Voltage
- ii. AC Output current
- iii. Output Power
- iv. Energy in kWh
- v. DC Input Voltage
- vi. DC Input Current
- vii. Ambient Temperatures
- viii. Inverter Status
- ix. Irradiation
- x. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

51. PROTECTIONS

The system should be provided with all necessary protections like earthing, Lightning, and grid islanding as follows:

51.1 LIGHTNING PROTECTION

The SPV power plants shall be provided with lightning & overvoltage protection. The main aim in this protection shall be to reduce the over voltage to a tolerable value before it reaches the PV or other sub system components. The source of over voltage can be lightning, atmosphere disturbances etc. The entire space occupying the SPV array shall be suitably protected against Lightning by deploying required number of Lightning Arrestors. Lightning protection should be provided as per IS/IEC 62305 standard. The protection against induced high-voltages shall be provided by the use of metal oxide varistors (MOVs) and suitable earthing such that induced transients find an alternate route to earth.

51.2 SURGE PROTECTION

The system should have installed with Surge Protection Device (SPD) for higher withstand of the continuous PV-DC voltage during earth fault condition. SPD shall have safe disconnection and short circuit interruption arrangements through integrated DC in-built bypass fuse (parallel) which should get tripped driving failure mode of MOV, extinguishing DC arc safely in order to protect the installation against fire hazards. The SPD should be provided in the AC Distribution Box as well.

51.3 EARTHING PROTECTION

- i. Each array structure of the PV yard should be grounded/ earthed properly as per IS:3043-1987. In addition, the lighting arrester/masts should also be earthed inside the array field. Earth Resistance shall be tested in presence of the representative of ANERT as and when required after earthing by calibrated earth tester. PCU, ACDB and DCDB should also be earthed properly.
- ii. Earth resistance shall not be more than 5 ohms. It shall be ensured that all the earthing points are bonded together to make them at the same potential.
- iii. Earthing System shall connect all non-current carrying metal receptacles, electrical boxes, appliance frames, chassis and PV module mounting structures in one long run. The earth strips should not be bolted. Earthing GI strips shall be interconnected by proper welding.
- iv. Masonry enclosure with the earth pit of size not less than 400mm X 400mm (width) complete with cemented brick work (1:6) of minimum 500 mm depth duly plastered with cement mortar (inside), shall be provided. Hinged inspection covers of size not less than 300mm X 300mm with locking arrangement shall be provided. Suitable handle shall be provided on the cover by means of welding a rod on top of the cover for future maintenance.
- v. Earthing system must be interconnected through GI strip to arrive equipotential bonding. The size of the GI earth strip must be minimum 25mm X 6mm.
- vi. The complete earthing system shall be mechanically and electrically connected to provide independent return to earth. All three-phase equipment shall have two distinct earth connections. An earth bus shall be provided inside the control facility. For each earth pit, necessary test point shall have to be provided.

51.4 GRID ISLANDING:

- i. In the event of a power failure on the electric grid, it is required that any independent power-producing inverters attached to the grid turn off in a short period of time. This prevents the DC-to-AC inverters from continuing to feed power into small sections of the grid, known as "islands." Powered islands present a risk to workers who may expect the area to be unpowered, and they may also damage grid-tied equipment. The PV system shall be equipped with islanding protection.

In addition to disconnection from the grid (due to islanding protection) disconnection due to under and over voltage conditions shall also be provided.

- ii. A manual disconnect 4pole isolation switch beside automatic disconnection to grid would have to be provided at utility end to isolate the grid connection by the utility personnel to carry out any maintenance. This switch shall be locked by the utility personnel

52. CABLES

Cables of appropriate size to be used in the system shall have the following characteristics:

- i. Shall meet IEC 60227/IS 694, IEC 60502/IS1554 standards
- ii. Temp. Range: -10°C to $+80^{\circ}\text{C}$.
- iii. Voltage rating 660/1000V
- iv. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
- v. Flexible
- vi. Sizes of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum. The cables (as per IS) should be insulated with a special grade PVC compound formulated for outdoor use.
- vii. Cable Routing/ Marking: All cable/wires are to be routed in a GI cable tray and suitably tagged and marked with proper manner by good quality ferrule or by other means so that the cable easily identified.
- viii. The Cable should be so selected that it should be compatible up to the life of the solar PV panels i.e. 25years.
- ix. The ratings given are approximate. Bidder to indicate size and length as per system design requirement. All the cables required for the plant provided by the bidder. Any change in cabling sizes if desired by the bidder/approved after citing appropriate reasons. All cable schedules/layout drawings approved prior to installation.
- x. Multi Strand, annealed high conductivity copper conductor PVC type 'A' pressure extruded insulation or XLPE insulation. Overall PVC/XLPE insulation for UV

protection Armored cable for underground laying. All cable trays including covers to be provided. All cables conform to latest edition of IEC/ equivalent BIS Standards as specified below: BoS item / component Standard

Description Standard Number Cables General Test and Measuring Methods, PVC/XLPE insulated cables for working Voltage up to and including 1100 V, UV resistant for outdoor installation IS /IEC 69947.

- xi. For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible Aluminium cables shall be used, Outdoor AC cables shall have a UV -stabilized outer sheath.
- xii. The size of each type of DC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 1%.
- xiii. The size of each type of AC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 2 %.
- xiv. The minimum DC cables size shall be 4.0mm² copper; The minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire shall be equal to the size of the phase wires.
- xv. The following colour code shall be used for cable wires and shall confirm to IEC 69947
 - DC positive: red (the outer PVC sheath can be black with a red line marking)
 - DC negative: black
 - AC single phase: Phase: Red; Neutral: Black
 - AC three phase: phases: Red, Yellow, Blue; Neutral: Black
 - Earth wires: Green

53. CABLING PRACTICE

Cable Cabling is required for wiring from AC output of inverter/PCU to the Grid Interconnection point. It includes the DC cabling from Solar Array to AJB and from AJB to inverter input.

53.1 All cables of appropriate size to be used in the system shall have the following characteristic:

- a. Shall conform to IEC 60227 / IS 694 & IEC 60502 / IS 1554 standards.
 - b. Temperature Range: -10 degree Celsius to +80 degree Celsius
 - c. Voltage rating: 660/1000V
 - d. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
 - e. Flexible
- 53.2 Sizes of cables between any array interconnections, array to junction boxes, junction boxes to inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum (2%).
- 53.3 For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; multi-core cables shall not be used.
- 53.4 For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible copper cables shall be used. However, for above 10kWp systems, XLPE insulated Aluminium cable of suitable area of cross section can be used in the AC side subject to a minimum area of cross section of 10 sq.mm. Outdoor AC cables shall have a UV -stabilized outer sheath IS/IEC 69947.
- 53.5 All LT XLPE cables shall conform to IS:7098 part I&II.
- 53.6 The total voltage drop on the cable segments from the solar PV modules to the solar grid inverter shall not exceed 2.0%
- 53.7 The total voltage drop on the cable segments from the solar grid inverter to the building distribution board shall not exceed 2.0%
- 53.8 The DC cables from the SPV module array shall run through a UV-stabilized PVC conduit pipe of adequate diameter with a minimum wall thickness of 1.5mm
- 53.9 Cables and wires used for the interconnection of solar PV modules shall be provided with solar PV connectors (MC4) and couplers
- 53.10 All cables and conduit pipes shall be clamped to the rooftop, walls and ceilings with thermo-plastic clamps at intervals not exceeding 50cm; the minimum DC cables size shall be 4.0mm² copper; the minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire size shall be equal to the size of the phase wires. Conduits for taking outdoor cables shall be UV treated.

53.11 Cable Marking: All cable/wires are to be marked in proper manner by good quality ferule or by other means so that the cable can be easily identified. The following colour code shall be used for cable wires

- a. DC positive: red (the outer PVC sheath can be black with a red line marking)
- b. DC negative: black
- c. AC single phase: Phase: red; Neutral: black
- d. AC three phase: phases: red, yellow, blue; neutral: black
- e. Earth wires: green

53.12 Cables and conduits that have to pass through walls or ceilings shall be taken through PVC pipe sleeve.

53.13 Cable conductors shall be terminated with tinned copper end ferrules to prevent fraying and breaking of individual wire strands. The termination of the DC and AC cables at the Solar Grid Inverter shall be done as per instructions of the manufacturer, which in most cases will include the use of special connectors.

53.14 All cables and connectors used for installation of solar field must be of solar grade which can withstand harsh environment conditions including high temperatures, UV radiation, rain, humidity, dirt, salt, burial and attack by moss and microbes for 25 years and voltages as per latest IEC standards. DC cables used from solar modules to array junction box shall solar grade copper (Cu) with XLPO insulation and rated for 1.1 kV as per relevant standards only.

53.15 Bending radii for cables shall be as per manufactures recommendations and IS: 1255.

53.16 For laying/termination of cables latest BIS/IEC Codes/ standards shall be followed.

54. FACTORY TESTING

- a. PCU shall be tested prior to shipment and factory test certificate for relevant parameters should be provided with the PCU supplied. ANERT or authorised representative of ANERT may be allowed to witness the tests if required.
- b. Factory testing shall not only be limited to measurement of phase currents, efficiencies, harmonic content and power factor, but shall also include all other

necessary tests/simulation required and requested by the Purchasers Engineers. Tests may be performed at 25, 50, 75 and 100 percent of the rated nominal power.

55 NET METERING AND UTILITY INTERCONNECTION

- a. Net metering equipment (an Import-Export Energy Meter) approved and tested by the electrical utility based on the accuracy class required for the proposed capacity of the system must be provided with the necessary data cables if required.
- b. Net Metering and Utility Interconnection should be accomplished according the Kerala State Electricity Regulatory Commission (Grid Interactive Distributed Solar Energy Systems) Regulations 2014 Clauses (8) & (9) (Notification No. 2096/KSERC/CT/2014 dt. 10th June 2014)

56 INTER CONNECTION OF INVERTER OUTPUT WITH UTILITY GRID

- a. The interconnection of load with inverter output should be done after obtaining permission from Electrical Inspectorate and Electrical Utility.
- b. The plan scheme and drawing related to interconnection details should be submitted to Electrical Inspectorate through a licensed Electrical contractor with the guidance appropriate Engineering Authority.
- c. Licenced contractor has to be engaged for preparation of plan scheme to be submitted to the Kerala State Electricity Licensing Board and necessary fee should be remitted for energisation of Solar Power Plant.
- d. The panel board and distribution board required for AC interconnection should be done as per specification/ instruction given appropriate Engineering Authority.
- e. All the electrical works required for the interconnection of load with inverter output should be done by the successful bidder as a part of the Solar Power Plant installation.
- f. Bidder should visit the actual site and ensure the exact place for providing Solar Modules and Inverter etc. in presence of technical representative from the ANERT.
- g. Net Metering Equipment shall be installed and maintained in accordance with the provisions of The Central Electricity Authority (Installation and Operation of

Meters) Regulations, 2006 as amended from time to time. The Contractor shall maintain the Metering System as per metering code and CEA guidelines. The defective meter shall be immediately tested and calibrated.

- h. The accuracy class of the Net Metering Equipment will be selected so that all levels of energy produced or taken by the Solar Power Plant will be measured accurately, and this equipment has applicable accuracy class.
- i. Net Metering Equipment shall be microprocessor-based conforming to the relevant IEC standards with Advanced Metering Infrastructure (AMI) with RS232 cable facility.
- j. Net Metering Equipment shall measure active energy (both import and export) and reactive energy (import) by 3 ph, 4 wire principle suitable for balanced / unbalanced 3 phase load (With KVAR, KWh, KVA measuring registers). Tri-vector based energy meter shall have an accuracy class of energy measurement of at least Class 0.2 for active energy and at least 0.5 Class for reactive energy according to IEC 60687.
- k. Display parameters: LCD test, KWH import, KWH export, MD in KW export, MD in KW import, Date & Time, AC current and voltages and power factor (Cumulative KWH will be indicated continuously by default)

57 WARRANTY

- a. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided as per the special conditions of the contract.
- b. PV modules used in solar power plants/ systems must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- c. The Warranty Card to be supplied with the system must contain the details of the all the components supplied including serial numbers accompanied with the OEM warranty card

58. OPERATION & MAINTENANCE OF THE PLANT

58.1 For the optimal operation of a PV plant, maintenance must be carried out on a regular basis. All the components should be kept clean. It should be ensured that all the components are fastened well at their due place. The O&M Charges for 10-year period is to be quoted by the bidders

58.2 The service personnel should visit the installations at least once a month for preventive maintenance even if no faults are reported. **Reports of these preventive maintenance visits and generation data should be submitted to the concerned ANERT District Offices on a quarterly basis.**

58.3 Maintenance guidelines for various components viz. solar panels, inverter, wiring etc. are discussed below:

58.3.1 SOLAR PV PANELS

Although the cleaning frequency for the panels will vary from site to site depending on soiling, it is recommended that

- a) The panels are cleaned at least once every thirty days.
- b) Use water and a soft sponge or cloth for cleaning.
- c) Do not use detergent or any abrasive material for panel cleaning.
- d) Iso-propyl alcohol may be used to remove oil or grease stains.
- e) Do not spray water on the panel if the panel glass is cracked or the back side is perforated.
- f) Wipe water from module as soon as possible.
- g) Use proper safety belts while cleaning modules at inclined roofs etc.
- h) The modules should not be cleaned when they are excessively hot. Early morning is particularly good time for module cleaning.
- i) Check if there are any shade problems due to vegetation or new building. If there are, make arrangements for removing the vegetation or moving the panels to a shade-free place.
- j) Ensure that the module terminal connections are not exposed while cleaning; this poses a risk of electric shock.

- k) Never use panels for any unintended use, e. g. drying clothes, chips etc.) Ensure that monkeys or other animals do not damage the panels.

58.3.2 CABLES AND CONNECTION BOXES

- a) Check the connections for corrosion and tightness.
- b) Check the connection box to make sure that the wires are tight, and the water seals are not damaged.
- c) There should be no vermin inside the box.
- d) Check the cable insulating sheath for cracks, breaks or burns. If the insulation is damaged, replace the wire.
- e) If the wire is outside the building, use wire with weather-resistant insulation.
- f) Make sure that the wire is clamped properly and that it should not rub against any sharp edges or corners.
- g) If some wire needs to be changed, make sure it is of proper rating and type.

58.3.3 INVERTER

- a) The inverter should be installed in a clean, dry, and ventilated area.
- b) Remove any excess dust in heat sinks and ventilations. This should only be done with a dry cloth or brush.
- c) Check that vermin have not infested the inverter. Typical signs of this include spider webs on ventilation grills or wasps' nests in heat sinks.
- d) Check functionality, e.g., automatic disconnection upon loss of grid power supply, at least once a month.
- e) Verify the state of DC/AC surge arrestors, cable connections, and circuit breakers.

58.4 Inspection and Maintenance Schedule

Component	Activity	Description	Interval
PV Module	Cleaning	- Clean PV modules with plain water or mild dishwashing detergent. - Do not use brushes, any types of solvents, abrasives, or harsh detergents.	Monthly or as per site conditions
PV Array	Inspection	Check the PV modules and rack for any damage.	Annual

Component	Activity	Description	Interval
		Note down location and serial number of damaged modules.	
	Inspection	Determine if any new objects, such as vegetation growth, are causing shading of the array and move them if possible.	Half Yearly
	Vermin Removal	Remove bird nests or vermin from array and rack area.	Half Yearly
Junction Boxes	Inspection	- Inspect electrical boxes for corrosion or intrusion of water or insects. Seal boxes if required. - Check position of switches and breakers. - Check operation of all protection devices.	Annual
Wiring	Inspection	Inspect cabling for signs of cracks, defects, loose connections, overheating, arcing, short or open circuits, and ground faults.	Annual
Inverter	Inspection Service	- Observe instantaneous operational indicators on the faceplate of the inverter to ensure that the amount of power being generated is typical of the conditions. - Inspect Inverter housing or shelter for physical maintenance, if required.	Monthly
Plant	Monitoring	Operation and Performance Monitoring	Monthly
Spare Parts	Management	Manage inventory of spare parts.	As needed

58.5 The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation. If any of the components are to be taken out from the site for repair, a standby must be provided to ensure un-interrupted power generation and the systems functions smoothly.

58.6 Any Delay in servicing beyond 7 days of fault reporting would attract penalty at the rate of at the rate fixed by CEO, ANERT and further actions will be initiated against the agency.

58.7 A designated contact Telephone Number and address should be submitted for reporting faults during the O&M period of 5 years.

59. CIVIL WORKS

While installing solar power plants on rooftops, the physical condition of the rooftop, chances of shading, chances water level rise in the rooftop during raining due improper drainage in the roof-top should be taken in to consideration.

- a. PV array shall be installed in the terrace space free from any obstruction and/or shadow and to minimize effects of shadows due to adjacent PV panel rows.
- b. PV array shall be oriented in the south direction in order to maximize annual energy yield of the plant.
- c. The solar PV array must be installed on the rooftop in such a way that there is sufficient space on the rooftop for maintenance etc.
- d. There should not be any damage what so ever to the rooftop due to setting up of the solar power plant so that on a later day there is leakage of rainwater, etc. from the rooftop.
- e. Some civil works are inevitable for erecting the footings for the module mounting structure as discussed in Module Mounting Structure section. The roof top may be given a suitable grading plaster with suitable leak proof compound so as to render the roof entirely leak proof.
- f. Ample clearance shall be provided in the layout of the inverter and DC/AC distribution boxes for adequate cooling and ease of maintenance.
- g. While cabling the array, care must be taken such that no loose cables lie on the rooftops.
- h. The roof top should look clean and tidy after installation of the array.
- i. Neatness, tidiness and aesthetics must be observed while installing the systems.
- j. RCC Works - All RCC works shall be as per IS 456 and the materials used viz. Cement reinforcement, steel etc. shall be as per relevant IS standards. Reinforcement shall be high strength TMT Fe 415 or Fe 500 conforming to IS: 1786-1985.
- k. Brick Works (If any) - All brick works shall be using 1st class bricks of approved

quality as per IS 3102.

- l. Plastering - Plastering in cement mortar 1:5, 1:6 and 1:3 shall be applied to all.
- m. Display of mandatory items- Single Line Diagram and layout diagram of modules and interconnection at installation site shall be provided near the inverter.
- n. For painting on concrete, masonry and plastered surface IS:2395 shall be followed. For distempering IS 427 shall be followed referred. For synthetic enamel painting IS 428 shall be followed. For cement painting IS 5410 shall be followed.
- o. All Civil works required for the installation of the PV Plant and other civil and electrical work in evacuation infrastructure, wherever necessary, shall be within the scope of the bidder

The layout of Inverter accommodation shall be designed to enable adequate heat dissipation and availability. Mount within the existing infrastructure available in consultation with the Site in charge. String Inverters may be installed with Canopy type structure over it to protect it from frequent monsoon and weather changes.

60. TESTING & COMMISSIONING

- a. The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.
- b. Any modification in the equipment or installation that may be demanded by the inspecting authorities shall be carried out by the contractor at no additional cost to the KSEBL
- c. In accordance with the specific installation instruction as per the manufacturers drawings or as directed by the KSEBL, the successful Bidder shall unload, assemble, erect, install test, commission and hand over all electrical equipments included in this contract after O&M of 10 years.
- d. Erection materials including all consumables, tools, testing instruments or any other equipment required for successful commissioning shall be arranged by the successful Bidder in a timely manner.
- e. All equipment and instruments, indoor and outdoor, shall be marked with No. and provided with danger boards before commissioning.
- f. All Power equipments shall be handled and erected as per the relevant codes of practice and manufacturer's drawings and instruction manuals.

- g. The Contractor shall obtain the temporary Electrical connection for construction purposes and the same has to be dismantled off the premises after completion of erection of plant.

61. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:

The Weather monitoring station installed in the plant shall be in working condition for minimum 2 weeks and all the parameters shall be available for analysis and verification. The test report for the calibration shall be submitted by the Contractor for approval. After the successful verification of the initial parameters by ANERT, PR test shall be conducted. The Following factors shall be excluded for calculation;

- Generation loss due to grid outage.
- Irradiance below 250 W/m²
- The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = \frac{\text{Measured output in kW}}{\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2)}$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

62. DATE OF COMMISSIONING

After the Inspection and approval of the Electrical Inspectorate, date of Energisation to the Grid will be considered as the official Date of Commissioning (CoD) of the project. To ensure PR, the bidder will be allowed EPC contractor shall improve the quality of the plant by replacement of any components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

63. SOLAR PV SYSTEM FOR MEETING THE ANNUAL ENERGY REQUIREMENT

Key Performance Indicators (For installations above 50 kW)

The following KPIs would be monitored by the ANERT/Owner throughout the contract tenure and the contractor shall furnish monthly reports on above, without fail.

- PV Array Energy Yield
- Final System Yield
- PV System Efficiency (DC/AC)
- Performance Ratio (PR): The performance ratio test as per IS/IEC 61724 has to be carried out at site by the agency in presence of authorized officials of ANERT, deriving sample data within a period of 7 consecutive days sufficient to provide operational data representing insolation and ambient conditions as desired by the

agreement authority to prove the Performance ratio of 75%. If a Solar Plant achieves the Minimum Performance Ratio, then the ANERT will issue Commercial Operation Date Certificate.

- Capacity Utilization Factor (CUF)
- Plant uptime
- Reactive Power Consumption
- Auxiliary Energy Consumption
- CO₂ Savings
- Environment, Health & Safety

64. DANGER BOARDS AND SIGNAGES:

Danger boards should be provided as and where necessary as per IE Act. /IE rules as amended up to date. Three signage shall be provided one each at battery –cum- control room, solar array area and main entry from administrative block. Text of the signage may be finalized in consultation with ANERT/ owner.

65. DRAWINGS & MANUALS:

- i. Two sets of Electrical drawings installation and O&M manuals are to be supplied. Bidders shall provide complete technical data sheets for each equipment giving details of the specifications along with make/makes in their bid along with basic design of the power plant and power evacuation, synchronization along with protection equipment.
- ii. Approved ISI and reputed makes for equipment be used.
- iii. For complete electro-mechanical works, bidders shall supply complete design, details and drawings for approval to ANERT before progressing with the installation work

67. BILL OF MATERIAL

The bidder should provide the bill of material mentioning the quantity of each of the item consisting in the system, along with the offer in the format as show below for each capacity:

Sl. No.	Item	Make (if any)	Model & Individual Capacity (If any)	Qty (Nos)	Rating / Capacity
1.	PV Module				
2.	PCU/Inverter				
3.	DC Cables				
4.	AC Cables				
5.	AJB/SCB				
6.	Module Mounting Structure (MMS)				
7.	ACDB				
8.	Lightning Arrester				
9.	Earthing System Details and No. of Earth pits				
10.	Data Acquisition System				

68. SITE INSPECTON

It is recommended that the bidders visit all the sites listed here for the physical verification and for correctly estimating the quantity, especially related to structure and cabling, before submitting the bids. **Bidder must include all the AC/DC wiring cost, replacement of instrument transformers, panel boards etc only after visiting the proposed site. The quoted amount will be for all the site-specific works and no additional amount will be allotted for any sort of works.**

The site-specific requirement of ladders for accessing PV modules, pathway facility along with handrails in case of sheet roofs are under the scope of the bidder. The Fabrication of Permanent Ladder should be of GI (min14 SWG), coated with Epoxy steel primer with rung spacing not be more than 10 inches and rung width of min 50 inches. Side Handrails / Grab Bars welded on both sides for safety purpose with an extension of

Min 50 inches above the landing or access level. The pathway can be either of GI or FRP material and shall include handrails for safety without causing shade on the PV modules.

69. CLEANING

The bidder shall provide permanent arrangement for module washing in the SPV Plant. Water lines may be drawn to feed water from the available resources. Contractor has to provide additional facility including pipeline, motor for pumping to the additional overhead tank, if required.

70. DISPLAY BOARD

The vendor has to display a board of size at the project site of size minimum 60 cm x 30 cm including the following details

- Plant Name, Capacity, Location, Type of Renewable Energy plant (solar), Date of commissioning etc. The logo of ANERT and details of the scheme as specified in the work order.

71. INSURANCE

- i. The power plant must be insured at every stage of operation – from Material dispatch, storage, completion of installation and till 5 years after commissioning. The insurance coverage on handing over of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**.
- ii. The insurance premium for the 10 years of warranty is to be paid by the bidder. Only the system components are to be insured. On handing over of the system, the original insurance policy is to be handed over to the authorised person at the site of installation and a copy to ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the site of installation.

72. ENGINEERING DRAWINGS

The bidder should submit and get the necessary approval of the following detailed Engineering Drawings before execution of the project:

- i. Schematic drawing showing the PV panels, Power conditioning Unit(s)/Inverter, Array Junction Boxes (AJBs)/String Combiner Boxes (SJB), AC and DC Distribution Box, Net meters, MSB etc.
- ii. Layout of solar PV Array
- iii. Single Line Diagram (SLD) with specification of all components.
- iv. Design document for Module Mounting Structure (MMS) including certificate showing wind speed withstanding capacity of the structure (STAAD/Equivalent).
- v. Module Mounting Structure (MMS) drawing along with foundation details for the structure.
- vi. Sizes and specification of cables for PV Module interconnections, PV Array to Array Junction Boxes, Array Junction Boxes to Inverter, Inverter to ACDB/ Grid Connection point etc. shall be furnished.

The Vendor shall submit a PVsyst report for PV power plants from 25kWp and above. All PV plant design should contain the following details which should be approved by the concerned officer before installation.

- i. Design of strings including the number of PV modules
- ii. AC Protection (Circuit Breaker, Switches, Fuses, SPD)
- iii. DC Protection (Switches, Fuses, SPD)
- iv. AJB / SCB details
- v. DC Cable size and length from point to point
- vi. AC Cable size and length from point to point
- vii. Earthing system details and number of pits
- viii. Lightning protection details/specification
- ix. PV Syst / Any other software-based Simulation Report

73. SAFETY MEASURES

The bidder shall take entire responsibility for electrical safety of the installation(s) including connectivity with the grid and follow all the safety rules & regulations applicable as per Electricity Act, 2003 and CEA guidelines etc. Adequate firefighting equipment and extinguishing agents of sufficient capacity and quantity must always be available at site

and kept ready for immediate use. The installation of Fire Extinguishers should confirm to BIS standards.

The fire extinguishers shall be provided in the control room housing inverters as well as on the Roof or site where the PV arrays have been installed. One liquefied CO2 fire extinguisher upright type of capacity 8 kg having IS: 2171 -7, IS: 10658 marked per installation of 100kWp shall be supplied by the Successful bidder and kept near the Inverter accommodation and shall also be responsible for periodic renewal during the maintenance period. The fire extinguisher shall be suitable for fighting fire of oils, solvents, gases, paints, varnishes, electrical wiring, live machinery fires and all flammable liquid & gas.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 4: ANNEXURES

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

FORMAT 1 - COVERING LETTER

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

I am/We are remitting herewith the required amount of Rs. towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transaction No dtd.....

Yours faithfully,

FORMAT 2 - POWER OF ATTORNEY

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

Power of Attorney to be provided by the Bidding Company in favour of its representative as evidence of authorized signatory's authority.

Know all men by these presents, We (name and address of the registered office of the Bidding Company as applicable) do hereby constitute, appoint and authorize Mr./Ms. (name & residential address) who is presently employed with us and holding the position of as our true and lawful attorney, to do in our name and on our behalf, all such acts, deeds and things necessary in connection with or incidental to submission of our Bid for Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala in response to the RFS. No dated issued by ANERT including signing and submission of the Bid and all other documents related to the Bid, including but not limited to undertakings, letters, certificates, acceptances, clarifications, guarantees or any other document which the ANERT may require us to submit. The aforesaid Attorney is further authorized for making representations to the ANERT and providing information / responses to ANERT representing us in all matters before ANERT and generally dealing with ANERT in all matters in connection with this Bid till the completion of the bidding process as per the terms of the above mentioned RFS.

We hereby agree to ratify all acts, deeds and things done by our said attorney pursuant to this Power of Attorney and that all acts, deeds and things done by our aforesaid attorney shall be binding on us and shall always be deemed to have been done by us.

All the terms used herein but not defined shall have the meaning ascribed to such terms under the RFS.

Signed by the within named

Notes:

The mode of execution of the power of attorney should be in accordance with the procedure, if any, laid down by the applicable law and the charter documents of the executant(s) and the same should be under common seal of the executant affixed in accordance with the applicable procedure. Further, the person whose signatures are to be provided on the power of attorney shall be duly authorized by the executant(s) in this regard.

The person authorized under this Power of Attorney, in the case of the Bidding Company / Lead Member being a public company, or a private company which is a subsidiary of a public company, in terms of the Companies Act, 1956, with a paid up share capital of more than Rupees Five crores, should be the Managing CEO / whole time CEO/manager appointed under section 269 of the Companies Act, 1956. In all other cases the person authorized should be a CEO duly authorized by a board resolution duly passed by the Company. Also, wherever required, the executant(s) should submit for verification the extract of the chartered documents and documents such as a Board resolution / power of attorney, in favour of the person executing this power of attorney for delegation of power hereunder on behalf of the executant(s).

FORMAT 3 – GENERAL PARTICULARS

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Name of the Agency	
Registered Office	
Nature of Agency (Ltd. Co., Partnership etc.) Attach Copy of partnership Deed/ Certification of Incorporation	
Year of Establishment	
Registration of Number	
Address for Communication	
Telephone number of Contact person(Mobile if any)	
Name of CEOs/ Proprietor/Partners(with address and Telephone No)	
GST Registration Number (Copy to be Attached)	
PAN Number	
TAN Number	
Whether the bidder wishes to form a project company for execution of work	
Whether any Civil Suit / Litigation arisen in the contract executed during the last five years/being executed. If yes, please furnish the name of the Contract, employer nature of work, contract value,	

work order and date and brief details of litigation.	
Details of Total Experience in general since inception(Details of similar systems installed till the date of bid)	
Details of Turnover for last Two years. (Copy Audited Statements has to be submitted for last two financial years)	
Details of offices in Kerala, India and abroad- address and contact details	

Documentary evidence for the bid qualification requirements are submitted along with this document and the details furnished above are true and correct.

FORMAT 5 - PERFORMANCE SECURITY GUARANTEE

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

BG No. :

Amount :

Date :

Valid up to :

In consideration of the Agency for New & Renewable Energy Research and Technology, therein after called "ANERT") have allotted work to M/s..... (hereinafter called the said Contractor) under the terms and conditions of Supply Order No..... issued by ANERT and the agreement dated made between (name of contractor) and ANERT for covering (hereinafter called the said agreement) of Security Deposit for the due fulfilment by the said contractor of the terms and conditions.

Contained in the said agreement, on production of the Bank Guarantee for Rs..... (Rupees..... only) we,Bank having our Head Office at (herein after referred to as "the Bank") at the request of M/s.(name of contractor) do hereby undertake to pay to the ANERT an amount not exceeding Rs..... (Rupees only), against any loss or damage caused to or suffered or would be caused to or suffered by the ANERT by reason of any breach by the said contractor of any of the terms and conditions contained in the said agreement

We,Bank, do hereby undertake to pay the amount due and payable under this Guarantee without any demur, merely on a demand from the ANERT stating that the amount claimed is due by way of loss or damage caused to or would be caused to or suffered by the ANERT by reasons of breach by the said contractor of any of the terms or conditions contained in the said agreement. Any such demand made on the Bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee. However, our liability under this guarantee shall be restricted to an amount not exceeding Rs. (Rupees only).

This guarantee will not be discharged due to change in the constitution of the bank or the contractor/supplier.

Notwithstanding anything contained hereinbefore:

- 1) Our liability under this Bank Guarantee shall not exceed Rs.....(Rupees only)
- 2) This Bank Guarantee shall be valid upto
- 3) We are liable to pay the guaranteed amount or any part thereof under this Bank Guarantee amount only and only if you serve us a written claim or demand on or before.....

Dated at this ... day of 2023

FORMAT 6 – COMPONENT WISE SPLIT UP OF COSTS

(On Letterhead of the respective entity for which the below details are provided.)

To be provided for all capacity quoted by the bidder

S/N	Component	Percentage (%)
1	SPV Modules	
2	Module Mounting Structure	
3	Grid Tied Inverter as per specification	
4	Balance of System	
5	Cost for 10 Year Warranty and Preventive Maintenance	
6	Installation and Commissioning Charges	
7	Insurance (From Material dispatch till 10 years warranty period)	
8	Any miscellaneous expenses required for the successful commissioning of the plant	
9	Remote Monitoring and associated costs	
Total		100%

ANNEXURE A – PRE-AGREEMENT

(To be on non-judicial Kerala stamp paper of value Rs. 200)

ARTICLES OF AGREEMENT executed on this the day of
Two thousand andbetween the **Agency for
New & Renewable Energy Research and Technology** (hereinafter referred to as
ANERT) of the one part and Sri
(Name and Address of the tenderer) hereinafter referred to as “the Bounden”) of the other
part.

WHEREAS in response to the Notification No.
dated the bounden has submitted to ANERT a e-tender for the ***Request for
Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar
City project funded by Smart City Thiruvananthapuram Ltd*** specified therein subject to
the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT a sum of Rs. as
Earnest Money Deposit for execution of an agreement undertaking the due fulfilment of
the contract in case his e-tender is accepted by ANERT. NOW THESE PRESENTS WITNESS
and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract
for is
awarded to the bounden, the bounden shall within Fifteen days of acceptance of this e-
tender, execute an agreement with ANERT incorporating all the terms and conditions
under which ANERT accepts this e-tender.

In case the bounden fails to execute the agreement as aforesaid incorporating the terms
and conditions governing the contract, ANERT shall have power and authority to recover

from the bounden any loss or damage caused to ANERT by such breach as may be determined by ANERT by appropriating the moneys inclusive of Earnest Money deposited by the bounden and if the Earnest Money is found to be inadequate the deficit amount may be recovered from the bounden and his properties movable and immovable in the manner hereinafter contained.

All sums found due to ANERT under or by virtue of this agreement shall be recoverable from the bounden and his properties movable and immovable under the provisions of the Revenue Recovery Act for the time being in force as though such sums are arrears of land revenue and in such other manner as ANERT may deem fit.

In witness whereof Sri (Name and Designation) for and on behalf of the Agency for New & Renewable Energy Research and Technology and Sri the bounden have hereunto set their hands the day and year shown against their respective signature.

Signed by Sri Signed by Sri

ANNEXURE B – BIDDERS TECHNICAL INFORMATION

TECHNICAL PARTICULAR DATA

Solar PV Module

Sl. No	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Manufacture name to be specified	
2	PV Module type	Poly/Mono Crystalline, Mono PERC	
3	No. of PV cells per Module		
4	Total number of PV modules		
5	Max. Power, P_{mp} @STC	330 Wp or above	
6	Max. Power tolerance (%)	Not more than 3%	
7	Max. Power voltage (V_{mp}) @STC	To be specified	
8	Max. Power current (I_{mp}) @STC	To be specified	
9	Open circuit voltage, V_{oc} @ STC	To be specified	
10	Short circuit current, I_{sc} @STC	To be specified	
11	Nominal voltage	To be specified	
12	Nominal Wattage	To be specified	
13	Fill Factor	Not less than 0.7	
14	Temp. coefficient of V_{oc} (%/C)		
15	Temp. coefficient of P_{mp} (%/C)		
16	Temperature Co-efficient of I_{sc} (%/°C)		
17	Normal Operating Cell Temperature (NOCT) (°C)		
18	Operating Temperature (°C)		
19	Module efficiency	$\geq 17\%$	
20	No. of By-pass Diodes		
21	Mounting arrangement for Solar Module	Fixed Arrangement	

Sl. No	Particulars	Required	Offered
22	Solar Module frame material	Anodized Aluminium	
23	Module dimensions' cm (L x W x H)	To be specified	
24	PV panel Weight (kg)	To be specified	
25	Output Cables	Polarized, UV protected & Weather Proof DC rated multi-contact connector	
26	Output Terminal	PV Connectors	
27	Junction Box	Weather resistant HDPE (IP65)	
28	Copies of test certificates	IS 14286/IEC 61215,61730 part 1&2, IEC 61701	

INVERTER

Sl. No.	Particulars	Required	Offered
1	Manufacturer		
2	Model name/No.		
3	Number of units		
4	Nominal AC power		
5	Nominal AC voltage		
6	Nominal AC Current		
7	AC grid Frequency range	50Hz $\pm$ 0.5%	
8	AC grid voltage range		
9	Power Factor (+ and -)		

Sl. No.	Particulars	Required	Offered
10	Total Harmonic Distortion	As per IEEE-519 2014	
11	AC over / under voltage over / under frequency protection		
12	Max PV input power		
13	Maximum DC voltage	Less than 1000 V	
14	MPPT voltage range		
15	Maximum DC current		
16	No. of DC input ports		
17	Maximum Efficiency	as per IEC61683	
18	DC voltage ripple		
19	Ambient temperature range		
20	Humidity (non-condensing)	95%, non-condensing	
21	Protective functions - AC over/under voltage, AC over/under frequency, over temperature, AC and DC overcurrent, DC over-voltage, against Islanding		
22	Communication Interface	RS485, MPI Profi-Bus/Telephone Modem/WiFi	
22	User-display standard	LCD panel with membrane keypad	
23	Enclosure environment rating		
24	Safety and EMC		
25	Anti-islanding feature	IEEE1547/UL1741/IEC62116	

ANNEXURE C – DECLARATION BY THE BIDDER

e-Tender Notification No:, dtd for Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No.: (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule
3. Our Bid shall be valid for a period of 6 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 5 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. Our firm has obtained the certifications from MNRE or NABL approved Test laboratories that the goods and services are satisfying the technical criteria specified in the bid.

CEO ANERT

E-TENDER NOTICE

Competitive e-tenders in two cover system with Earnest Money Deposit (EMD) and Price Bid are invited from experience and eligible bidders to participate in the ***Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd.*** The e-tender documents can be downloaded from the e-tendering website of Govt. of Kerala. Tender form will not be available in any other form.

Bid documents which include Eligibility criteria, "Technical Specifications", various conditions of contract, formats, etc. can be downloaded from website www.etenders.kerala.gov.in. Any amendment (s)/corrigendum/clarifications with respect to this Bid shall be uploaded on the above website only. The Bidder should regularly follow up for any Amendment/Corrigendum/Clarification on the above website.

TENDER ABSTRACT

Ref. No.	ANERT-TECH/99/2022-T2
Document Description	Implementation of 2 MWp Grid Connected Solar PV Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram
Name of Work	Design, Supply, Engineering, Erection Testing, Commissioning of SPV Power Plant of cumulative capacity of 1 MWp with Grid connectivity along with 10 years of Operation & Maintenance at various
Site	Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram
Download of Tender Form	http://www.etenders.kerala.gov.in
Last date of submission of Tender	26/04/2023 @ 03.00 PM
Date and Time of Bid opening (Techno-Commercial)	27/04/2023 @ 03.30 PM
Cost of Tender form	Rs. 11,800/- (Including GST)
EMD	Rs. 2,00,000/-
Warranty period	10-year warranty and complete Operation & Maintenance. Minimum guaranteed PR and CUF of the plant as specified in the Technical Specification to be maintained.
Availability of Tender Forms	Website http://www.etenders.kerala.gov.in
Place of opening of tender	Office of CEO, ANERT Law College Road, Vikas Bhavan. PO, Thiruvananthapuram – 695 033, Kerala
Thiruvananthapuram 12/04/2023	Sd/- CEO

Important Note: Prospective Bidders are requested to remain updated for any notices/amendments/clarifications etc. to the RFS document through the website www.anert.gov.in/www.etenders.kerala.gov.in. No separate notifications will be issued for such notices/amendments/clarification etc. in the print media or individually.

DISCLAIMER

1. Though adequate care has been taken while preparing the NIT document, the Bidders shall satisfy themselves that the document is complete in all respect. Intimation regarding any discrepancy shall be given to this office immediately. If no intimation is received from any Bidder within Ten (10) days from the date of notification of NIT / issuance of e-Tender documents, it shall be considered that the document is complete in all respect and has been received / acknowledged by the Bidder(s).
2. Agency for New and Renewable Energy Research and Technology (ANERT) reserves the right to modify, amend or supplement this document.
3. While this tender document has been prepared in good faith, neither ANERT nor their employees or advisors make any representation or warranty, express or implied, or accept any responsibility or liability, whatsoever, in respect of any statements or omissions herein, or the accuracy, completeness or reliability of information, and shall incur no liability under any law, statute, rules or regulations as to the accuracy, reliability or completeness of this document, even if any loss or damage is caused by any act or omission on their part.

Solgen Energy Pvt. Ltd.

22/314-B, Kuttanallur P.O, Thrissur - 680014, Kerala, India.

COVERING LETTER

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New & Renewable Energy Research and Technology (ANERT), at the rates quoted against each item.

I am/We are remitting herewith the required amount of Rs. NIL (Exemption Allowed, MSME Certificate Attached) towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transactionNo dtd.....

Yours faithfully,

Lajo Davis

ANNEXURE C – DECLARATION BY THE BIDDER

e-Tender Notification No: ANERT-TECH/99/2022-T2, dtd 12.04.2023 for
Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant
at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City
project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No. (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule
3. Our Bid shall be valid for a period of 6 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 5 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. Our firm has obtained the certifications from MNRE or NABL approved Test laboratories that the goods and services are satisfying the technical criteria specified in the bid.

Lajo Davis
Manager Design & Technical

ANNEXURE D – DECLARATION OF RELATIONSHIP WITH ANERT EMPLOYEE

Tender Notification No.: ANERT-TECH/99/2022-T2, dtd 12.04.2023

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

Name of the ANERT employee with Designation: Nil

Name of the bidder related to the employee: Nil

This is to put on record that Shri/SmtNil..... currently working asNil... in ANERT is related to M/s Solgen Energy Pvt Ltd, who is the bidder in the bid. We are aware of the Anti-corruption policy of ANERT and will observe the highest standards during the procurement and the execution of contract and shall retain from corrupt, fraudulent, collusive or coercive practices on competing for the contract.

Solar inverters

ABB central inverters PVS800 100 to 1000 kW

ABB central inverters raise reliability, efficiency and ease of installation to new levels. The inverters are aimed at system integrators and end users who require high performance solar inverters for large photovoltaic (PV) power plants. The inverters are available from 100 up to 1000 kW, and are optimized for cost-efficient multi-megawatt power plants.

World's leading inverter platform

The ABB central inverters have been developed on the basis of decades of experience in the industry and proven technology platform. Unrivalled expertise from the world's market and technology leader in frequency converters is the hallmark of this solar inverter series.

Based on ABB's highly successful platform and the most widely used frequency converters on the market – the inverters are the most efficient and cost-effective way to convert the direct current (DC) generated by solar modules into high-quality and CO₂-free alternating current (AC) that can be fed into the power distribution network.

Solar inverters from ABB

ABB central inverters are ideal for large PV power plants but are also suitable for large-sized power plants installed in commercial or industrial buildings. High efficiency, proven components, compact and modular design and a host of life cycle services ensures ABB central inverters provide a rapid return on investment.

Highlights

- High total performance
- Modular and compact product design
- Extensive DC and AC side protection
- Full grid support functionality
- Fast and easy installation
- Complete range of industrial-type data communication options, including remote monitoring
- Life cycle service and support through ABB's extensive global service network

Maximize yields without losing a watt

Maximum energy and feed-in revenues

ABB central inverters have a high total efficiency level. Optimized and accurate system control and a maximum power point tracking (MPPT) algorithm together with high efficiency power converter design ensure that maximum energy is delivered to the power distribution network from the PV modules. For end users this generates the highest possible revenues from the feed-in tariffs.

Proven ABB components

The inverters comprise proven ABB components with a long track record of performance excellence in demanding applications and harsh environments. Equipped with extensive electrical and mechanical protection, the inverters are engineered to provide a long and reliable service life of at least 20 years.

Compact and modular design

The inverters are designed for fast and easy installation. The industrial design and modular platform provides a wide range of options like remote monitoring, fieldbus connection and modular and flexible DC input cabinet. The integrated DC cabinet saves space and costs as the solar array junction boxes can be connected directly to the inverter DC cabinet fused busbars. The inverters are customized to meet end user needs and are available with short delivery times.

Effective connectivity to power distribution network

ABB's transformerless central inverter series enables system integrators to design the PV power plant using optimum combination of different power rating inverters. Inverters are connected to the medium voltage (MV) power distribution network either centrally or in a distributed manner depending on the plant size and shape and network connection position.

Advanced grid support features

ABB central inverter software includes all the latest grid support and monitoring features including active power limitation, low voltage ride through (LVRT) with current feed-in and reactive power control. Active and reactive power output can be limited by using an external source. Active power can also be limited automatically as a function of grid frequency.

All grid support functions are parameterized allowing easy adjusting for local utility requirements. ABB central inverters are also able to support grid stability even at night by providing reactive power with the DC input disconnected.

ABB central inverters

PVS800

100 to 1000 kW

High total performance

- High efficiency
- Low auxiliary power consumption
- Efficient maximum power point tracking
- Long and reliable service life of at least 20 years

Modular industrial design

- Compact and easy-to-maintain product design
- Fast and easy installation
- Integrated and flexible DC input cabinet

Full grid support functionality

- Reactive power compensation also during the night time
- Active power limitation
- Low voltage ride through with current feed in

Extensive protections

- DC and AC side protection with built-in fuses, surge protection and filters
- Increased reliability and safety with DC and AC side contactors
- Heavy-duty surge protection

Grid code compatibility

- Wide country-specific grid code compliance
- Adjustability to various local utility requirements

Proven technology

- Based on ABB's market-leading technology platform used in frequency converters

Life cycle service and support

- ABB's extensive global service network
- Extended warranties
- Service contracts
- Technical support throughout the service life

Wide communication options

- Complete range of industrial-type data communication options
- Ethernet/Internet protocol
- Remote monitoring

Grid support and grid functions	Reactive power compensation ¹⁸⁾ , Power reduction, LVRT, HVRT, Anti-islanding						

¹¹⁾ Frosting is not allowed. May need optional cabinet heating.

¹²⁾ Power derating after 40 °C/45 °C/50 °C

¹³⁾ Power derating above 1000 m

¹⁴⁾ With option 2000 to 4000 m

¹⁵⁾ At partial power typically < 70 dBA

¹⁶⁾ Optional

¹⁷⁾ More detailed information, please contact ABB

¹⁸⁾ Also during the night

Data communication principle for ABB central inverters

Options

- Integrated and flexible DC input extension cabinets
- Cabinet heating
- I/O extensions
- DC grounding (negative and positive)
- Fieldbus and Ethernet connections
- Current measurement to each DC input
- Warranty extensions
- Solar inverter care contracts

Accessories

- Solar array junction boxes with string monitoring
- Remote monitoring solutions

Support and service

ABB supports its customers with a dedicated service network in more than 60 countries and provides a complete range of life cycle services from installation and commissioning to preventative maintenance, spare parts, repairs and recycling.

For more information please contact your local ABB representative or visit:

FRONIUS TAURO

Direct variant.

System design flexibility

Max. performance up to 50°C

Direct sunlight

Optimizing costs

Active Double Wall Cooling

Power stage replacement

The three-phase Fronius Tauro in the 50 and 100 kW power classes promises maximum performance for decentral systems even under the harshest conditions.

With its smart hardware design, it offers not just BOS cost optimization but unprecedented flexibility in system design. Simple installation and the fastest service on the market ensure maximum yield.

TECHNICAL DATA FRONIUS TAURO

INPUT DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Number of MPP trackers	3		1	
Max. input current ($I_{dc\ max}$)	134 A	87.5 A		175 A
Max. input current module field (PV1 / PV2 / PV3)	36 / 36 / 72 A	75 / 75 / - A		75 / 75 / 75 A
Max. short circuit current (PV1 / PV2 / PV3)	72 / 72 / 125	125 / 125 / -		125 / 125 / 125
Max. short circuit current ($I_{sc\ max}$, inverter)	240	178		355
DC input voltage range ($U_{dc\ min} - U_{dc\ max}$)	200 - 1000 V		580 - 1000 V	
Feed-in start voltage ($U_{dc\ start}$)	200 V		650 V	
Usable MPP voltage range ($U_{mpp\ min} - U_{mpp\ max}$)	400 - 870 V		580 - 930 V	
Number of DC connections (PV1 / PV2 / PV3)	4 / 3 / 7	7 / 7 / -		7 / 7 / 8
Max. PV generator power ($P_{dc\ max}$)		75 kW _{peak}		150 kW _{peak}

OUTPUT DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
AC nominal output ($P_{ac\ n}$)		50,000 W	99,990 W	100,000 W
Max. output power		50,000 VA	99,990 VA	100,000 VA
AC output current ($I_{ac\ nom}$)		76 A		152 A
Grid connection ($U_{ac\ n}$)		3~ NPE 400/230 V ; 3~ NPE 380/220 V		
Frequency (frequency range $f_{min} - f_{max}$)		50 Hz / 60 Hz (45 - 65 Hz)		
Power factor ($\cos \phi_{ac\ n}$)		0 - 1 ind. / cap.		

GENERAL DATA	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Dimensions (height x width x depth)		755 x 1109 x 346 mm (without wall mount)		
Weight	92 kg	74 kg		103 kg
Degree of protection		IP 65		
Protection class		1		
Night-time consumption		< 16 W		
Cooling		Active cooling technology and double wall system		
Installation		Indoor and outdoor ¹		
Ambient temperature range		- 40 bis + 65 °C ²		
Certificates and compliance with standards ³		AS/NZS 4777.2:2020, IEC62109-1/-2, VDE-AR-N 4105:2018, IEC62116, EN50549-1:2019 & EN50549-2:2019, VDE-AR-N 4110:2018, CEI 0-16:2019, CEI 0-21:2019		

¹ Direct under the sun is possible

² Optional AC-disconnect mounted inside the inverter: from -30 to +65 °C

³ These are planned certificates. For the current certificates, please see www.fronius.com/tauro-cert

TECHNICAL DATA FRONIUS TAURO

AC CONNECTION TECHNOLOGY	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Cable cross section	35 - 240 mm ²		70 - 240 mm ²	
AC conductor material	Al and Cu			
Connection terminals	Cable lug or V clamps			
Single core option (single core cable)	Cable gland: 5 x M40			
Multi core option (multi core cable)	Cable gland: 1 x multi core connection ø 16 - 61.4 mm + 1 x M32			
AC Daisy Chaining option (single core cable)	Cable gland: 10 x M32			

DC CONNECTION TECHNOLOGY	TAURO 50-3-D	TAURO ECO 50-3-D	TAURO ECO 99-3-D	TAURO ECO 100-3-D
Cable cross section	4 - 6 mm ²

THREE BUSINESS UNITS, ONE GOAL: TO SET THE STANDARD THROUGH TECHNOLOGICAL ADVANCEMENT.

What began in 1945 as a one-man operation now sets technological standards in the fields of welding technology, photovoltaics and battery charging. Today, the company has around 5,440 employees worldwide and 1,264 patents for product development show the innovative spirit within the company. Sustainable development means for us to implement environmentally relevant and social aspects equally with economic factors. Our goal has remained constant throughout: to be the innovation leader.

PERFECT WELDING

Our mission is Perfect Welding; a task we have approached with passion and skill for decades in order that our customers can join materials with the perfect weld seam. With our outstanding technologies and services and together with our customer's applications, not only do we solve their specific welding technology problems, but we also make a substantial contribution to increasing their productivity.

SOLAR ENERGY

Our mission is to achieve 24 hours of sun. Day after day we are hard at work turning this vision of a future in which 100% of the world's energy needs are covered by renewable sources into a reality. We are therefore concentrating on solutions to intelligently, efficiently and economically generate, store, distribute and consume solar energy.

PERFECT CHARGING

As know-how leaders in the world of battery charging, we deliver exceptional solutions to create the maximum benefit for our customers. For the intralogistics sector, we are committed to energy flow optimisation for electric forklift trucks and are constantly striving for the next innovation. Our powerful charging systems for vehicle workshops guarantee safe and reliable processes.

FORM T-4

PERFORMANCE REPORT OF WORKS

1	Name of work/ Project & Location	Design, Installation, Testing & Commissioning of 0.5MW grid interactive Ground Mounted solar PV Plant on turn-key basis at 110kw substation, Kuttipuram, Malappuram District.
2	Agreement No:	1060 Dated 28 th January 2017
3	Estimated Cost	Nil
4	Tendered Cost	Rs.3,01,00,985.23
5	Date of Start	28.01.2017
6	Date of Completion	
	i) Stipulated date of Commission (As mentioned in work order)	4 Months
	ii) Actual date of completion	01/10/2018
7	a)Whether case of Levi of compensation for delay has been decided or not	No
	b) If decided amount of compensation levied for delayed completion, if any	
8	Amount of reduced rate items, if any	
9	Performance report	
	1)Quality of work	Outstanding
	2)Financial Soundness	Outstanding
	3)Technical Proficiency	Outstanding
	4)Resourcefulness	Outstanding
	5)General Behaviour	Outstanding
10	Remarks (If any)	

Dated: 22.12.2022

Kerala State Electricity Board Limited is pleased to accept your financial and technical offer and place this Letter of Award (LoA) to your offer for Appointment of EPC contractor for the design as per site conditions, erection, testing & commissioning of Grid Tied Rooftop Solar PV Power plants under IPDS scheme for Kerala launched by Ministry of Power, Government of India, on the Roof of buildings owned by Kerala State Electricity Board Limited to generate and deliver 445 kWp in total 23 locations in Trivandrum, Kollam, Kottayam, Pathanamthitta, Alappuzha, Ernakulam, Idukki and Thrissur including Operation for first year & Maintenance of the plant for the first 5 years from the date of commissioning utilizing the IPDS fund.

The contract shall be strictly in accordance with provisions contained in the bid documents cited under reference (3) above. This LoA, tender documents will form part of the contract agreement.

Additional conditions/modifications if any, stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The work includes design, planning, investigation, survey, engineering, manufacture/procurement, manufacturer's quality assurance, shop testing (including type testing where specified/required), transportation, handling storage, erection including all civil/structural works, electrical and general works, piping, cabling, instrumentation, installation, testing and commissioning, training, services, permits and insurance at all stages on composite supply basis of Grid-tied solar photovoltaic system on the rooftop of buildings under KSEBL to install the solar PV plant in 23 locations to produce and deliver 445 kWp in various districts of South and Central region of Kerala and handing over the SPV Plants to KSEBL to its full satisfaction. The contractor shall be responsible for obtaining consents, clearances, including Electrical Inspectorate sanction, permit and approval from appropriate authorities and KSEBL for grid connection.

The generated output power from the solar panels at low voltage shall be grid tied to Voltage levels available at the existing grid infrastructure at the various locations. The EPC Integrator shall also be responsible for the operation and maintenance of the plant for the first year after commissioning and do maintenance of the plant for the next 4 years. The plant shall be designed for a project life of 25 years.

The contractor shall be responsible for the performance to attain the net minimum guaranteed generation (NMGG) specified in the Table-1 below for five years from the date of

commissioning. To ensure this NMGG, the contractor shall erect additional number of solar modules if any without extra cost to KSEBL.

Any material or works which have not been specifically mentioned in the specifications/schedule but which are found necessary and essential for the proper fulfillment of the contract during execution will also form part of the work. This shall also deem to be covered by the rates and prices quoted for the work and no additional payment will be made to the contractor for such unspecified but essential work elements.

Table 1

Sl.No	Location of the project	Total capacity (KWp)	Yearwise Net Minimum Guarantee Generation (NMGG) in kWh				
			1st year	2nd year	3rd year	4th year	5th year

The contractor shall be responsible for obtaining consents, clearances, including Electrical Inspectorate sanction, permit and approval from appropriate authorities and KSEBL for grid connection. As the projects are under IPDS, the installations shall be satisfactory with the appropriate authorities/Project monitoring agency of IPDS in line with the tender conditions. Sign boards in accordance with the specification for the IPDS projects have to be provided in each location indicating the name of the project, name of implementation agency and capacity. The sign board should be put up immediately when the plant is commissioned.

All statutory approvals/permissions related to installation of the solar power plant and carrying out its operation & maintenance (O&M) as may be required under applicable law/ rules shall be obtained by the contractor. All fees for such statutory approvals for installation, commissioning and operation for the first year and maintenance for first five years from the date of commissioning shall be borne by the Contractor.

2. Name of the Project:

Design, Installation, testing and commissioning of 445 kWp Grid tied Rooftop Solar PV project on composite supply basis under IPDS scheme in 23 locations of South and Central region of Kerala using IPDS fund and operation of the plant for the first year and maintenance of the plant for the first 5 years from the date of commissioning of the plant herein after called "the project".

3. Name of the Utility:

Kerala State Electricity Board Ltd, having its Registered Office at Vydyuthi Bhavanam, Pattom, Thiruvananthapuram-695004, Kerala, India. Website: www.kseb.in herein after called "KSEBL"

4. Name of the Contractor:

M/s. Solgen Energy Pvt Ltd, 22/314-B, Kuttanellur P.O, Thrissur, Kerala, India-680 014 herein after called "Contractor".

5. Contract Amount:

The Total Contract Amount is INR 3,04,78,050/- (Rupees Three Crore Four Lakhs Seventy Eight Thousand and Fifty only) for design, engineering, manufacturing, procurement, supply (including spares), handling storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price under composite supply with 5% GST payable by the contractor for successful completion, operation and maintenance of the project as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document and as per B.O vide ref(9) above. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

6. Taxes & Duties:

The Contract Amount as indicated in clause 5 of this document is inclusive of 5% GST. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State/Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed. Any hike in tax rate will be admitted during the contract period only if the contract is executed as per contract schedule and benefits of reduction in tax rates shall be passed on to KSEBL. The contractor shall submit a clear tax invoice containing all details prescribed as per GST Act and Rules for effecting Payments.

7. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract i.e for 5 years. The entire cost on account of this shall be borne by the Contractor. Losses or damage if occurred to such machinery, equipment and work shall be made good at the risk of Contractor. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times.

The machinery, equipment and other valuable material of the Contractor at work site shall be insured by the contractor so that any loss or damage due to force majeure situation can be taken up by the Contractor with the insurance companies for getting their claims. The KSEBL will not give any financial assistance on this account.

All the personnel employed/engaged by the contractor shall have adequate insurance coverage. Any claim due to mishap/accidence or otherwise to personnel/equipment, shall be taken up by the contractor, directly with the insurance company. KSEBL will not have any liability in this respect whatsoever.

The Contractor, without limiting KSEBL's obligations and responsibilities shall insure:

- (a) the works, together with materials and plant to the full replacement cost and third party liability at site.
- (b) an additional sum of 15% of such replacement cost to cover additional costs and incidental to the rectification of loss or damage including professional fees and cost of demolishing and removing any part of works and of removing debris of whatsoever nature, and
- (c) the Contractor's equipment and other things brought to site, for a sum sufficient to provide for their replacement at the site.
- (d) The insurance against third party liability at site shall be ensured before commencing the execution of work, against any damage or loss or injury which may occur to the equipment being shifted/ installed or to any property or person (including property and employees of the Employer) by or arising out of the execution of works or temporary works in carrying out of the Contract. The insurance coverage shall be revalidated till the certification of project.

The insurances under item (a) and (b) shall be in the joint names of Contractor and KSEBL and shall cover:

- (i) KSEBL and the Contractor against all losses or damage, from whatsoever cause arising from the start of work at the site until the date of issue of the relevant taking over certificate in respect of the works or any section or part thereof as the case may be, and
- ii) The Contractor for his liability :
 1. during the Defects Liability Period for loss or damage arising from a cause occurring prior to the commencement of Defect Liability Period,
 2. for loss or damage caused by the Contractor in the course of any operations carried out by him under the terms of the Contract, and
 3. for loss or damage caused by the Contractor in the course of any operation carried out by him during execution of works to the neighbouring habitats , life and property in an area of 200 metres around the boundary of the site.

If the Contractor fails to effect in force the insurances referred in the above clauses, or any other insurance which he may be required to effect under the terms of the contract, then and in any such case, the KSEBL may effect and keep in force any such insurance and pay such premium or premiums as may be necessary for that purpose and from time to time deduct the amount so paid by the KSEBL as aforesaid from any amounts due or which may become due to the Contractor, or recover the same as a debt due from the Contractor.

8. Work commencement, Period of Completion and Date of Commissioning:

The Contractor shall complete the implementation in all respect within 6 months from the official date of commencement of work which shall be on or before 15 days from the date of executing Agreement or the date of handing over the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later.

The site shall be handed over to the contractor by the Engineer-in-Charge within 15 days from the date of execution of Agreement. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion thus worked out, unless the time of completion is postponed and period of completion is extended by a written letter from the Agreement Authority.

All Commissioning test shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

The date of commissioning shall be the date on which the solar plant is synchronized into KSEBL grid after obtaining clearance from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL found satisfactory. The Engineer in Charge should issue a certificate indicating the date of commissioning and an authorization certificate/commissioning report after the successful synchronization and commissioning of the plant with the grid.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project and if there are no obligations to arise out of the Contract, the Engineer in charge shall furnish a certificate to the Contractor to the effect that all works are completed satisfactorily and no works remains incomplete as per the terms of contract. The issue of this certificate does not relieve the contractor from the obligations during the defect liability period and the execution of Operation for first year and Maintenance for 5 years.

As the projects comes under IPDS, the installations shall be satisfactory with the appropriate authorities/Project monitoring agency of IPDS and necessary rectifications if any proposed against the defects shall be done based on the inspection in line with the tender conditions. The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant after completion of the project.

9. Price Escalation due to Extension Of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions.

10. Liquidated Damage:

Any delay in commissioning a Project will adversely affect the total planning which in turn will affect the State and the public exchequer. Hence, for any damage or loss caused to the KSEBL due to the failure from the part of the Contractor in completing the Work in all respects within the stipulated period of completion, the Contractor shall compensate for the same. The Liquidated Damages (not as penalty) is to be realised at the end of the period of completion. The maximum amount of Liquidated Damages shall be limited to 10% of the accepted Contract Amount in proportionate to the capacity for each location. The rate of Liquidated Damages shall be 0.05% of accepted Contract Amount in proportionate to the capacity for each location per day of delay subject to a maximum of 10% accepted contract amount in proportionate to the capacity of each location.

Penalty imposed, if any, shall be deducted from the amount of Liquidated Damages. If the delay prolongs in excess of 200 days from the agreed date of completion as per the original agreement, the Work is liable to be terminated and balance works will be arranged to be completed at the risk and cost of the Contractor as per clause 5.3.8 of volume 1 of the tender document.

11. Performance security deposit:

The Contractor shall submit a Bank Guarantee for an amount equal to 10% of the total Contract amount INR 30,48,000/- (Rs. Thirty lakh forty eight thousand only) as the Performance security deposit at the time of execution of agreement and shall be in the prescribed format in Annexure 2 - Contract forms A - of this document. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls including the NMGG, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the KSEBL, the Performance Security deposit for the Contract shall be collected and retained from the Contractor.

The Bank Guarantee shall be initially valid from the signing of contract and for a period of 2 years and be kept renewed from time to time. This Performance security deposit BG equivalent to 10% of the total contract amount will be released on proving the Net Minimum Guaranteed Generation (NMGG) specified for the 1st year in the Table-1 (page 3) of this LoA, within one year from the date of commissioning for each plant and subject to the submission of a B.G equivalent to 5% of the total Contract Amount which shall be valid for a period of 5 years to cover the entire defects liability period.

This remaining 5% of the contract amount furnished as performance security deposit will be released after the defect liability period of 5 years subject to the following.

Contractor shall be responsible for performance of the plant to attain net minimum guaranteed generation as offered for succeeding 4 years after commissioning and proving the capacity. Proper operation and maintenance of the plant shall be carried out in this regard. As the 100% of the total contract amount is released after satisfactory completion, testing and commissioning of the plant which includes the O&M cost of the plant. For any shortfall in attaining the net minimum guaranteed generation for the 2nd, 3rd, 4th and 5th years as specified in the Table-1 (page 3) of this LoA, a compensation equivalent to existing O&M cost for each year as defined by the CERC Regulation 2016 vide ref(10) above shall be recovered from the contractor as per the decision of the agreement authority vide clause 1.2 of volume 3 of the tender document. This compensation shall be 12.5% of the Performance Security Deposit (i.e., Rs. 3,80,000) for each 2nd, 3rd, 4th and 5th years which shall be deducted from the Performance Security Deposit.

No interest shall be paid by KSEBL at any stage of contract on this Performance Security Deposit.

12. Agreement:

A contract agreement has to be executed by the contractor within 15 days from the date of issue of this LoA, in the prescribed format in Annexure 2-Contract form B of this document, in Kerala State Government Stamp paper worth INR 200/- (Indian Rupees Two Hundred only), along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed:

The contractor shall provide the original contract agreement and Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney in original and other requisite documents for signing of the contract. All the documents cited in clause no.30 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

Failure of the Contractor to comply with the above requirement shall constitute sufficient grounds for cancellation of award of contract and to re-arrange the Work including re-bidding at the risk and cost of the Contractor. If due to the default of the Bidder/Contractor to furnish requisite Performance Security deposit, execute Contract Agreement or to take possession of the site and execute the Work with proper diligence, the Work will be arranged otherwise by Engineer-in-Charge at the risk and cost of the Contractor and if any loss to KSEBL results due to this, the same will be recovered from the Contractor. Recoveries on this or on any other account will be made from the sum that may be due to the Contractor on this or any other subsisting contracts or under the Revenue Recovery Act or otherwise as the KSEBL may decide.

13. Construction Programme:

Within 15 days from the date of award, the contractor shall submit a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones to KSEBL for approval.

The contractor shall carry out the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL. Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

14. Terms of Payment:

- a. The contractor shall submit a clear tax invoice containing all details prescribed as per GST ACT and RULES for effecting Payment.
- b. The Contractor has to produce Bank Guarantee for an amount specified in the clause 11 of this LoA as Performance Security Deposit at the time of executing Contract Agreement.
- c. Up to 10% of the Total Contract amount will be released to the contractor as Mobilisation advance, after execution of the Contract agreement and production of a Bank Guarantee for 10% of the contract amount after site mobilisation as per clause no. 15 of this LoA.
- d. 30% of Contract value proportionate to capacity of each location excluding O&M, will be released to the contractor after delivery of major components (PV Modules, Inverters, and Module Mounting Structures) at sites after site inspection and acceptance tests and verification by authorized departmental officers and production of insurance certificates for the materials delivered at site.
- e. 100% of the total Contract amount proportionate to capacity of each location will be released after satisfactory completion, testing & commissioning as specified in the clause 8 (page 6) of this LoA. Bank Guarantee submitted for availing Mobilization advance, if any availed, can be released along with 100% payment after deducting Interest.
- f. The Performance security deposit BG equivalent to 10% of the total contract amount will be released on proving the Net Minimum Guaranteed Generation (NMGG) specified for the 1st year in the Table-1 (page 3) of this LoA, within one year from the date of commissioning for each plant and subject to the submission of a B.G equivalent to 5% of the total Contract Amount which shall be valid for a period of 5 years to cover the entire defects liability period. This remaining 5% of the contract amount furnished as performance security deposit will be released after the defect liability period of 5 years.

15. Advance Payment:

10% of the contract amount INR 30,47,805/- (Rs. Thirty lakh forty seven thousand eight hundred and five only) carrying an interest rate of 12% will be released as "Mobilization Advance" after signing the contract only on request of the contractor. The following shall be ascertained before release of payment:-

- Submission of necessary Bank Guarantee/Guarantees of 10% of Contract Amount.
- Submission of agreed project implementation schedule.
- Submission of all drawings and major components for approval.

This Bank Guarantee shall be valid till the completion and commissioning of work and shall be extended if required. The BG (10% of contract amount) towards advance payment will be released after the satisfactory completion and commissioning of the project.

The KSEDL may, if requested by the Contractor, allow multiple Bank Guarantees towards Security for the advance granted. The interest on advance paid shall be calculated

from the date of payment to the date of recovery, both days inclusive, on the outstanding amount of advance. Recovery of such sums shall be done at the time of completion of work and final payment of the contract amount.

The Contractor shall indemnify the KSEBL against all losses that the KSEBL may suffer due to theft or destruction or pilferage or any other cause on this account.

This Bank Guarantee shall be extended as mutually agreed upon, if situation requires.

The Advance Bank Guarantee should be submitted strictly as per prescribed format enclosed in Annexure 2-Contract form C.

16. Payment Authority and Engineer-in-Charge:

The details of Engineer-in-Charge of all locations are furnished below for the proper monitoring of the project.

Sl. No	Location of the project	Engineer-In-Charge	Total capacity (KWp)	IPDS Ele.Circle
1	66 kV Substation Kuravilangadu	Deputy Chief Engineer Trn.Circle, Poovanthuruth	15	Kottayam
2	110 kV Kozhencherry	Executive Engineer Trn.Division, Pathanamthitta	15	Pathanamthitta
3	66 KV Substation Thiruvalla	Executive Engineer Trn.Division, Pathanamthitta	15	Pathanamthitta
4	Vydyuthi Bhavanam Pathanamthitta	Executive Engineer Trn.Division, Pathanamthitta	25	Pathanamthitta
5	110 KV Substation Kavanad	Deputy Chief Engineer Trn.Circle, Kottarakkara	20	Kollam
6	66 KV Substation Balaramapuram	Deputy Chief Engineer Trn.Circle, Thiruvananthapuram	15	Kattakkada
7	66 KV Substation Neyyattinkara	Deputy Chief Engineer Trn.Circle, Thiruvananthapuram	15	Kattakkada
8	110 KV Substation Nedumangad	Deputy Chief Engineer Trn.Circle, Thiruvananthapuram	15	Thiruvananthapuram
9	66 KV Substation Vattiyoorkavu	Deputy Chief Engineer Trn.Circle, Thiruvananthapuram	15	Thiruvananthapuram
10	Powerhouse Thiruvananthapuram	Deputy Chief Engineer Trn.Circle, Thiruvananthapuram	10	Thiruvananthapuram
11	IB, Paruthippara	Executive Engineer Civil Division, Thiruvananthapuram	35	Thiruvananthapuram
12	Vydyuthi Bhavanam, Pattom, Loc.2	Executive Engineer Civil Division, Thiruvananthapuram	30	Thiruvananthapuram
13	110 kV S/s Ollur	Deputy Chief Engineer Trn.Circle, Thrissur	20	Thrissur
14	110 kV S/s, Wadakkancherry	Deputy Chief Engineer Trn.Circle, Thrissur	15	Thrissur
15	110kV S/s Ayyampuzha	Deputy Chief Engineer Trn.Circle, Thrissur	20	Thrissur
16	66kV S/s Angamaly	Deputy Chief Engineer Trn.Circle, Thrissur	30	Thrissur

17	110KV Substation Rayonpuram	Deputy Chief Engineer Trn.Circle, Thodupuzha	15	Thodupuzha
18	110 kV S/s Myloor	Deputy Chief Engineer Trn.Circle, Thodupuzha	20	Thodupuzha
19	110 kV S/s Kadavanthra	Deputy Chief Engineer Trn.Circle, Kalamassery	25	Ernakulam
20	110 kV S/s Kandanad	Deputy Chief Engineer Trn.Circle, Kalamassery	25	Ernakulam
21	66 kV S/s Alappuzha	Deputy Chief Engineer Trn.Circle, Alappuzha	15	Alappuzha

23	110 kV S/s Udumbanoor	Deputy CE Trn.Circle, Thodupuzha	15	Thodupuzha

The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision. The following flow chart indicates the work flow and payment for distribution and transmission works under IPDS.

The contractor shall submit bills in Triplicate to the Engineer in Charge with all supporting documents as specified in the bid document for preliminary audit. Measurement, check measurement and other certifications of the bills shall be done by the respective Engineers, along with necessary Invoices and other mandatory documents, after preliminary audit, shall be forwarded to the Engineer in Charge of each location. The work order and bill details shall be entered in SARAS software, and the bill shall be audited and passed. The duly certified and audited bills for payment of each location are to be forwarded to the respective IPDS Electrical Circle.

The Deputy Chief Engineer of IPDS Electrical Circle shall approve the bill and transfer the bills to FA and will make payment directly to the contractor through e- payment and intimate the payment details to the concerned circles and CAPs. The Engineer-in-Charge shall inform the status and details of payment effected to the agreement authority.

17. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, inverters, cables, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards, All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed valid test reports, list of O & M spares for major materials, detailed Bill of materials (site specific BOM) and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specification provided in the volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters, module mounting structures etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer- in- Charge in prior to the submission of all the drawings.

Solar meter and bi directional Net meter has to be provided by the contractor for the grid connected Solar Roof Top systems with accuracy class as per the Central Electricity Authority (Installation and Operation of Meters) Regulations, 2006. Three phase 4 wire, whole current, Bi-directional 10-60A static Tri vector energy meter of accuracy class 1S with LCD and ToD facility suitable for measurement of active kWh, reactive energy kVARh and apparent energy kVAh, kVA MD and kW MD at frequency in the range of 47.5 Hz to 52.5 Hz in balanced as well as unbalanced load conditions.

Energy meter provided for the installation of the solar PV plant shall be in accordance with the prevailing regulations and technical specifications of KSEBL.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, ~~202~~ duties, license fees, and other such levies

imposed outside the purchaser's country.

The contractor shall provide all MAFs (Manufacturer's Authorization Forms) for all the components specified in the bid within 15 days and before executing the Contract Agreement.

18. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details/specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s)/ inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram.
- e. Mounting structure drawing
- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be furnished
- i. PVSyst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

19. Quality Assurance and Inspection/Acceptance tests:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The power conditioning units / inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE

1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanisation of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted during the Factory inspection:

➤ For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electro luminous tests
8. Robustness of termination

➤ For inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

➤ For isolation transformer:

1. Visual inspection
2. Routine test as per IS-2026/ IEC 60601-1/IEC 61558-1

➤ For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fitment

The contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon

satisfactory completion of the inspection and tests, the Material Despatch Clearance Certificate will be issued.

The test and Inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commission at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also. Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any materials or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at contractor's cost.

20. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

Monthly Review Meeting shall be held in the office of the Engineer –in charge, between KSEBL and Contractor to monitor the progress of the works and review the plans for remaining works and to deal with matters that would rise in accordance with the early warning procedure.

The Engineer-in-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

21. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 as per CEA technical standard for connectivity of the distributed generation resources.

Individual voltage harmonics distortion	< 3 %
Total voltage DistortionTHD	< 5%
Total Current harmonic Distortion	<8%
Output frequency	= 50Hz +/- 0.5Hz

- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.

- e. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid and should shift to island mode.
- h. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained

22. Operation and Maintenance (O&M):

The Contractor shall be responsible for Operation of the plant at each location for the first year from the date of commissioning, and Maintenance of Solar PV plant at each location for the first five years from the date of commissioning. The date of commissioning is described under in clause no.8 of this LoA.

The scope of the contractor shall be, including but not limited to

- i) Cleaning of module surface on regular basis as and when required.
- ii) Normal and preventive maintenance of the plant
- iii) The contractor is responsible for supply of all spare parts, repairs / replacement of any defective equipment(s) at his own cost as required from time to time during the O&M period.
- iv) The O&M of the project during this period shall cover the tools and tackles, spare parts, any consumables, and any systems such as modules, inverter, PCU, remote monitoring etc. required for proper functioning of the SPV system as a whole.
- v) During the comprehensive O&M period, the contractor shall at his cost maintain the spares for minimising system outage due to time required in getting replacements of defective part(s) of equipment from the manufacturer. The contractor has to use the mandatory spare(s) available at site for replacing defective part(s) of equipment for minimising system outage temporarily and top up the quantity of spares so that the required quantity of spares shall be made available at site at all the times and same shall be handed over at the end of O&M period.

A maintenance record is to be maintained by the operator/engineer-in-charge to record the regular maintenance work carried out as well as any breakdown maintenance along with the date of maintenance reasons for the breakdowns steps have taken to attend the breakdown duration of the breakdown etc. Contractor shall submit monthly reports to the Engineer in charge, Agreement authority on the energy generation and operating conditions of the solar plant.

23. Annual Maintenance Contract (AMC):

The plant shall then be handed over to KSEBL at the end of 5 years. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price. The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

24. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the solar power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

The PV Power Plant should be designed and simulated with the offered quality components by the bidder (PV Modules, Inverters etc.) so as to obtain the minimum capacity specified for each location. The electrical degradation of power generated shall not exceed 5% of the minimum rated power over the 5 year period and not more than 10% after ten years.

EPC contractor shall ensure the specified Energy as the Net Minimum Guaranteed Generation output as per Table 1 (page 3) of this LoA

25. Handing over:

The plant shall be handed over to KSEB Ltd in the best working condition at the end of first year after commissioning with the following conditions,

- After proving the specified Energy generation (NMGG) of the plant for the first year.
- After satisfying the DC output (kWp) of each plant measuring at the input side of the inverter as specified in the Table 1 of page 3 of this LoA.
- Handing over of all items and materials with required tools and minimum spares as listed below.
- After providing basic training to the employer personnel with the concurrence of the site Engineer in Charge

The contractor shall provide the tools specified below with the required number of spare for each locations. The list ensuring sufficient number of spares shall be approved by the agreement authority. KSEBL will carry out operation of the plant after taking over of the plant. If required, spares during life period shall be arranged by the contractor after Guaranty Period at the cost of KSEBL.

List of tools & Spares

Tools

Spanner set
Small cable cutters
nose pliers
Wire strippers
Nut drivers
Screw driver
Knife
Electric tester
Clamp meter-ac- dc clamp-on meter/
AC/DC multimeter(AC&DC 1000V)

Spares

PV modules
Junction Boxes
Fuse and fuse holder
MOVs / arrestors
MCBs
DC connectors
DC cables
DC SPD
Nuts and bolts
Diodes
Different Clamps for MMS

Contractor shall conduct the maintenance and supply of necessary spares as and when required for the smooth functioning of the plant with its associated equipments and materials, as described in "Price Schedule" attached as Annexure 1, including all associated items and activities that though not exclusively specified herein but are required for the completion of entire works under this contract. 407

Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the KSEBL. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years.

The Contractor shall hand over the complete system and shall transfer all Guarantees and warranties of the different components of the project to KSEBL.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.8 of volume 1 of the tender document.

27. Force Majeure:

Force Majeure shall be governed by Clause.5.3.5 of volume 1 of the tender document.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.1.10 of volume 1 of the tender document.

The Contractor is liable to rectify any defect or damage notified by the Engineer - in - Charge, at Contractors cost during the Defect Liability Period, which shall be 5 years reckoned from the date of commissioning of the project, ie; to cover the entire O& M period. The Contractor shall guarantee for the performance of the entire project and its components during this period. If any defect, cracks, shrinkage or other faults in the works appear at any time prior to the end of the Defects Liability Period, the Engineer may instruct the Contractor to rectify the defects immediately. If the Contractor fails to carry out the directions given by the Engineer-in-Charge and does not rectify the defects within a reasonable time, the Engineer-in-Charge shall make alternate arrangements for making good the defects through other agencies and the cost thereof plus 21% shall be recovered from the Contractor from the amounts payable to the Contractor by way of forfeiting Performance Security deposit or any other means.

If the drawings, specifications and contract documents do not contain particulars of materials and work which are obviously necessary for the proper completion of the work and intention to include which is nevertheless to be inferred, all such materials and works shall be supplied and executed by the Contractor without any extra charge. The Contractor is bound to furnish information and data including the data in support of his quoted amount to the KSEBL if called upon to do so.

29. Law and Jurisdiction:

Any suit or legal proceedings arising out of this contract shall be governed by the laws of India and Kerala and shall be subject to the exclusive jurisdiction of the Courts at Thiruvananthapuram only.

30. Contract Documents.

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. Approved List of spares that will be supplied
14. All volumes of bid with Tender No. KSEBL/REES/IPDS07/2016-17 dated 06-08-2016 and its Addendums along with clarifications and related documents issued by the Tendering Authority.
15. Response (proposal) of Solgen Energy Pvt Ltd, 22/314-B, Kuttanellur P.O, Thrissur, Kerala, India- 680 014, including the Bid, Clarification documents and the accepted rate submitted.

31. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Cl. 13 and 17 shall be submitted within 15 days from the date of issue of this LoA

A copy of the LoA attached is to be returned immediately duly signed and seal affixed on all pages as token of acceptance and for incorporation in the Contract Agreement preferably within 15 days in any case from the date of issue of this Letter of award.

Sir,

Sub: ANERT- Order for Supply, Installation and Commissioning of Grid connected SPV Power Plants at 24 Government Educational Institutions (21 Schools and 3 ITI's) for a cumulative capacity of 142 kWp in 7 Districts of Kerala (Plan Scheme 2019-2020) - reg

Ref : Tender ID: 2020_ANERT_334175_1

Attention is invited to the references cited. Your offer for the Supply, Installation and Commissioning of Grid connected SPV Power Plants at 24 Government Educational Institutions (21 Schools and 3 ITIs) for a cumulative capacity of 142 kWp in 8 Districts of Kerala is accepted. You are requested to carry out the work as detailed below subject to the following terms and conditions.

S/N	District	Site	Capacity	Amount
1	Alappuzha	GHSS, Kalavoor	10	₹ 5,89,097.67
2		VRVM GHSS, Vayalar	5	₹ 3,31,284.82
3		Govt. VHSS Kodamthuruthu	5	₹ 3,01,337.95
4		Dr. Ambedker MMRS	5	₹ 3,00,317.14
5		Govt. Girls HSS Kayamkulam	5	₹ 3,17,673.01

23		GHSS Kuttippuram	3	₹ 1,84,288.27
24	Wayanad	KMM Govt. ITI, Kalpetta	10	₹ 6,23,196.02
TOTAL			142	₹ 84,80,407
Rupees Eight-Four Lakh Eighty Thousand Four Hundred and Seven only				
<i>Amount inclusive of GST and all other expenses</i>				

The components of the Solar Power Plant including the Solar Modules, Battery and PCU, already accepted, alone will be considered for installation work.

An agreement has to be executed by you in the prescribed form (enclosed) on Kerala Stamp paper worth Rs. 200/- within a week time for the fulfilment of the contract along with a security deposit of **Rs. 4,24,020/- (Rupees Four Lakh Twenty-Four Thousand and Twenty only)** being the 5 % of contract value of **Rs. 84,80,407/-** on Demand Draft in favour of Director, ANERT. You have to pay all expenses incidental to the execution of the above agreement.

SCHEDULE OF SUPPLY

The items should be Delivered, Installed and commissioned at the Rooftop of the aforementioned Government Educational Institutions (21 Schools & 3 ITI's) as specified by ANERT, under prior intimation and supervision of ANERT.

- The Supply, Installation and Commissioning of the entire system shall be completed within **2 months of the date of supply order.**
- The supply and installation must be completed within **1 month from the date of supply order** and must be properly informed to the work order issuing authority.

- iii. Supply of the main components such as SPV module, PCU and charge controller should be from the approved component list published in ANERT Website.
- iv. Penalty for delay in supply and installation will be imposed at 0.5 % per week up to a maximum 10 %. In case of delay in supply and installation, Director, ANERT may cancel the contract and take recourse to other action as deemed appropriate.

PAYMENT

- i. No advance payment will be given. Payment will be released on receipt of invoices and successful installation and commissioning of power plant along with **satisfying the clause 15.1, 37 and 40**, certified by the concerned District Office of ANERT.
- ii. The terms of payment shall be:
 - a. 2.5 % of the invoice amount shall be charged by ANERT as non-refundable license fee.
 - b. Upon delivery of items at all sites, 30 % of the remaining contract value will be released as first part payment.
 - c. On completion of the installation of power plant and filing application for connectivity, 60% of the remaining contract value shall be released as second part payment.
 - d. On commissioning of the grid connected system, 30% of the remaining contract value will be released.
 - e. The remaining 10% shall be retained as performance security as given below.
 - a. 50% of performance security shall be paid after one year
 - b. The remaining 50% shall be paid after the five-year warranty periodPerformance security shall not be released against bank guarantee.
- iii. The security deposit of 5% furnished along with the contract agreement shall be released on completion of supply, installation and commissioning.
- iv. Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

ANNEXURE A- PRE- AGREEMENT

ARTICLES OF AGREEMENT executed on this the day of 20th April Two thousand and twenty three between the Agency for Non-conventional Energy and Rural Technology (hereinafter referred to as ANERT) of the one part and Sri Solgen Energy PVT Ltd. 14/19, Sidco Industrial Estate, P.O Peringadoor, Thrissur-680581, Kerala . (Name and Address of the tenderer) hereinafter referred to as "the Bounden") of the other part.

WHEREAS in response to the Notification No ANERT-TECH/99/2022-T2 dated 12.04.2023 the bounden has submitted to ANERT a e-tender for the Request for Selection (RFS) of agency for the Implementation of 2MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd specified therein subject to the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT a sum of Rs. NIL (exemption allowed) as Earnest Money Deposit for execution of an agreement undertaking the due fulfilment of the contract in case his e-tender is accepted by ANERT.

419

കേരളം KERALA

DV 989561

NOW THESE PRESENTS WITNESS and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract for M/s Solgen Energy PVT Ltd. 14/19, Sidco Industrial Estate, P.O Peringadoor, Thrissur-680581, Kerala is awarded to the bounden, the bounden shall within Fifteen days of acceptance of this e- tender, execute an agreement with ANERT incorporating all the terms and conditions under which ANERT accepts this e-tender.

In case the bounden fails to execute the agreement as aforesaid incorporating the terms and conditions governing the contract, ANERT shall have power and authority to recover from the bounden any loss or damage caused to ANERT by such breach as may be determined by ANERT by appropriating the moneys inclusive of Earnest Money deposited by the bounden and if the Earnest Money is found to be inadequate the deficit amount may be recovered from the bounden and his properties movable and immovable in the manner hereinafter contained.

All sums found due to ANERT under or by virtue of this agreement shall be recoverable from the bounden and his properties movable and immovable under the provisions of the Revenue Recovery Act for the time being in force as though such sums are arrears of land revenue and in such other manner as ANERT may deem fit.

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd.

Important Note: Prospective Bidders are requested to remain updated for any notices/amendments/clarifications etc. to the RFS document through the website www.anert.gov.in/www.etenders.kerala.gov.in. No separate notifications will be issued for such notices/amendments/clarification etc. in the print media or individually.

DISCLAIMER

1. Though adequate care has been taken while preparing the NIT document, the Bidders shall satisfy themselves that the document is complete in all respect. Intimation regarding any discrepancy shall be given to this office immediately. If no intimation is received from any Bidder within Ten (10) days from the date of notification of NIT / issuance of e-Tender documents, it shall be considered that the document is complete in all respect and has been received / acknowledged by the Bidder(s).
2. Agency for New and Renewable Energy Research and Technology (ANERT) reserves the right to modify, amend or supplement this document.
3. While this tender document has been prepared in good faith, neither ANERT nor their employees or advisors make any representation or warranty, express or implied, or accept any responsibility or liability, whatsoever, in respect of any statements or omissions herein, or the accuracy, completeness or reliability of information, and shall incur no liability under any law, statute, rules or regulations as to the accuracy, reliability or completeness of this document, even if any loss or damage is caused by any act or omission on their part.

GENERAL TERMS AND CONDITIONS FOR E-PROCUREMENT

This e-Tender is being published as the Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd. The tender is invited in two cover system from experienced manufacturers / EPC contractors through e-procurement portal of Government of Kerala (www.etenders.kerala.gov.in). Prospective bidders willing to participate in this tender shall necessarily register themselves with above mentioned e-procurement portal.

The tender timeline is available in the critical date section of this tender published in www.etenders.kerala.gov.in

1. ONLINE BIDDER REGISTRATION PROCESS:

- 1.1 Bidders should have a Class III or above Digital Signature Certificate (DSC) to be procured from any Registration Authorities (RA) under the Certifying Agency of India. Details of RAs will be available on www.cca.gov.in. Once, the DSC is obtained, bidders have to register on www.etenders.kerala.gov.in website for participating in this tender. Website registration is a one-time process without any registration fees. However, bidders have to procure DSC at their own cost.
- 1.2 Bidders may contact e-Procurement support desk of Kerala State IT Mission over telephone at 0471- 2577088, 2577188, 2577388 or 0484 – 2336006, 2332262 - through email: helpetender@gmail.com/etendershelp@kerala.gov.in for assistance in this regard

2. ONLINE TENDER PROCESS:

The tender process shall consist of the following stages:

- i. Downloading of tender document: Tender document will be available for free download on www.etenders.kerala.gov.in. However, tender document fees shall be payable at the time of bid submission as stipulated in this tender document.

- ii. Publishing of Corrigendum: All corrigenda shall be published on www.etenders.kerala.gov.in and shall not be available elsewhere.
- iii. Bid submission: Bidders have to submit their bids along with supporting documents to support their eligibility, as required in this tender document on www.etenders.kerala.gov.in. No manual submission of bid is allowed and manual bids shall not be accepted under any circumstances.
- iv. In case bidder encounters any technical issues pertaining to e-Procurement system while acting on the tender, computer screen shot of the error message with date & time stamp on the web-browser along with the query shall be e-mailed by the bidder to the help desk (**helpetender@gmail.com/etendershelp@kerala.gov.in**), for resolution of the problem. At the same time, problem must be intimated to the concerned Tender Inviting Authority via email.
- v. The time taken to ascertain, evaluate and suggest a solution for the problem reported by bidder may vary from case to case. Hence bidders are advised to submit the bid **at least 2 working days before the due date** and time of bid submission to avoid any last-minute issues that may come up.
- vi. Opening of Bid and Bidder short-listing: The single cover bids will be opened, evaluated and shortlisted as per the eligibility. Failure to submit the required documents online will attract disqualification. Price bids of the qualified bidders will open on the day to be intimated to all bidders and the work will be awarded.

3. DOCUMENTS COMPRISING BID:

- 3.1 The 2-cover bid shall contain the scanned copies of the following documents which every bidder has to upload:
- i. The tender document duly signed and sealed downloaded from the website.
 - ii. Pre-Agreement in the prescribed format (Annexure A) on Govt. of Kerala stamp paper worth Rs. 200/-
 - iii. Copy of Registration Certificate of the bidder firm
 - iv. Copy of PAN card

- v. The bidder must have an experience of successful commissioning of at least 5 MW SPV Power Plants in India.
 - vi. Documentary evidence to support the bidders experience in any completed or ongoing SPV contract with a Govt. Department / Govt. undertaking / PSU / Private sector for having a single plant capacity not less than 1 MW. The plant shall be in operation at least 3 months before the date of opening of this bid proposal.
 - vii. Documents to prove the annual Turnover of the bidder (audited statement)
 - viii. Certifications required for proving technical compliance
 - ix. Summary of bidders Technical Information (Annexure B)
 - x. Declaration by the Bidder (format as in Annexure C)
 - xi. Declaration of relationship with ANERT employee (format as in Annexure D)
 - xii. The Price Schedule as per BOQ in Excel format for this tender to be downloaded from e-tender website, duly digitally signed by the tenderer/authorized signatory of the tender.
 - xiii. Bill of Material
- 3.2 The department doesn't take any responsibility for any technical snag or failure that has taken place during document upload.
- 3.3 The Bidder shall complete the Price bid as per format given for download along with this tender.

Note: The blank price bid should be downloaded and saved on bidder's computer without changing file-name otherwise price bid will not get uploaded. The bidder should fill in the details in the same file and upload the same back to the website.

4. TENDER DOCUMENT FEES AND EARNEST MONEY DEPOSIT (EMD)

- 4.1 The Bidder shall pay, a tender document fee of Rs. 17,850/- and Earnest Money Deposit or Bid Security or Bid Bond of Rs. 2,00,000/-. The Bid security is required to protect the purchaser against risk of Bidder's conduct, which would warrant the forfeiture of security.

4.2 Online Payment modes: The tender document fees and EMD can be paid in through e-Payment facility provided by the e-Procurement system. Bidders can make payment only via Internet banking facility

State Bank of India Multi Option Payment System (SBI MOPS Gateway): Bidders are required to avail Internet Banking Facility in any of below banks for making tender remittances in eProcurement System.

A) Internet Banking Options (Retail)

9. BIDDER'S LOCATION

- 9.1 The tenderers are requested to furnish the exact location of their factories/godown with detailed postal address and pin code, telephone and fax nos. etc. in their tenders to arrange inspection by ANERT, if considered necessary.
- 9.2 All communication shall be made to the registered email of the bidder in the e-tendering systems and ANERT shall not be responsible for non-receipt or delay of any such communication.

CONDITIONS OF CONTRACT

10. GENERAL CONDITIONS

- 10.1 The tenders should be submitted online at www.etenders.kerala.gov.in.
- 10.2 The tenders should be as per the prescribed form which should be downloaded from the e-tender website. The cost of tender forms should be paid online, and once paid will not be refunded. Tender forms are not transferable. Tenders that are not in the prescribed form are liable to be rejected.
- 10.3 Intending tenderers should submit their tenders on or before the due date and time mentioned in the tender abstract. Late tender will not be accepted.
- 10.4 The rates quoted should be only in Indian currency. Tenders in any other currency are liable to rejection. The rates quoted should be for the unit specified in the schedule attached.
- 10.5 The tenderer shall submit a copy of PAN card of the authorised signatory along with tender.
- 10.6 Tenders subject to conditions will not be considered. They are liable to be rejected on that sole ground.
- 10.7 The tenders will be opened on the specified day and time in the office of the CEO, ANERT in the presence of such of those tenderer's representatives who may be present with proper authorisation issued by the tenderer.
- 10.8 Every tenderer should send along with his tender an Earnest Money Deposit. This may be paid online at the e-tenders website.
- 10.9 If any tenderer withdraws from his e-tender before the expiry of the period fixed for keeping the rates firm for acceptance, the earnest money if any, deposited by him, will be forfeited.
- 10.10 The final acceptance/rejection of the tenders rests entirely with CEO, ANERT who do not bind themselves to accept the lowest or any tender.
- 10.11 In the case of materials of technical nature, the successful tenderer should be prepared to guarantee satisfactory performance for a period of guarantee under a definite penalty. Communication of acceptance of the e-tender normally constitutes a concluded contract. Nevertheless, the successful tenderer shall also

execute an agreement for the due fulfilment of the contract within the period to be specified in the letter of acceptance. The contractor shall have to pay all stamp duty, Lawyer's charges and other expenses incidental to the execution of the agreement. Failure to execute the agreement within the period specified will entail the penalties set out below:

- 10.11.1 The successful tenderer shall **a) deposit a sum @ 3% of the contract till the completion of Installation works. The deposit shall be in the form of a BG which shall be returned after COD (Commercial Operation Date).** There will be no exemption for MSE's in depositing this security amount. If the successful bidder fails to deposit the security and execute the agreement as stated above, the earnest money deposited by him will be forfeited to ANERT; and contract arranged elsewhere at the defaulter's risk and any loss incurred by ANERT on account of the purchase will be recovered from the defaulter who will however not be entitled to any gain accruing thereby.
- 10.11.2 In cases where a successful tenderer, after having made partial supplies fails to fulfil the contracts in full, all or any of the materials not supplied may at the discretion of the Purchasing Officer be purchased by means of another tender/quotation or by negotiation or from the next higher tenderer who had offered to supply already, and the loss if any caused to ANERT shall thereby together with such sums as may be fixed by ANERT towards damages be recovered from the defaulting tenderer.
- 10.12 Return the Security deposit shall, subject to the conditions specified herein to the contractor within three months after the expiration of the contract. But in the event of any dispute arising between ANERT and the contractor, ANERT shall be entitled to deduct out of the deposits or the balance thereof, until such dispute is determined the amount of such damages, costs, charges and expenses as may be claimed. The same may also be deducted from any other sum, which may be due at any time from ANERT to the contractor. In all cases where there are guarantee for the goods supplied, the security deposit will be released only after the expiry of the guarantee period.

(a) All payments to the contractors will be made by CEO ANERT in due course by NEFT transfer only

(b) All incidental expenses incurred by ANERT for making payments outside the State in which the claim arises shall be borne by the contractor.

10.13 The contractor shall not assign or make over the contract on the benefits or burdens thereof to any other person or body corporate. The contractor shall not underlet or sublet to any person or persons or body corporate the execution of the contract or any part thereof without the consent in writing of the purchasing officer who shall have absolute power to refuse such consent or to rescind such consent (if given) at any time if he is not satisfied with the manner in which the contract is being executed and no allowance or compensation shall be made to the contractor or the subcontractor upon such rescission. Provided always that if such consent be given at any time, the contractor shall not be relieved from any obligation, duty or responsibility under this contract.

10.14 In case the contractor becomes insolvent or goes into liquidation, or makes or proposes to make any assignment for the benefit of his creditors or proposes any composition with his creditors for the settlement of his debts, carries on his business or the contract under inspection or behalf of or his creditors or in case any receiving order(s) for the administration of his estate are made against him or in case the contractor shall commit any act of insolvency or in case in which under any clause or clauses any act of insolvency or in case in which under any clause(s) of this contract the contractor shall have rendered himself liable to damages amounting to the whole of his security deposits, the contract shall, thereupon, after notice given by the Purchasing Officer to the contractor, be determined and ANERT may complete the contract in such time and manner and by such persons as ANERT shall think fit. But such determination of the contract shall be without any prejudice to any right or remedy of ANERT against the contractor or his sureties in respect of any breach of contract committed by the contractor. All expenses and damages caused to ANERT by any breach of contract by the contractor shall be paid by the contractor to ANERT and may be recovered from him under the provisions of the Revenue Recovery Act in force in the State.

- 10.15 Any sum of money due and payable to the contractor (including security deposit returnable to him) under this contract may be appropriated by the CEO or any other person authorised by ANERT and set off against any claim of ANERT for the payment of a sum of money arising out of or under any other contract made by the contractor with ANERT or any other person authorised by ANERT. Any sum of money due and payable to the successful tenderer or contractor from ANERT shall be adjusted against any sum of money due to ANERT from him under any other contracts.
- 10.16 Every notice hereby required or authorised to be given may be either given to the contractor personally or left at his residence or last known place of abode or business, or may be handed over to his agent personally, or may be addressed to the contractor by post at his usual or last known place of abode or business and if so addressed and posted, shall be deemed to have been served on the contractor on the date on which in the ordinary course of post, a letter so addressed and posted would reach his place of abode or business.
- 10.17 The tenderer shall undertake the installation and commissioning of the system according to the standards and specification.
- 10.18 No representation for enhancement of rate once accepted will be considered.
- 10.19 Special conditions, if any, of the tenderers attached with the tenders will not be applicable to the contract unless they are expressly accepted in writing by the purchaser.
- 10.20 The tenderer should send along with this tender an agreement executed and signed in Kerala Stamp Paper of value Rs.200/-. A specimen form of agreement is given as Annexure A to this tender. Tenders without the agreement in stamped paper will be rejected outright.
- 10.21 Conditions in the technical document, technical specifications and special conditions of this tender document would override these general conditions, wherever applicable.
- 10.22 ANERT, by notice sent to the Supplier, may terminate the contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination be for ANERT's convenience, the extent to which performance of the

Supplier under the contract is terminated, and the date upon which such termination becomes effective.

- 10.23 The E-tender shall be opened at the time and date announced in the tender notice, and the price bid will be evaluated as intimated vide auto generated email only.
- 10.24 In case any difference or dispute arises in connection with the contract, all legal proceedings relating to the matter shall be instituted in the Court within whose jurisdiction the CEO, ANERT voluntarily resides.
- 10.25 The Courts situated at the place where the headquarters of ANERT is situated viz, Thiruvananthapuram alone will have jurisdiction to entertain civil suits and all other legal pertaining to this contract.

11. SPECIAL CONDITIONS

- 11.1 Each bidder should submit only one (1) bid. Any bidder who submits/participates in more than one bid for the work shall be disqualified.
- 11.2 The tenders will be opened at the date and time advised in the Bidding Document. If the due date for receiving and opening the tender happens to be declared holiday, then the tender will be received and opened on the very next day, for which no prior intimation will be given.
- 11.3 If the bidder has NOT submitted the requisite EMD OR Agreement, OR if the price bid is not submitted along with the tender, such tenders will be summarily rejected.
- 11.4 During the tender evaluation, ANERT may seek more clarifications/details from any or all of the tenderers, if felt necessary.
- 11.5 The price bids of the tenderers, which submitted the required documents only will be opened and the L1 bidder will be awarded the work of supply and installation of items after fulfilling all the requirements.
- 11.6 If found essential, ANERT reserves the right, in the interest of completion of work within the time limit, to award portion/portions of the Work order to next higher bidders, called for negotiation in the increasing order of their price offers, if they agree to supply at the L1 price.

- 11.7 **The rate quoted should be all-inclusive including delivery of materials at the location to be specified, and the cost of materials and labour for the civil works, installation and commissioning, Warranties, Application fees, O&M charges, GST and all other expenses.**
- 11.8 The tender offer shall be kept valid for acceptance for a period of 6 months from the date of opening of bid. The offers with lower validity period are liable for rejection.
- 11.9 The evaluation of the price bid will be based on the grand total of all-inclusive amount quoted excluding GST.

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd.,
Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

- 13.13 **Commercial Operation Date:** The date of successful conducting field acceptance tests and injection of power at delivery point shall be the "Commercial Operation Date"
- 13.14 **“Capacity Utilization Factor” (CUF)** shall mean the ratio of actual energy generated by SPV project over the year to the equivalent energy output at its

rated capacity over the yearly period.

$$CUF = \frac{\text{actual annual energy generated from the plant in kWh}}{(\text{installed plant capacity in kW} * 365 * 24)}$$

13.15 **"Eligibility Criteria"** shall mean the Eligibility Criteria as set forth in Clause 16 of this RFS;

13.16 **"Financially Evaluated Entity"** shall mean the company which has been evaluated for the satisfaction of the Financial Eligibility Criteria set forth in Clause 16.3 hereof;

13.17 **"IEC"** shall mean specifications of International Electro-Technical Commission;

13.18 **"kWp"** shall mean kilo-Watt Peak;

13.19 **"kWh"** shall mean kilo-Watt-hour;

13.20 **"MNRE"** shall mean Ministry of New and Renewable Energy, Government of India;

13.21 **"O&M"** shall mean Operation & Maintenance of Solar PV system for PPA period.

13.22 **"Owner of the project"** shall mean MILMA Ernakulam Dairy, shall mean anyone who has ownership (including lease ownership also) of the land / roof and is the legal owner of all equipments of the project. Owner of the project can enter into a PPA with the consumer (s) of power for supply of solar power for agreed time (years) from the date of Commissioning of project.

13.23 **"Project Cost / Project Price"** shall mean the price offered by the Bidder for the Scope of work as per RFS document for the site.

13.24 **"Project capacity"** means Capacity in kWp offered by the Bidder. The project capacity specified is on "DC" output Side only.

13.25 **"Performance Ratio" (PR) means**

"Performance Ratio" (PR) means the ratio of plant output versus installed plant capacity at any instance with respect to the radiation measured.

$$PR = \frac{\text{Measured output in kW}}{\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2)}$$

13.26 **"Parent"** shall mean a company, which holds more than 51% equity either directly or indirectly in the Bidding Company or Project Company or a Member in a Consortium developing the Project

13.27 **"Project Company"** shall mean Company incorporated by the bidder as per

Indian Laws in accordance with Clause no 16.1.

13.28 **"Price Bid"** shall mean BoQ, containing the Bidder's quoted Price as per the Volume- IV of this RFS;

13.29 **"Qualified Bidder"** shall mean the Bidder(s) who, after evaluation of their Techno Commercial Bid stand qualified for opening and evaluation of their Price Bid;

13.30 **"RFS"** shall mean Request for Selection (RFS)/Bid document/Tender document

13.31 **"Statutory Auditor"** shall mean the auditor of a Company appointed under the provisions of the Companies Act, 1956 or under the provisions of any other applicable governing law;

13.32 **"Successful Bidder(s) /Contractor/Project Developers(s)"** shall mean the Bidder(s) selected by Owner pursuant to this RFS for Implementation of Grid Connected Ground mounted Solar PV System as per the terms of the RFS Documents, and to whom an Allocation Letter has been issued;

13.33 **"Site"** shall mean the project location at the address mentioned below.

MILMA Ernakulam Dairy, Thrippunithura PO., Ernakulam-682 301

13.34 **"SNA"** shall mean State Nodal Agency, ANERT.

13.35 **"Tendered Capacity"** shall mean the Total aggregate capacity in MW proposed to be tendered by ANERT to the Successful Bidder through this bidding process as per terms and conditions specified therein;

13.36 **"Ultimate Parent"** shall mean a company, which owns at least more than fifty percent (51%) equity either directly or indirectly in the Parent and Affiliates.

13.37 **"Wp"** shall mean Watt Peak.

13.38 **2MWp** for the purpose of conversion in **kWp** shall be considered as 2000kWp.

b) INTERPRETATIONS

- i. Words comprising the singular shall include the plural & vice versa
- ii. An applicable law shall be construed as reference to such applicable law including its amendments or re-enactments from time to time.
- iii. A time of day shall save as otherwise provided in any agreement or document be construed as a reference to Indian Standard Time.

supplementary to each other and if there is any differentiation between or among the parts of this contract, they shall be interpreted in a harmonious manner to give effect to each part.

- v. The table of contents and any headings or sub headings in the contract has been inserted for case of reference only & shall not affect the interpretation of this agreement.

INTRODUCTION, BID DETAILS AND INSTRUCTIONS TO THE BIDDERS

14. INTRODUCTION

- 14.1 ANERT, on behalf of Smart City Thiruvananthapuram Ltd, hereby invites interested companies to participate in the bidding process for the selection of Successful Bidder(s) for implementation of grid-connected Solar Photovoltaic Project under CAPEX model in Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram.
- 14.2 The Bidders are advised to read carefully all instructions and conditions appearing in this document and understand them fully. All information and documents required as per the bid document must be furnished. Failure to provide the information and / or documents as required may render the bid technically unacceptable.
- 14.3 The bidder shall be deemed to have examined the bid document, to have obtained his own information in all matters whatsoever that might affect the carrying out the works in line with the scope of work specified elsewhere in the document at the offered rates and to have satisfied himself to the sufficiency of his bid. The bidder shall be deemed to know the scope, nature and magnitude of the works and requirement of materials, equipment, tools and labour involved, wage structures and as to what all works, he has to complete in accordance with the bid documents irrespective of any defects, omissions or errors that may be found in the bid documents.

15. BID DETAILS

- 15.1 The bidding process under this RFS is for a 2 MWp cumulative capacity of SPV Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram. This includes 1.5 MWp installation to be done in Ground and 500 kWp in the Rooftop of various buildings within TTL campus.

BID QUALIFICATION REQUIREMENTS

16. ELIGIBILITY CRITERIA

16.1 General

- i. The Bidder should be either a body incorporated in India under the Companies Act, 1956 or 2013 including any amendment thereto, Sole Proprietorship, Partnership company and engaged in the business of Solar Power.
- ii. A copy of certificate of incorporation shall be furnished along with the bid in support of above.

16.2 Technical Eligibility Criteria:

The Bidder should have installed & commissioned Grid connected Solar PV Power Project having a capacity of single plant not less than 1 MW and cumulative capacity of above 5 MW, which should have been commissioned at least two months prior to Techno-Commercial Bid Opening date. The list of projects commissioned at least 2 months prior to Techno-Commercial Bid Opening date, indicating whether the project is grid connected, along with a copy of the Commissioning certificate and Work order / Contract / Agreement/ from the Client/Owner shall be submitted in support of Clause 16.2.

16.3 Financial eligibility criteria

The Bidder should have an Annual Turnover or Net worth as indicated below.

- i. The Minimum Average Annual turnover of Rupees 8 Crores in any two of the last 5 financial years preceding the Bid Deadline subject to the condition that the Bidder should at least have completed two financial years.

OR

- ii. Net worth equals to or greater than the value calculated at rate of Rs. 10 Crores. The Computation of Net worth shall be based on unconsolidated audited annual accounts of the last financial year immediately preceding the Bid Deadline. Share

premium can be included in the Net-worth calculation in case of listed companies in India only.

The formula of calculation of net-worth shall be as follows:

Net-worth = (Paid up share capital) + {(Free reserves - Share premium) + Share premium of listed companies} - (Revaluation of reserves) - (Intangible assets) - (Miscellaneous expenditure to the extent not written off and carry forward losses).

For the purposes of meeting financial requirements, only unconsolidated audited annual accounts shall be used. Bidders shall furnish documentary evidence as per the Format - 5, duly certified by Authorized Signatory and the Statutory Auditor / Practising Chattered Accountant of the Bidding Company in support of their financial capability.

16.4 Bid submission by the bidder

16.4.1 The Bidder shall submit the information and/or documents as per the formats specified in Volume-IV.

16.4.2 Strict adherence to the formats wherever specified, is required. Wherever, information has been sought in specified formats, the Bidder shall refrain from referring to brochures /pamphlets. Non-adherence to formats and / or submission of incomplete information may be a ground for declaring the Bid as non-responsive. Each format has to be duly signed and stamped by the authorized signatory of the Bidder.

16.4.3 The Bidder shall furnish documentary evidence in support of meeting Eligibility Criteria as indicated in Clause no. 16.1, 16.2 and 16.3 to the satisfaction of ANERT. They shall also furnish unconsolidated/consolidated audited annual accounts in support of meeting financial requirement, which shall consist of balance sheet, profit and loss account, profit appropriation account, auditors report, etc., as the case may be of Bidding Company or Financially Evaluated Entity for any of the last three(3) financial years immediately preceding the Bid Deadline which are used by the bidder for the purpose of calculation of Annual Turnover or of last Financial Year in case of Net Worth.

16.4.4 In case the annual accounts for the latest financial year are not audited and therefore the bidder cannot make it available, the applicant shall give certificate to this effect from their CEOs. In such a case, the Applicant shall provide the Audited Annual Reports for 3 (Three) years preceding the year or from the date of incorporation if less than 3 years for which the Audited Annual Report is not being provided.

16.5 Amendments to RFS

16.5.1 At any time prior to the deadline for submission of Bids, ANERT may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective Bidder, modify the RFS document by issuing clarification(s) and/or amendment(s).

16.5.2 The clarification(s) / amendment(s) (if any) may be notified on Kerala Tenders website www.etenders.kerala.gov.in at least Two (2) days before the proposed date of submission of the Bid. If any amendment is required to be notified within Two (2) days of the proposed date of submission of the Bid, the Bid Deadline may be extended for a suitable period.

16.5.3 ANERT will not bear any responsibility or liability arising out of non-receipt of the information regarding Amendments in time or otherwise. Bidders must check the website for any such amendment before submitting their Bid.

16.5.4 In case any amendment is notified after submission of the Bid (prior to the opening of Techno-Commercial Bid.

16.5.5 All the notices related to this Bid which are required to be publicized shall be uploaded on website www.etenders.kerala.gov.in

16.6 Bidding process

16.6.1 Bid formats

The Bid shall comprise of the following:

(A) Cover I - Techno-Commercial documents

i. Covering Letter as per the prescribed Format-1

- ii. Copy of PAN and TAN certificates of Bidding company
- iii. Original power of attorney issued by the Bidding Company in favour of the authorized person signing the Bid, in the form attached hereto as Format-2 or standard power of attorney in favour of authorized person signing the Bid. (Power of Attorney must be supplemented by Board Resolution to above effect for the company). However, ANERT may accept general Power of Attorney executed in favour of Authorised signatory of the Bidder, if it shall conclusively establish that the signatory has been authorized by the Board of CEOs to execute all documents on behalf of the Bidding Company.
- iv. General particulars of bidders as per Format-3
- v. Document in support of meeting Eligibility Criteria as per Clause no. 16.1 & 16.2.
- vi. Certificates of incorporation of Bidding company
- viii. Details for meeting Financial Eligibility Criteria as per Clause no. 16.3 along with documentary evidence for the same as per Format -4
- ix. Board resolution for Authorised signatory
- x. Signed and stamped Copy of RFS Documents including amendments & clarifications by Authorised signatory on each page.

(B) Cover II- Price bid

The Bidder shall inter-alia take into account the following while preparing and submitting the Price Bid digitally signed by the authorized signatory. The Bidder shall submit Price Bid in excel BoQ file downloaded from the e-tender website.

16.7 Validity of Bid

- 16.7.1 The bid and the Price Schedule included shall remain valid for a period of 3 months from the date of techno-commercial bid opening, with bidder having no right to withdraw, revoke or cancel his offer or unilaterally vary the offer submitted or any terms thereof. In case of the bidder revoking or cancelling his offer or varying any term & conditions in regard thereof or not accepting letter of allocation, ANERT shall forfeit the Bid Bond furnished by him.

16.7.2 In exceptional circumstances when letter of acceptance is not issued, ANERT may solicit the Bidder's consent to an extension of the period of validity. The request and the responses thereto shall be made in writing. The EMD provided shall also be suitably extended. A Bidder may refuse the request without forfeiting its Bid Bond. A Bidder granting the request will neither be required nor permitted to modify its Bid in any manner.

16.8 Cost of bidding

The bidder shall bear all the costs associated with the preparation and submission of his offer, and ANERT will in no case be responsible or liable for those costs, under any conditions. The Bidder shall not be entitled to claim any costs, charges and expenses of and incidental to or incurred by him through or in connection with his submission of bid even though ANERT may elect to modify / withdraw the invitation of Bid.

16.9 Performance Security / Performance Bank Guarantee (PBG)

16.9.1 Within 30 days from the date of issue of Allocation letter, Successful Bidder shall furnish the Performance Security @ 3% of the total contract value.

16.9.2 The Performance Security shall be denominated in Indian Rupees and shall be in one of the following forms:

- a. A demand draft, or a bank guarantee in the format given in Format-4 from any nationalised bank.
- b. Be confirmed for payment by the branch of the bank giving the bank guarantee at Thiruvananthapuram.

16.9.3 The PBG shall be forfeited as follows without prejudice to the Bidder being liable for any further consequential loss or damage incurred to ANERT, if the Successful Bidder is not able to commission the projects to the satisfaction of ANERT.

16.9.4 The Performance Security shall be valid for a minimum period of 6 months from the date of issue of LoA

16.10 Right to withdraw the RFS and to reject any bid

16.10.1 This RFS may be withdrawn or cancelled by ANERT at any time without assigning any reasons thereof. ANERT further reserves the right, at its

complete discretion, to reject any or all of the Bids without assigning any reasons whatsoever and without incurring any liability on any account.

16.10.2 ANERT reserve the right to interpret the Bid submitted by the Bidder in accordance with the provisions of the RFS and make its own judgment regarding the interpretation of the same. In this regard ANERT shall have no liability towards any Bidder and no Bidder shall have any recourse to ANERT with respect to the selection process. ANERT shall evaluate the Bids using the evaluation process specified in Volume - III, at its sole discretion. ANERT's decision in this regard shall be final and binding on the Bidders.

16.10.3 ANERT reserves its right to vary, modify, revise, amend or change any of the terms and conditions of the Bid before submission. The decision regarding acceptance or rejection of bid by ANERT will be final.

16.11 Zero Deviation

This is a ZERO Deviation Bidding Process. Bidder is to ensure compliance of all provisions of the Bid Document and submit their Bid accordingly. Tenders with any deviation to the bid conditions shall be liable for rejection.

16.12 Examination of Bid document

16.12.1 The Bidder is required to carefully examine the Technical Specification, terms and Conditions of Contract, and other details relating to supplies as given in the Bid Document.

16.12.2 The Bidder shall be deemed to have examined the bid document including the agreement/contract, to have obtained information on all matters whatsoever that might affect to execute the project activity and to have satisfied himself as to the adequacy of his bid. The bidder shall be deemed to have known the scope, nature and magnitude of the supplies and the requirements of material and labour involved etc. and as to all supplies he has to complete in accordance with the Bid document.

16.12.3 Bidder is advised to submit the bid on the basis of conditions stipulated in the Bid Document. Bidder's standard terms and conditions if any will not be considered. The cancellation / alteration / amendment / modification in Bid documents shall not be accepted by ANERT.

16.12.4 Bid not submitted as per the instructions to bidders is liable to be rejected. Bid shall confirm in all respects with requirements and conditions referred in this bid document.

SCOPE OF WORK

17. SCOPE OF WORKS

The scope includes the Supply, Installation, Testing and Commissioning of Rooftop On-Grid SPV power plants. All the necessary approvals from KSEBL/Electrical Inspectorate, feasibility study, necessary civil work, Mounting of Module Structures, PV Module Installation, Inverter Installation, DC/AC Cabling and interconnections, Installation of Lightning Arresters and Earthing System as per the standards, Arranging all the necessary inspections from KSEBL/Electrical Inspectorate/ANERT District Office as part of Pre-Commissioning, if any, Commissioning of the PV Power Plant along with warranty and Operation and Maintenance (O&M) of the project under CAPEX model for 10 years after Commercial Operation Date (COD) are coming under the scope of the bidder.

The total project comprises of 500 kWp Rooftop Solar Power plant and 1500 kWp Ground Mounted Solar Power plant. The successful bidder reserves the right to finalise the capacity being installed at these locations identified within the area available with due approval of ANERT/TTL authorities.

17.1 LOCATION DETAILS

The location of installation of the proposed 2 MWp Solar Power plant is at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala.

Site Name	Travancore Titanium Products Ltd., Kochuveli
Area available	Rooftop (Various buildings as listed below) and Ground of area 13000 Sqm.
District	Thiruvananthapuram
State	Kerala
Latitude	8°29'57.73"N
Longitude	76°54'5.13"E
Nearest National Highway	NH-66
Nearest Village/Town	Veli

Nearest Railway Station	Kochuveli (3 km from the site)
Nearest Airport	Trivandrum International Airport (5 km from the site)
Nearest KSEB Substation	Within the Campus

The Proposed 1.5 MW Solar Power Plant is to be installed on the area marked below

The balance 500 kWp is to be installed at the Rooftops of Buildings listed below:

#	Name of Block / Building	Capacity (kW)
1	Canteen	200
2	Locker Room	75
3	CLSS	75
4	Lime Storage Area	50
5	Filter Press	50
6	Time Office	25
7	66 kV Substation	25
TOTAL		500

The bidders are to quote the per kW cost for the successful Supply, Testing, Installation and Commissioning of the Power plants as per the capacity mentioned for Rooftop as well as Ground mounted system. The full work will be awarded to the lowest bidder for the 2000 kWp. The cost of O&M will not form part of the selection of the L1 bidder.

17.2 ADDITIONAL WORKS

- i. The successful bidder is to borne the fee for KSEBL feasibility, Registration and all other expenses. The additional costs for site specific cabling works, earthing, mounting structure modifications, required civil works etc to meet the technical criteria as detailed in this document are under the scope of the bidder.
- ii. The scope of enhancing load, phase conversion, changing of CTs, PT, modification of Panel boards, extension of bus bars, replacement of metering panel boards etc wherever necessary is under the scope of the bidder. The rates for the same are to be considered in the bid for each site.
- iii. In case of installations to be made in sites with HT connection, the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items to be quoted along with the bid.
- iv. It is mandatory that the bidders are to visit the sites and quote the rates considering all the requirements as mentioned in this tender document. No requests for revision of rates will be entertained. In case, the successful bidder is not undertaking the specific work, the work will be cancelled and disciplinary proceedings will be initiated against the bidder and all payments due will be withheld. Hence, Bidders are requested to visit the site before quoting and the rate for successful commissioning in all aspects is to be quoted.
- v. **The rate quoted should be all inclusive including delivery of materials, the cost of materials and labour for the civil works, Installation and Commissioning, 10-year Warranty, fee for approval from the KSEBL, Electrical Inspectorate if any, Solar Meter, Remote monitoring facility, Insurance, GST and all other expenses deemed necessary for the proper**

implementation of the conditions and specification as in-incorporated in the tender.

- vi. The Operation and Maintenance of the Power plant for the whole period of warranty will be duty of the vendor. The rates for O&M per year need to be quoted in the BoQ file provided.**
- vii. The Component wise split up of the costs in percentage for each capacity is to be included as part of the technical bid (included as format 6).**
- viii. Any other work required for the successful commissioning of the power plant which are not mentioned in this document and are required as per prevailing laws & regulations in the country**

17.3 SUBMITTALS

On commencement of the Project, the Contractor shall submit the following to ANERT:

- a. Prior to the technical submittals, the contractor shall submit detailed baseline program and methodology indicating the proposed overall schedule for documentation such as calculations, shop/ working drawings, plan/ procedures and records. Submission of samples, process of fabrication / delivery to site storage yard for the approval of the Employer. Also, Contractor shall submit Method statements and Quality Assurance plan for each activity to be done and get approval from ANERT before commencing the work. Contractor shall maintain the necessary Quality and Quantity documentation. All the documents shall be submitted to Employer for their review and records.
- b. Detailed work procedures and schedules shall be submitted by contractor at least one month before start of work and shall get necessary approval from ANERT authorities and various entities. If required meeting shall be called to settle all the open issues. Contractor to ensure that all issues are closed one month prior to start of work.
- c. Complete fabrication drawings, materials list, cutting lists, bolt lists, welding schedules and QC schedules, based on the design drawing furnished to him and in accordance with the approved schedule. It is highlighted that structural steel

members, dimensions thereof indicated in tender drawings are tentative only, and may be modified during final design stage.

- d. Results of any tests, as and when conducted and as required by Employer.
- e. A detailed list of all constructional Plant & Equipment, such as cranes, derricks, winches, welding sets etc. their makes, model, present condition and location, available to the contractor and the ones he will employ on the job to maintain the progress of work in accordance with the contract.
- f. The total number of experienced personnel of each category, like fitters, welders, riggers etc., which he intends to deploy on the project.
- g. The contractor shall submit complete design calculations for any alternative sections proposed by him, for the approval of Employer and records of Owner.

18. PROJECT COST

18.1 The Project cost shall include all the costs related to above Scope of Work. Bidder shall quote for the entire facilities on a “single responsibility” basis such that the total Bid Price covers all the obligations mentioned in the Bidding Documents in respect of Design, Supply, Erection, Testing and Commissioning including Warranty, Operation & Maintenance for a period 10 years under CAPEX model, goods and services including spares required if any during O&M period. The Bidder has to take all permits, approvals and licenses, Insurance etc., provide training and such other items and services required to complete the scope of work mentioned above.

18.2 The Project cost shall remain firm and fixed and shall be binding on the Successful Bidder till completion of work. No escalation will be granted on any reason whatsoever. The bidder shall not be entitled to claim any additional charges, even though it may be necessary to extend the completion period for any reasons whatsoever.

18.3 The cost shall be inclusive of all duties and taxes, insurance etc. The prices quoted by the firm shall be complete in all respect and no price variation /adjustment shall be payable during the 10-year period.

18.4 The Operation & Maintenance of Solar Photovoltaic Power Plant would include wear, tear, overhauling, machine breakdown, insurance, and replacement of

defective modules, invertors / Power Conditioning Unit (PCU), spares, consumables & other parts for a period of 10 years.

- 18.5 The cost shall be specified in sanction letter based on Successful Bidder's quote for the project. The project cost shall be in accordance with all terms, conditions, specifications and other conditions of the Contract as accepted by ANERT and incorporated into the sanction letter.

19. INSURANCE

- 20.1 The Bidder shall be responsible and take an Insurance Policy for transit-cum-storage-cum-erection for all the materials to cover all risks and liabilities for supply of materials on site basis, storage of materials at site, erection, testing and commissioning. The bidder shall also take appropriate insurance during O&M period.
- 20.2 The Bidder shall also take insurance for Third Party Liability covering loss of human life, engineers and workmen and also covering the risks of damage to the third party/material/equipment/properties during execution of the Contract. Before commencement of the work, the Bidder will ensure that all its employees and representatives are covered by suitable insurance against any damage, loss, injury or death arising out of the execution of the work or in carrying out the Contract. Liquidation, Death, Bankruptcy etc., shall be the responsibility of bidder.

20. WARRANTIES AND GUARANTEES

The Bidder shall warrant that the goods supplied under this contract are new, unused, of the most recent or latest technology and incorporate all recent improvements in design and materials. The bidder shall provide system warrantee covering the rectification of any and all defects in the design of equipment, materials and workmanship including spare parts for a period of the 10-years from the date of commissioning. The successful bidder has to transfer all the Guarantees /Warrantees of the different components to the Owner of the project. The responsibility of operation of Warrantee and Guarantee clauses and Claims/ Settlement of issues arising out of said clauses shall be

joint responsibility of the Successful bidder and the owner of the project and ANERT will not be responsible in any way for any claims whatsoever on account of the above.

21. TYPE AND QUALITY OF MATERIALS AND WORKMANSHIP

- 22.1 The Design, Engineering, Manufacture, Supply, Installation, Testing and Performance of the equipment shall be in accordance with latest appropriate IEC/Indian Standards as detailed in the Vol- III (Technical specifications) of the bid document. Where appropriate Indian Standards and Codes are not available, other suitable standards and codes as approved by the MNRE / authorised Government agency shall be used.
- 22.2 The specifications of the components should meet the technical specifications mentioned in Volume III.
- 22.3 Any supplies which have not been specifically mentioned in this Contract but which are necessary for the design, engineering, manufacture, supply & performance or completeness of the project shall be provided by the Bidder without any extra cost and within the time schedule for efficient and smooth operation and maintenance of the SPV plant.

22. OPERATION & MAINTENANCE

- i. The bidder shall be responsible for Operation and Maintenance of the Solar PV system for the 10-year period, during which ANERT will monitor the project for effective performance in line with conditions specified elsewhere in the bid document. During this period, the bidder shall be responsible for supply of all spare parts as required from time to time for scheduled and preventive maintenance, major overhauling of the plant, replacement of defective modules, inverters, PCU's etc and maintaining log sheets for operation detail, deployment of staff for continuous operations and qualified engineer for supervision of O&M work, complaint logging & its attending.
- ii. If any Operation & Maintenance issues are not resolved within 7 days, then complaint may be raised to ANERT, pursuant to which a penalty as decided by CEO, ANERT will be imposed.

- iii. If the outage of the plant is more than 30 days continuously, then the 50% PBG amount shall be encashed by ANERT.
- iv. If the outage is exceedingly more than 60 days then complete PBG amount shall be encashed by Owner. (This will be applicable till 10 years of O&M as per the Scope of the RFS.) Legal proceedings and other as deemed necessary by CEO, ANERT will be initiated against the defaulted contractor.

23. METERING AND GRID CONNECTIVITY

Metering and grid connectivity of the solar PV system under this project would be the responsibility of the Bidder in accordance with the prevailing guidelines of the concerned DISCOM and / or CEA (if available by the time of implementation). The bidder need to connectivity and the entire responsibility lies with bidder only. This particular power plant will be connected to the 11 kV bus at the 66 kV Substation under Captive consumer category.

24. PLANT PERFORMANCE EVALUATION

The successful bidder shall be required to meet minimum guaranteed generation with Performance Ratio (PR) at the time of commissioning and related Capacity Utilization Factor (CUF) as per the GHI levels of the location during the O&M period. PR should be shown minimum of 75% at the time of inspection for initial commissioning acceptance. Minimum CUF shall not be less than 21% for a period of 10 years. The bidder should send the periodic plant output details to ANERT for ensuring the CUF. The PR will be measured at Inverter output level during peak radiation conditions.

25. PROGRESS REPORT

The bidder shall submit the progress report monthly to ANERT in Prescribed Proforma. ANERT will have the right to depute his/their representatives to ascertain the progress of contract at the premises of works of the bidder.

26. SCHEDULE OF SUPPLY

- i. The items should be delivered and installed at the sites of institution for which work order shall be given and specified by ANERT, under prior intimation and supervision of ANERT. The list of sites is listed below:
- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next bidder and penalty as decided by ANERT will be levied.

#	Capacity of Solar Plant	Material Delivery (Days)	Completion Period (Days)
1	2 MWp	25	45

- iii. For any delay in Installation and Commissioning beyond the period mentioned above, the ANERT will charge penalty of 0.5% of the order value/week or part thereof, subject to the cost not exceeding 10% of the total cost. Order will be cancelled if the delay of service is more than this time period and work will be issued to the second successful bidder
- iv. Bidders are to submit their quotes only after visiting the site and the details of additional works required for the successful commissioning of the power plant is to be mentioned in the technical bid. No additional amount for any works will be provided under any circumstance, even if the site requires additional work other than quoted by the bidder. Hence, special care must be taken while submitting the bids.
- v. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. The test certificates and reports of the inverters being used for the project must be submitted along with the bid. ANERT reserves the right to reject the bid based on the non-conformity of the inverter being supplied.
- vi. The successful bidder shall submit the detailed BoM and the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of the bidder.

- vii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.
- viii. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the PAC subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the PAC subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

27. PAYMENT

- 27.1 No advance payment will be given. All the documents submitted should be certified by the concerned personnel of ANERT.
- 27.2 The quotes for the Design, Supply, Installation & Commissioning including 10 years of warranty (EPC Part) to be provided by the bidders. The L1 bidder will be selected on the basis of their quotes on the EPC part with 10-year warranty and the O&M quote will not be part of bid evaluation.
- 27.3 The terms of payment shall be:

27.3.1 EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter etc) at the site/warehouse, a maximum of 60% of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of installation of the power plant, a maximum of 20% of the contract value can be released as Running Account Bills of min 10% of the

contract value. The supplier shall submit the invoice for the materials supplied and all documents related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The second part invoice can be raised only after submitting application for energization to the Electrical Inspectorate. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.

- iii. After the Inspection and Approval of the Electrical Inspectorate, 5% of the contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
- iv. The date of Energisation to the Grid by the DISCOM will be considered as the official Date of Commissioning (CoD) of the project and this will be treated as the commissioning of the system. On commissioning of the grid connected system, 5% of the contract value will be released after proving the Performance ratio (AC). The PR report as per standard is to be provided for release of the amount.
- v. The balance 10% shall be retained as performance security and will be released in five equal parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and last 2% after the 10 years of warranty. For releasing these payment, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. **The plant shall be handed over at the end of 10 years after commissioning after proving the performance ratio (AC).** This period will be considered only from the date of commissioning.
- vi. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

27.3.2 Maintenance Payment

- i. The amount shall be released on annual basis after completion of the period of the previous year. The start of maintenance period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

27.4 Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

28. PROJECT INSPECTION

The project progress will be monitored by ANERT and the projects will be inspected for quality at any time during commissioning or after the completion of the project either by officer(s) from ANERT or any authorized agency/ experts.

29. APPLICABLE LAW

The Contract shall be interpreted in accordance with the laws of the Union of India and in the Jurisdiction of Thiruvananthapuram, Kerala.

30. SETTLEMENT OF DISPUTE

29.1 If any dispute of any kind whatsoever arises between ANERT and Successful bidder in connection with or arising out of the contract including without prejudice to the generality of the foregoing, any question regarding the existence, validity or termination, the parties shall seek to resolve any such dispute or difference by mutual consent. If the same cannot be resolved, the courts in the jurisdiction will be approached and finalised by the appropriate court after legal proceedings.

31. FORCE MAJEURE

30.1 Notwithstanding the provisions of clauses contained in this RFS document; the contractor shall not be liable to forfeit (a) Security deposit for delay and (b)

termination of contract; if he is unable to fulfill his obligation under this contract due to force majeure conditions.

30.2 For purpose of this clause, "Force Majeure" means an event beyond the control of the contractor and not involving the contractor's fault or negligence and not foreseeable, either in its sovereign or contractual capacity. Such events may include but are not restricted to Acts of God, wars or revolutions, fires, floods, epidemics, quarantine restrictions and fright embargoes etc. Whether a "Force majeure" situation exists or not, shall be decided by ANERT and its decision shall be final and binding on the contractor and all other concerned.

30.3 In the event that the contractor is not able to perform his obligations under this contract on account of force majeure, he will be relieved of his obligations during the force majeure period. In the event that such force majeure extends beyond six months, ANERT has the right to terminate the contract in which case, the security deposit shall be refunded to him.

30.4 If a force majeure situation arises, the contractor shall notify ANERT in writing promptly, not later than 14 days from the date such situation arises. The contractor shall notify ANERT not later than 3 days of cessation of force majeure conditions. After examining the cases, ANERT shall decide and grant suitable additional time for the completion of the work, if required.

32. LANGUAGE

All documents, drawings, instructions, design data, calculations, operation, maintenance and safety manuals, reports, labels and any other data shall be in English Language. The contract agreement and all correspondence between ANERT and the bidder shall be in English language.

33. OTHER CONDITIONS

32.1 The Successful bidder shall not transfer, assign or sublet the work under this contract or any substantial part thereof to any other party without the prior consent of ANERT in writing.

32.2 The Successful bidder shall not display the photographs of the work and not take advantage through publicity of the work without written permission of ANERT.

32.3 The Successful bidder shall not make any other use of any of the documents or information of this contract, except for the purposes of performing the contract.

32.4 Successors and Assigns:

In case ANERT or Successful bidder may undergo any merger or amalgamation or a scheme of arrangement or similar re-organization & this contract is assigned to any entity (ies) partly or wholly, the contract shall be binding mutatis mutandis upon the successor entities & shall continue to remain valid with respect to obligation of the successor entities.

32.5 Severability:

It is stated that each paragraph, clause, sub-clause, schedule or annexure of this contract shall be deemed severable & in the event of the unenforceability of any paragraph, clause sub-clause, schedule or the remaining part of the paragraph, clause, sub-clause, schedule annexure & rest of the contract shall continue to be in full force & effect.

32.6 Counterparts

This contract may be executed in one or more counterparts, each of which shall be deemed an original & all of which collectively shall be deemed one of the same instruments.

32.7 Rights and Remedies under the contract only for the parties

This contract is not intended & shall not be construed to confer on any person other than the ANERT & Successful bidder hereto, any rights and / or remedies herein.

BID EVALUATION

34. BID EVALUATION

The evaluation process comprises the following four steps:

Step I - Responsiveness check of Techno Commercial Bid

Step II - Evaluation of Bidder's fulfilment of Eligibility Criteria as per Clause 16

Step III - Evaluation of Price Bid

Step IV - Successful Bidders(s) selection

I. Responsiveness check of Techno Commercial Bid

The Techno Commercial Bid submitted by Bidders shall be scrutinized to establish responsiveness to the requirements laid down in the RFS subject to Clause 16.1 and Clause 16.2. Any of the following may cause the Bid to be considered "non-responsive", at the sole discretion of ANERT:

- a. Bids that are incomplete, i.e. not accompanied by any of the applicable formats inter alia covering letter, power of attorney supported by a board resolution, applicable undertakings, format for disclosure, etc.;
- b. Bid not signed by authorized signatory and /or stamped in the manner indicated in this RFS;
- c. Material inconsistencies in the information /documents submitted by the Bidder, affecting the Eligibility Criteria;
- d. Information not submitted in the formats specified in this RFS;
- e. Bid being conditional in nature;
- f. Bid having Conflict of Interest;
- g. More than one Member of a Bidding Company using the credentials of the same Parent Company /Affiliate;
- h. Bidder delaying in submission of additional information or clarifications sought by ANERT as applicable;
- i. Bidder makes any misrepresentation.

Each Bid shall be checked for compliance with the submission requirements set forth in this RFS before the evaluation of Bidder's fulfilment of Eligibility Criteria is taken up. Clause 16.2 shall be used to check whether each Bidder meets the stipulated requirement.

33.1 Preliminary Examination

33.1.1 ANERT will examine the Bids to determine whether they are complete, whether any computational errors have been made, whether required sureties have been furnished, whether the documents have been properly signed and stamped and whether the Bids are otherwise in order.

33.1.2 Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total Amount that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total amount shall be corrected. If there is a discrepancy between words and figures, the amount written in words will prevail.

II. Evaluation of Bidder's fulfilment of eligibility criteria

Evaluation of Bidder's Eligibility will be carried out based on the information furnished by the Bidder as per the prescribed Formats and related documentary evidence in support of meeting the Eligibility Criteria as specified in Clause 16.2. Non-availability of information and related documentary evidence for the satisfaction of Eligibility Criteria may cause the Bid to be non-responsive.

III. Evaluation of Price Bid

The Price Bid of only the Qualified Bidders shall be opened in presence of the representatives of such Qualified Bidders, who wish to be present, on a date as may be intimated by ANERT to the Bidders through ANERT. The evaluation of Price Bid shall be carried out based on the information furnished in the BoQ. The Price Bid submitted by the Bidders shall be scrutinized to ensure conformity with the RFS. Any Bid not meeting any of the requirements of this RFS may cause the Bid to be considered "non-responsive" at the sole decision of the ANERT.

IV. Successful Bidder(s) Selection

- i. Bids qualifying in Clause 16.2 shall only be evaluated in this stage.
- ii. The Price Bids of Qualified Bidders shall be ranked from the lowest to the highest. The lowest bidder will be declared as the successful bidder.
- iii. Letter of Acceptance (LOA): The Letter of Acceptance (LOA) shall be issued to Successful Bidder selected as per the provisions of this Clause 33
- iv. The Successful Bidder shall acknowledge the LoA and return duplicate copy with signature & stamp of the authorized signatory of the Successful Bidder to ANERT within Seven (7) days of issue of LoA.
- v. If the Successful Bidder, to whom the Letter of Acceptance has been issued does not fulfil any of the conditions specified in Bid document, ANERT reserves the right to annul/cancel the award of the Letter of Acceptance of the Successful Bidder and forfeit the Bid security.
- vi. ANERT at its own discretion, has the right to reject any or all the Bids without assigning any reason whatsoever, at its sole discretion

35. NOTIFICATION TO SUCCESSFUL BIDDERS

The name of Successful Bidder shall be notified indicating the awarded project price individually through letter of acceptance.

36. REQUIREMENT OF APPROVALS ON MAKES OF THE COMPONENTS:

The modules should be manufactured in India only. Rest of the components can be procured from any source. However, these items should meet the Technical specification and standards mentioned in RFS.

37. OPERATION OF THE SYSTEM DURING WEEKENDS AND GENERAL HOLIDAYS AND CALCULATION OF CUF:

During grid failure, the SPV system stops generating. Any instances of grid failure need to be mentioned in the monthly report and those instances need to be authorised by local DISCOM. Then the period will be excluded in calculation of CUF.

38. COMMERCIAL OPERATION DATE:

38.1 Document Submission for Issue Commissioning/ Completion Certificate:

The following documents will be deemed to form the completion documents:

- a. Project completion report from successful bidder as per ANERT format
- b. Project completion/satisfaction certificate from ANERT.

38.2 Commercial Operation Date

If the results of system acceptance testing indicate that the System is capable of generating electric energy (at full rated kWp) for 3 continuous days using such instruments and meters as have been installed for such purposes, then the power producer shall send a written notice to Employer to that effect, and the date of successful conducting such tests and injection of power at delivery point shall be the "Commercial Operation Date"

39. CORRUPT OR FRAUDULENT PRACTICES

The Successful Bidders/ Contractors should follow the highest standard of ethics during the execution of contract. In pursuance of this policy, ANERT:

39.1 defines, for the purposes of this provision, the terms set forth as follows:

- a. "corrupt practice" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the bid process or in contract execution; and
- b. "fraudulent practice" means a misrepresentation of facts in order to influence a bid process or the execution of a contract to the detriment of ANERT/Govt. scheme, and includes collusive practice among Bidders (prior to or after Bid submission) designed to establish Bid prices at artificial non-competitive levels and to deprive ANERT of the benefits of free and open competition;
- c. will declare a firm ineligible/debarred, either indefinitely or for a specific period of time, a GOVT contract if at any time it is found that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government/ ANERT schemes.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 3: TECHNICAL SPECIFICATIONS

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

TECHNICAL SPECIFICATIONS

The proposed projects shall be commissioned as per the technical specifications given below.

40. DEFINITION

A Grid Tied Solar Photo Voltaic (SPV) power plant consists of SPV array, Module Mounting Structure, Power Conditioning Unit (PCU) consisting of Maximum Power Point Tracker (MPPT), Inverter, and Controls & Protections, interconnect cables and switches. PV Array is mounted on a suitable structure. Grid tied SPV system do not have battery backup and should be designed with necessary features to supplement the grid power during day time. Components and parts used in the SPV power plants including the PV modules, metallic structures, cables, junction box, switches, PCUs etc., should conform to the BIS or IEC or international specifications, wherever such specifications are available and applicable.

Solar PV system shall consist of following equipments/components.

- Solar PV modules consisting of required number of **Crystalline** PV modules.
- Grid interactive Power Conditioning Unit with Remote Monitoring System
- Mounting structures
- String Monitoring Units / Junction Boxes.
- Power evacuation system
- Earthing and lightening protections.
- IR/UV protected PVC Cables, pipes and accessories
- RTTU / Metering

The detailed list of certifications and standards to be followed are given in annexure – F

41. SYSTEM COMPONENTS - TECHNICAL COMPLIANCE FOR SYSTEM COMPONENTS

S/N	System Component	Capacity/ rating	Minimum Technical Compliance
1.	Solar panel (MONO PERC Half cut of capacity 600 Wp or above)	As per the required capacity	IS 14286 - Design Qualification and Type Approval for Crystalline Silicon Terrestrial Photovoltaic (PV) Modules IEC/IS 61730: Part I & II;
2.	Grid Tied Inverter (DC to AC ratio of 1.2 to be maintained at all sites)	As per the required capacity	IS 16221: Part 1 & 2 - Safety of Power Converters for use in Photovoltaic Power Systems IS 16169 - Test Procedure of Islanding Prevention Measures for Utility-Interconnected Photovoltaic Inverters
3.	Module Mounting Structure	As per the required capacity	IS 2062 - Hot Rolled Medium and High Tensile structural Steel IS 4759 - Hot-dip Zinc Coatings on structural steel and other products
4.	Cables	As required	IEC 60227 / IS 694 IEC 60502 / IS 1554 (Pt. I & II)
5.	Switches/ Circuit Breakers	As required	IEC 60947 part I, II, III / IS 60947 Part I, II, III
6.	Connectors		EN 50521
7.	Surge Protection Device		IEC 60364-5-53 / IS 15086-5
8.	Junction Boxes/Enclosures for Inverters/ Charge Controllers	As required	IP 54 (for outdoor) or IP 65 / IP 21(for indoor) as per IEC 529
9.	Energy Meter for Recording Solar Electricity Generated & Two-way meter for Distribution Licensee grid connection		As per CEA Regulations; IEC 60687/ IEC 62052-11 / IEC 62053-22 / IS 14697
10.	Lightning Protection	As required	As per IEC 62305 / IEC 62561
11.	Electrical Grounding (Earthing)	As required	As per IS 3043

42. SOLAR PHOTOVOLTAIC MODULES:

42.1 The PV modules used should be made in India and should be from the ALMM list issued by MNRE from time to time of Mono PERC type having module capacity of 600Wp or above.

42.2 The PV modules used must qualify to the latest edition BIS standards for Crystalline Silicon Solar Cell Modules - IS 14286. In addition, the modules must conform to IEC 61730 Part-2- requirements for construction & Part 2 – requirements for testing, for safety qualification or equivalent IS.

- i. For the PV modules to be used in a highly corrosive atmosphere throughout their lifetime, they must qualify to IEC 61701/IS 61701
- ii. The total solar PV array capacity should not be less than 2 MWp and should comprise of solar crystalline modules of MONO PERC type of minimum 525 Wp and above wattage. Module capacity less than minimum 525 watts shall not be accepted. Inspection of testing of PV array will be conducted by the Tendering Authority including identification of panels ready for dispatch to be confirmed with details provided in RFID tag using RFID reader at site during FAT. The RFID details of each module shall be issued to the employer during FAT.
- iii. Protective devices against surges at the PV module shall be provided. Low voltage drop bypass diodes shall be provided.
- iv. PV modules must be tested and approved by one of the BIS approved test centers.
- v. The module frame shall be made of corrosion resistant materials, preferably having anodized aluminum.
- vi. The bidder shall carefully design & accommodate requisite numbers of the modules to achieve the rated power in his bid. ANERT shall allow only minor changes at the time of execution.
- vii. Other general requirement for the PV modules and subsystems shall be the Following:
 - a. The rated output power of any supplied module shall have tolerance of $\pm 3\%$.
 - b. The peak-power point voltage and the peak-power point current of any supplied module and/or any module string (series connected modules) shall

not vary by more than 2 (two) per cent from the respective arithmetic means for all modules and/or for all module strings, as the case may be.

- c. The module shall be provided with a junction box with either provision of external screw terminal connection or sealed type and with arrangement for provision of by-pass diode. The box shall have hinged, weather proof lid with captive screws and cable gland entry points or may be of sealed type and IP-65 rated.
 - d. IV curves at STC should be provided by bidder.
- 42.3 Modules deployed must use a RF identification tag. The following information must be mentioned in the RFID used on each module (This can be inside or outside the laminate, but must be able to withstand harsh environmental conditions).
- a. Name of the manufacturer of the PV module
 - b. Name of the manufacturer of Solar Cells.
 - c. Month & year of the manufacture (separate for solar cells and modules)
 - d. Country of origin (separately for solar cells and module)
 - e. I-V curve for the module Wattage, I_m , V_m and FF for the module
 - f. Unique Serial No and Model No of the module
 - g. Date and year of obtaining BIS PV module qualification certificate.
 - h. Name of the test lab issuing BIS certificate.
 - i. Other relevant information on traceability of solar cells and module as per ISO 9001 and ISO 14001

42.4 Warranties:

A. Material Warranty:

- i. Material Warranty is defined as: The manufacturer should warrant the Solar Module(s) to be free from the defects and/or failures specified below for a period not less than five (10) years from the date of sale to the original customer ("Customer")
- ii. Defects and/or failures due to manufacturing
- iii. Defects and/or failures due to quality of materials

- iv. Non conformity to specifications due to faulty manufacturing and/or inspection processes. If the solar Module(s) fails to conform to this warranty, the manufacturer will repair or replace the solar module(s), at the Owners sole option

B. Performance Warranty:

- i. The predicted electrical degradation of power generated not more than 10% after ten years' period and not exceeding 20% of the minimum rated power over the 25-year period and of the full rated original output.

42.5 Use of advance cell technologies

- a. The Contractor shall try to maximize the output within the allocated area. The contractor is allowed to propose use of new and better technology. (Eg. Bifacial Modules)
- b. Additionally, the bidder at bidding stage may propose modern methods for maintenance & cleaning of the plant. Technology employing drone, cleaning methods without water, which will automate the maintenance and reduce the cost of maintenance may be proposed.
- c. Based on the technology employed, the contractor has to design, Electrical System Features, Architecture and Structural requirement and the same shall be implemented with the prior approval of ANERT. The tenderer at tender stage shall submit the details of the technology proposed. The tender submission shall also include the proposed modified structure also. The capacity mentioned in the tender is indicative and extra capacity over and above the indicative capacity mentioned will be permitted, based on the technology proposed and employed.

43. ARRAY STRUCTURE

43.1 For Ground Mounted:

- a. Hot dip galvanized MS as per specifications BIS 2062 or shall be cold formed light gauge structural steel sections with IS 811: 1987/IS 801: 1975 having galvanization thickness as per BIS 4759 -amended upto date; may be used for mounting the modules/ panels/arrays. Each structure should have angle of inclination as per the

site conditions to take maximum insolation. However, to accommodate more capacity the angle inclination may be reduced until the plant meets the specified performance ratio requirements.

- b. The Mounting structure shall be so designed to withstand the speed for the wind zone of the location where a PV system is proposed to be installed (min wind speed of 150 km/ hour). It may be ensured that the design has been certified by a recognized Lab/ Institution in this regard and submit wind loading calculation sheet to ANERT. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The array design shall be submitted with the STAAD structural design report for the materials used with relevant IS.
- c. Structural material shall be corrosion resistant and electrolytically compatible with the materials used in the module frame, its fasteners, nuts and bolts. Aluminium structures also can be used which can withstand the wind speed of respective wind zone. Necessary protection towards rusting need to be provided either by coating or anodization.
- d. The fasteners used should be made up of stainless steel. The structures shall be designed to allow easy replacement of any module. The array structure shall be so designed that it will occupy minimum space without sacrificing the output from the SPV panels
- e. Regarding civil structures, the bidder needs to take care of the load bearing capacity of the soil at the site of installation. The soil is fine sand and specific care is to be taken while designing the foundation. The foundation design must be submitted to ANERT duly certified by a chartered structural engineer before start of works.
- f. The minimum clearance of the structure from the ground level should be 200 mm for ground mounted installations
- g. The array will be installed on steel racking structures that are anchored in the ground. Racks will be laid out in parallel matrices allowing for individuals to access the area between the racks for cleaning and other maintenance needs. In between the row of solar panels sufficient gap need to be provided to avoid falling of shadow

of previous row on the next row. Seismic factors for the site will be considered while making the design of the foundation.

43.2 For Ground Mounted:

- a. Photovoltaic arrays must be mounted on a stable, durable structure that can support the array and withstand wind, rain, and other adverse conditions. The modules will be fixed on structures with fixed arrangement.
- b. The module mounting structures shall have adequate strength and appropriate design suitable to the locations, which can withstand the load and high wind velocities. Stationary structures shall support PV modules at a given orientation, absorb and transfer the mechanical loads to the surface properly.
- c. Wherever required, suitable number of PV panel structures shall be provided. Structures shall be of flat-plate design using minimum size of C (75 x 40 x 5mm) or L (55 x 55 x 5mm) or I (60x 40x 4mm) sections or higher dimensions for respective sections.
- d. Each structure with fixed tilt should have a tilt angle as per the site conditions to take maximum insolation which will be approximately equal to the latitude of the location facing true South with a North - South orientation. The tilt angle can vary from 9 degree to 12 degree based on the location's latitude in Kerala
- e. The PV module mounting structure shall have a capacity to withstand a wind velocity of 150 km/hr unless specified for dedicated requirements
- f. Suitable fastening arrangement such as grouting and calming should be provided to secure the installation against the specific wind speed. The PV array structure design shall be appropriate with a factor of safety of min 1.5.
- g. The materials used for structures shall be Hot dip Galvanized Mild Steel conformed to IS 2062:1992 or aluminium of suitable grade minimum alloy 6063 or better.
- h. The minimum thickness of galvanization for hot dip Galvanized Mild Steel should be at least 80 microns as per IS 4759. The galvanisation thickness will be checked during inspection and the vendor is to arrange the equipment needed for the same at the site.

- i. The Bolts, Nuts, fasteners, and clamps used for panel mounting shall be of Stainless-Steel SS 304.
- j. Structures shall be supplied complete with all members to be compatible for allowing easy installation at the site. Additional Structures/Frames for required for the installation of modules if any need to be provided by the bidder.
- k. The structures shall be designed to allow easy replacement of any module, repairing and cleaning of any module. No Welding is allowed on the mounting structure. Adequate spacing shall be provided between two panel frames and rows of panels to facilitate personnel protection, ease of installation, replacement, cleaning of panels and electrical maintenance
- l. Aluminium structures used shall be protected against rusting either by coating or anodization. Aluminium frames should be avoided for installations in coastal areas.
- m. The structure shall be designed to withstand operating environmental conditions for a period of minimum 25 years. And shall be free from corrosion while installation.
- n. Screw fasteners shall use existing mounting holes provided by module manufacturer. No additional holes shall be drilled on module frames
- o. The total load of the structure (when installed with PV modules) on the roof should be less than 60 kg/m².
- p. Minimum distance between the lower level of PV Module and the ground shall be 0.6m from the ground level.
- q. The PV Panel area shall be accessible for cleaning and for any repair work.
- r. Sufficient gap needs to be provided between the rows to avoid falling of shadow of one row on the next row. Seismic factors for the site will be considered while making the design of the foundation.
- s. Adequate spacing shall be provided between any two modules secured on PV panel for improved wind resistance.
- t. Installation of structure for solar PV mounting should not tamper with the water proofing of the roofs.

43.3 The Rooftop Structures may be classified in three broad categories as follows (drawings at **Annexure-G**). The bidders are required to quote the rates for each separately in the financial bid:

i. Ballast structure

- a. The mounting structure must be Non-invasive ballast type and any sort of penetration of roof to be avoided.
- b. The minimum clearance of the structure from the roof level should be in between 70 - 150 mm to allow ventilation for cooling, also ease of cleaning and maintenance of panels as well as cleaning of terrace.
- c. The structures should be suitably loaded with reinforced concrete blocks of appropriate weight made out of M25 concrete mixture.

ii. Tin shed

- a. The structure design should be as per the slope of the tin shed.
- b. The inclination angle of structure can be done in two ways
 - b.1. Parallel to the tin shed (flat keeping zero-degree tiling angle), if the slope of shed in Proper south direction
 - b.2. With same tilt angle based on the slope of tin shed to get the maximum output.
- c. The minimum clearance of the lowest point from the tin shade should be more than 100mm.
- d. The base of structure should be connected on the Purlin of tin shed with the proper riveting. e. All structure member should be of minimum 2 mm thickness.

iii. RCC Elevated structure: It can be divided into further three categories:

A. Minimum Ground clearance (300MM – 1000 MM)

- a. The structure shall be designed to allow easy replacement of any module and shall be in line with site requirement. The gap between module should be minimum 30MM.
- b. Base Plate – Base plate thickness of the Structure should be 5MM for this segment.
- c. Column – Structure Column should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.

- d. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side (y-axis) and 40MM in flange side (x-axis).
- e. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
- f. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
- g. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- h. For single portrait structure the minimum ground clearance should be 500MM.

B. Medium Ground clearance (1000MM – 2000 MM)

- a. Base Plate – Base plate thickness of the Structure should be Minimum 6MM for this segment.
- b. Column – Structure Column should be minimum 2MM in Lip section / 3MM in C-Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in C Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

C. Maximum Ground clearance (2000MM – 3000 MM)

- a. Base Plate – Base plate thickness of the Structure should be minimum 8 MM for this segment.
- b. Column – Structure Column thickness should be minimum 2.6MM in square hollow section (minimum 50x50) or rectangular hollow section (minimum 60x40) or 3MM in C-Channel section.
- c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 80MM in Web side and 50MM in flange side in Lip section.
- e. Front/back bracing – The section for bracing part should be minimum 3MM thickness.
- f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.

D. Super elevated structure (More than 3000 MM)

i. Base structure

- b. Base Plate – Base plate thickness of the Structure should be 10MM for this segment.
- c. Column – Structure Column minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40).
- d. Rafter - Structure Rafter minimum thickness should be minimum 2.9MM in square hollow section (minimum 60x60) or rectangular hollow section (minimum 80x40)

- e. Cross bracing – Bracing for the connection of rafter and column should be of minimum thickness of 4mm L-angle with the help of minimum bolt diameter of 10mm.

ii. Upper structure of super elevated structure

- a. Base Plate – Base plate thickness of the Structure should be minimum 5MM for this segment.
 - b. Column – Structure Column should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
 - c. Rafter - Structure rafter should be minimum 2MM in Lip section / 3MM in Channel section. The minimum section should be 70MM in Web side and 40MM in flange side in Lip section.
 - d. Purlin - Structure purlin should be minimum 2MM in Lip section. The minimum section should be 60MM in Web side and 40MM in flange side in Lip section.
 - e. Front/back bracing – The section for bracing part should be minimum 2MM thickness.
 - f. Connection – The structure connection should be bolted completely. Leg to rafter should be connected with minimum 12 diameter bolt. Rafter and purlin should be connected with minimum 10 diameter bolt. Module mounting fasteners should be SS-304 only and remaining fasteners either SS-304 or HDG 8.8 Grade.
- iii. If distance between two legs in X-Direction is more than 3M than sag angle/Bar should be provide for purlin to avoid deflection failure. The sag angle should be minimum 2MM thick, and bar should be minimum 12Dia.
- iv. Degree - The Module alignment and tilt angle shell be calculated to provide the maximum annual energy output. This shall be decided on the location of array installation
- v. Foundation – Foundation should be as per the roof condition; two types of the foundation can be done- either penetrating the roof or without penetrating the roof.
- a) If penetration on the roof is allowed (based on the client requirement) then minimum 12MM diameter anchor fasteners with minimum length 100MM can

be used with proper chipping. The minimum RCC size should be 400x400x300 cubic mm. Material grade of foundation should be minimum M20.

- b) If penetration on roof is not allowed, then foundation can be done with the help of 'J Bolt' (refer IS 5624 for foundation hardware). Proper Neto bond solution should be used to adhere the Foundation block with the RCC roof. Foundation J - bolt length should be minimum 12MM diameter and length should be minimum 300MM.

44. ARRAY JUNCTION BOXES (JBs)

- a. The junction boxes are to be provided in the PV array for termination of connecting cables. The J. Boxes (JBs) shall be made of GRP/FRP/Powder Coated Aluminum /cast aluminum alloy with full dust, water & vermin proof arrangement. All wires/cables must be terminated through cable lugs. The JB's shall be such that input & output termination can be made through suitable cable glands.
- b. Copper bus bars/terminal blocks housed in the junction box with suitable termination threads Conforming to IP65 standard and IEC 62208 Hinged door with EPDM rubber gasket to prevent water entry. Single / double compression cable glands, Provision for earthing the box must be provided.
- c. Each Junction Box shall have High quality Suitable Capacity Metal Oxide Varistors (MOVs) / SPDs, suitable Reverse Blocking Diodes. The Junction Boxes shall have suitable arrangement monitoring and disconnection for each of the groups. Each string combiner box/ junction box will have suitable Reverse Blocking Diodes of maximum DC blocking voltage of 600 / 1000V or as per the system requirement with suitable arrangement for its connecting.
- d. Suitable markings shall be provided on the bus bar for easy identification and the cable ferrules must be fitted at the cable termination points for identification
- e. The junction boxes/ enclosures should be IP 65(for outdoor)/ IP 54 (indoor) and as per IEC 529 specifications. The Junction boxes / string combiner boxes shall conform to IEC 60529 (Degrees of Protection provided by Enclosures (IP Code))

45. DC DISTRIBUTION BOARD:

- a. DC Distribution panel to receive the DC output from the array field. DC generated by the solar modules is transmitted through the appropriate cables from Array Yard to Control facility. DC bus & panel should be provided for the incoming DC supply from array yard. The panel should consist of adequate size.
- b. DC DPBs shall have sheet from enclosure of dust & vermin proof conform to IP 65 protection. The bus bars are made of copper of desired size. Suitable capacity MCBs/MCCB shall be provided for controlling the DC power output to the PCU along with necessary surge arrestors.

46. AC DISTRIBUTION PANEL BOARD:

- a. AC Distribution Panel Board (DPB) shall control the AC power from PCU/ inverter, and should have necessary surge arrestors. Output from the inverter shall be fed to the ACDB through 4 pole MCCB of suitable current rating and multifunction export solar meter.
- b. All switches and the circuit breakers, connectors should conform to IEC 60947, part I, II and III/ IS60947 part I, II and III.
- c. The changeover switches, cabling work should be undertaken by the bidder as part of the project.
- d. All the Panel's shall be metal clad, totally enclosed, rigid, floor mounted, air - insulated, cubical type suitable for operation on three phase / single phase, 415 or 230 volts, 50 Hz
- e. The panels shall be designed for minimum expected ambient temperature of 45 degrees Celsius, 80 percent humidity and dusty weather.
- f. All indoor panels will have protection of IP54 or better. All outdoor panels will have protection of IP65 or better.
- g. Should conform to Indian Electricity Act and rules (till last amendment).
- h. All the 415 AC or 230 volts' devices / equipment like bus support insulators, circuit breakers, SPDs, VTs etc., mounted inside the switchgear shall be suitable for

continuous operation and satisfactory performance under the following supply conditions

Variation in supply voltage +/- 10 %

Variation in supply frequency +/- 3 Hz

47. PCU/ARRAY SIZE RATIO:

- a. The combined wattage of all inverters should not be less than 80% of rated capacity of DC power of the plant under STC.
- b. Maximum power point tracker shall be integrated in the PCU/inverter to maximize energy drawn from the array.

48. PCU/ INVERTER:

The Power Conditioning Unit shall be String Inverter with power exporting facility to the Grid. The DC to AC ratio of 1.25 is to be maintained at all sites. (For eg. – For DC capacity of 100 kWp, the AC capacity of minimum 80 kW is to be maintained). Preferred Makes – Fronius / ABB / SMA

General Specifications:

48.1 All the Inverters should contain the following clear and indelible Marking Label & Warning Label as per IS16221 Part II, clause 5. The equipment shall, as a minimum, be permanently marked with:

- a. The name or trademark of the manufacturer or supplier.
- b. A model number, name or other means to identify the equipment.
- c. A serial number, code or other markings allowing identification of manufacturing location and the manufacturing batch or date within a three-month time period.
- d. Input voltage, type of voltage (A.C. or D.C.), frequency, and maximum continuous current for each input.
- e. Output voltage, type of voltage (A.C. or D.C.), frequency, maximum continuous current, and for A.C. outputs, either the power or power factor for each output.
- f. The Ingress Protection (IP) rating

- 48.2 The inverter output shall be 415 VAC, 50 Hz, 3 phase.
- 48.3 The inverter shall include appropriate self-protective and self-diagnostic feature to protect itself and the PV array from damage in the event of inverter component failure or from parameters beyond the inverter's safe operating range due to internal or external causes.
- 48.4 PCU shall have the dynamic and efficient MPPT algorithm behaviour which finds maximum power point even in low light conditions. The PCU Company should be able to display this feature.
- 48.5 The PCU shall be supplied with in-built advanced grid feed-in feature along with dynamic feed-in control considering self-consumption. The PCU shall also include control functions for optimum feed-in of reactive power and effective power. The amount of reactive power injection and absorption can be controlled depending upon under/over excited systems.
- 48.6 The PCU shall have a provision of external shutdown via remote signal separately with an in-built floating-point contact or similar option using any minimum interface which is to ensure the emergency stop function in the inverter
- 48.7 The PCU shall have a higher degree of ingress protection of IP 65 to handle robust environment conditions from dust and water ingress under complete outdoor installations.
- 48.8 The data logger should possess the feature of extracting the data externally with open protocols like Modbus TCP/RTU. The manufacturer should provide the Modbus register mapping file to utilise this feature
- 48.9 **The inverter shall have an efficient cooling concept with better power derating feature to handle higher temperatures and ensure the best efficiency. The inverter shall be able to provide full rated output power even at ambient temperatures of 50°C. The manufacturer to provide the power derating curves to demonstrate the same.**
- 48.10 The inverter shall be flexible in terms of the installation and should be capable for installation in a horizontal position facilitating easy installation for site specific requirements.

- 48.11 The inverter shall have an integrated feature of emergency stop to halt the inverter from operation considering safety scenarios
- 48.12 The PCU manufacturer should have an authorised service centre in Kerala. The details of the service centre along with the spare list must be submitted along with the bid.
- 48.13 **PCU should be able to respond smoothly to the voltage fluctuations on the low-tension grid via active & reactive power control/ support. The PCU should be able to respond separately to fulfil below mentioned:**
- 48.13.1 Finding out optimisation of the system**
- 48.13.2 Optimal power distribution on each phase**
- 48.13.3 Prevent PCU from unnecessary disconnections**
- 48.14 The PCU Company should have grid connected solar plants running in the country with inverters at least 7 years from the time of bidding to showcase the service reliability and long-term presence. Also, the PCU should have local presence in the county for at least last 5 years. The PCU manufacturer to provide details to authenticate the same.
- 48.15 The Technical Specification of On-Grid Inverters are summarized below:

Specifications of Inverters	
Parameters	Detailed specification
Nominal voltage	230V/415V
Voltage Band	Between 80% and 110% of V nominal
Nominal Frequency	50 Hz
Operating Frequency Range	47.5 to 50.5 Hz
Waveform	Sine wave
Harmonics	AC side total harmonic current distortion < 3%
Ripple	DC Voltage ripple content shall be not more than 1%
Efficiency	Efficiency shall be >98%
Casing protection levels	Degree of protection: Min IP-65
Operating ambient Temp range	-10 to + 60 degree Celsius
Operation	Completely automatic including wakeup, synchronization (phase locking) and shut down
MPPT	MPPT range must be suitable to individual array voltages

Specifications of Inverters	
Parameters	Detailed specification
Protection Class	1
Protections	Over voltage: both input and output Over current: both input and output Over / Under grid frequency Over temperature Short circuit Lightning Surge voltage induced at output due to external source Islanding
Ingress Protection	IP 65
Recommended LED indications	ON Grid ON Under/ Over voltage Overload Over temperature
Recommended LCD Display on front Panel	DC input voltage DC current AC Voltage (all 3 phases) AC current (all 3 phases) Frequency Ambient Temperature Instantaneous power Cumulative output energy Cumulative hours of operation Daily DC energy produced
Communication Interface	RS485/ RS232/Wi-Fi (with or without USB)

48.16 The Technical Specification for Interconnection are summarized below:

Sl No	Parameters	Requirements	Reference
1	Overall conditions of service	Reference to regulations	Conditions for Supply of Electricity
2	Overall Grid Standards	Reference to regulations	Central Electricity Authority (Grid standards) Regulations 2010

3	Equipment	Applicable industry standards	IEC/EN standards
4	Safety and Supply	Reference to regulations, (General safety requirements	Central Electricity Authority (Measures of safety and electricity supply) Regulations, 2010 and subsequent amendments
5	Meters	Reference to regulations and additional conditions issued by the commission.	Central Electricity Authority (Installation & operation of meters) regulations 2006 and subsequent amendments
6	Harmonic current	Harmonic current injections from a generating station shall not exceed the limits specified in IEEE 519	IEEE 519 relevant CEA (Technical Standards for connectivity of the distributed generation resource) Regulations 2013 and subsequent amendments
7	Synchronization	Photovoltaic system must be equipped with a grid frequency synchronization device, if the system is using synchronizer inherently built in to the inverter, then no separate synchronizer is required	Relevant CEA (Technical Standards for Connectivity of the distributed generation resources) regulations 2013 and subsequent amendments.
8	Voltage	The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage. beyond the clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid	
9	Flicker	Operation of Photovoltaic system should not cause	Relevant CEA regulations 2013 and subsequent if

		voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards if any	any, (Technical standards for connectivity of the distributed generation resource)
10	Frequency	When the distribution system frequency deviates outside the specified limits (50.5 Hz on upper side and 47.5 Hz on lower side) up to 0.2 sec, the Photovoltaic systems shall automatically disconnect from grid and be in island mode.	
11	DC injection	Photovoltaic system shall not inject DC current greater than 0.5% of full rated output at the interconnection point or 1% rated inverter output current into distribution system under any operating conditions.	
12	Power Factor	While the output of the inverter is greater than 50%, a lagging power factor greater than 0.9 shall be maintained.	
13	Islanding and Disconnection	The photovoltaic system in the event of voltage or frequency variations must island/disconnect itself with the time stipulated as per IEC standards	
14	Overload and overheat	The inverter should have the facility to automatically switch off in case of overload or overheat and should restart when normal conditions are restored	

48.17 The Certifications of On-Grid Inverters are summarized below:

Standard	Description
IS 16221-2	Safety of Power Converters for use in Photovoltaic Power Systems Part 2 (Particular Requirements for Inverters)
IEC 61683	Photovoltaic systems - Power conditioners - Procedure for measuring efficiency
IEC 61727	Photovoltaic (PV) systems- Characteristics of the utility interface
IEC/EN 62109-1	Safety of power converters for use in photovoltaic power systems - Part 1: General requirements
IEC/EN 62109-2	Safety of power converters for use in photovoltaic power systems - Part 2: Particular requirements for inverters
IEC/EN 61000-3-3/ 3-11/ 3-5	Electromagnetic compatibility (EMC) - Part 3-11; Limits; Limitation of Voltage Change, Voltage Fluctuations and Flicker in Public Low- Voltage Supply Systems; Rated Current <16A / >16A and <75A / >75A per Phase respectively
IEC/EN 61000-3-2/ -3-12/ -3-4	Electromagnetic compatibility (EMC) - Part 3-12; Limits; Limits for Harmonic Currents produced by equipment connected to the public low voltage systems with Rated Current <16A / >16A and <75A / >75A per Phase respectively
*IEC/EN 61000-6-1 / 6-2	Electromagnetic compatibility (EMC) - Part 6-2: Generic standards - Immunity standard for residential and commercial / industrial environments
*IEC/EN 61000-6-3 / 6-4	Electromagnetic compatibility (EMC) - Part 6-4: Generic standards - Emission standard for residential and commercial / industrial environments
IEC 62116 / IS 16169	Utility-interconnected photovoltaic inverters - Test procedure of islanding prevention measures
IEC 60068-2-1	Environmental testing - Part 2-1: Tests - Test A: Cold
IEC 60068-2-2	Environmental testing - Part 2-2: Tests - Test B: Dry heat
IEC 60068-2-14	Environmental testing - Part 2-14: Tests - Test N: Change of temperature
IEC 60068-2-30	Environmental testing - Part 2-30: Tests - Test Db; Damp heat, cyclic (12 h + 12 h cycle)

***Recommended but not mandatory**

49. INTEGRATION OF PV POWER WITH GRID:

The output power from SPV would be fed to the inverters which converts DC produced by SPV array to AC and feeds it into the main electricity grid after synchronization. In case of grid failure, or low or high voltage, solar PV system shall be out of synchronization and shall be disconnected from the grid.

50. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance:

A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- i. AC Voltage
- ii. AC Output current
- iii. Output Power
- iv. Energy in kWh
- v. DC Input Voltage
- vi. DC Input Current
- vii. Ambient Temperatures
- viii. Invertor Status
- ix. Irradiation
- x. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

51. PROTECTIONS

The system should be provided with all necessary protections like earthing, Lightning, and grid islanding as follows:

51.1 LIGHTNING PROTECTION

The SPV power plants shall be provided with lightning & overvoltage protection. The main aim in this protection shall be to reduce the over voltage to a tolerable value before it reaches the PV or other sub system components. The source of over voltage can be lightning, atmosphere disturbances etc. The entire space occupying the SPV array shall be suitably protected against Lightning by deploying required number of Lightning Arrestors. Lightning protection should be provided as per IS/IEC 62305 standard. The protection against induced high-voltages shall be provided by the use of metal oxide varistors (MOVs) and suitable earthing such that induced transients find an alternate route to earth.

51.2 SURGE PROTECTION

The system should have installed with Surge Protection Device (SPD) for higher withstand of the continuous PV-DC voltage during earth fault condition. SPD shall have safe disconnection and short circuit interruption arrangements through integrated DC in-built bypass fuse (parallel) which should get tripped driving failure mode of MOV, extinguishing DC arc safely in order to protect the installation against fire hazards. The SPD should be provided in the AC Distribution Box as well.

51.3 EARTHING PROTECTION

- i. Each array structure of the PV yard should be grounded/ earthed properly as per IS:3043-1987. In addition, the lighting arrester/masts should also be earthed inside the array field. Earth Resistance shall be tested in presence of the representative of ANERT as and when required after earthing by calibrated earth tester. PCU, ACDB and DCDB should also be earthed properly.
- ii. Earth resistance shall not be more than 5 ohms. It shall be ensured that all the earthing points are bonded together to make them at the same potential.
- iii. Earthing System shall connect all non-current carrying metal receptacles, electrical boxes, appliance frames, chassis and PV module mounting structures in one long run. The earth strips should not be bolted. Earthing GI strips shall be interconnected by proper welding.
- iv. Masonry enclosure with the earth pit of size not less than 400mm X 400mm (width) complete with cemented brick work (1:6) of minimum 500 mm depth duly plastered with cement mortar (inside), shall be provided. Hinged inspection covers of size not less than 300mm X 300mm with locking arrangement shall be provided. Suitable handle shall be provided on the cover by means of welding a rod on top of the cover for future maintenance.
- v. Earthing system must be interconnected through GI strip to arrive equipotential bonding. The size of the GI earth strip must be minimum 25mm X 6mm.
- vi. The complete earthing system shall be mechanically and electrically connected to provide independent return to earth. All three-phase equipment shall have two distinct earth connections. An earth bus shall be provided inside the control facility. For each earth pit, necessary test point shall have to be provided.

51.4 GRID ISLANDING:

- i. In the event of a power failure on the electric grid, it is required that any independent power-producing inverters attached to the grid turn-off in a short period of time. This prevents the DC-to-AC inverters from continuing to feed power into small sections of the grid, known as "islands." Powered islands present a risk to workers who may expect the area to be unpowered, and they may also damage grid-tied equipment. The PV system shall be equipped with islanding protection.

In addition to disconnection from the grid (due to islanding protection) disconnection due to under and over voltage conditions shall also be provided.

- ii. A manual disconnect 4pole isolation switch beside automatic disconnection to grid would have to be provided at utility end to isolate the grid connection by the utility personnel to carry out any maintenance. This switch shall be locked by the utility personnel

52. CABLES

Cables of appropriate size to be used in the system shall have the following characteristics:

- i. Shall meet IEC 60227/IS 694, IEC 60502/IS1554 standards
- ii. Temp. Range: -10°C to $+80^{\circ}\text{C}$.
- iii. Voltage rating 660/1000V
- iv. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
- v. Flexible
- vi. Sizes of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum. The cables (as per IS) should be insulated with a special grade PVC compound formulated for outdoor use.
- vii. Cable Routing/ Marking: All cable/wires are to be routed in a GI cable tray and suitably tagged and marked with proper manner by good quality ferrule or by other means so that the cable easily identified.
- viii. The Cable should be so selected that it should be compatible up to the life of the solar PV panels i.e. 25years.
- ix. The ratings given are approximate. Bidder to indicate size and length as per system design requirement. All the cables required for the plant provided by the bidder. Any change in cabling sizes if desired by the bidder/approved after citing appropriate reasons. All cable schedules/layout drawings approved prior to installation.
- x. Multi Strand, annealed high conductivity copper conductor PVC type 'A' pressure extruded insulation or XLPE insulation. Overall PVC/XLPE insulation for UV

protection Armored cable for underground laying. All cable trays including covers to be provided. All cables conform to latest edition of IEC/ equivalent BIS Standards as specified below: BoS item / component Standard

Description Standard Number Cables General Test and Measuring Methods, PVC/XLPE insulated cables for working Voltage up to and including 1100 V, UV resistant for outdoor installation IS /IEC 69947.

- xi. For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible Aluminium cables shall be used, Outdoor AC cables shall have a UV -stabilized outer sheath.
- xii. The size of each type of DC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 1%.
- xiii. The size of each type of AC cable selected shall be based on minimum voltage drop however; the maximum drop shall be limited to 2 %.
- xiv. The minimum DC cables size shall be 4.0mm² copper; The minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire shall be equal to the size of the phase wires.
- xv. The following colour code shall be used for cable wires and shall confirm to IEC 69947
 - DC positive: red (the outer PVC sheath can be black with a red line marking)
 - DC negative: black
 - AC single phase: Phase: Red; Neutral: Black
 - AC three phase: phases: Red, Yellow, Blue; Neutral: Black
 - Earth wires: Green

53. CABLING PRACTICE

Cable Cabling is required for wiring from AC output of inverter/PCU to the Grid Interconnection point. It includes the DC cabling from Solar Array to AJB and from AJB to inverter input.

53.1 All cables of appropriate size to be used in the system shall have the following characteristic:

- a. Shall conform to IEC 60227 / IS 694 & IEC 60502 / IS 1554 standards.
 - b. Temperature Range: -10 degree Celsius to +80 degree Celsius
 - c. Voltage rating: 660/1000V
 - d. Excellent resistance to heat, cold, water, oil, abrasion, UV radiation
 - e. Flexible
- 53.2 Sizes of cables between any array interconnections, array to junction boxes, junction boxes to inverter etc. shall be so selected to keep the voltage drop (power loss) of the entire solar system to the minimum (2%).
- 53.3 For the DC cabling, XLPE or XLPO insulated and sheathed, UV stabilized single core flexible copper cables shall be used; multi-core cables shall not be used.
- 53.4 For the AC cabling, PVC or XLPE insulated and PVC sheathed single or, multi-core flexible copper cables shall be used. However, for above 10kWp systems, XLPE insulated Aluminium cable of suitable area of cross section can be used in the AC side subject to a minimum area of cross section of 10 sq.mm. Outdoor AC cables shall have a UV -stabilized outer sheath IS/IEC 69947.
- 53.5 All LT XLPE cables shall conform to IS:7098 part I&II.
- 53.6 The total voltage drop on the cable segments from the solar PV modules to the solar grid inverter shall not exceed 2.0%
- 53.7 The total voltage drop on the cable segments from the solar grid inverter to the building distribution board shall not exceed 2.0%
- 53.8 The DC cables from the SPV module array shall run through a UV-stabilized PVC conduit pipe of adequate diameter with a minimum wall thickness of 1.5mm
- 53.9 Cables and wires used for the interconnection of solar PV modules shall be provided with solar PV connectors (MC4) and couplers
- 53.10 All cables and conduit pipes shall be clamped to the rooftop, walls and ceilings with thermo-plastic clamps at intervals not exceeding 50cm; the minimum DC cables size shall be 4.0mm² copper; the minimum AC cable size shall be 4.0mm² copper. In three phase systems, the size of the neutral wire size shall be equal to the size of the phase wires. Conduits for taking outdoor cables shall be UV treated.

53.11 Cable Marking: All cable/wires are to be marked in proper manner by good quality ferule or by other means so that the cable can be easily identified. The following colour code shall be used for cable wires

- a. DC positive: red (the outer PVC sheath can be black with a red line marking)
- b. DC negative: black
- c. AC single phase: Phase: red; Neutral: black
- d. AC three phase: phases: red, yellow, blue; neutral: black
- e. Earth wires: green

53.12 Cables and conduits that have to pass through walls or ceilings shall be taken through PVC pipe sleeve.

53.13 Cable conductors shall be terminated with tinned copper end ferrules to prevent fraying and breaking of individual wire strands. The termination of the DC and AC cables at the Solar Grid Inverter shall be done as per instructions of the manufacturer, which in most cases will include the use of special connectors.

53.14 All cables and connectors used for installation of solar field must be of solar grade which can withstand harsh environment conditions including high temperatures, UV radiation, rain, humidity, dirt, salt, burial and attack by moss and microbes for 25 years and voltages as per latest IEC standards. DC cables used from solar modules to array junction box shall solar grade copper (Cu) with XLPO insulation and rated for 1.1 kV as per relevant standards only.

53.15 Bending radii for cables shall be as per manufactures recommendations and IS: 1255.

53.16 For laying/termination of cables latest BIS/IEC Codes/ standards shall be followed.

54. FACTORY TESTING

- a. PCU shall be tested prior to shipment and factory test certificate for relevant parameters should be provided with the PCU supplied. ANERT or authorised representative of ANERT may be allowed to witness the tests if required.
- b. Factory testing shall not only be limited to measurement of phase currents, efficiencies, harmonic content and power factor, but shall also include all other

necessary tests/simulation required and requested by the Purchasers Engineers. Tests may be performed at 25, 50, 75 and 100 percent of the rated nominal power.

55 NET METERING AND UTILITY INTERCONNECTION

- a. Net metering equipment (an Import-Export Energy Meter) approved and tested by the electrical utility based on the accuracy class required for the proposed capacity of the system must be provided with the necessary data cables if required.
- b. Net Metering and Utility Interconnection should be accomplished according the Kerala State Electricity Regulatory Commission (Grid Interactive Distributed Solar Energy Systems) Regulations 2014 Clauses (8) & (9) (Notification No. 2096/KSERC/CT/2014 dt. 10th June 2014)

56 INTER CONNECTION OF INVERTER OUTPUT WITH UTILITY GRID

- a. The interconnection of load with inverter output should be done after obtaining permission from Electrical Inspectorate and Electrical Utility.
- b. The plan scheme and drawing related to interconnection details should be submitted to Electrical Inspectorate through a licensed Electrical contractor with the guidance appropriate Engineering Authority.
- c. Licenced contractor has to be engaged for preparation of plan scheme to be submitted to the Kerala State Electricity Licensing Board and necessary fee should be remitted for energisation of Solar Power Plant.
- d. The panel board and distribution board required for AC interconnection should be done as per specification/ instruction given appropriate Engineering Authority.
- e. All the electrical works required for the interconnection of load with inverter output should be done by the successful bidder as a part of the Solar Power Plant installation.
- f. Bidder should visit the actual site and ensure the exact place for providing Solar Modules and Inverter etc. in presence of technical representative from the ANERT.
- g. Net Metering Equipment shall be installed and maintained in accordance with the provisions of The Central Electricity Authority (Installation and Operation of

Meters) Regulations, 2006 as amended from time to time. The Contractor shall maintain the Metering System as per metering code and CEA guidelines. The defective meter shall be immediately tested and calibrated.

- h. The accuracy class of the Net Metering Equipment will be selected so that all levels of energy produced or taken by the Solar Power Plant will be measured accurately, and this equipment has applicable accuracy class.
- i. Net Metering Equipment shall be microprocessor-based conforming to the relevant IEC standards with Advanced Metering Infrastructure (AMI) with RS232 cable facility.
- j. Net Metering Equipment shall measure active energy (both import and export) and reactive energy (import) by 3 ph, 4 wire principle suitable for balanced / unbalanced 3 phase load (With KVAR, KWh, KVA measuring registers). Tri-vector based energy meter shall have an accuracy class of energy measurement of at least Class 0.2 for active energy and at least 0.5 Class for reactive energy according to IEC 60687.
- k. Display parameters: LCD test, KWH import, KWH export, MD in KW export, MD in KW import, Date & Time, AC current and voltages and power factor (Cumulative KWH will be indicated continuously by default)

57 WARRANTY

- a. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided as per the special conditions of the contract.
- b. PV modules used in solar power plants/ systems must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- c. The Warranty Card to be supplied with the system must contain the details of the all the components supplied including serial numbers accompanied with the OEM warranty card

58. OPERATION & MAINTENANCE OF THE PLANT

58.1 For the optimal operation of a PV plant, maintenance must be carried out on a regular basis. All the components should be kept clean. It should be ensured that all the components are fastened well at their due place. The O&M Charges for 10-year period is to be quoted by the bidders

58.2 The service personnel should visit the installations at least once a month for preventive maintenance even if no faults are reported. **Reports of these preventive maintenance visits and generation data should be submitted to the concerned ANERT District Offices on a quarterly basis.**

58.3 Maintenance guidelines for various components viz. solar panels, inverter, wiring etc. are discussed below:

58.3.1 SOLAR PV PANELS

Although the cleaning frequency for the panels will vary from site to site depending on soiling, it is recommended that

- a) The panels are cleaned at least once every thirty days.
- b) Use water and a soft sponge or cloth for cleaning.
- c) Do not use detergent or any abrasive material for panel cleaning.
- d) Iso-propyl alcohol may be used to remove oil or grease stains.
- e) Do not spray water on the panel if the panel glass is cracked or the back side is perforated.
- f) Wipe water from module as soon as possible.
- g) Use proper safety belts while cleaning modules at inclined roofs etc.
- h) The modules should not be cleaned when they are excessively hot. Early morning is particularly good time for module cleaning.
- i) Check if there are any shade problems due to vegetation or new building. If there are, make arrangements for removing the vegetation or moving the panels to a shade-free place.
- j) Ensure that the module terminal connections are not exposed while cleaning; this poses a risk of electric shock.

- k) Never use panels for any unintended use, e. g. drying clothes, chips etc.) Ensure that monkeys or other animals do not damage the panels.

58.3.2 CABLES AND CONNECTION BOXES

- a) Check the connections for corrosion and tightness.
- b) Check the connection box to make sure that the wires are tight, and the water seals are not damaged.
- c) There should be no vermin inside the box.
- d) Check the cable insulating sheath for cracks, breaks or burns. If the insulation is damaged, replace the wire.
- e) If the wire is outside the building, use wire with weather-resistant insulation.
- f) Make sure that the wire is clamped properly and that it should not rub against any sharp edges or corners.
- g) If some wire needs to be changed, make sure it is of proper rating and type.

58.3.3 INVERTER

- a) The inverter should be installed in a clean, dry, and ventilated area.
- b) Remove any excess dust in heat sinks and ventilations. This should only be done with a dry cloth or brush.
- c) Check that vermin have not infested the inverter. Typical signs of this include spider webs on ventilation grills or wasps' nests in heat sinks.
- d) Check functionality, e.g., automatic disconnection upon loss of grid power supply, at least once a month.
- e) Verify the state of DC/AC surge arrestors, cable connections, and circuit breakers.

58.4 Inspection and Maintenance Schedule

Component	Activity	Description	Interval
PV Module	Cleaning	- Clean PV modules with plain water or mild dishwashing detergent. - Do not use brushes, any types of solvents, abrasives, or harsh detergents.	Monthly or as per site conditions
PV Array	Inspection	Check the PV modules and rack for any damage.	Annual

Component	Activity	Description	Interval
		Note down location and serial number of damaged modules.	
	Inspection	Determine if any new objects, such as vegetation growth, are causing shading of the array and move them if possible.	Half Yearly
	Vermin Removal	Remove bird nests or vermin from array and rack area.	Half Yearly
Junction Boxes	Inspection	- Inspect electrical boxes for corrosion or intrusion of water or insects. Seal boxes if required. - Check position of switches and breakers. - Check operation of all protection devices.	Annual
Wiring	Inspection	Inspect cabling for signs of cracks, defects, loose connections, overheating, arcing, short or open circuits, and ground faults.	Annual
Inverter	Inspection Service	- Observe instantaneous operational indicators on the faceplate of the inverter to ensure that the amount of power being generated is typical of the conditions. - Inspect Inverter housing or shelter for physical maintenance, if required.	Monthly
Plant	Monitoring	Operation and Performance Monitoring	Monthly
Spare Parts	Management	Manage inventory of spare parts.	As needed

58.5 The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation. If any of the components are to be taken out from the site for repair, a standby must be provided to ensure un-interrupted power generation and the systems functions smoothly.

58.6 Any Delay in servicing beyond 7 days of fault reporting would attract penalty at the rate of at the rate fixed by CEO, ANERT and further actions will be initiated against the agency.

58.7 A designated contact Telephone Number and address should be submitted for reporting faults during the O&M period of 5 years.

59. CIVIL WORKS

While installing solar power plants on rooftops, the physical condition of the rooftop, chances of shading, chances water level rise in the rooftop during raining due improper drainage in the roof-top should be taken in to consideration.

- a. PV array shall be installed in the terrace space free from any obstruction and/or shadow and to minimize effects of shadows due to adjacent PV panel rows.
- b. PV array shall be oriented in the south direction in order to maximize annual energy yield of the plant.
- c. The solar PV array must be installed on the rooftop in such a way that there is sufficient space on the rooftop for maintenance etc.
- d. There should not be any damage what so ever to the rooftop due to setting up of the solar power plant so that on a later day there is leakage of rainwater, etc. from the rooftop.
- e. Some civil works are inevitable for erecting the footings for the module mounting structure as discussed in Module Mounting Structure section. The roof top may be given a suitable grading plaster with suitable leak proof compound so as to render the roof entirely leak proof.
- f. Ample clearance shall be provided in the layout of the inverter and DC/AC distribution boxes for adequate cooling and ease of maintenance.
- g. While cabling the array, care must be taken such that no loose cables lie on the rooftops.
- h. The roof top should look clean and tidy after installation of the array.
- i. Neatness, tidiness and aesthetics must be observed while installing the systems.
- j. RCC Works - All RCC works shall be as per IS 456 and the materials used viz. Cement reinforcement, steel etc. shall be as per relevant IS standards. Reinforcement shall be high strength TMT Fe 415 or Fe 500 conforming to IS: 1786-1985.
- k. Brick Works (If any) - All brick works shall be using 1st class bricks of approved

quality as per IS 3102.

- l. Plastering - Plastering in cement mortar 1:5, 1:6 and 1:3 shall be applied to all.
- m. Display of mandatory items- Single Line Diagram and layout diagram of modules and interconnection at installation site shall be provided near the inverter.
- n. For painting on concrete, masonry and plastered surface IS:2395 shall be followed. For distempering IS 427 shall be followed referred. For synthetic enamel painting IS 428 shall be followed. For cement painting IS 5410 shall be followed.
- o. All Civil works required for the installation of the PV Plant and other civil and electrical work in evacuation infrastructure, wherever necessary, shall be within the scope of the bidder

The layout of Inverter accommodation shall be designed to enable adequate heat dissipation and availability. Mount within the existing infrastructure available in consultation with the Site in charge. String Inverters may be installed with Canopy type structure over it to protect it from frequent monsoon and weather changes.

60. TESTING & COMMISSIONING

- a. The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.
- b. Any modification in the equipment or installation that may be demanded by the inspecting authorities shall be carried out by the contractor at no additional cost to the KSEBL
- c. In accordance with the specific installation instruction as per the manufacturers drawings or as directed by the KSEBL, the successful Bidder shall unload, assemble, erect, install test, commission and hand over all electrical equipments included in this contract after O&M of 10 years.
- d. Erection materials including all consumables, tools, testing instruments or any other equipment required for successful commissioning shall be arranged by the successful Bidder in a timely manner.
- e. All equipment and instruments, indoor and outdoor, shall be marked with No. and provided with danger boards before commissioning.
- f. All Power equipments shall be handled and erected as per the relevant codes of practice and manufacturer's drawings and instruction manuals.

- g. The Contractor shall obtain the temporary Electrical connection for construction purposes and the same has to be dismantled off the premises after completion of erection of plant.

61. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:

The Weather monitoring station installed in the plant shall be in working condition for minimum 2 weeks and all the parameters shall be available for analysis and verification. The test report for the calibration shall be submitted by the Contractor for approval. After the successful verification of the initial parameters by ANERT, PR test shall be conducted. The Following factors shall be excluded for calculation;

- Generation loss due to grid outage.
- Irradiance below 250 W/m²
- The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = \frac{\text{Measured output in kW}}{\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2)}$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

62. DATE OF COMMISSIONING

After the Inspection and approval of the Electrical Inspectorate, date of Energisation to the Grid will be considered as the official Date of Commissioning (CoD) of the project. To ensure PR, the bidder will be allowed EPC contractor shall improve the quality of the plant by replacement of any components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

63. SOLAR PV SYSTEM FOR MEETING THE ANNUAL ENERGY REQUIREMENT

Key Performance Indicators (For installations above 50 kW)

The following KPIs would be monitored by the ANERT/Owner throughout the contract tenure and the contractor shall furnish monthly reports on above, without fail.

- PV Array Energy Yield
- Final System Yield
- PV System Efficiency (DC/AC)
- Performance Ratio (PR): The performance ratio test as per IS/IEC 61724 has to be carried out at site by the agency in presence of authorized officials of ANERT, deriving sample data within a period of 7 consecutive days sufficient to provide operational data representing insolation and ambient conditions as desired by the

agreement authority to prove the Performance ratio of 75%. If a Solar Plant achieves the Minimum Performance Ratio, then the ANERT will issue Commercial Operation Date Certificate.

- Capacity Utilization Factor (CUF)
- Plant uptime
- Reactive Power Consumption
- Auxiliary Energy Consumption
- CO₂ Savings
- Environment, Health & Safety

64. DANGER BOARDS AND SIGNAGES:

Danger boards should be provided as and where necessary as per IE Act. /IE rules as amended up to date. Three signage shall be provided one each at battery –cum- control room, solar array area and main entry from administrative block. Text of the signage may be finalized in consultation with ANERT/ owner.

65. DRAWINGS & MANUALS:

- i. Two sets of Electrical drawings installation and O&M manuals are to be supplied. Bidders shall provide complete technical data sheets for each equipment giving details of the specifications along with make/makes in their bid along with basic design of the power plant and power evacuation, synchronization along with protection equipment.
- ii. Approved ISI and reputed makes for equipment be used.
- iii. For complete electro-mechanical works, bidders shall supply complete design, details and drawings for approval to ANERT before progressing with the installation work

67. BILL OF MATERIAL

The bidder should provide the bill of material mentioning the quantity of each of the item consisting in the system, along with the offer in the format as show below for each capacity:

Sl. No.	Item	Make (if any)	Model & Individual Capacity (If any)	Qty (Nos)	Rating / Capacity
1.	PV Module				
2.	PCU/Inverter				
3.	DC Cables				
4.	AC Cables				
5.	AJB/SCB				
6.	Module Mounting Structure (MMS)				
7.	ACDB				
8.	Lightning Arrester				
9.	Earthing System Details and No. of Earth pits				
10.	Data Acquisition System				

68. SITE INSPECTON

It is recommended that the bidders visit all the sites listed here for the physical verification and for correctly estimating the quantity, especially related to structure and cabling, before submitting the bids. **Bidder must include all the AC/DC wiring cost, replacement of instrument transformers, panel boards etc only after visiting the proposed site. The quoted amount will be for all the site-specific works and no additional amount will be allotted for any sort of works.**

The site-specific requirement of ladders for accessing PV modules, pathway facility along with handrails in case of sheet roofs are under the scope of the bidder. The Fabrication of Permanent Ladder should be of GI (min14 SWG), coated with Epoxy steel primer with rung spacing not be more than 10 inches and rung width of min 50 inches. Side Handrails / Grab Bars welded on both sides for safety purpose with an extension of

Min 50 inches above the landing or access level. The pathway can be either of GI or FRP material and shall include handrails for safety without causing shade on the PV modules.

69. CLEANING

The bidder shall provide permanent arrangement for module washing in the SPV Plant. Water lines may be drawn to feed water from the available resources. Contractor has to provide additional facility including pipeline, motor for pumping to the additional overhead tank, if required.

70. DISPLAY BOARD

The vendor has to display a board of size at the project site of size minimum 60 cm x 30 cm including the following details

- Plant Name, Capacity, Location, Type of Renewable Energy plant (solar), Date of commissioning etc. The logo of ANERT and details of the scheme as specified in the work order.

71. INSURANCE

- The power plant must be insured at every stage of operation – from Material dispatch, storage, completion of installation and till 5 years after commissioning. The insurance coverage on handing over of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**.
- The insurance premium for the 10 years of warranty is to be paid by the bidder. Only the system components are to be insured. On handing over of the system, the original insurance policy is to be handed over to the authorised person at the site of installation and a copy to ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the site of installation.

72. ENGINEERING DRAWINGS

The bidder should submit and get the necessary approval of the following detailed Engineering Drawings before execution of the project:

- i. Schematic drawing showing the PV panels, Power conditioning Unit(s)/Inverter, Array Junction Boxes (AJBs)/String Combiner Boxes (SJB), AC and DC Distribution Box, Net meters, MSB etc.
- ii. Layout of solar PV Array
- iii. Single Line Diagram (SLD) with specification of all components.
- iv. Design document for Module Mounting Structure (MMS) including certificate showing wind speed withstanding capacity of the structure (STAAD/Equivalent).
- v. Module Mounting Structure (MMS) drawing along with foundation details for the structure.
- vi. Sizes and specification of cables for PV Module interconnections, PV Array to Array Junction Boxes, Array Junction Boxes to Inverter, Inverter to ACDB/ Grid Connection point etc. shall be furnished.

The Vendor shall submit a PVsyst report for PV power plants from 25kWp and above. All PV plant design should contain the following details which should be approved by the concerned officer before installation.

- i. Design of strings including the number of PV modules
- ii. AC Protection (Circuit Breaker, Switches, Fuses, SPD)
- iii. DC Protection (Switches, Fuses, SPD)
- iv. AJB / SCB details
- v. DC Cable size and length from point to point
- vi. AC Cable size and length from point to point
- vii. Earthing system details and number of pits
- viii. Lightning protection details/specification
- ix. PV Syst / Any other software-based Simulation Report

73. SAFETY MEASURES

The bidder shall take entire responsibility for electrical safety of the installation(s) including connectivity with the grid and follow all the safety rules & regulations applicable as per Electricity Act, 2003 and CEA guidelines etc. Adequate firefighting equipment and extinguishing agents of sufficient capacity and quantity must always be available at site

and kept ready for immediate use. The installation of Fire Extinguishers should confirm to BIS standards.

The fire extinguishers shall be provided in the control room housing inverters as well as on the Roof or site where the PV arrays have been installed. One liquefied CO2 fire extinguisher upright type of capacity 8 kg having IS: 2171 -7, IS: 10658 marked per installation of 100kWp shall be supplied by the Successful bidder and kept near the Inverter accommodation and shall also be responsible for periodic renewal during the maintenance period. The fire extinguisher shall be suitable for fighting fire of oils, solvents, gases, paints, varnishes, electrical wiring, live machinery fires and all flammable liquid & gas.

E-TENDER DOCUMENT

***Request for Selection (RFS) of agency for the
Implementation of 2 MW Solar Power Plant at
Travancore Titanium Products Ltd., Kochuveli,
Thiruvananthapuram under Solar City project funded
by Smart City Thiruvananthapuram Ltd***

Ref. No.: ANERT-TECH/99/2022-T2

VOL – 4: ANNEXURES

Date of Publishing of Bids : - 12/04/2023

Last Date of Submission of Bids : - 26/04/2023

FORMAT 1 - COVERING LETTER

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

I am/We are remitting herewith the required amount of Rs. towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transaction No dtd.....

Yours faithfully,

FORMAT 2 - POWER OF ATTORNEY

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

Power of Attorney to be provided by the Bidding Company in favour of its representative as evidence of authorized signatory's authority.

Know all men by these presents, We (name and address of the registered office of the Bidding Company as applicable) do hereby constitute, appoint and authorize Mr./Ms. (name & residential address) who is presently employed with us and holding the position of as our true and lawful attorney, to do in our name and on our behalf, all such acts, deeds and things necessary in connection with or incidental to submission of our Bid for Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram, Kerala in response to the RFS. No dated issued by ANERT including signing and submission of the Bid and all other documents related to the Bid, including but not limited to undertakings, letters, certificates, acceptances, clarifications, guarantees or any other document which the ANERT may require us to submit. The aforesaid Attorney is further authorized for making representations to the ANERT and providing information / responses to ANERT representing us in all matters before ANERT and generally dealing with ANERT in all matters in connection with this Bid till the completion of the bidding process as per the terms of the above mentioned RFS.

We hereby agree to ratify all acts, deeds and things done by our said attorney pursuant to this Power of Attorney and that all acts, deeds and things done by our aforesaid attorney shall be binding on us and shall always be deemed to have been done by us.

All the terms used herein but not defined shall have the meaning ascribed to such terms under the RFS.

Signed by the within named

..... **(Insert the name of the executant company)**

The person authorized under this Power of Attorney, in the case of the Bidding Company / Lead Member being a public company, or a private company which is a subsidiary of a public company, in terms of the Companies Act, 1956, with a paid up share capital of more than Rupees Five crores, should be the Managing CEO / whole time CEO/manager appointed under section 269 of the Companies Act, 1956. In all other cases the person authorized should be a CEO duly authorized by a board resolution duly passed by the Company. Also, wherever required, the executant(s) should submit for verification the extract of the chartered documents and documents such as a Board resolution / power of attorney, in favour of the person executing this power of attorney for delegation of power hereunder on behalf of the executant(s).

FORMAT 3 – GENERAL PARTICULARS

(This letter to be submitted on the official letter head of the tenderer, signed by the authorised signatory.)

Name of the Agency	
Registered Office	
Nature of Agency (Ltd. Co., Partnership etc.) Attach Copy of partnership Deed/ Certification of Incorporation	
Year of Establishment	
Registration of Number	
Address for Communication	
Telephone number of Contact person(Mobile if any)	
Name of CEOs/ Proprietor/Partners(with address and Telephone No)	
GST Registration Number (Copy to be Attached)	
PAN Number	
TAN Number	
Whether the bidder wishes to form a project company for execution of work	
Whether any Civil Suit / Litigation arisen in the contract executed during the last five years/being executed. If yes, please furnish the name of the Contract, employer nature of work, contract value,	

work order and date and brief details of litigation.	
Details of Total Experience in general since inception(Details of similar systems installed till the date of bid)	
Details of Turnover for last Two years. (Copy Audited Statements has to be submitted for last two financial years)	
Details of offices in Kerala, India and abroad- address and contact details	

Documentary evidence for the bid qualification requirements are submitted along with this document and the details furnished above are true and correct.

FORMAT 5 - PERFORMANCE SECURITY GUARANTEE

(To be on non-judicial Kerala stamp paper of appropriate value as per Stamp Act relevant to place of execution)

BG No. :

Amount :

Date :

Valid up to :

In consideration of the Agency for New & Renewable Energy Research and Technology, therein after called "ANERT") have allotted work to M/s..... (hereinafter called the said Contractor) under the terms and conditions of Supply Order No..... issued by ANERT and the agreement dated made between (name of contractor) and ANERT for covering (hereinafter called the said agreement) of Security Deposit for the due fulfilment by the said contractor of the terms and conditions.

Contained in the said agreement, on production of the Bank Guarantee for Rs..... (Rupees..... only) we,Bank having our Head Office at (herein after referred to as "the Bank") at the request of M/s.(name of contractor) do hereby undertake to pay to the ANERT an amount not exceeding Rs..... (Rupees only), against any loss or damage caused to or suffered or would be caused to or suffered by the ANERT by reason of any breach by the said contractor of any of the terms and conditions contained in the said agreement

We,Bank, do hereby undertake to pay the amount due and payable under this Guarantee without any demur, merely on a demand from the ANERT stating that the amount claimed is due by way of loss or damage caused to or would be caused to or suffered by the ANERT by reasons of breach by the said contractor of any of the terms or conditions contained in the said agreement. Any such demand made on the Bank shall be conclusive as regards the amount due and payable by the Bank under this guarantee. However, our liability under this guarantee shall be restricted to an amount not exceeding Rs. (Rupees only).

Page 96 of 109

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travanfore
Titanium Products Ltd., Kochuveli, Thiruvananthapuram 530 under Solar City project funded by Smart City
Thiruvananthapuram Ltd

This guarantee will not be discharged due to change in the constitution of the bank or the contractor/supplier.

Notwithstanding anything contained hereinbefore:

- 1) Our liability under this Bank Guarantee shall not exceed Rs.....(Rupees only)
- 2) This Bank Guarantee shall be valid upto
- 3) We are liable to pay the guaranteed amount or any part thereof under this Bank Guarantee amount only and only if you serve us a written claim or demand on or before.....

Dated at this day of 2023

FORMAT 6 – COMPONENT WISE SPLIT UP OF COSTS

(On Letterhead of the respective entity for which the below details are provided.)

To be provided for all capacity quoted by the bidder

S/N	Component	Percentage (%)
1	SPV Modules	
2	Module Mounting Structure	
3	Grid Tied Inverter as per specification	
4	Balance of System	
5	Cost for 10 Year Warranty and Preventive Maintenance	
6	Installation and Commissioning Charges	
7	Insurance (From Material dispatch till 10 years warranty period)	
8	Any miscellaneous expenses required for the successful commissioning of the plant	
9	Remote Monitoring and associated costs	
Total		100%

ANNEXURE A – PRE-AGREEMENT

(To be on non-judicial Kerala stamp paper of value Rs. 200)

ARTICLES OF AGREEMENT executed on this the day of
Two thousand andbetween the **Agency for New & Renewable Energy Research and Technology** (hereinafter referred to as **ANERT**) of the one part and Sri
(Name and Address of the tenderer) hereinafter referred to as “the Bounden”) of the other part.

WHEREAS in response to the Notification No.
dated the bounden has submitted to ANERT a e-tender for the ***Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd*** specified therein subject to the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT a sum of Rs. as Earnest Money Deposit for execution of an agreement undertaking the due fulfilment of the contract in case his e-tender is accepted by ANERT. NOW THESE PRESENTS WITNESS and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract for is awarded to the bounden, the bounden shall within Fifteen days of acceptance of this e-tender, execute an agreement with ANERT incorporating all the terms and conditions under which ANERT accepts this e-tender.

In case the bounden fails to execute the agreement as aforesaid incorporating the terms and conditions governing the contract, ANERT shall have power and authority to recover

Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

Page 99 of 109

from the bounden any loss or damage caused to ANERT by such breach as may be determined by ANERT by appropriating the moneys inclusive of Earnest Money deposited by the bounden and if the Earnest Money is found to be inadequate the deficit amount may be recovered from the bounden and his properties movable and immovable in the manner hereinafter contained.

All sums found due to ANERT under or by virtue of this agreement shall be recoverable from the bounden and his properties movable and immovable under the provisions of the Revenue Recovery Act for the time being in force as though such sums are arrears of land revenue and in such other manner as ANERT may deem fit.

In witness whereof Sri (Name and Designation) for and on behalf of the Agency for New & Renewable Energy Research and Technology and Sri the bounden have hereunto set their hands the day and year shown against their respective signature.

ANNEXURE B – BIDDERS TECHNICAL INFORMATION

TECHNICAL PARTICULAR DATA

Solar PV Module

Sl. No	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Manufacture name to be specified	
2	PV Module type	Poly/Mono Crystalline, Mono PERC	
3	No. of PV cells per Module		
4	Total number of PV modules		
5	Max. Power, P_{mp} @STC	330 Wp or above	
6	Max. Power tolerance (%)	Not more than 3%	
7	Max. Power voltage (V_{mp}) @STC	To be specified	
8	Max. Power current (I_{mp}) @STC	To be specified	
9	Open circuit voltage, V_{oc} @ STC	To be specified	
10	Short circuit current, I_{sc} @STC	To be specified	
11	Nominal voltage	To be specified	
12	Nominal Wattage	To be specified	
13	Fill Factor	Not less than 0.7	
14	Temp. coefficient of V_{oc} (%/C)		
15	Temp. coefficient of P_{mp} (%/C)		
16	Temperature Co-efficient of I_{sc} (%/°C)		
17	Normal Operating Cell Temperature (NOCT) (°C)		
18	Operating Temperature (°C)		
19	Module efficiency	$\geq 17\%$	
20	No. of By-pass Diodes		
21	Mounting arrangement for Solar Module	Fixed Arrangement	

Sl. No	Particulars	Required	Offered
22	Solar Module frame material	Anodized Aluminium	
23	Module dimensions' cm (L x W x H)	To be specified	
24	PV panel Weight (kg)	To be specified	
25	Output Cables	Polarized, UV protected & Weather Proof DC rated multi-contact connector	
26	Output Terminal	PV Connectors	
27	Junction Box	Weather resistant HDPE (IP65)	
28	Copies of test certificates	IS 14286/IEC 61215,61730 part 1&2, IEC 61701	

INVERTER

Sl. No.	Particulars	Required	Offered
1	Manufacturer		
2	Model name/No.		
3	Number of units		
4	Nominal AC power		
5	Nominal AC voltage		
6	Nominal AC Current		
7	AC grid Frequency range	50Hz $\pm$ 0.5%	
8	AC grid voltage range		
9	Power Factor (+ and -)		

Sl. No.	Particulars	Required	Offered
10	Total Harmonic Distortion	As per IEEE-519 2014	
11	AC over / under voltage over / under frequency protection		
12	Max PV input power		
13	Maximum DC voltage	Less than 1000 V	
14	MPPT voltage range		
15	Maximum DC current		
16	No. of DC input ports		
17	Maximum Efficiency	as per IEC61683	
18	DC voltage ripple		
19	Ambient temperature range		
20	Humidity (non-condensing)	95%, non-condensing	
21	Protective functions - AC over/under voltage, AC over/under frequency, over temperature, AC and DC overcurrent, DC over-voltage, against Islanding		
22	Communication Interface	RS485, MPI Profi-Bus/Telephone Modem/WiFi	
22	User-display standard	LCD panel with membrane keypad	
23	Enclosure environment rating		
24	Safety and EMC		
25	Anti-islanding feature	IEEE1547/UL1741/IEC62116	

ANNEXURE C – DECLARATION BY THE BIDDER

e-Tender Notification No:, dtd for Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No.: (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule
3. Our Bid shall be valid for a period of 6 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 5 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. Our firm has obtained the certifications from MNRE or NABL approved Test laboratories that the goods and services are satisfying the technical criteria specified in the bid.

ANNEXURE C – DECLARATION BY THE BIDDER

e-Tender Notification No: **ANERT-TECH/99/2022-T2** for **Request for Selection (RFS)** of agency for the **Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd**

To
The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No.: 1 (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule and this is as per the visit to the sites. We also undertake that we will complete any additional works required for the successful commissioning of the power plants.
3. Our Bid shall be valid for a period of 3 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 3 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. We have visited all the sites for which we have quoted and all additional works required for the successful commissioning of the Solar Power Plant will be done by us. In case, we fail to do so, ANERT may initiate the required proceedings against us.

COVERING LETTER

To,
The CEO
ANERT

Sub: Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd.

Ref. No: ANERT-TECH/99/2022-T2 And Tender ID: 2023_ANERT_571678_1

Sir,

We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

We are remitting herewith the required amount of **Rs. NIL** towards the cost of e-tender and Earnest Money Deposit by electronic payment vide transaction No **NIL**.

			● Output overvoltage protection ● Surge protection ● AC short circuit protection ● Insulation resistance protection ● Islanding protection ● AC output overcurrent protection ● Ground fault monitoring ● Temperature protection
13.	Max PV input power		1500KW
14.	Maximum DC voltage	Less than 1000 V	1000V
15.	MPPT voltage range		200-800
16.	Maximum DC current		40A PER MPPT
17.	No. of DC input ports		4*4
18.	Maximum Efficiency	As per IEC61683	98.9%
19.	DC voltage ripple		< 0.5%
20.	Ambient temperature range		-25°C- + 60°C
21.	Humidity (non - condensing)	95%, non-condensing	0-100%
22.	Degree of protection		IP65
23.	Dimensions approx. (HxWxD)		838*568*323(W*H*D)
24.	Weight		73kgs
25.	Protective functions AC over/under voltage, AC over / under frequency, over temperature, AC and DC overcurrent, DC over- voltage, against Islanding		● DC Reverse- Polarity protection ● Output overvoltage protection ● Surge protection ● AC short circuit protection ● Insulation resistance protection ● Islanding protection ● AC output overcurrent protection ● Ground fault monitoring ● Temperature protection
26.	Communication Interface	RS485. MPI Profi Bus / Telephone Modem/WiFi	RS485/RS232
27.	User-display standard	LCD panel with membrane keypad	LCD
28.	Enclosure environment rating		IEC 60068-2-1:2007, IEC 60068-2-2:2007, IEC 60068-2-14:2009, IEC 60068-2-30:2005.

WORK ORDER

Sir,

Sub: ANERT - Design, Supply, Installation and Commissioning of Grid connected SPV Power Plants in University of Kerala, Karyavattam Campus, Thiruvananthapuram under Solar City Project (funded by Smart City Thiruvananthapuram Ltd) - reg

Ref: 1. Tender ID: 2023_ANERT_568710_1 published on Kerala Tenders portal
2. Your Bid No. 1533204 dtd 05/04/2023

Attention is invited to the references cited. Your offer for the Design, Supply, Installation and Commissioning of Grid connected SPV Power Plants in University of Kerala, Karyavattam Campus, Thiruvananthapuram under Solar City Project (funded by Smart City Thiruvananthapuram Ltd) is accepted. You are requested to carry out the work at the sites as detailed below subject to the following terms and conditions.

SN	Name of building	Capacity (kW)	Amount
1	Design, Supply, Installation, Testing and Commissioning of Grid connected Solar Power plant in various buildings within University of Kerala, Karyavattam Campus	750	4,78,08,992/-
Total		750	4,78,08,992/-
Rupees Four Crores Seventy-Eight Lakh Eight Thousand Nine Hundred and Ninety-Two only			

A tripartite agreement has to be executed by you in the prescribed form (enclosed as Annexure - I) on Kerala Stamp paper as per the Kerala Government order - G.O.(P) No.113/2019/TD dtd 24/07/2019 (One rupee for every Rs 1000 or part thereof on the contract amount, subject to a minimum of rupees 200 and a maximum of rupees one lakh) within 7 days of the receipt of this work order for the fulfilment of

Law College Road, Vikas Bhavan P.O., Thiruvananthapuram, Kerala - 695 033 Phone: +91 471 - 2338077, 2334122, 2333124, 2331803 Fax: + 91 471 - 2329853
Web: www.anert.gov.in E-mail: info@anert.in e-Market place: www.buymysun.com

the contract along with a security deposit of **Rs. 14,34,270/- (Rupees Fourteen Lakh Thirty-Four Thousand Two Hundred & Seventy only)** being the 3% of contract value of **Rs. 4,78,08,992/-** on Demand Draft/Bank Guarantee/NEFT transfer in favour of CEO, ANERT. You have to pay all expenses incidental to the execution of the above agreement. Another agreement must be provided before the start of the O&M period upon issue of separate work order and the formats shall be provided during the commissioning of the SPV Power Plant.

1. SCHEDULE OF SUPPLY, INSTALLATION & COMMISSIONING:

- i. The items should be delivered and installed at the Roof top of the buildings listed below as specified by ANERT, under prior intimation and supervision of ANERT. The work awarded agency is free to omit any of the buildings listed below if they are able to accommodate the capacity in other buildings. Further, they are free to select any other additional building within the campus with permission of the UoK authorities and prior approval from ANERT for installation of the above capacity.

SN	Name of building	Capacity (kW)
1	School of Distance Education	100
2	Department of Aquatic Biology & Fisheries	90
3	Department of chemistry	90
4	Institute of management Kerala (IMK)	80
5	CLIF (Central Laboratory for instrumentation and facilitation)	60
6	Department of Optoelectronics	60

TOTAL		750

- ii. If the successful bidder fails to deliver the materials within the days mentioned below, the order stands cancelled and ANERT will award the work to the next

bidder and penalty as decided by ANERT will be levied.

SN	Material Delivery (Days)	Completion Period (Days)
1	30	60

- iii. The detailed Engineering drawings as mentioned in the tender also be submitted prior to start of works. The rates mentioned above is inclusive of all additional works required for the successful commissioning of the power plant and no request for enhancement of rates will be entertained.
- iv. Supply of the SPV module must be from the ALMM list issued by MNRE from time to time. It is required to use Mono PERC Half cut cells – 500 Wp or above for the works. The Solar PCU and charge controller should meet the General and Technical specifications as mentioned in the tender.
- v. The agency shall submit the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of your agency.
- vi. The detailed Bill of Materials along with datasheets & Test certificates of PV Modules (Mono PERC), Grid Tie Inverter etc must be provided well in advance and must be approved by ANERT before material despatch. ANERT reserves the right to reject the materials if the same are not in compliance with the requirements of the tender. In case, the successful bidder delivers the materials without BoM approval, they may have to take back the materials at their own cost and no time extension without penalty will be provided for completion of works.
- vii. The Supply, Installation and Commissioning of the Power Plant must be completed within the timeline mentioned above. This is the time period for handing over the system to ANERT with Grid connectivity.
- viii. In case of no valid reason, extension of time of completion that can be granted at a time shall will be 25% of the original time. The maximum extension that can be granted for a work shall be limited to half the original time of completion.
- ix. When the contract period has to be extended wholly or partly due to default on the part of the bidder, the Agreement Authority may sanction extension of time after imposing fine as mentioned below;

Period	Rate of Fine
First Extension	1% of the PAC subject to a minimum of Rs. 1000/- and maximum of Rs. 50,000/-.
Second Extension	2% of the PAC subject to a minimum of Rs. 2000/- and maximum of Rs. 1,00,000/-

- x. Penalty for delay in supply and installation will be imposed at 0.5 % per week up

to a maximum 10%. In case of delay in supply and installation, CEO, ANERT may cancel the contract and take recourse to other action as deemed appropriate.

2. INSTALLATION

- i. The installation work of the solar power plant must be in compliance with the Technical Requirements and Standards as mentioned in the Tender.
- ii. A display board, made of metal plate (size 60cm x 40cm) should be displayed with contents to be provided by the concerned official at ANERT is to be placed at each of the sites.
- iii. The vendor is to bear the fee for KSEBL feasibility, Registration and all other expenses along with additional costs for site specific cabling works, earthing, mounting structure modifications, Electrical panel modification, access ladders, pathway facility in case required are also under the scope of the vendor. The scope of enhancing load, phase conversion wherever necessary is also under the scope.
- iv. In case the installations require the replacement of CTs (Class 0.2s), PT (Class 0.2) of rating for commissioning of the power plant, it is under the scope of the vendor. The rates for Supply of tested transformers & Replacement at the site of these items are under the vendor scope.
- v. Any other work required for the successful commissioning of the power plant which are not mentioned in this document and are required as per prevailing laws & regulations in the country

3. PAYMENT

A. The terms of payment shall be:

A1. EPC Payment

- i. Upon delivery of major components (PV Modules, Inverter, MMS etc) at the site/warehouse, a maximum of 60 % of the contract value can be released through Running Accounts Bills of min 10% of the contract value. The supplier shall submit the part invoice for the materials (including serial numbers and delivery chalan) for the materials duly certified by the concerned District Office along with a report regarding the supply of materials. Each RAB shall be accompanied with an item wise statement of work completion with qty, rate & the actual expenditure incurred audited by a Chartered Accountant.
- ii. On completion of the installation of power plant and filing application for testing with the electrical utility (incl Energisation order for plant capacity above 30kW), 20% of the contract value shall be released as second part payment. The supplier shall submit the invoice for the materials supplied and all documents

1/17588/2023

- related including the Project Completion Report to the completion of the work certified by the district office shall be submitted for the release of the amount. The PCR submitted will be used for conducting the pre-commissioning tests.
- iii. On commissioning of the grid connected system, 10% of the remaining contract value will be released after proving the Performance ratio (AC). All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.
 - iv. The balance 10% shall be retained as performance security and will be released in parts - 2% after 1 year of operation, 2% after 3 years of operation, 2% after 5 years of operation, 2% after 7 years of operation and the balance upon completion of warranty. For each of these payment release, Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of payment. This period will be considered only from the date of commissioning.
 - v. The security deposit of 3% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

A2. O&M Payment

- i. A separate work order for the O&M if required will be issued by ANERT. The O&M charges shall be released on annual basis after completion of the O&M period of the previous year. The start of O&M period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of O&M payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.

B. Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

4. REMOTE MONITORING SYSTEM

A dedicated Remote Monitoring System (Hardware and software) for monitoring the plant shall be provided even if the inverter has embedded data logging system. The following weather parameters are to be measured as part of the datalogging system.

a) Solar Irradiance: A Pyranometer/ Solar cell-based irradiation sensor (along with calibration certificate) shall be provided, with the sensor mounted in the plane of the array. Readout shall be integrated with data logging system.

b) Temperature: Integrated temp, sensors for measuring the module surface temp., inverter inside enclosure temp, and ambient temp to be provided complete with readouts integrated with the data logging system.

It is recommended that the following important parameters shall be accessible through the Data Logging Facility.

- a. AC Voltage
- b. AC Output current
- c. Output Power
- d. Energy in kWh
- e. DC Input Voltage
- f. DC Input Current
- g. Temperatures (C)
- h. Inverter Status
- i. Irradiation
- j. Module temperature

Provision for Internet monitoring and download of historical data shall be incorporated. GSM Modem/Wi Fi modem in case GSM connectivity is used or Wireless Router + modem in case Ethernet connection is being used for remote access must be provided. The data is to be transmitted to ANERT server as well as to the Integrated Command and Control Centre (ICCC) developed by Smart City Thiruvananthapuram Ltd. The successful bidder has to undertake all the works required for such deployment including software and arrange for APIs etc.

5. WARRANTY

- i. 10 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided.
- ii. PV modules used in solar power plants/ systems must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- iii. The Warranty Card to be supplied must contain all the details of the system supplied. The OEM warranty card of all the equipment must also be submitted along with the warranty certificate issued in your letter head.

6. SERVICE AND MAINTENANCE

- i. The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation.
- ii. Any Delay in servicing beyond 7 days of fault reporting would attract penalty at

the rate of at the rate fixed by CEO, ANERT and further actions will be initiated against the agency.

- iii. A designated contact Telephone Number and address should be submitted for reporting faults during the warranty period.
- iv. A detailed O&M order will be issued separately upon completion of the EPC works

7. PERIODIC MAINTENANCE

- i. For the optimal operation of a PV plant, maintenance must be carried out on a quarterly basis. All the components should be kept clean. It should be ensured that all the components are fastened well at their due place.
- ii. The service personnel should visit the installations at least once a quarter for preventive maintenance even if no faults are reported. Reports of these preventive maintenance visits and generation data should be submitted to the concerned ANERT District Office on a quarterly basis.

8. PERFORMANCE RATIO TEST (PR TEST)

The Plant should run minimum two weeks without any major equipment failure to start the PR test. The EPC Contractor shall submit two copies of O&M manual with soft copy before the start of PR Test. Depending on the requirement, capacity and suitable Pyranometer shall be installed at locations suggested by ANERT or else METEONORM data shall be considered for calculating PR.

- i. The PR test shall be conducted at site by the Contractor in presence of the ANERT officials as per IEC 61724. The PR test procedure shall be submitted by the Contractor for review and approval. Any special equipment, instrumentation tools and tackles required for the successful completion of the performance test shall be arranged by the Contractor at his own cost.
- ii. The procedure for PR demonstration test shall be as follows:
The Following factors shall be excluded for calculation;
 - Generation loss due to grid outage.
 - Irradiance below 250 W/m²
 - The measured global solar radiation of the period of the outage of the power evacuation system shall be excluded to calculate average global solar radiation for the period of PR test.

PR is to be calculated as per the below formula:

$$PR = (\text{Measured output in kW}) / (\text{Installed Plant capacity in kW} * (1000 / \text{Measured radiation intensity in W/m}^2))$$

The EPC Contractor shall demonstrate minimum PR of 75% (measured at output

of the inverter/solar meter level) in the initial PR test within 7 consecutive days. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period, he will be given a second chance to demonstrate the PR within another 7 consecutive days. Still if it is not achieved, the same shall be demonstrated within another 7 consecutive days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio. After obtaining Energisation Approval from Electrical Inspectorate and demonstration of minimum specified PR, the solar plant shall be commissioned which shall be the date of completion of the project.

9. ENGINEERING DRAWINGS

The bidder should submit and get the necessary approval of the following detailed Engineering Drawings before execution of the project:

- i. Schematic drawing showing the PV panels, Power conditioning Unit(s)/Inverter, Array Junction Boxes (AJBs)/String Combiner Boxes (SJB), AC and DC Distribution Box, Net meters, MSB etc.
- ii. Layout of solar PV Array
- iii. Single Line Diagram (SLD) with specification of all components.
- iv. Design document for Module Mounting Structure (MMS) including certificate showing wind speed withstanding capacity of the structure (STAAD/Equivalent).
- v. Module Mounting Structure (MMS) drawing along with foundation details for the structure.
- vi. Sizes and specification of cables for PV Module interconnections, PV Array to Array Junction Boxes, Array Junction Boxes to Inverter, Inverter to ACDB/ Grid Connection point etc. shall be furnished.

The PV plant design should contain the following details which should be approved by the concerned officer before installation.

- i. Design of strings including the number of PV modules in series and number of strings
- ii. AC Protection (Circuit Breaker, Switches, Fuses, SPD)
- iii. DC Protection (Switches, Fuses, SPD)
- iv. AJB / SCB details
- v. DC Cable size and length from point to point
- vi. AC Cable size and length from point to point

I/17588/2023

- vii. Earthing system details and number of pits
- viii. Lightning protection details/specification
- ix. PV Syst / Any other software-based Simulation Report

10. CLEANING

The bidder shall provide permanent arrangement for module washing in the SPV Plant. Water lines may be drawn to feed water from the available resources. Contractor has to provide additional facility including pipeline, motor for pumping to the additional overhead tank, if required.

11. INSURANCE

The power plant must be insured at every stage of operation – from Material dispatch, storage, completion of installation and till 10 years after commissioning. The insurance coverage on handing over of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**. The insurance premium for the 10 years of warranty is to be paid by your agency. On handing over of the system, the original insurance policy is to be handed over to the authorised person at ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the District Office of ANERT.

Not Withstanding the terms and conditions stipulated above, it is to be noted that the conditions in the tender document shall prevail;

Yours faithfully

NARENDRA NATH VELURI I F S
CEO ANERT

: Order No. : REIL/PROC/19119110/ 3876
: Date : 10.09.2019

Dear Sir,

Sub:- Design, Engineering, Supply, Construction, Erection, Testing, Transportation, Unloading, Installation, Commissioning and 25 year O&M of Solar PV based Power Plant with capacities ranging from 250 KW to 2 MW or more (total 3.5 MW) at various locations/sub stations of MSEDCL in the state of Maharashtra.

With reference to your online offer against our tender no. REIL/RE/2019-20/GC/MWP/19079 dated 22.07.2019 & your revised offer dated 06.09.2019, please arrange to execute the following as per terms and conditions given below:-

S/No	Description	Qty in Watt	Unit Rate in Rs	Total Value in Rs
01	Supply Part: Supply of Solar PV Modules, Balance of Systems (BOS) including Grid. Tie Inverter, MMS, Transformers, AJB, Cables, Connectors, LT, HT Panels etc. required for successful commissioning	35,00,000.00 (3.5 MW)	33.00 Per Watt	11,55,00,000.00
2	I&C Part: Erection, Installation & Commissioning of Solar Power Grid connected Systems Project	35,00,000.00 (3.5 MW)	2.35Per Watt	82,25,000.00
3	AMC Part: Operation & maintenance of Solar Power Grid Connected Systems Project for 25 Years	35,00,000.00 (3.5 MW)	13.65 Per Watt	4,77,75,000.00
Total Value				17,15,00,000.00

Terms & Conditions:- As per Annexure - 1

For & On behalf of
RAJASTHAN ELECTRONICS & INSTRUMENTS LTD.,

Annexure : 1

M/s Power One Micro Systems Pvt. Ltd, Bangalore

TERMS & CONDITIONS:-

- 1) Terms of Delivery : FOR Site (As instructed by REIL)
- 2) GST : GST extra as applicable.
- 3) Project Completion Period : 90 days from the issue of LOI & allocation of sites.
- 4) Payment terms :

a) During Supply Installation, Testing and Commissioning: (For Part A& Part B of contract price table)

S. No.	% of Payment	Criteria
1.	60% of (Part A+ Part B) as per price bid	1. Within 30 days of supply of the SPV modules, PCU/Inverters, BoS and associated project material required for construction, erection, testing and commissioning at site supported with pre-dispatch inspection report, quantity as per BoQ and receipt of the SI's invoice at REIL office with receipt, acknowledgement, signed and stamped by EESL-authorized representative/EIC at designated site. 2. Release of REIL payment.
2.	30 % of (Part A+ Part B) as per price bid	1. Within 30 days of successful installation, synchronization and commissioning of systems along with requisite documentation, training programs and Issuance of Completion certificate to the SI by respective DISCOM. 2. Release of REIL payment.
3.	10 % of (Part A+ Part B) as per price bid	1. After one year of reliable and trouble free operation and demonstration of the energy generation by the project as per RfP from the date of commissioning of the project(s). 2. Release of REIL payment.

b) Payment during O&M Period

Years	% of O&M value released during the period
2-5	10%
6-10	20%
11-15	40%
16-20	10%
21-25	20%

- 5) **Contract Performance Bank Guarantee (CPG) :** Contractor shall submit PBG of 5% amount of total work order valid for 25 years after placement of LOI with in 15 days from the LOI. Within fifteen (15) days of the receipt of notification of award from REIL, the Contractor shall furnish the CPG in the form of Demand Draft/ Pay Order or Bank Guarantee for 5% of the total contract value. The Bank Guarantee must be valid to cover Delivery Period + Warrantee Period + Three Months Claim Period. However, out of which 2.5% CPG would be released after 10 years based on satisfactorily performance of the Contractor. Any delay in submission of SD/CPG shall be deemed as accruing of financial benefit to the supplier and REIL may take necessary interest penalty recovery action (interest @ SBI's MCLR + 2 %) from the payments due to the supplier for the period of delay. However, this provision does not bind REIL in any way from proceeding against the supplier (including forfeiture of EMD, cancellation of the empanelment/LOA, etc.) for non-compliance towards non-submission of the SD/CPG. In case Contractor provides CPG for shorter duration, it shall be for a minimum period of 3.5 years and REIL reserves right to invoke CPG in case extended CPG/fresh CPG is not furnished at least 90 days prior to expiry of original CPG.

ANNEXURE A – Pre - Agreement

ARTICLES OF AGREEMENT executed on this the 03rd Day of MAY Two thousand and Twenty Three between the **Agency for New & Renewable Energy Research and Technology** (hereinafter referred to as ANERT) of the one part and **Sri and M/s Power One Micro Systems Pvt Ltd**, GF-3 & F-12, KSSIDC Building, 5th cross, 1st stage, Peenya Industrial Estate, Bangalore-560058 hereinafter referred to as "the Bounden") of the other part.

WHEREAS in response to the Notification No **ANERT-TECH/99/2022-T2** the bounden has submitted to ANERT a e-tender for the **Request for Selection (RFS)** of agency for the **Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram** under **Solar City project funded by Smart City Thiruvananthapuram Ltd** specified therein subject to the terms and conditions contained in the said e-tender.

AND WHEREAS the bounden has furnished to ANERT Earnest Money Deposit **Nil** for execution of an agreement undertaking the due fulfilment of the contract in case his e-tender is accepted by ANERT. NOW THESE PRESENTS WITNESS and it is hereby mutually agreed as follows: -

In case the e-tender submitted by the bounden is accepted by ANERT and the contract for **Request for Selection (RFS)** of agency for the **Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram** under **Solar City project funded by Smart City Thiruvananthapuram Ltd** is awarded to the bounden, the bounden shall within 15 days of acceptance of this e- tender, execute an agreement with ANERT incorporating all the terms and conditions under which ANERT accepts this e-tender.

no: 323

Kakkanad Cochin - 682030

Dear Sir,

Sub: Grading of your organization under vendor grading in renewable energy sector for ANERT

Please refer to your email dated January 13, 2022, for assigning vendor grading of your organization.

ICRA Analytics (ICRA-A), after due consideration, has assigned **1C** to **INKEL Limited**. The grading indicates that based on performance parameters the entity has got Grade 1 [Strong Performance Strength] and based on financial parameters the entity has got Grade C [Average Financial Strength] of the Manufacturers / System Integrators / EPC contractor in the Renewable Energy sector space. Our grading symbols are annexed.

We thank you for your kind cooperation extended during the grading exercise. Please let us know if you need any clarification. We look forward to further strengthening our existing relationship and assure you of our best services.¹

With kind regards,

Yours sincerely,

for ICRA Analytics Limited

Authorised signatory

e-Copy to ANERT (Manager-in-charge)

¹ICRA-A reserves the right to suspend/withdraw/revise the grading assigned on the basis of new information or in the event of failure on the part of the entity to furnish such information, material or clarifications as may be required by ICRA-A. ICRA-A shall also be entitled to publicize/disseminate such suspension/withdrawal/revision in the assigned grading in any manner considered appropriate by it, without reference to you.

**ICRA
ANALYTICS**
A Group ICRA Company

ICRA ANALYTICS LIMITED
(Formerly known as ICRA Online Limited)

The grading scale is as follows:

Performance capability	Financial Strength					
		Strong	Above average	Average	Below average	Weak
	Strong	1A	1B	1C	1D	1E
	Above average	2A	2B	2C	2D	2E
	Average	3A	3B	3C	3D	3E
	Below average	4A	4B	4C	4D	4E
	Weak	5A	5B	5C	5D	5E

DISCLAIMER: An ICRA Analytics' Manufacturers / System Integrators (SI) / EPC contractor grade reflects ICRA Analytics' opinion on the ability of the company to undertake renewable energy projects. ICRA Analytics or its affiliates or group companies and its respective officers, directors, personnel and employees, shall not be liable for or accept any liability for any loss, damage of any nature, including but not limited to direct, indirect, punitive, special, exemplary, consequential, and also any loss of profit in any way arising from the use of this document or its contents in any manner. This grading does not constitute an audit by ICRA Analytics of the SI / Manufacturer / EPC contractor. The gradings are solely based on the information provided by the company or obtained by ICRA Analytics from sources it considers reliable. ICRA Analytics does not guarantee the completeness or accuracy of the information on which the grading is based and therefore shall not be responsible for any liability incurred by the users of such grading. An ICRA Analytics' Manufacturers / System Integrators / EPC contractor grading is not a recommendation to use the services of the company, or to invest in any project undertaken by the company, or to lend to the company or invest in any financial instrument issued by the company. ICRA Analytics has the right to revise gradings as and when circumstances so warrant. At the same time ICRA Analytics is not under any obligation to review or revise the gradings assigned at any later period of time. The grading(s) provided are based on the data and circumstances that it believes to be in existence at the time of conducting the assignment. ICRA Analytics is not responsible for any errors and especially states that it has no financial liability whatsoever to the subscribers / users / transmitters / distributors of its gradings.

Work Order No.	06/ 2019-20
Date	23.11.2019
Order type	Appointment of EPC contractor for design as per site conditions, erection, testing & commissioning of Grid Tied Ground Mounted Solar PV Power plants at Brahmapuram, Kanjikode and Agali owned by KSEBL with total installed capacity of 8 MWp (4MWp-Brahmapuram, 3MWp-Kanjikode and 1MWp-Agali) including Operation & Maintenance of the plants for the first 5 years from the date of handing over
Reference file	CE(REES)/Clubbed projects BAK / 19-20 / 1449
e -Tender No	This office Tender No. KSEBL/REES/CLUBBED PROJECTS BAK/17/2018-19 dated 17.01.2019 with Tender ID: 2019_KSEB_261756_2
Value	INR 44,99,99,999/-only
Price	Fixed

Sir,

Sub:- Appointment of EPC contractor for design as per site conditions, erection, testing & Commissioning of Grid Tied Ground Mounted Solar PV Power plants at Brahmapuram Kanjikode and Agali owned by KSEBL with an installed capacity of 8 MWp (4MWp -Brahmapuram, 3MWp-Kanjikode and 1MWp-Agali) including Operation & Maintenance of the plants for the first 5 years from the date of handing over - Award of contract - reg

Ref:- 1) Office order (CMD) No 654/2018 (CE(REES)/ Clubbed Projects Agali,

- Kanjikode, Brahmapuram / 2018-19/ TVM dated: 25.10.2018,
- 2) This office E-Tender No. KSEBL/REES/Clubbed Projects BAK/17/2018-19 dated: 17.01.2019.
 - 3) Your offer for e -Tender No. KSEBL/REES/Clubbed Projects BAK/17/2018- 19 dated: 17.01.2019 vide Tender ID: 2019_KSEB_261756_2
 - 4) Letter No. INKEL/SOLAR/KSEB-8MW/19-20/011 dated: 17.08.2019 from M/s. Inkel Ltd.
 - 5) Letter No. INKEL/SOLAR/KSEB-8 MW/19-20/002 dated: 23.08.2019 from M/s. Inkel Ltd.
 - 6) This office letter No.CE/(REES)/Clubbed Projects BAK/2019-20/1298 dated 05-11-2019
 - 7) Letter No. INKEL/SOLAR/KSEB-8MW/19-20/003 dated 7-11-2019 from M/s INKEL

The subject work is awarded to you at a contract value of INR 44,99,99,999/- (Rupees Forty four crore ninety nine lakhs ninety nine thousand nine hundred and ninety nine only) inclusive of all taxes and duties. You shall carryout and complete the work as per the time schedule as contained in clause 2.2.4 and 5.3.2 of tender document Volume-1. Two copies of the order are included herewith. The duplicate of this order shall be returned to this office within seven days after affixing your seal and signature on all pages as a token of acceptance.

This contract will be governed by the terms and conditions as contained in tender document Volume-I, II and III and all corrigendum issued in this respect by the tendering authority. This Letter of Award (LoA) & tender documents will form part of the contract agreement. Additional conditions, modifications, if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand nullified.

1. Glance of the Project:

Appointment of EPC contractor for design as per site conditions, erection, testing & commissioning of Grid Tied Ground Mounted Solar PV Power plants at Brahmapuram, Kanjikode and Agali owned by KSEBL with total installed capacity of 8 MWp (4MWp-Brahmapuram, 3MWp-Kanjikode and 1MWp-Agali) including Operation & Maintenance of the plants for the first 5 years from the date of handing over where Performance Ratio of location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume 1 and corrigendum issued in this respect, herein after called "the project".

2. Scope of work:

The scope of work will be governed by clause 2.2.3 of tender document Volume-1 and corrigendum issued in this respect.

Sites	Brahamapuram- 4MWp, Kanjikode- 3MWp, Agali- 1MWp
Total Capacity	8.0MWp
Number of locations	3
Operation and Maintenance	Five years from date of handing over as per Clause 6.9
Performance Ratio(AC)	75-80%

3. Contract amount:

The Total Contract Amount is **INR 44,99,99,999/-** (Rupees forty four crore ninety nine lakh ninety nine thousand nine hundred and ninety nine only) inclusive of all taxes and duties for design, planning, investigation, survey, engineering, manufacture/procurement, manufacturer's quality assurance, shop testing (including type testing where specified/required), transportation, handling, storage, erection including all associated civil/structural works, electrical and general works, piping, cabling, instrumentation, installation, testing and commissioning, training, services, permits and insurance at all stages and all related works for connectivity, statutory inspection and training, cabling, power evacuation including cost of transformers and HT metering including design and implementation of plant, string level monitoring scheme with compatible software and hardware for providing real time SCADA visibility to load despatch centre, Kalamassery and proposed renewable data centre at Vidyuthi Bhavanam TVM and works related with single phase to three phase conversion required in necessary locations of the project sites and handing over the SPV Plants to KSEBL to its full satisfaction after proving the performance ratio (AC) at the time of handing over of the project. The performance ratio (AC) of each location shall range from 75- 80%. Performance ratio (AC) shall be proved deriving samples within a period of 7 consecutive days at the end of each year for release of O&M charges as per the table given 2.2.3 of tender document volume 1 and corrigendum issued in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

4. Taxes & Duties:

The Contract Amount as indicated in Clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the Clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed. The GST on freight & insurance

4

shall be borne by you and GST on basic rate quoted by you shall be paid by KSEBL.

5. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and and to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document.

All the Personnel employed and engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel and equipment, shall be taken up by the contractor, directly with the Insurance Company.

6. Work Completion Period and Date of Commissioning (CoD):

The work shall be completed within 12 months (maximum) from the date of handing over of site. The period of commencement of work as stipulated vide clause 2.2.4 will be reckoned from 10 days from the date of agreement or the date of handing over the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is earlier and time of Completion will be worked out accordingly. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion thus worked out, unless the time of completion is postponed and period of completion is extended by a written letter from the agreement Authority

The date of commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests ,clearing of snags and with satisfactory measurements by the KSEBL. The Engineer-in-Charge shall issue a certificate including date of commissioning and an authorization certificate/ commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 of tender document Volume-1 and corrigendum issued in this respect.

7. Extension of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended due to any reason, including litigation or force majeure conditions and is governed by Clause 5.3.6 of tender document Volume-1.

8. Liquidated Damage:

Liquidated Damage will be governed by the clause 5.3.9 of tender document Volume 1.

9. Execution of Agreement:

The successful bidder shall execute an agreement for the work as well O&M of individual solar PV plant KSEBL in Kerala Government Stamp paper worth **Rs.1,00,000 /-** (Rupees one lakh only) after furnishing a Bank Guarantee of **Rs.4,50,00,000 /-** (Indian Rupees four crore fifty lakh only) i.e. 10% of the Contract value rounded off to the higher multiple of Rs 1000/-, within 15 days from the date of

Issue of Letter of Award of contract, with the KSEBL . After execution of the agreement the successful bidder shall be known as 'EPC Integrator.

10. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones. The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL.

Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

11. Terms of Payment:

The payment condition is governed by Clause 5.2 of tender document Volume-1

- a. The Contractor has to produce four separate Bank Guarantees towards performance security of the project and O&M performance guarantee of Individual plants, for an amount apportioned suitably, totalling to 10% of the Contract amount at the time of executing Contract Agreement.
- b. No amount shall be released as mobilisation advance
- c. Upon delivery , acceptance and production of Insurance certificates of major components of the plant (PV modules, Inverters, transformers and module mounting structures) required for a particular site, 30% of the total value of materials delivered to the site, shall be released. However the total amount so released for all the sites together shall be limited to 30% of the contract value excluding O&M. Necessary invoices and documentary evidences shall be produced in this regard for release of amount. The no. of modules required for a particular site shall be assessed on the basis of capacity requirement of that site.

The Engineer-In -charge is to be informed about the delivery of material at least one week in advance by the contractor. The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submission of the SAT procedure of the delivered material from the vendor by the contractor. The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.

- d. Balance 70% of the total value of contract (except Operation and Maintenance charges) will be released after satisfactory completion, testing, commissioning of the solar plant at all sites after proving the Performance ratio (AC) as per clause 2.2.3 and handing over the entire project . However part payment could be released on satisfactory completion, testing, commissioning of the solar plant at a particular site, after proving the Performance ratio (AC) and handing over that site as per clause 2.2.3.

The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3)

6

after completing the project within 12 months. The invoices shall be verified and final payment will be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions.

- e. The Operation & Maintenance charges of a particular site shall be released at the end of each year after commissioning and demonstration of the specified Performance ratio (AC) as per clause 2.2.3 at the end of each year during the O&M period (5 years). The performance guarantee amount towards O&M of a particular site shall be released at the end of every year of O&M period of a site after demonstrating the specified Performance ratio (AC) (as per Clause 2.2.3) at the end of every year during the O & M period.
- f. The Quoted taxes and duties etc. as Governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc. as Governed by GST from concerned Tax authorities occurs in future, he shall indemnify KSEBL from such liabilities and shall be liable for the additions, loss or cost on account of such discrepancies /dispute".

12. Advance Payment:

No amount shall be released as mobilisation advance

13. Performance security deposit:

The performance security deposit is governed by Clause 5.1.7 of Tender document Volume 1

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the KSEBL, an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security for the Contract.

The Contractor shall submit four separate Performance security deposits in the form of Bank Guarantees at the time of execution of agreement in the prescribed format (Annexure 5) towards performance security of the project and O&M performance guarantee of individual plants, which shall be an amount, apportioned suitably totalling to 10% of the total Contract amount. The Bank Guarantee submitted by the contractor shall be rounded off to the higher multiple of Rs 1000/ i.e., INR.4,50,00,000 /-(Indian Rupees four crore fifty lakhs only).

The Bank Guarantee towards the performance security of the project shall be initially valid from the date of agreement for a period of 1 year and will be released after the satisfactory handing over of the project. Three separate BGs furnished towards O&M performance guarantee of the respective sites shall initially be valid for two years and be kept renewed from time to time till the end of defect liability period. The performance Guarantee of each plant will be released at the end of every year of O&M, after demonstration of desired performance ratio (AC) as per clause 2.2.3 during the O&M period. The performance ratio (AC measurements) (as per Clause 2.2.3) will be calculated based on data from pyranometer / Meteoronorm data. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD. However while considering renewal of BG towards performance security of O&M for the succeeding

Par, proportionate reduction in the BG amount corresponding to the elapsed O&M period shall be made.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio (AC)(as per Clause 2.2.3 of tender document volume 1) can be checked at any time in between if deemed necessary by the Engineer in charge (as per clause 2.2.3 of tender document Volume 1 and Addendums issued in this respect). If any unusual degradation is noticed in the PR, the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

14. Payment Authority and Engineer-in-Charge:

Engineer-in-Charge – Engineer authorized by the Chief Engineer (Renewable Energy & Energy Savings). The Engineer-in-Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision.

The work shall be treated completed only when the Engineer-in-charge issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure, the Engineer-in-charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc. and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL.

The contractor shall submit bills in Triplicate to the **Engineer-in-Charge** with all supporting documents as indicated in the relevant Clauses of Volume 1 of the bid document.

15. Manufacturing Schedule:

The Bidder is to choose high efficiency 350Wp or higher mono crystalline PERC silicon modules manufactured in **India of reputed make** from the list of PV modules to be approved from this office.. The bidder shall specify all basic design details, including details of the PV modules and the support structures, grid tie inverter transformer, cables (AC&DC) Plant protection scheme, Integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the IS 2062/IS 4759. All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipment and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipment required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specification provided in

the volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc. shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be issued by the Agreement Authority on submission of all the drawings within 15 days of issuance of LoA. Modifications if any, suggested by the agreement authority shall be incorporated in the design brief/revised drawings and shall be resubmitted within seven working days of intimation.

16. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

1. String Sizing & Array design
2. String Layout
3. Array Layout
4. DC Protection
5. Inverter Sizing
6. AC Protection.
7. DC Cable size calculation
8. DC cable specification
9. DC cable schedule, voltage drop and power loss calculation.
10. String monitoring unit specification.
11. DC earthing & pit calculation
12. HT transformer & Isolation Transformer Switch Gear
13. Lightning protection details/specification.
14. All technical specification of AC components
15. Cable schedules.
16. PV syst Simulation Report with proposed modules and Grid Tie Inverter.

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s)/ Inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram with specification of all components..
- e. Design document for Mounting structure
- f. Mounting structure drawing
- g. Structural drawing along with foundation details for the structure.
- h. Civil drawings of control room building.
- i. Cable Layout (indicating details of cable route for power & communication cables).
- j. Utility drawings (showing water piping, fire lines etc.)
- k. Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- l. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be furnished

● The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall furnish drawings, design, data, documents/information in soft/hard copies for the respective works including all calculations and approvals shall be taken from the Engineer-in -Charge before commencement of the project. The contractor shall furnish following documents/information.

- a. General description of equipment offered specifying the important features, make, technical parameters, material of construction, etc. to enable the owner to have proper understanding of the equipment offered and its operation
- b. Technical literature, catalogue and publications.
- c. Layout of complete power plant installation showing location of all major sub-systems
- d. Single line diagram
- e. Typical general arrangement and foundation details.
- f. Technical particulars as listed in this specification.
- g. Earthing layout design and calculations
- h. Lightning protection design
- i. CSS drawing
- j. Module installation guidelines from module manufacturer,
- k. Detailed calculation of Auxilliary consumption
- l. Type tests certificates of all major equipment like transformers, switchgears, Grid tie Inverter, solar modules etc.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

17. Quality Assurance:

The Contractor shall establish a Quality Assurance system for the Work to demonstrate the compliance of such part with the requirement of the contract and specifications. The Quality Assurance system shall be subject to the approval of the Engineer-In-Charge. The system shall be in accordance with the specifications stated in the Contract or with BIS specifications unless otherwise specified anywhere in this Contract. The Engineer-in-Charge shall be entitled to inspect the system and the reports shall be periodically sent to him by the Contractor. Compliance with the Quality Assurance system shall not relieve the Contractor from any of his obligations or responsibilities under the Contract.

The cost of all Quality Assurance operation shall be included in the quoted amount under the price schedule and no extra claim will be entertained. The details of sampling, testing, procedures etc. for different works are given in the Technical Specifications of the Contract. If these details are not stated in the technical document, BIS specification shall be followed. The Contractor shall provide samples and test without any extra cost and co-operate in the testing of materials if so desired by the Engineer-In-Charge.

18. Review and Progress report:

This report shall be submitted (e mailed) to the agreement Authority as well as Engineer In charge on a monthly basis within Ten Calendar days from cut-off date as agreed upon, covering over all scenario of the work as per clause 7.1 of tender document volume I.

19. Technical parameters for getting grid connectivity:

As per technical specification of tender document

20. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-In-Charge.

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant to KSEBL.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume 1.

21. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 of tender document Volume 1. Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor. Operation and Maintenance during this period shall include supply of spares of panels, inverters and all equipment in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive insurance covering fire, earthquake. The solar plant should be maintained in shadow free environment. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of KSEB officials.

Copies of the insurance policies are to be given to KSEBL as and when taken. The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians trained under "Suryamitra" Skill Development Programme of MNRE. The contractor shall also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training shall be given to personnel identified by KSEBL, for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with generation and down time analysis data has to be sent to KSEBL corporate office as well as Engineer in Charge by E-mail during the defect liability period.

The contractor shall not misuse the land and assign responsibility for the safety of machinery within the premises.

22. Annual Maintenance Contract (AMC):

The Annual Maintenance Contract shall begin after the Operation and Maintenance period. If desired the EPC Contractor may be asked to execute the AMC for 5 years on agreement between KSEBL and the contractor at mutually agreed price.

23. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the grid solar power plant must ensure longevity. PV modules used in grid power plant shall be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years. Manufactures warranty certificate shall be produced in this regard.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume 1

24. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per Clause 2.2.3 of Tender document Volume 1 . The performance ratio test as per IEC 61724 has to be carried out at site by the EPC contractor in presence of authorized officials from KSEBL, deriving samples within a period of 7 consecutive days sufficient to provide operational data representative of insolation and ambient conditions as desired by the agreement authority to prove the Performance ratio achieved in the range of 75-80% as per obligations under the EPC contract. This is mandatory for handing over the plant to the KSEBL. It is also agreed that if the specified performance ratio is not achieved, the same shall be demonstrated within a period of another 7 consecutive days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant or improve the quality of the plant by replacement of module or any other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio(AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

25. Handing over:

Date of Handing Over is the date on which the first performance ratio will be proved to the satisfaction of KSEBL along with the successful clearing of snag list of all the projects.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with Clause 5.3.11 of the Tender document volume 1.

27. Force Majeure:

Force Majeure shall be governed by Clause 5.3.8 of the Tender document volume 1.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause 5.3.4 of the Tender document volume-1

29. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

30. Contract Documents.

The Contract documents among other things consist of this agreement on stamp paper.

Bid document consisting of

Volume I - Conditions of Bid and Contract

Volume II - Pre Qualification Bid

Volume III - Technical Specifications

Schedule of Technical particulars and prices

Corrections and amendments to the specifications and conditions of contract included in the above volume

Annexure, if any, to the above volume containing the change in specifications and conditions of contract arrived at after mutual negotiations before awarding the work.

Drawings as listed in the conditions of contract

Schedule of prices as finally accepted.

Approved Construction Programme

31. Assignment & Subletting

As per the Article VIII of Tender documents Volume 1, the contractor shall not assign or make over the contract or the benefit or the burdens thereof, or any part thereof, to any other person or persons or body corporate. The contractor shall not

underlet or sublet to any person or persons or body corporate, the execution of the contract or any part thereof without the consent, in writing, of the KSEBL.

32. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of **KSEBL's General conditions of contract** which is applicable to this contract also and Ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/ conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Sl. Nos 10 and 15 of the LOA shall be submitted within 15 days from the date of issue of this LoA

Value	INR 2,23,31,999/- (Rupees Two Crore Twenty Three Lakh Thirty One Thousand Nine Hundred and Ninety Nine only)
Price	Fixed

Sir,

Sub Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on buildings owned by LSGD(District Panchayath Kasargod II Phase) with a total installed capacity of 335 kWp in 5 locations, including Operation & Maintenance of the plant for the first 5 years from the date of handing over - Award of contract reg.

- Ref**
- 1 B.O.(FTD)No.S26/2017-CF(REES)/General/2016-17TVM dated 02.03.17
 - 2 B.O.(CMD)No 842/2017-CE(REES)/General/2016-17TVM dated 30.03.17
 - 3 B.O.(FTD)No.2053/2017-KSEBI/CF(REES)/2017-18 TVM dated 09.08.17
 - 4 E tender No.KSEBI/REES/LSGD District Panchayath Kasargod II/01/2018- 19 having Tender ID : 2018_KSEB_202397_1
 - 5 Letter No INKEL/Solar/CEREES/002/2018-19/18.07.2018 from M/s INKEL Limited
 - 6 Remarks of FA on the price bid as per No.Tender-1/38/2018 dtd 26.07.2018

The subject work is awarded to you at a contract value of INR 2,23,31,999/- (Rupees Two Crore Twenty Three Lakh Thirty One Thousand Nine Hundred and Ninety Nine only) inclusive of all taxes and duties. You shall carryout and complete the work as per the time schedule as contained in clause 2.2.4 and 5.3.2 of tender document Volume 1. Two copies of this order are enclosed herewith.

639

The duplicate of this order shall be returned to this office within seven days after affixing your seal and signature on all pages as a token of acceptance.

This contract will be governed by the terms and conditions as contained in tender document volume-I, II and III issued in this respect by the tendering authority. This Letter of Award (LOA), tender documents will form part of the contract agreement. Additional conditions, modifications if any, stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn or nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 of tender document Volume-1 in this respect.

Sl. No	Location of the project	Capacity of the proposed plant(kWp)
1	GHSS Chandragiri	20
2	District Allopathy Hospital, Kanhangad	100
3	District Ayurvedic Hospital, Padanakkad	15
4	GHSS Mogral, Puthur	100
5	GHSS Kumbala	100

Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on buildings owned by LSGD(District Panchayath Kasargod II phase) with a total installed capacity of 335 kWp in 5 locations, including Operation & Maintenance of the plant for the first 5 years from the date of handing over where performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 in this respect, herein after called "the project".

2. Contract amount:

The Total Contract Amount is INR 2,23,31,999/ (Rupees Two Crore Twenty Three Lakh thirty One Thousand Nine Hundred and Ninety Nine only) for design, engineering, manufacturing, procurement, supply(including spares), handling storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, Cess, freight and insurance charges, logistics, etc and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Rooftop Solar PV Power plants on the Roof of buildings owned by LSGD(District Panchayath Kasargod) with a total installed capacity of 335 kWp in 5 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over where performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 issued in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

3. Taxes & Duties:

The Contract Amount as indicated in clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. KSEBL will provide C form for transfer of the tax benefit to KSEBL. No future claims on unquoted taxes and duties will be allowed.

4. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document.

All the Personnel employed/engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel/equipments, shall be taken up by the contractor, directly with the Insurance company. KSEBL/LSGD will not have any liability in this respect whatsoever.

5. Work Completion Period and Date of Commissioning(CoD):

The Contractor shall complete the works in all respect within 6 months from the official date of commencement of work which shall be the date of Agreement or the date of handing over the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the time of completion thus worked out, unless the time of completion is postponed and period of completion is extended by a written letter from the Tripartite agreement Authority.

The date of completion/commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL are found satisfactory. The Engineer-in-Charge shall issue a certificate including date of commissioning and an authorization certificate/commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 of tender document volume-1 in this respect

6. Extension Of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions and is governed by clause 5.3.6 of tender document Volume-1.

7 Liquidated Damage:

Liquidated Damage will be governed by the clause 5.3.9 of of tender document Volume 1.

8. Execution of Agreement:

The Contractor shall execute a tripartite agreement in Kerala Government Stamp paper worth INR 22,340/- (Indian Rupee Twenty Two Thousand Three Hundred and Forty only) after furnishing a Bank Guarantee of INR 22,34,000/- (Indian Rupees Twenty Two lakh Thirty Four Thousand only) i.e. 10% of the Contract value rounded off to the higher multiple of Rs 1000/-, within 15 days from the date of issue of Letter of Award of contract, with the KSEBL and LSGD (District Panchayath Kasargod) as First and Second party respectively, as per the terms and conditions set forth in the Bld document. After execution of the tripartite agreement the successful bidder shall be known as 'EPC Integrator. The tripartite agreement has to be executed by the contractor in the prescribed format in Form-B of Contract Tripartite agreement of this document, along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed. The contractor shall provide for signing of the contract, 2 additional copies of contract agreement, 2 copies of Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney and other requisite documents. All the documents cited in clause No. 30 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

After handing over of the project to LSGD (District Panchayath Kasargod), you shall execute Separate O&M Bilateral Agreements with LSGD (District Panchayath Kasargod) as the first party.

9. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS [Projects] and GANTT chart indicating the critical events/paths and milestones.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL.

Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

10. Terms of Payment:

The payment condition is governed by clause 5.2 of tender document volume 1 in this respect.

a. The Contractor has to produce Bank Guarantee for an amount of 10% of the Contract amount as Performance Security Deposit at the time of executing Contract Agreement.

b. 30% of the contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV modules, Inverters and module mounting structures) after delivery of this materials at site, inspection and verification by authorized departmental officers, and production of insurance certificates for the materials delivered at site. (Refer clause 5.5.2 of tender document Volume-1). The Engineer-in-charge is to be informed about the delivery of material one week in advance by the contractor.

The Engineer in charge shall ensure the site acceptance/ rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor.

The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions

c. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing, commissioning of the solar plant after proving the Performance ratio (AC) as per clause 2.2.3 of Tender document Volume-1 in this respect. The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3 of tender document Volume-1) after completing the project within 06 months.

The invoices shall be verified and final payment may be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions

d. The Operation & Maintenance charges will be released at the end of each year by LSGD (District Panchayath Kasargod), after commissioning and demonstration of the specified Performance ratio (AC) as per clause 2.2.3 of tender document Volume-1 in this respect, at the end of each year during O&M period (5 years).

e. The performance security amount shall also be released in equal instalments each year (O&M period) from the date of handing over the project after demonstrating the specified Performance ratio (AC) (as per Clause 2.2.3 of Tender document Volume-1 in this respect).

f. The Quoted taxes and duties etc as Governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as Governed by GST from concerned tax authorities occurs in future, the Contractor shall Indemnify LSGD (District Panchayath Kasargod) from such liabilities and the Contractor shall be liable for the additions, loss or cost on account of such discrepancies/ dispute".

11. Advance Payment:

No amount shall be released as mobilisation advance.

12. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 of Tender document volume 1

The Contractor shall submit Performance security deposit as Bank Guarantee at the time of execution of bipartite agreement in the prescribed format (Annexure 5) for performance security of the Contract and it shall be an amount equal to 10% of the total Contract amount rounded off to the higher multiple of Rs 1000/- i.e. INR 22,34,000/- (Indian Rupees Twenty Two lakh Thirty Four Thousand only) in order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the LSGD (District Panchayath Kasargod), an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security for the Contract.

The Bank Guarantee shall be initially valid from the date of agreement for a period of 2 years and be kept renewed from time to time till the end of defect liability period including O&M. The performance security B.G will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 in this respect) during the defect liability period. The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 in this respect) will be calculated based on data from Pyranometer/ Meteoronorm/ Pyrheliometer data. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 in this respect) can be checked at any time in between if deemed necessary by the Engineer in charge (as per clause 2.2.3 of tender document Volume-1 in this respect) If any unusual degradation is noticed in the PR the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

13. Payment Authority and Engineer-in-Charge:

Engineer in Charge – Engineer authorized by Chief Engineer (Renewable Energy & Energy Savings). The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision.

The work shall be treated completed only when the Engineer-in-charge issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure the Engineer in charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL

The contractor shall submit bills in Triplicate to the **Engineer in Charge** with all supporting documents as indicated in the relevant clauses of volume 1 of the bid document

14. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, inverters, cables, online monitoring, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards. All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specification provided in the volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer- in- Charge prior to the submission of all the drawings.

Energy meter provided for the installation of the solar PV plant shall be in accordance with the regulations and technical specifications of KSEBL.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, stamp duties, license fees, and other such levies imposed outside the purchaser's country.

The contractor shall provide all MAFs (Manufacturer's Authorization Forms) for all the components specified in the bid within 15 days and before executing the Contract Agreement

15. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details/specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s)/ inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram.
- e. Mounting structure drawing

- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to inverter etc. shall be furnished
- i. PV Syst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

16 Quality Assurance:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test (as per STC) certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The power conditioning units / inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanization of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted on the required number of samples as is required by the engineer-in-charge, during the Factory inspection:

For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electro luminous tests
8. Robustness of termination

For inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

For Isolation transformer:

1. Visual inspection
2. Routine test as per IS-7026/ IEC 60601-1/IEC 61558-1

For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fitments

The contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests, the Material Despatch Clearance Certificate will be issued.

The test and Inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commission at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also. Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer in Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any materials or work found to be defective or which

does not meet the requirements of the specification will be rejected and shall be replaced at contractor's cost.

17. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

The Engineer-In-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

18. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 as per CEA technical standard for connectivity of the distributed generation resources

Individual voltage harmonics distortion	< 3 %
Total voltage Distortion THD	< 5%
Total Current harmonic Distortion	< 8%
Output frequency	= 50Hz +/- 0.5Hz
- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
- e. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid

19. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge/authorized person of LSGD (District Panchayath Kasargod).

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant and handed over to KSEBL

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume 1.

20. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 of tender document volume-1. Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor.

Operation and Maintenance during this period shall include supply of spares of panels, Inverters and all equipments in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive insurance covering fire, earthquake.

The solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of LSGD (District Panchayath Kasargod). Copies of the Insurance Policies are to be given to LSGD (District Panchayath Kasargod) as and when taken.

The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians trained under "Suryamitra" Skill Development Programme of MNRE. The contractor shall also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training should be given to personnel identified by the LSGD (District Panchayath Kasargod) for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with generation and down time analysis data has to be sent to LSGD (District Panchayath Kasargod) Corporate offices by E-mail during the defect liability period. Any discrepancy/malfunctioning noted shall be immediately attended to and got rectified by the contractor.

The contractor should not misuse the land and assign responsibility for the safety of machinery within the premises.

21. Annual Maintenance Contract (AMC):

The plant shall then be handed over to the LSGD (District Panchayath Kasargod) at the end of 5 years for O&M. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price.

The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

22. Performance & Warranty:

The mechanical structures, electrical works and overall workmanship of the solar power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume-1 in this respect.

23. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1 in this respect. Performance ratio test as per IEC 61724 will be carried out at site jointly by the EPC contractor in presence of authorized officials from KSEBL and LSGD (District Panchayath Kasargod). This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive five years of defect liability period he will be

given a second chance to demonstrate the PR in another 7 days. Still If It is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant/ improve the quality of the plant by replacement of module/ other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio(AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

24. Handing over:

After the date of successful commissioning the Contractor shall hand over the complete system to the LSGD (District Panchayath Kasargod) as specified in the tender within 15 days. Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the LSGD (District Panchayath Kasargod) authorities. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years from the date of handing over.

The contractor shall provide the name list of essential tools and spares required for the future operation and maintenance of the plant.

25. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.11 of the tender document volume 1.

26. Force Majeure:

Force Majeure shall be governed by Clause 5.3.8 of the tender document volume 1.

27. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.3.4 of the tender document volume 1.

28. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

29. Contract Documents.

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. All volumes of bid with Tender No.KSEBL/REES/LSGD District Panchayath Kasargod II/01/2018- 19 having Tender ID . 2018_KSEB_202397_1 along with clarifications and related documents issued by the Tendering Authority.
14. Response (proposal) of M/s. INKET Limited, Ajiyal Complex, Post office Road, Kakkanad, Cochin 682030 including the Bid, Clarification documents and the accepted rate submitted.

30 Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Cl 10 and 15 shall be submitted within 15 days from the date of issue of this LoA

- 8 Letter No.Inkel/solar/CEREES-Kottiyam/7/001/2018-19 dated 18.02.2019
- 9 Remarks of FA on the price bid as per Note No. FA/Tender 1/28/2019 dt 28.02.2019

Kerala State Electricity Board Limited is pleased to accept your financial and technical offer and place this Letter of Award (LoA) to your offer for Appointment of EPC contractor for the design as per site conditions, supply, installation, testing & commissioning of Grid Tied Ground Mounted Solar PV Power plant at Kottiyam in the land owned by KSEBL with an installed capacity of 0.60MWp Including Operation & Maintenance of the plant for the first 5 years from the date of commissioning under IPDS for Kerala launched by Ministry of Power, Government of India.

The contract shall be strictly in accordance with provisions contained in the bid documents cited under reference (4) above and its addendums. This LoA, tender documents and its addendums will form part of the contract agreement.

Additional conditions/modifications if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 of tender document Volume-1 issued in this respect.

The work includes planning, investigation, survey, design, engineering, manufacture/procurement, manufacturer's quality assurance, shop testing (including type testing where specified/required), transportation, handling & storage, erection including all civil/structural works, electrical and general works, piping, cabling, instrumentation, installation, testing and commissioning, training, services, permits and insurance at all stages on composite supply basis to install the Grid-tied Ground Mounted solar photovoltaic plant at Kottiyam in the land owned by KSEBL with an installed capacity of 0.60 MWp and handing over the SPV Plant to KSEBL to its full satisfaction after proving the performance ratio (AC) within a period of 7 consecutive days after commissioning and at the end of each year upto 5 years after commissioning. Performance ratio (AC) shall be proved within a period of 7 consecutive days at the end of each year for release of O&M charges. The performance ratio (AC) of the solar plant shall range from 75- 80% for first 5 years from the date of commissioning. Operation and maintenance charges shall be released at the end of each year.

The contractor shall be responsible for obtaining consents, clearances, including Electrical Inspectorate sanction, permit and approval from appropriate authorities and KSEBL for grid connection.

The generated output power from the solar panels at low voltage shall be stepped upto 11kV and shall be grid tied to the grid infrastructure nearest to the location as directed by Engineer in Charge of the Project.

Any material or works which have not been specifically mentioned in the specifications/schedule but which are found necessary and essential for the proper fulfilment of the contract during execution will also form part of the work. This shall also deem to be covered by the rates and prices quoted for the work and no additional payment will be made to the contractor for such unspecified but essential work elements.

As the project is under IPDS, the installations shall be satisfactory with the appropriate authorities/Project monitoring agency of IPDS in line with the tender conditions. Sign boards in accordance with the specification for the IPDS projects have to be provided in the project location indicating the name of the project, name of implementation agency and capacity. The sign board should be put up immediately when the plant is commissioned.

All statutory approvals/permissions related to installation of the solar power plant and carrying out its operation & maintenance (O&M) as may be required under applicable law/ rules shall be obtained by the contractor. All fees for such statutory approvals for installation, commissioning and operation and maintenance for first five years from the date of commissioning shall be borne by the Contractor.

2. Name of the Project:

Design, Installation, testing and commissioning of Grid Tied Ground Mounted Solar PV Power plant at Kottiyam under IPDS scheme in the land owned by KSEBL with an installed capacity of 0.60 MWp using IPDS fund and operation and maintenance of the plant for the first 5 years from the date of commissioning of the plant herein after called "the project".

3. Name of the Utility:

Kerala State Electricity Board Ltd, having its Registered Office at Vidyuthi Bhavanam, Pattom, Thiruvananthapuram-695004, Kerala, India. Website: www.kseb.in herein after called "KSEBL"

4. Name of the Contractor:

M/s Inkel Limited, 2nd floor, 7/473 ZA- 5 & 6, Ajiyal Complex, Kakkanad, Kerala-682030 herein after called "Contractor".

5. Contract Amount:

The Total Contract Amount is INR32620000/- (Rupees Three Crore Twenty Six lakh Twenty Thousand only) for design, engineering, manufacturing, procurement, supply(including spares), handling storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, Cess, freight and insurance charges, logistics etc and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Ground Mounted Solar PV Power plant for the first 5 years from the date of commissioning where performance ratio of the project shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

6. Taxes & Duties:

The Contract Amount as indicated in clause 5 of this document is inclusive of all Taxes and duties, incidental charges and other levies. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State/Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed. The contractor shall submit a clear tax invoice containing all details prescribed as per GST Act and Rules for effecting Payments.

7. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract i.e. for 5 years. The entire cost on account of this shall be borne by the Contractor. Losses or damage if occurred to such machinery, equipment and work shall be made good at the risk of Contractor. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times.

The machinery, equipment and other valuable material of the Contractor at work site shall be insured by the contractor so that any loss or damage due to force majeure situation can be taken up by the Contractor with the insurance companies for getting their claims. The KSEBL will not give any financial assistance on this account.

All the personnel employed/engaged by the contractor shall have adequate insurance coverage. Any claim due to mishap/accidence or otherwise to personnel/equipment, shall be taken up by the contractor, directly with the insurance company. KSEBL will not have any liability in this respect whatsoever. The Contractor, without limiting KSEBL's obligations and responsibilities shall insure:

- (a) the works, together with materials and plant to the full replacement cost and third party liability at site.
- (b) an additional sum of 15% of such replacement cost to cover additional costs and incidental to the rectification of loss or damage including professional fees and cost of demolishing and removing any part of works and of removing debris of whatsoever nature, and
- (c) the Contractor's equipment and other things brought to site, for a sum sufficient to provide for their replacement at the site.

- (d) The insurance against third party liability at site shall be ensured before commencing the execution of work, against any damage or loss or injury which may occur to the equipment being shifted/ installed or to any property or person (including property and employees of the Employer) by or arising out of the execution of works or temporary works in carrying out of the Contract. The insurance coverage shall be revalidated till the certification of project.

The insurances under item (a) and (b) shall be in the joint names of Contractor and KSEBL and shall cover:

- (i) KSEBL and the Contractor against all losses or damage, from whatsoever cause arising from the start of work at the site until the date of issue of the relevant taking over certificate in respect of the works or any section or part thereof as the case may be, and
- ii) The Contractor for his liability :
 1. During the Defects Liability Period for loss or damage arising from a cause occurring prior to the commencement of Defect Liability Period,
 2. for loss or damage caused by the Contractor in the course of any operations carried out by him under the terms of the Contract, and
 3. for loss or damage caused by the Contractor in the course of any operation carried out by him during execution of works to the neighboring habitats, life and property in an area of 200 metres around the boundary of the site.

If the Contractor fails to effect in force the insurances referred in the above clauses, or any other insurance which he may be required to effect under the terms of the contract, then and in any such case, the KSEBL may effect and keep in force any such insurance and pay such premium or premiums as may be necessary for that purpose and from time to time deduct the amount so paid by the KSEBL as aforesaid from any amounts due or which may become due to the Contractor, or recover the same as a debt due from the Contractor.

a. Work commencement, Period of Completion and Date of Commissioning:

The Contractor shall complete the implementation in all respect within **6 months** from the official date of commencement of work which shall be on or before 10 days from the date of executing Agreement.

The site shall be handed over to the contractor by the Engineer-in-Charge within 10 days from the date of execution of Agreement. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion thus worked out, unless the time of completion is postponed and period of completion is extended by a written letter from the Agreement Authority.

All Commissioning test shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

The date of commissioning shall be the date on which the solar plant is synchronized into KSEBL grid after obtaining clearance from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL found satisfactory. The Engineer in Charge should issue a certificate indicating the date of commissioning and an authorization certificate/commissioning report after the successful synchronization and commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 of tender document volume-1 issued in this respect.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project and if there are no obligations to arise out of the Contract, the Engineer in charge shall furnish a certificate to the Contractor to the effect that all works are completed satisfactorily and no works remains incomplete as per the terms of contract. The issue of this certificate does not relieve the contractor from the obligations during the defect liability period and the execution of Operation and Maintenance for 5 years.

As the projects comes under IPDS, the installations shall be satisfactory with the appropriate authorities/Project monitoring agency of IPDS and necessary rectifications if any proposed against the defects shall be done based on the inspection in line with the tender conditions. The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant after completion of the project.

9. Price Escalation due to Extension Of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions.

10. Liquidated Damage:

Any delay in commissioning a Project will adversely affect the total planning which in turn will affect the State and the public exchequer. Hence, for any damage or loss caused to the KSEBL due to the failure from the part of the Contractor in completing the Work in all respects within the stipulated period of completion, the Contractor shall compensate for the same. The Liquidated Damages (not as penalty) is to be realised at the end of the period of completion. The maximum amount of Liquidated Damages shall be limited to 10% of the accepted Contract Amount. The rate of Liquidated Damages shall be 1% of accepted Contract Amount per week of delay subject to a maximum of 10% accepted contract.

Penalty imposed, if any, shall be deducted from the amount of Liquidated Damages. If the delay prolongs in excess of 200 days from the agreed date of completion as per the original agreement, the Work is liable to be terminated and balance works to be completed will be arranged at the risk and cost of the Contractor as per clause 5.3.9 of volume 1 of the tender document.

As per clause 2.2.3 of volume 1 of the tender document and corrigendum, the contractor shall be liable to pay liquidated damages for lower generation as below:

If the plant outage is due to component failure or lack of maintenance and unless it is rectified within 7 days from the date of intimation to the contractor, the contractor is liable for LD. The monetary compensation for the plant outage days shall be computed as 4 units per KWp/Day multiplied by the approved average annual energy purchase cost of that year and will be deducted from the payments to the contractor till the same is rectified. For the year 2017-18, KSERC has approved the average pooled power purchase cost of KSEBL as Rs. 3.26/unit. Average Pooled Cost of Power Purchase will be revised by KSERC for each year.

11. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 of Tender document volume-1.

The Contractor shall submit a Bank Guarantee for an amount equal to 10% of the total contract amount rounded off to the higher multiple of Rs 1000/- ie, **INR 32, 62,000/-** (Rupees Thirty Two Lakh Sixty Two Thousand only) as the Performance security deposit at the time of execution of agreement and shall be in the prescribed format in Annexure 2 - Contract forms A - of this document. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the KSEBL, the Performance Security deposit for the Contract shall be collected and retained from the Contractor.

The Bank Guarantee shall be initially valid from the signing of contract and for a period of 2 years and be kept renewed from time to time till the end of defect liability period including O&M. The performance security B.G will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 issued in this respect) during the defect liability period. The performance ratio (AC) will be calculated based on data from pyranometer / Meteororm/Pyreheliometer data.

No interest shall be paid by KSEBL at any stage of contract on this Performance Security Deposit.

The performance ratio (AC) (as per Clause 2.2.3) can be checked at any time in between if deemed necessary by the Engineer in charge. If any unusual degradation is noticed in the PR, the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

12. Agreement:

A contract agreement has to be executed by the contractor within 15 days from the date of issue of this LoA, in the prescribed format in Annexure 2-Contract form B of this document, in Kerala State Government Stamp paper worth INR 32,620/- (Indian Rupees Thirty two thousand Six hundred and twenty only), along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed.

The contractor shall provide the original contract agreement and Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney in original and other requisite documents for signing of the contract. All the documents cited in clause no.32 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

Failure of the Contractor to comply with the above requirement shall constitute sufficient grounds for cancellation of award of contract and to re-arrange the Work including re-bidding at the risk and cost of the Contractor. If due to the default of the Bidder/Contractor to furnish requisite Performance Security deposit, execute Contract Agreement or to take possession of the site and execute the Work with proper diligence, the Work will be arranged otherwise by Engineer-in-Charge at the risk and cost of the Contractor and if any loss to KSEBL results due to this, the same will be recovered from the Contractor. Recoveries on this or on any other account will be made from the sum that may be due to the Contractor on this or any other subsisting contracts or under the Revenue Recovery Act or otherwise as the KSEBL may decide.

13. Construction Programme:

Within 15 days from the date of award, the contractor shall submit a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones to KSEBL for approval.

The subject work is under IPDS and time bound completion is required to avoid the loss of additional grant provided to KSEBL under IPDS.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL. Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

14. Terms of Payment:

- a. The contractor shall submit a clear tax invoice containing all details prescribed as per GST ACT and RULES for effecting Payment.
- b. The Contractor has to produce Bank Guarantee for an amount specified in the clause 11 of this LoA as Performance Security Deposit at the time of executing Contract Agreement.
- c. No amount shall be released as mobilisation advance.
- d. 30% of Contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV Modules, Inverters, Module

Mounting Structures) after delivery of major components at site, after inspection and acceptance tests and verification by authorized departmental officers and production of insurance certificates for the materials delivered at site.

- i) The Engineer-in-charge is to be informed about the delivery of material one week in advance by the contractor.
 - ii) The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor.
 - iii) The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.
- e. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing, commissioning of the solar plant after proving the Performance ratio (AC) as per clause 2.2.3 of Volume 1 of the tender document.
- The contractor can submit the final Invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3) after completing the project within 6 months. The invoices shall be verified and final payment may be released within 3 months of receipt of the Invoices subject to the satisfaction of the above conditions.
- f. The Operation & Maintenance charges shall be released at the end of each year after commissioning and demonstration of the specified Performance ratio (AC) as per clause 2.2.3 at the end of each year during O&M period (5 years).
- g. The performance security amount shall also be released in equal instalments each year (O&M period) from the date of commissioning the project after demonstrating the specified Performance ratio (AC) (as per Clause 2.2.3). The proportionate amount for decrease in the production of energy units will be deducted for liquidated damages from the amount to be released and only the remaining will be released after demonstrating the required Performance ratio. i.e. the contractor shall compensate for lower generation as per clause 10 of this LoA.
- h. The Quoted taxes and duties etc as Governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as Governed by GST from concerned Tax authorities occurs in future, he shall indemnify KSEBL from such liabilities and the contractor shall be liable for the additions, loss or cost on account of such discrepancies /dispute".

15. Advance Payment:

No amount shall be released as mobilization advance.

16. Payment Authority and Engineer-in-Charge:

The detail of Engineer-in-Charge is furnished below for the proper monitoring of the project.

Location of the project	Engineer-In-Charge	Total capacity (MWp)	IPDS Ele.Circle
110 kV Substation Kottiyam	Deputy Chief Engineer Transmission Circle, Kottarakkara	0.60	Kollam

The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision. The following flow chart indicates the work flow and payment for distribution and transmission works under IPDS.

The contractor shall submit bills in Triplicate to the Engineer in Charge with all supporting documents as specified in the bid document for preliminary audit. Measurement, check measurement and other certifications of the bills shall be done by the respective Engineers, along with necessary Invoices and other mandatory documents, after preliminary audit, shall be forwarded to the Engineer in Charge of each location. The work order and bill details shall be entered in SARAS software, and the bill shall be audited and passed. The duly certified and audited bills for payment of each location are to be forwarded to the respective IPDS Electrical Circle.

The Deputy Chief Engineer of IPDS Electrical Circle shall approve the bill and transfer the bills to FA and will make payment directly to the contractor through e-payment and intimate the payment details to the concerned circles and CAPs. The Engineer-in-Charge shall inform the status and details of payment effected to the agreement authority.

17. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, Inverters, cables, Integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards, all guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed valid test reports, list of O&M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specification provided in the volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters, module mounting structures etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer- In- Charge in prior to the submission of all the drawings.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, stamp duties, license fees, and other such levies imposed outside the purchaser's country.

The contractor shall provide all MAFs (Manufacturer's Authorization Forms) for all the components specified in the bid within 15 days and before executing the Contract Agreement.

18. Metering

Energy meter provided for the installation of the solar PV plant shall be in accordance with the prevailing regulations and technical specifications of KSEBL.

Solar meter and bi directional Net meter has to be provided by the contractor for the grid connected systems with accuracy class as per the Central Electricity Authority (Installation and Operation of Meters) Regulations, 2006 amended from time to time. Solar meter shall be of accuracy class 0.5s or better and net meter shall be of accuracy class 0.2s.

Meters shall be provided with LCD and ToD facility, having DLMS Compliance and AMR compatibility with optical port and RS 232 port complying with the latest KSERC Regulation suitable for measurement of active kWh, reactive energy kVARh and apparent energy kVAh, kVA MD and kW MD at frequency in the range of 47.5 Hz to 52.5 Hz in balanced as well as unbalanced load conditions.

The meters shall be installed after testing and sealing from the respective TMR divisions.

Solar meter shall be installed at inverter output and a bidirectional meter (net meter) shall be provided at the HT side of the transformer.

19. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details/specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the location
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s)/ inverter, Junction Boxes, AC and DC Distribution Boards, meters, transformers etc.
- d. Layout of solar PV Array and Single line diagram and Cable Trench layout if any.
- e. Mounting structure drawing
- f. Structural drawing along with foundation details for the structure.
- g. Bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be furnished
- i. PVSyst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

20. Quality Assurance and Inspection/Acceptance tests:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanisation of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted during the Factory inspection:

➤ For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electro luminous tests
8. Robustness of termination

➤ For inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxillary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks
7. Protection function checks.

8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
 9. Load tests simulation 25%, 50%, 70% and 100%
 10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
 11. Over temperature, ground fault simulation
- For transformer:
 1. Visual inspection
 2. Routine test as per IS-2026
 - For Module mounting structures:
 1. Visual inspection
 2. Dimensional Inspection
 3. Functional fitment

The contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests, the Material Despatch Clearance Certificate will be issued.

The test and inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commission at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also.

Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any materials or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at contractor's cost.

21. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

Monthly Review Meeting shall be held in the office of the Engineer -in charge, between KSEBL and Contractor to monitor the progress of the works and review the plans for remaining works and to deal with matters that would rise in accordance with the early warning procedure.

The Engineer-In-Charge will co-ordinate and monitor all activities of the project. These progress report formats ~~678~~ **678** be changed as and when required by

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

22. Technical parameters for getting grid connectivity:

Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 as per CEA technical standard for connectivity of the distributed generation resources.

The limits for harmonics on AC side shall as follows:

- a. Total Voltage harmonic Distortion as per IEEE-519 2014
 - b. Individual Voltage harmonics Distortion as per IEEE-519 2014
 - c. Total Current harmonic Distortion as per IEEE-519 2014
 - d. Output frequency = 50Hz +/- 0.5Hz
- a. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
 - b. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
 - c. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
 - d. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
 - e. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
 - f. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid and should shift to island mode.

23. Operation and Maintenance (O&M):

The Contractor shall be responsible for Operation and maintenance of the plant at for the first 5 years from the date of commissioning. The date of commissioning is described under clause no.8 of this LoA. Operation and Maintenance is governed by clause 6.9 of tender document volume-1.

The scope of the contractor shall be, including but not limited to,

- i) Cleaning of module surface on regular basis as and when required.
- ii) Normal and preventive maintenance of the plant
- iii) The contractor is responsible for supply of all spare parts, repairs/ replacement of any defective equipment(s) at his own cost as required from time to time during the O&M period.
- iv) The O&M of the project during this period shall cover the tools and tackles, spare parts, any consumables, and any systems such as modules, inverter,

PCU, remote monitoring etc. required for proper functioning of the SPV system as a whole.

- v) During the comprehensive O&M period, the contractor shall at his cost maintain the spares for minimizing system outage due to time required in getting replacements of defective part(s) of equipment from the manufacturer. The contractor has to use the mandatory spare(s) available at site for replacing defective part(s) of equipment for minimizing system outage temporarily and top up the quantity of spares so that the required quantity of spares shall be made available at site at all the times and same shall be handed over at the end of O&M period.
- vi) The solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of KSEBL official.
- vii) Adequate training should be given to personnel identified by the KSEBL for Daily Monitoring Information like solar energy generated, net meter readings etc.

If the contractor fails to prove the desired Performance ratio (AC) as per clause 2.2.3 of volume 1 during any of the consecutive years the annual O&M period will be extended to that time period till the desired Performance ratio as per clause 2.2.3 is attained

A maintenance record is to be maintained by the operator/Engineer-in-charge to record the regular maintenance work carried out as well as any breakdown maintenance along with the date of maintenance reasons for the breakdowns steps have taken to attend the breakdown duration of the breakdown etc. Contractor shall submit monthly reports to the Engineer in charge, Agreement authority on the energy generation and operating conditions of the solar plant.

24. Annual Maintenance Contract (AMC):

The plant shall then be handed over to KSEBL at the end of 5 years. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price. The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

25. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the solar power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

The PV Power Plant should be designed and simulated with the offered quality components by the bidder (PV Modules, Inverters etc.) so as to obtain the minimum capacity of 0.6 MWp. The electrical degradation of power generated shall not exceed 5% of the minimum rated power over the 5 year period and not more than 10% after ten years.

EPC contractor shall ensure the performance ratio as detailed in the Clause 2.2.3 of Tender document Volume-1 in this respect.

26. Generation Assessment

The performance ratio (AC) shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1. Performance ratio test as per IEC 61724 will be carried out at site by the EPC contractor in presence of officials from KSEBL. This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period he will be given a second chance to demonstrate the PR in another 7 days. Still if it is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall improve the quality of the plant by replacement of components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above.

27. Handing over:

The plant shall be handed over to KSEB Ltd in the best working condition at the end of 5 year after commissioning with the following conditions,

- Required Performance ratio shall be achieved and proved.
- After providing basic training to the employer personnel with the concurrence of the site Engineer in Charge
- Handing over of all items and materials with required tools and minimum spares as listed below.

The contractor shall provide the tools specified below with the required number of spare. The list ensuring sufficient number of spares shall be approved by the agreement authority. KSEBL will carry out operation of the plant after taking over of the plant. If required, spares during life period shall be arranged by the contractor after Guaranty Period at the cost of KSEBL.

List of tools & Spares

Tools

Spanner set
Small cable cutters
nose pliers
Wire strippers
Nut drivers
Screw driver
Knife
Electric tester
Clamp meter-ac- dc clamp-on meter/
AC/DC multimeter(AC&DC 1000V)

Spares

PV modules
Junction Boxes
Fuse and fuse holder
MOV's / arrestors
MCBs
DC connectors
DC cables
DC SPD
Nuts and bolts
Diodes
Different Clamps for MMS

Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the KSEBL. In

order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the Ground mounted SPV plant till the end of the contract period of five years.

The Contractor shall hand over the complete system and shall transfer all Guarantees and warranties of the different components of the project to KSEBL.

28. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.11 of volume 1 of the tender document.

29. Force Majeure:

Force Majeure shall be governed by Clause.5.3.8 of volume 1 of the tender document.

30. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.3.4 of volume 1 of the tender document.

31. Law and Jurisdiction:

Any suit or legal proceedings arising out of this contract shall be governed by the laws of India and Kerala and shall be subject to the exclusive jurisdiction of the Courts at Thiruvananthapuram only.

32. Contract Documents.

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. Approved List of spares that will be supplied
14. All volumes of bid with Tender No. KSEBL/REES/Kottiyam/07/2018-19 dated 22.09.2018 along with clarifications and related documents Issued by the Tendering Authority.
15. Response (proposal) of M/s Inkel Limited, 2nd Floor, 7/473 ZA-5&6, Ajiyal Complex, Kakkanad, Kerala-682030 including the Bid, Clarification documents and the accepted rate submitted.

33. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware

of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Cl. 13 and 17 shall be submitted within 15 days from the date of issue of this LoA.

A copy of the LoA attached is to be returned immediately duly signed and seal affixed on all pages as token of acceptance and for incorporation in the Contract Agreement preferably within 15 days in any case from the date of issue of this Letter of award.

Annexure : 1 Price Schedule

Supply, installation, testing and commissioning of Grid Tied Ground Mounted Solar PV Power plant at Kottiyam under IPDS scheme in the land owned by KSEBL with an installed capacity of 0.6 MWp

Item No	Item Description	Quantity	BASIC RATE without tax in Rs.	GST (Rs.)	TOTAL AMOUNT With Taxes (Rs.)
(A)	Total Price for the 0.60MWp Grid Tied Ground Mounted solar PV power plant at Kottiyam in the land owned by KSEBL for the Design as per site condition, Supply of all materials, transportation, Construction, Erection, civil works, testing and commissioning work of the Solar plant, inspection and testing charges, Additional work/Cabling for Power Evacuation and works related to each of the project site	1	30870000.00	1543500.00	32413500.00
684	Total price for Operation and Maintenance (O & M) charges of the 0.60 MWp Grid Tied Ground Mounted solar PV power plant at Kottiyam in the land owned by KSEBL for a period of 5 years including arrangement of cost of replacement of all the defective parts, consumables, tools, tackles, testing equipments & instruments, manpower, all administrative work, maintenance of records and submissions to all concerned authorities including all taxes as per GST, covered under Guarantee period of 5 years from the date of commissioning.				
	O & M Charges for first year	1	35000.00	6300.00	41300.00
	O & M Charges for second year	1	35000.00	6300.00	41300.00
	O & M Charges for third year	1	35000.00	6300.00	41300.00
	O & M Charges for fourth year	1	35000.00	6300.00	41300.00
	O & M Charges for fifth year	1	35000.00	6300.00	41300.00
(B)	Total O&M charges for 5 years		175000.00	31500.00	206500.00
	Total accepted contract amount = (A)+(B)		31045000.00	1575000.00	32620000.00

Proceedings of the
Electrical Inspector
Kollam
Present: Alex PV

Subject: Installation of 2 Nos of 315 kVA Transformer-HT, 600kWp Solar Panel Installation and 8 Nos of 80kVA Solar Inverter and connected electrics at the premises of The 110kV Substation, Kottiyam, Kollam, 691571 - Sanction for energisation orders issued - regarding.

Reference: 1. Scheme Approval No. B1-24315/19/CEI dated 05.12.2019
2. Completion report submitted by B.Rajeev CA.315, Kalavoor, Alleppey ,Kerala-688522 dated received on 02.01.2020
3. Inspection conducted on 27.12.2019
4. Non conformity report dated 04.01.2020
5. Compliance report submitted by B.Rajeev CA.315, Kalavoor, Alleppey ,Kerala-688522 dated 24.01.2020

Order No: B1-00002/20/EIQ Dated 24-01-2020

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 and 43 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (3) above, installed at the premises of ,110kV Substation Kottiyam,kottiyam,Kollam,691571 subject to following conditions and as detailed in the annexure appended

1. Date of energization shall be intimated.
2. Operation and maintenance of electrical installation shall be done only by authorized persons.
3. All the maintenance works shall be recorded in the maintenance register.
4. Addition/alteration in the existing installation shall be carried out only with prior approval from the electrical inspectorate.
5. Copy of the test certificates of relays shall be submitted in this office prior to energisation of the installation

 - 6 Remarks of FA on the price bid dated 29.01.2019

The subject work is awarded to you at a contract value of INR 50, 80,000/- (Rupees Fifty Lakh and Eighty Thousand only) inclusive of all taxes and duties. You shall carryout and complete the work as per the time schedule as contained in clause 2.2.4 and 5.3.2 of tender document Volume 1. Two copies of this order are included herewith. The duplicate of this order shall be returned to this office within seven days after affixing your seal and signature on all pages as a token of acceptance.

This contract will be governed by the terms and conditions as contained in tender document volume-I, II and III and addendums issued in this respect by the tendering authority. This Letter of Award (LOA), tender documents will form part of the contract agreement. Additional conditions/modifications if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 of tender document Volume-1 and addendum's issued in this respect.

Sl. No	Location of the project	Capacity of the proposed plant (kWp)
1	Grama Panchayath office, Muttill	43
2	District Hospital, Mananthavady	17
3	Grama Panchayath Office, Thavinjal	12

2. Name of the Project:

Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on buildings owned by LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) with a total installed capacity of 72 kWp in 3 locations, including Operation & Maintenance of the plant for the first 5 years from the date of handing over where performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect, herein after called "the project".

3. Contract amount:

The Total Contract Amount is INR 50, 80,000/- (Rupees Fifty Lakh and Eighty Thousand only) inclusive of all taxes and duties for design, engineering, manufacturing, procurement, supply (including spares), handling storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, Cess, freight and insurance charges, logistics, etc and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Rooftop Solar PV Power plants on the Roof of buildings owned by LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) with a total installed capacity of 72 kWp in 3 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over where performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect, as per the financial proposal submitted by you and as

detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

4. Taxes & Duties:

The Contract Amount as indicated in clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed.

5. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be Insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document.

All the Personnel employed/engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel/equipments, shall be taken up by the contractor, directly with the Insurance Company. KSEBL/ LSGD, Wayanad [Grama Panchayath, Mutil, District Hospital Mananthavady & Grama Panchayath, Thavinjal] will not have any liability in this respect whatsoever.

6. Work Completion Period and Date of Commissioning (CoD):

The Contractor shall complete the works in all respect within 6 months from the official date of commencement of work which shall be the date of Agreement or the date of handing over the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion thus worked out, unless the time of completion is postponed and period of completion is extended by a written letter from the Tripartite agreement Authority.

The date of completion/commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL are found satisfactory. The Engineer-in-Charge should issue a certificate including date of commissioning and an authorization certificate/commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 of tender document volume-1 and addendums issued in this respect.

7. Extension of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions and is governed by clause 5.3.6 of tender document Volume-1.

8. Liquidated Damage:

Liquidated Damage will be governed by the clause 5.3.9 of tender document Volume 1.

9. Execution of Agreement:

The Contractor shall execute three tripartite agreements in Kerala Government Stamp paper worth (1). Rs. 2940/- (Rupees Two Thousand Nine Hundred and Forty only) with Grama Panchayath, Muttill after furnishing a Bank Guarantee of Rs 2,94, 000/- (Indian Rupees Two Lakh and Ninety Four Thousand only; (2). Rs. 1310/- (Rupees One Thousand Three Hundred and Ten only) with District Hospital, Mananthavady after furnishing a Bank Guarantee of Rs.131000/- (Indian Rupees Five Lakh and Eight Thousand only) & Rs. 850/- Rupees Eight Hundred and Fifty only) with Grama Panchayath, Thavinjali; after furnishing a Bank Guarantee of Rs. 85, 000/- (Indian Rupees Eighty Five Thousand only) i.e. 10% of the Contract value with each of the three LSGD Wayanad rounded off to the higher multiple of Rs 1000/-, within 15 days from the date of issue of Letter of Award of contract, with the KSEBL and LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjali) as First and Second party respectively, as per the terms and conditions set forth in the Bid document. After execution of the tripartite agreement the successful bidder shall be known as 'EPC Integrator'. The tripartite agreement has to be executed by the contractor in the prescribed format in Form-B of Contract Tripartite agreement of this document, along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed. The contractor shall provide for signing of the contract, 2 additional copies of contract agreement, 2 copies of Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney and other requisite documents. All the documents cited in clause No. 30 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

After handing over of the project LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjali), you shall execute Separate O&M Bilateral Agreements with the LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjali) as the first party.

10. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL. Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

11. Terms of Payment:

The payment condition is governed by clause 5.2 of tender document volume-1 and addendum's issued in this respect.

a. The Contractor has to produce Bank Guarantee for an amount of 10% of the Contract amount as Performance Security Deposit at the time of executing Contract Agreement.

b. 30% of the contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV modules, Inverters and module mounting structures) after delivery of this materials at site, inspection and verification by authorized departmental officers, and production of insurance certificates for the materials delivered at site.(Refer clause 5.5.2 of tender document Volume-1). The Engineer-in -charge is to be informed about the delivery of material one week in advance by the contractor.

The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor.

The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.

c. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing ,commissioning of the solar plant after proving the Performance ratio (AC) as per clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect. The contractor can submit the final Invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3 of tender document Volume-1 and addendum's issued in this respect) after completing the project within 06 months.

The invoices shall be verified and final payment may be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions.

d. The Operation & Maintenance charges will be released at the end of each year by LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal), after commissioning and demonstration of the specified Performance ratio (AC) as per clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect, at the end of each year during O&M period (5 years).

e. The performance security amount shall also be released in equal installments each year (O&M period) from the date of handing over the project after demonstrating the specified Performance ratio (AC)(as per Clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect).

f. The Quoted taxes and duties etc as Governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as Governed by GST from concerned Tax authorities occurs in future, the Contractor shall indemnify LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) from such liabilities and the Contractor shall be liable for the additions, loss or cost on account of such discrepancies / dispute".

12. Advance Payment:

No amount shall be released as mobilisation advance.

13. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 of Tender document volume-1.

The Contractor shall submit Performance security deposit as Bank Guarantee at the time of execution of tripartite agreement in the prescribed format (Annexure 5) for performance security of the Contract and it shall be an amount equal to 10% of the total

Contract amount rounded off to the higher multiple of Rs 1000/- i.e. INR 508000/- (Indian Rupees Five Lakh and Eight Thousand only).

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal), an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security for the Contract.

The Bank Guarantee shall be initially valid from the date of agreement for a period of 2 years and be kept renewed from time to time till the end of defect liability period including O&M. The performance security B.G will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 and addendum's issued in this respect) during the defect liability period. The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 and addendum's issued in this respect) will be calculated based on data from pyranometer / Meteonorm/Pyreheliometer data. Failure of the successful bidder to submit the required Performance EMD Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio(AC)(as per Clause 2.2.3 of tender document vol-1 and addendum's issued in this respect) can be checked at any time in between if deemed necessary by the Engineer in charge (as per clause 2.2.3 of tender document Volume-1 and addendum's issued in this respect). If any unusual degradation is noticed in the PR the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

14. Payment Authority and Engineer-in-Charge:

Engineer in Charge - Engineer authorized by Chief Engineer (Renewable Energy & Energy Savings). The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision.

The work shall be treated completed only when the Engineer-in charge issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure the Engineer- In -charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL.

The contractor shall submit bills in Triplicate to the Engineer In Charge with all supporting documents as indicated in the relevant clauses of volume 1 of the bid document.

15. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the

support structures, inverters, cables, online monitoring, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards, All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specification provided in the volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer- in- Charge prior to the submission of all the drawings.

Energy meter provided for the Installation of the solar PV plant shall be in accordance with the regulations and technical specifications of KSEBL.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, stamp duties, license fees, and other such levies imposed outside the purchaser's country.

The contractor shall provide all MAFs (Manufacturer's Authorization Forms) for all the components specified in the bid within 15 days and before executing the Contract Agreement.

16. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details/specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s)/ inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram.
- e. Mounting structure drawing

- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to inverter etc. shall be furnished
- i. PVSyst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

17. Quality Assurance:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test (as per SIC) certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The power conditioning units / inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanization of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted on the required number of samples as is required by the engineer-in-charge, during the Factory inspection:

For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electro luminous tests
8. Robustness of termination

For Inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

For Isolation transformer:

1. Visual inspection
2. Routine test as per IS-2026/ IEC 60601-1/IEC 61558-1

For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fitments

The contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests, the Material Despatch Clearance Certificate will be issued.

The test and inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commission at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also.

Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any materials or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at contractor's cost.

18. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

The Engineer-in-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

19. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 2014 as per CEA technical standard for connectivity of the distributed generation resources.

Individual voltage harmonics distortion	< 3 %
Total voltage Distortion THD	< 5%
Total Current harmonic Distortion	<8%
Output frequency	= 50Hz +/- 0.5Hz

- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
- e. The Photovoltaic system in the event of voltage or frequency variations must Island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid.

20. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge/authorized person of LSGD (District Panchayath Kottayam, Kollam & Altingal Municipality).

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant and handed over to KSEBL.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume 1.

21. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 of tender document volume-1. Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor.

Operation and Maintenance during this period shall include supply of spares of panels, inverters and all equipments in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive Insurance covering fire, earthquake.

The solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath and Thavinjal). Copies of the Insurance Policies are to be given to LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) as and when taken.

The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians trained under "Suryamitra" Skill Development Programme of MNRE. The contractor shall also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training should be given to personnel identified by the LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with generation and down time analysis data has to be sent to LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) Corporate offices by E-mail during the defect liability period. Any discrepancy/malfunctioning noted shall be immediately attended to and got rectified by the contractor.

The contractor should not misuse the land and assign responsibility for the safety of machinery within the premises.

22. Annual Maintenance Contract (AMC):

The plant shall then be handed over to the LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) at the end of 5 years for O&M. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price.

The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

23. Performance & Warranty:

The mechanical structures, electrical works and overall workmanship of the solar power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect.

24. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect. Performance ratio test as per IEC 61724 will be carried out at site jointly by the EPC contractor in presence of authorized officials from KSEBL and LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal). This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period he will be given a

second chance to demonstrate the PR in another 7 days. Still if it is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant/improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio(AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

25. Handing over:

After the date of successful commissioning the Contractor shall hand over the complete system to the LSGD, Wayanad (Grama Panchayath, Muttill, District Hospital Mananthavady & Grama Panchayath, Thavinjal) as specified in the tender within 15 days. Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the LSGD (District Panchayath Kottayam, Kollam & Attingal Municipality) authorities. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years from the date of handing over.

The contractor shall provide the name list of essential tools and spares required for the future operation and maintenance of the plant.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.11 of the tender document volume 1.

27. Force Majeure:

Force Majeure shall be governed by Clause.5.3.8 of the tender document volume 1.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.3.4 of the tender document volume 1.

29. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

30 Contract Documents.

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. All volumes of bid with **TENDER No. KSEBL/REES/LSGD- WAYANAD/11/2018-19/ dated 04.12.2018 and Tender ID: 2018_KSEB_253261_1** and its Addendums along with clarifications and related documents issued by the Tendering Authority.
14. Response (proposal) of M/s INKEL Limited, Door No. 7/4732A-5 & 6, IInd Floor, Ajiyal Complex, Post Office Road, Kakkanad, Cochin- 682030, including the Bid, Clarification documents and the accepted rate submitted.

31. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Cl 10 and 15 shall be submitted within 25 days from the date of issue of this LoA

PROCEEDINGS OF THE ELECTRICAL DEPUTY INSPECTOR IN-CHARGE, WAYANAD (Present: George Philip)

Sub: Installation of 12.54 kWp solar panel at the premises of M/s Thavinjal Grama Panchayath, Thalapuzha (Po), Wayanad Sanction for Energisation - Order issued

Read:

1. Completion report submitted by M/s First Law (CB 7161) on 30-09-2019
2. Inspection dated 10-10-2019.
3. Defect communicated vide letter No: B-902/19/ EIW dated 11-10-2019.
4. Compliance report submitted by M/s First Law (CB 7161) vide letter No: Nil dated 16-10-2019.

ORDER NO: B1-902/ 19/ EIW dt 18-10-2019

Sanction under Section 54 of The Electricity Act 2003 and Regulation 32 of Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulations 2010 is hereby accorded for energisation of the electrical installation covered under the Completion Report read as 2nd above and installed at the premises of M/s Thavinjal Grama Panchayath, Thalapuzha (Po), Wayanad with the following specifications, subject to the conditions mentioned there under.

SPECIFICATIONS

Solar inverter

Make :	Delta	Model :	RPM-M 15 A
SL No :	04718A00750 WC	DC Input Volt :	200-1000 VDC
MPPT :	355-800 VDC	Output :	230/ 400 VAC
Solar inverter :	15 kVA		

Load : 6.28 kW

Earth electrodes : 2 Nos

Switches :

KSEBI side : 63 A

MSB : 136 A

Solar meter : 32 A

Total switches : 231 A

CONDITIONS

1. The whole installation shall be maintained in conformity with Central Electricity Authority (Technical standards for connectivity of the distributed generation resources) Regulation , 2013 and Kerala State Electricity Regulatory Commission (Grid interactive distributed solar energy system) Regulation , 2014.
2. Power allocation for additional loads, if necessary, should be obtained from the KSEB.

3. Any addition or alteration to the existing installation shall be carried out only after getting prior written sanction from this office.
4. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation.
5. Date of energisation should be intimated to this office.
6. The maintenance of all major equipments should be carried out periodically as prescribed by the manufacturer and as per Indian Standard specifications and a register shall be maintained for recording maintenance activity and periodic checking. The register shall be kept up to date and submitted for perusal during periodical inspection.
7. The whole installation shall be operated and maintained in a condition free of any danger and as prescribed under the Regulation 13(4) of Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulations 2010.
8. All the pre-commissioning tests shall be recorded for ready reference.
9. Only authorized persons shall be in charge of the operation and maintenance of the installation.
10. There should not be any violation of Kerala Electricity Supply Code, 2014, The Electricity Act 2003 and Central Electricity Authority (Measures Relating to Safety and Electric Supply) Regulations 2010 and related Bureau of Indian Standards and National Electric Code.
11. This order is subject to any future modifications to the Electricity Act 2003, Central Electricity Authority (Measures Relating to Safety and Electric Supply) Regulations 2010 and connected Bureau of Indian Standards, National Electric Code etc. or any related order from the Honorable courts of law or appropriate Government.
12. Net meter shall be connected and copy of the test certificate shall be forwarded.
13. No Objection Certificate required from Local Authority/Other Departments/Organisation/ Individuals shall be obtained before energisation.

 4. This office TENDER No. KSEBL/REES/LSGD District Panchayath Thiruvananthapuram Phase 2/01/2019-20 dated 10.05.2019 - Tender ID: 2019_KSEB_277008_1 and its addenda
 5. Lr.No.CC (REES)/LSCOT/AEC 7/RTS/OP TVM Phs II/eTender/01/2019 20/819 Dated: 13.08.19
 6. Lr. No. INKEL/Solar/TVM-PH-II/1/2019-20 dated 13.08.2019 of the Asst Gen Manager-Solar, INKEL Ltd

The subject work is awarded to you at a contract value of INR 74, 00,000/- (Rupees Seventy four lakhs only) inclusive of all taxes and duties. You shall carryout and complete the work

as per the time schedule as contained in clause 2.2.4 and 5.3.2 in Volume-1 of the tender document. Two copies of this order are included herewith. The duplicate of this order shall be returned to this office within seven days, after affixing your seal and signature on all pages as a token of acceptance of the terms and conditions stated in it.

This contract will be governed by the terms and conditions as contained in tender documents Volume-I, II and III and addendums issued in this respect by the tendering authority. This Letter of Award (LOA), tender documents will form part of the contract agreement. Additional conditions/modifications if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect.

Sl. No	Location of the project	Capacity of the proposed plant (kWp)
1	Govt Taluk Hospital, Vithura, Thiruvananthapuram	10
2	Govt Higher Secondary School, Vithura, Thiruvananthapuram	45
3	Govt H.S.S, Mylachal, Thiruvananthapuram	20
4	Govt H.S.S, Punnamoodu, Thiruvananthapuram	46
Total		121 kWp

2. Name of the Project:

Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on buildings owned by **LSGD, District Panchayath Thiruvananthapuram** with a total installation capacity of 121 kWp in 4 locations (Phase-II), including Operation & Maintenance of the plants for the first 5 years from the date of handing over. The Performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 in Volume-1 of the tender document and the addenda issued in this respect, herein after called "the project".

3. Contract amount:

The Total Contract Amount is **INR 74,00,000/-** (Rupees Seventy four lakhs only) inclusive of all taxes and duties for design, engineering, manufacturing, procurement, supply (including spares), handling, storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, cess, freight and insurance charges, logistics, etc

and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Rooftop Solar PV Power plants on the Roof of buildings owned by LS GD, District Panchayath Thiruvananthapuram with a total installed capacity of 171 kWp in 4 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over. The performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 and the addenda issued in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

4 Taxes & Duties:

The Contract Amount as indicated in clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed.

5. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document

All the Personnel employed/engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel/equipments, shall be taken up by the contractor, directly with the Insurance Company. KSEBL/ LS GD, District Panchayath Thiruvananthapuram will not have any liability in this respect whatsoever.

6. Work Completion Period and Date of Commissioning (CoD):

The Contractor shall complete the works in all respect within 6 months from the official date of commencement of work which shall be the date of Agreement or the date of handing over of the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be

completed and commissioned before the expiry of the Time of Completion unless the time of completion is postponed and period of completion is extended by a written letter from the Tripartite agreement Authority.

The date of completion/commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL are found satisfactory. The Engineer-in-Charge should issue a certificate including date of commissioning and an authorization certificate/commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect.

7. Extension of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions and is governed by clause 5.3.6 in Volume-1 of tender document.

8. Liquidated Damages:

Liquidated Damages will be governed by the clause 5.3.9 of Volume 1 of the tender document

9. Execution of Agreement:

The Contractor shall execute a tripartite agreement in Kerala Government Stamp paper worth (1). Rs. 7,400/- (Rupees Seven thousand and four hundred only) with The Secretary, District Panchayath Thiruvananthapuram after furnishing a Bank Guarantee of Rs 7,40,000/- (Indian Rupees Seven lakhs and forty thousand only), i.e. 10% of the Contract value rounded off to the higher multiple of Rs 1000/-, within 15 days from the date of issue of Letter of Award of contract, with KSEBL and LSGD, District Panchayath Thiruvananthapuram as First and Second party respectively, as per the terms and conditions set forth in the Bid document. After execution of the tripartite agreement the successful bidder shall be known as 'EPC Integrator'. The tripartite agreement has to be executed by the contractor in the prescribed format in Form B of Contract Tripartite agreement of this document, along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed. The contractor shall provide for signing of the contract, 2 additional copies of contract agreement, 2 copies of Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney and other requisite documents. All the documents cited in clause No. 30 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

After handing over of the sites in Phase 2 of the LSGD, District Panchayath Thiruvananthapuram project, you shall execute a separate O&M Bilateral Agreement with the LSGD District Panchayath, Thiruvananthapuram as the first party.

10. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and

tool like PERT /CPM in MS {Projects} and GANTT chart indicating the critical events/paths and milestones.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL. Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

11. Terms of Payment:

The payment condition is governed by clause 5.2 in Volume-1 of the tender document and addenda issued in this respect.

a. The Contractor has to produce Bank Guarantee for an amount of 10% of the Contract amount as Performance Security Deposit at the time of executing Contract Agreement.

b. 30% of the contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV modules, Inverters and module mounting structures) after delivery of this materials at site, inspection and verification by authorized departmental officers, and production of insurance certificates for the materials delivered at site. (Refer clause 5.5.2 of tender document Volume-1). The Engineer-in-charge is to be informed about the delivery of material one week in advance by the contractor.

The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor. The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.

c. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing, commissioning of the Solar PV Power plant after proving the Performance ratio (AC) as per clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect. The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3 of tender document Volume-1 and addenda issued in this respect) after completing the project within 06 months.

The invoices shall be verified and final payment may be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions.

d. The Operation & Maintenance charges will be released by LSGD, District Panchayath Thiruvananthapuram, after commissioning and demonstration of the specified Performance ratio (AC) by the Contractor as per clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect, at the end of each year during O&M period (5 years).

e. The performance security amount shall also be released in equal instalments each year (O&M period) from the date of handing over the project after demonstrating the specified Performance ratio (AC) by the Contractor (as per Clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect).

f. The Quoted taxes and duties etc as governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as governed by GST from concerned Tax authorities occurs in future, the Contractor shall indemnify LSGD, District Panchayath Thiruvananthapuram from such liabilities and the Contractor shall be liable for the additions, loss or cost on account of such discrepancies / dispute".

12. Advance Payment:

No amount shall be released as mobilisation advance.

13. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 in Volume-1 of the Tender document.

The Contractor shall submit Performance security deposit as Bank Guarantee at the time of execution of tripartite agreement in the prescribed format (Annexure 5) for performance security of the Contract and it shall be an amount equal to 10% of the total Contract amount rounded off to the higher multiple of Rs 1000/- i.e. INR 7, 40, 000/- (Indian Rupees Seven Lakhs and forty thousand only).

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the LSGD, District Panchayath Thiruvananthapuram, an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security of the Contract.

The Bank Guarantee shall be initially valid from the date of agreement for a period of 2 years and be kept renewed from time to time till the end of defect liability period including Operation & Maintenance. The performance security Bank Guarantee will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 and the addenda issued in this respect) during the defect liability period. The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 and addenda issued in this respect) will be calculated based on data from pyranometer/ Meteororm / Pyrheliometer data. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio (AC) (as per Clause 2.2.3 of Vol-1 of the tender document and the addenda issued in this respect) can be checked at any time in between if deemed necessary by the Engineer in charge (as per clause 2.2.3 of tender document Volume-1 and addenda issued in this respect). If any unusual degradation is noticed in the Performance Ratio, the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

14. Payment Authority and Engineer-in-Charge:

Engineer in Charge -Engineer authorized by Chief Engineer (Renewable Energy &

Energy Savings). The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, technical support and civil supervision.

The work shall be treated completed only when the Engineer-in-charge Issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure the Engineer-in-charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL.

The contractor shall submit bills in Triplicate to the Engineer-in-Charge with all supporting documents as indicated in the relevant clauses in Volume 1 of the bid document.

15 Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, inverters, cables, online monitoring, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards, All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be Included. The design details and other accessories should adhere to and match with the technical specifications provided in the Volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer-in-Charge prior to the submission of all the drawings.

Energy meter provided for the installation of the solar PV plant shall be in accordance with the regulations and technical specifications of KSEBL.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, stamp duties, license fees, and other such levies imposed outside the purchaser's country.

The contractor shall provide all MA's (Manufacturer's Authorization Forms) for all the

components specified in the bid within 15 days and before executing the Contract Agreement.

16. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details / specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s) / inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram.
- e. Mounting structure drawing
- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to inverter etc. shall be furnished
- i. PVsyst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

17. Quality Assurance:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test (as per STC) certificate as per IEC 61215 and IEC 61730-1&2 and IEC 61701. The power conditioning units / inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2{1,2,14,30} and IEC 62109-1&2

and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanization of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted on the required number of samples as is required by the Engineer-in-charge, during the Factory inspection:

For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electroluminescence tests
8. Robustness of termination

For Inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fitments

The Contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through the Engineer-in-Charge. All the major components should undergo factory inspection tests. The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests; the Material Despatch Clearance Certificate will be issued.

The test and inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commissioning at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also. Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any material or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at the Contractor's cost.

18. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

The Engineer-in-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

19. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 2014 as per CEA technical standard for connectivity of the distributed generation resources.

Individual voltage harmonics distortion	< 3 %
Total Voltage harmonic Distortion THD	< 5%
Total Current harmonic Distortion	<8%
Output frequency	= 50Hz +/- 0.5Hz

- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions

- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
- e. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid.

20. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge/authorized person of LSGD (District Panchayath, Thiruvananthapuram)

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant and handed over to KSEBL.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume 1.

21. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 in Volume-1 of the tender document.

Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor.

Operation and Maintenance during this period shall include supply of spares of panels, inverters and all equipments in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive insurance covering fire, earthquake.

The Solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of LSGD, District Panchayath Thiruvananthapuram. Copies of the Insurance Policies are to be given to LSGD, District Panchayath Thiruvananthapuram as and when taken.

The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians trained under "Suryamitra" Skill Development Programme of MNRE. The contractor shall

also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training should be given to personnel identified by the LSGD, District Panchayath Thiruvananthapuram for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with generation and down time analysis data has to be sent to LSGD, District Panchayath Thiruvananthapuram Corporate offices by E-mail during the defect liability period. Any discrepancy/malfunctioning noted shall be immediately attended to and got rectified by the contractor.

The Contractor should not misuse the land and buildings in the project site and assign responsibility for the safety of machinery within the premises.

22. Annual Maintenance Contract (AMC):

The plant shall then be handed over to the LSGD District Panchayath Thiruvananthapuram at the end of 5 years for O&M. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price.

The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

23. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the Solar Power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect.

24. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect. Performance ratio test as per IEC 61724 will be carried out at site jointly by the EPC contractor in presence of authorized officials from KSEBL and LSGD, District Panchayath Thiruvananthapuram. This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period he will be given a second chance to demonstrate the PR in another 7 days. Still if it is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant/improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the stipulated Performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio (AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

25. Handing over:

After the date of successful commissioning of the Project, the Contractor shall hand over the complete Solar PV Electric Power Generation system to the LSGD, District Panchayath Thiruvananthapuram as specified in the tender within 15 days. Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the LSGD District Panchayath Thiruvananthapuram authorities. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years from the date of handing over.

The contractor shall provide the named list of essential tools and spares required for the future operation and maintenance of the plant.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.11 in Volume 1 of the tender document.

27. Force Majeure:

Force Majeure shall be governed by Clause. 5.3.8 in Volume 1 of the tender document.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause 5.3.4 in Volume 1 of the tender document.

29. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

30. Contract Documents.

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.

5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. All volumes of bid with TENDER No. KSEBL/REES/LSGD-District Panchayath TVM- Phase 2/1/2019-20 dated 10-05-2019 having Tender ID: 2019_KSEB_277008_1 and its addendums along with clarifications and related documents issued by the tendering authority.
14. Response (proposal) of M/s Regional Agro Industrial Development Co-Operative of Kerala Limited, (RAIDCO Kerala Ltd), RAIDCO Tower, SPCA Road, PB No: 407, Kannur- 670 002, Kerala including the bid, clarification documents and the accepted rate submitted.

31. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's General conditions of contract which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Clause 10 and 15 shall be submitted within 15 days from the date of issue of this LoA.

Proceedings of the
 Deputy Chief Electrical Inspector
 Thiruvananthapuram
Present: P N Anil Kumar

Subject: Installation of 46.2kW Grid Tied Solar Power Plant at the premises of GOVT.Model H.S.S Punnamoodu, Punnamoodu, Thiruvananthapuram, 695020 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B5-00676/19/EIT dated 24.01.2020
2. Completion report submitted by Nidhin, kunnamkulam, kunnamkulam, Kerala, 680517 dated received on 29.01.2020
3. Inspection conducted on 12.02.2020
4. Non conformity report dated 20.02.2020
5. Compliance report submitted by Nidhin, kunnamkulam, kunnamkulam, Kerala, 680517 dated 24.02.2020

Order No: B5-00676/19/EIT Dated 28-02-2020

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (2) above, installed at the premises of ,GOVT.Model H.S.S Punnamoodu, Punnamoodu, Thiruvananthapuram, 695020 subject to following conditions and as detailed in the annexure appended

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Date of energisation should be intimated to this office.
5. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and KSERC (Grid interactive distributed solar energy systems) Regulation, 2014.
6. Only authorised person shall be in charge of the operation and maintenance of the installation.
7. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee.
8. As per Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013- Section 5, the prescribed standards and codes of practice should be followed.
9. The mechanically operated isolation switch should have specification prescribed in Sub Section 5.ii.(9) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
10. The tests prescribed under 5 (8) (2), the harmonic measurements should be done using calibrated instrument in a standard laboratory having national intimation traceability with a basic standard instruments
11. You may conduct tests mentioned in Section 5 (6) 5.ii.1, 2, 3 & 6 in consultation with the licensee and the parameters shall be within the limits as prescribed by Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013 before committing the Solar Supply to Kerala State Electricity Regulatory aid.
12. The tests prescribed by Central Electricity Authority Regulation 2013 should be conducted every year and the results furnished in this department for verification as per Regulation 5.8(2) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
13. The whole installation should be conforming to the stipulation under Kerala State Electricity Regulatory Committee (Grid Technical Distributed Solar Energy System) Regulation 2014 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply is absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.
14. The maintenance of all major equipments should be carried out periodically as prescribed by the manufacturer and as per Indian Standard Specifications and a register shall be maintained for recording maintenance activity and periodic checking. The register shall be kept upto date and submitted for perusal during periodical inspection.

10. The tests prescribed under 5 (8) (2), the harmonic measurements should be done using calibrated instrument in a standard laboratory having national intimation traceability with a basic standard instruments
11. You may conduct tests mentioned in Section 5 (6) 5.ii.1, 2, 3 & 6 in consultation with the licensee and the parameters shall be within the limits as prescribed by Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013 before committing the Solar Supply to Kerala State Electricity Regulatory aid.
12. The tests prescribed by Central Electricity Authority Regulation 2013 should be conducted every year and the results furnished in this department for verification as per Regulation 5.8(2) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
13. The whole installation should be conforming to the stipulation under Kerala State Electricity Regulatory Committee (Grid Technical Distributed Solar Energy System) Regulation 2014 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply is absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.
14. The maintenance of all major equipments should be carried out periodically as prescribed by the manufacturer and as per Indian Standard Specifications and a register shall be maintained for recording maintenance activity and periodic checking. The register shall be kept upto date and submitted for perusal during periodical inspection.

Proceedings of the
 Deputy Chief Electrical Inspector
 Thiruvananthapuram
Present: P N Anil Kumar

Subject: Installation of 20.4kWp Solar system at the premises of M/s.GOV.T.H.S.S Mylachal, Thiruvananthapuram, 695125 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B5-00674/19/EIT dated 24.01.2020
2. Completion report submitted by Nidhin, kunnamkulam, kunnamkulam, Kerala, 680517 dated received on 29.01.2020
3. Inspection conducted on 13.02.2020
4. Non conformity report dated 20.02.2020
5. Compliance report submitted by Nidhin, kunnamkulam, kunnamkulam, Kerala, 680517 dated 24.02.2020

Order No: B5-00674/19/EIT Dated 29-02-2020

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (3) above, installed at the premises of ,M/s.GOV.T.H.S.S Mylachal, Mylachal, Thiruvananthapuram, 695125 subject to following conditions and as detailed in the annexure appended

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Date of energisation should be intimated to this office.
5. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and KSERC (Grid interactive distributed solar energy systems) Regulation, 2014.
6. Only authorised person shall be in charge of the operation and maintenance of the installation.
7. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee.
8. As per Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013- Section 5, the prescribed standards and codes of practice should be followed.
9. The mechanically operated isolation switch should have specification prescribed in Sub Section 5.ii.(9) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
10. The tests prescribed under 5 (8) (2), the harmonic measurements should be done using calibrated instrument in a standard laboratory having national intimation traceability with a basic standard instruments.
11. You may conduct tests mentioned in Section 5 (6) 5.ii.1, 2, 3 & 6 in consultation with the licensee and the parameters shall be within the limits as prescribed by Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013 before committing the Solar Supply to Kerala State Electricity Regulatory aid.
12. The tests prescribed by Central Electricity Authority Regulation 2013 should be conducted every year and the results furnished in this department for verification as per Regulation 5.8(2) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
13. The whole installation should be conforming to the stipulation under Kerala State Electricity Regulatory Committee (Grid Technical Distributed Solar Energy System) Regulation 2014 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply in an absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.

LETTER OF AWARD

To

M/s INKEL Limited,
Ajiyal Complex, Post Office Road,
Kakkanad, Kochi - 682030

W.O No.	07/2019-20
Date	01.01.2020
Order type	385 kWp Grid tied rooftop Solar PV power plant on the rooftop of buildings owned by LSGD, District Panchayath Thiruvananthapuram (Phase 1)
Reference file	CE (REES)/AE/(RTS/DP-TVM-PH1)/2019-20/1695 dated 1.1.2020
e-Tender No	E-Tender No. KSEBL/REES/LSGD-District Panchayath TVM-Phase 1/14/2018-19 dated 04-12-2018 and Tender ID : 2018_KSEB_253691_1
Value	INR 2,62,00,000/- (Rupees Two Crores and Sixty Two Lakhs Only)
Price	Fixed

Sir,

Sub: Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on the roof of selected buildings owned by LSGD District Panchayath Thiruvananthapuram with a total installed capacity of 385 kWp in 6 locations (Phase 1), including Operation & Maintenance of the plant for the first 5 years from the date of handing over - Award of contract - reg.

4. This office TENDER No, KSEBL/REES/LSGD-District Panchayath Thiruvananthapuram-Phase I/14/2018-19 dated 04.12.2018 - Tender ID: 2018_KSEB_253691_1 and its addenda.
 5. Ltr. No. INKEL/Solar/TVM-PH-II/2019-20/001 dated 03.12.2019
 6. Proceedings No. CE(REES)/ESCOT/AE9/RTS/DP-TVM/Phase I/2019-20/12 dated 31.12.2019

The subject work is awarded to you at a contract value of INR 2,62,00,000/- (Rupees Two Crores Sixty Two Lakhs only) inclusive of all taxes and duties. You shall carryout and complete the work as per the time schedule as contained in clause 2.2.4 and 5.3.2 in Volume-I of the tender document. Two copies of this order are included herewith. The duplicate of this order shall be returned to this office within seven days, after affixing your seal and signature on all pages as a token of acceptance of the terms and conditions stated in it.

This contract will be governed by the terms and conditions as contained in tender documents Volume-I, II and III and addendums issued in this respect by the tendering authority. This Letter of Award (LOA), tender documents will form part of the contract agreement. Additional conditions/modifications if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 in Volume-I of the tender document and addenda issued in this respect.

Sl. No	Location of the project	Capacity of the proposed plant (kWp)
1	District Panchayath Office, Pattom	70
2	General Hospital, Neyyattinkara	100
3	District Hospital, Nedumangad	50
4	Govt Model Hospital, Peroorkada	30
5	Govt Ayurveda Hospital, Varkala	60
6	Govt V.H.S.S., Vellanad	75
Total		385 KWp

2. Name of the Project:

Appointment of Engineering, Procurement and Construction (EPC) Contractor for the design as per site conditions, supply, installation, testing and commissioning of Grid Tied Rooftop Solar PV Power plants on buildings owned by **LSGD, District Panchayath Thiruvananthapuram** with a total installation capacity of 385 kWp in 6 locations (Phase-1), including Operation & Maintenance of the plant for the first 5 years from the date of handing over. The Performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 in Volume-1 of the tender document and the addenda issued in this respect, herein after called "the project".

3. Contract amount:

The Total Contract Amount is INR 2, 62, 00,000/- (Rupees Two Crores Sixty Two Lakhs only) inclusive of all taxes and duties for design, engineering, manufacturing, procurement, supply (including spares), handling, storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, cess, freight and insurance charges, logistics, etc and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Rooftop Solar PV Power plants on the Roof of buildings owned by LSGD, District Panchayath Thiruvananthapuram with a total installed capacity of 385 kWp in 6 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over. The performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 and the addenda issued in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to destination project site and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

4. Taxes & Duties:

The Contract Amount as indicated in clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed.

5. Insurance:

All equipment, machinery, works etc, which are furnished, installed, constructed and handed over/to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document.

All the Personnel employed/engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel/equipments, shall be taken up by the contractor, directly with the Insurance Company. KSEBL/ LSGD, District Panchayath Thiruvananthapuram will not have any liability in this respect whatsoever.

6. Work Completion Period and Date of Commissioning (CoD):

The Contractor shall complete the works in all respect within **6 months** from the official date of commencement of work which shall be the date of Agreement or the date of handing over of the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion unless the time of completion is postponed and period of completion is extended by a written letter from the Tripartite agreement Authority.

The date of completion/commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL are found satisfactory. The Engineer-in-Charge should issue a certificate including date of commissioning and an authorization certificate/commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect.

7. Extension of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions and is governed by clause 5.3.6 in Volume-1 of tender document.

8. Liquidated Damage:

Liquidated Damage will be governed by the clause 5.3.9 of tender document Volume 1.

9. Execution of Agreement:

The Contractor shall execute a tripartite agreement in Kerala Government Stamp paper worth (1). Rs. 26,200/- (Rupees Twenty Six Thousand and Two Hundred only) after furnishing a Bank Guarantee of Rs 26,20,000/- (Indian Rupees Twenty Six lakhs and Twenty Thousand only) i.e. 10% of the Contract value rounded off to the higher multiple of Rs 1000/-, within 15 days from

Page 4 of 16

the date of issue of Letter of Award of contract, with KSEBL and LSGD, District Panchayath Thiruvananthapuram as First and Second party respectively, as per the terms and conditions set forth in the Bid document. After execution of the tripartite agreement the successful bidder shall be known as 'EPC Integrator'. The tripartite agreement has to be executed by the contractor in the prescribed format in Form-B of Contract Tripartite agreement of this document, along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed. The contractor shall provide for signing of the contract, 2 additional copies of contract agreement, 2 copies of Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney and other requisite documents. All the documents cited in clause No. 30 of this document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

After handing over of the sites in phase I of the LSGD, District Panchayath Thiruvananthapuram project, you shall execute a separate O&M Bilateral Agreement with the LSGD District Panchayath, Thiruvananthapuram as the first party.

10. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL.

Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

11. Terms of Payment:

The payment condition is governed by clause 5.2 in Volume-1 of the tender document and addenda issued in this respect.

a. The Contractor has to produce Bank Guarantee for an amount of 10% of the Contract amount as Performance Security Deposit at the time of executing Contract Agreement.

b. 30% of the contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV modules, Inverters and module mounting structures) after delivery of this materials at site, inspection and verification by authorized departmental officers, and production of insurance certificates for the materials delivered at site.(Refer clause 5.5.2 of tender document Volume-1). The Engineer-in -charge is to be informed about the delivery of material one week in advance by the contractor.

The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor. The invoices shall be submitted by the

contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.

c. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing, commissioning of the Solar PV Power plant after proving the Performance ratio (AC) as per clause 2.2.3 of tender document Volume-1 and addenda issued in this respect. The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3 of tender document Volume-1 and addenda issued in this respect) after completing the project within 06 months.

The invoices shall be verified and final payment may be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions.

d. The Operation & Maintenance charges will be released by LSGD, District Panchayath Thiruvananthapuram, after commissioning and demonstration of the specified Performance ratio (AC) by the Contractor as per clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect, at the end of each year during O&M period (5 years).

e. The performance security amount shall also be released in equal instalments each year (O&M period) from the date of handing over the project after demonstrating the specified Performance ratio (AC) by the Contractor (as per Clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect).

f. The Quoted taxes and duties etc as governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as governed by GST from concerned Tax authorities occurs in future, the Contractor shall indemnify LSGD, District Panchayath Thiruvananthapuram from such liabilities and the Contractor shall be liable for the additions, loss or cost on account of such discrepancies / dispute".

12. Advance Payment:

No amount shall be released as mobilisation advance.

13. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 in Volume-1 of the Tender document.

The Contractor shall submit Performance security deposit as Bank Guarantee at the time of execution of tripartite agreement in the prescribed format (Annexure 2) for performance security of the Contract and it shall be an amount equal to 10% of the total Contract amount rounded off to the higher multiple of Rs 1000/- i.e. INR 26,20,000/-(Indian Rupees Twenty Six Lakhs and Twenty Thousand only).

In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to the LSGD, District Panchayath Thiruvananthapuram, an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security of the Contract.

The Bank Guarantee shall be initially valid from the date of agreement for a period of 2 years and be kept renewed from time to time till the end of defect liability period including Operation & Maintenance. The performance security Bank Guarantee will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 and the addenda issued in this respect) during the defect liability period. The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 and addenda issued in this respect) will be calculated based on data from Pyranometer/ Meteoronorm / Pyrheliometer data. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio (AC) (as per Clause 2.2.3 of Vol-1 of the tender document and the addenda issued in this respect) can be checked at any time in between if deemed necessary by the Engineer in charge (as per clause 2.2.3 of tender document Volume-1 and addenda issued in this respect). If any unusual degradation is noticed in the Performance Ratio, the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

14. Payment Authority and Engineer-in-Charge:

Engineer in Charge –Engineer authorized by Chief Engineer (Renewable Energy & Energy Savings). The Engineer-in Charge may delegate powers to subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision.

The work shall be treated completed only when the Engineer-in- charge issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure the Engineer-in -charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL.

The contractor shall submit bills in Triplicate to the **Engineer-in-Charge** with all supporting documents as indicated in the relevant clauses in Volume 1 of the bid document.

15. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, inverters, cables, online monitoring, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards. All guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specifications provided in the Volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer-in-Charge prior to the submission of all the drawings.

Energy meter provided for the installation of the solar PV plant shall be in accordance with the regulations and technical specifications of KSEBL.

For the goods supplied from outside the purchaser's country, the supplier shall be entirely responsible for all taxes, duties, stamp duties, license fees, and other such levies imposed outside the purchaser's country.

16. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details / specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s) / inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram,

- e. Mounting structure drawing
- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be furnished
- i. PVSyst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

17. Quality Assurance:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test (as per STC) certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The power conditioning units / inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS 2062 and galvanization of mounting structure shall be in compliance of BIS 4759 (amended up to date)/IS2629.

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted on the required number of samples as is required by the Engineer-in-charge, during the Factory inspection:

For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)

6. RFID verification
7. Electroluminescence tests
8. Robustness of termination

For Inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

For isolation transformer:

1. Visual inspection
2. Routine test as per IS-2026/ IEC 60601-1/IEC 61558-1

For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fittings

The Contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through the Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests; the Material Despatch Clearance Certificate will be issued.

The test and inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commissioning at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also.

Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any material or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at the Contractor's cost.

18. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office.

The Engineer-in-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

19. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 2014 as per CEA technical standard for connectivity of the distributed generation resources.

Individual voltage harmonics distortion	< 3 %
Total Voltage harmonic Distortion THD	< 5%
Total Current harmonic Distortion	< 8%
Output frequency	= 50Hz +/- 0.5Hz
- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
- e. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid.

20. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge/authorized person of LSGD (District Panchayath, Thiruvananthapuram).

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant to KSEBL.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume I.

21. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 in Volume-I of the tender document. Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor.

Operation and Maintenance during this period shall include supply of spares of panels, inverters and all equipments in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive insurance covering fire, earthquake.

The solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed under the supervision of LSGD, District Panchayath Thiruvananthapuram. Copies of the Insurance Policies are to be given to LSGD, District Panchayath Thiruvananthapuram as and when taken.

The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians. The contractor shall also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training should be given to personnel identified by the LSGD, District Panchayath Thiruvananthapuram for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with generation and down time analysis data has to be sent to LSGD, District Panchayath Thiruvananthapuram Corporate offices by E-mail during the defect liability period. Any discrepancy/malfunctioning noted shall be immediately attended to and got rectified by the contractor.

The Contractor should not misuse the land and buildings in the project site and assign responsibility for the safety of machinery within the premises.

22. Annual Maintenance Contract (AMC):

The plant shall then be handed over to the LSGD District Panchayath Thiruvananthapuram at the end of 5 years for O&M. After five years from the date of commissioning, the EPC contractor

may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price.

The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

23. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the Solar Power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect.

24. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect. Performance ratio test as per IEC 61724 will be carried out at site jointly by the EPC contractor in presence of authorized officials from KSEBL and LSGD, District Panchayath Thiruvananthapuram. This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period he will be given a second chance to demonstrate the PR in another 7 days. Still if it is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant/improve the quality of the plant by replacement of module/other components with all suitable modification requirements on balance of systems at his own cost to achieve the stipulated Performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio (AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

25. Handing over:

After the date of successful commissioning of the Project, the Contractor shall hand over the complete Solar PV Electric Power Generation system to the LSGD, District Panchayath

Thiruvananthapuram as specified in the tender within 15 days. Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to the LSGD District Panchayath Thiruvananthapuram authorities. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years from the date of handing over.

The contractor shall provide the named list of essential tools and spares required for the future operation and maintenance of the plant.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.1 | in Volume 1 of the tender document.

27. Force Majeure:

Force Majeure shall be governed by Clause. 5.3.8 in Volume 1 of the tender document.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.3.4 in Volume 1 of the tender document.

29. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

30. Contract Documents

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions
10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.

13. All volumes of bid with *TENDER* No. KSEBL/REES/LSGD-District Panchayath TVM-Phase 1/14/2018-19 dated 04-12-2018 having Tender ID: 2018_KSEB_253691_1 and its addendums along with clarifications and related documents issued by the Tendering Authority.
14. Response (proposal) of M/s INKEL Ltd, Door no.7/473ZA, 2nd Floor, Ajiyal Complex, Kakkanad, Cochin Kerala including the Bid, Clarification documents and the accepted rate submitted.

31. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Clause 10 and 15 shall be submitted within 15 days from the date of issue of this LoA

**Proceedings of the
Electrical Inspector(In Charge), Thiruvananthapuram**

(Present:- P K Ushakumari)

Subject:- Installation of 1 No. 60.06 kWp on Grid Solar Power Plant with 2 Nos. 30kVA Solar inverters and connected electrics in the existing non-HT installation at the premise of M/s. Government Ayurveda Hospital Varkala Thiruvananthapuram - Sanction for energisation - orders issued - reg.-

Read:-

1. Scheme approval no. B5-7549/20/EIT dated 12/02/2021
2. Completion report No. Nil FIRSTLAW/CC/005-4/20-21 received on 27/08/2021 of M/s. First Law B-Class Electrical Contractor, CB-7161, Kanippayur P.O, Kunnamkulam, Thrissur.
3. Inspection conducted on 17/09/2021
4. Inspection defect report of even number dated 17/09/2021
5. Compliance report furnished under cover of letter No. FIRSTLAW/CO/005-5/20-21 dated 18/09/2021 of M/s. First Law, B-Class Electrical Contractor, Kanippayur P.O. Kunnamkulam, Thrissur.

Order No. B5-7549/20/EIT dated 18/09/2021

Sanction under Section 54 of The Electricity Act, 2003, Regulation 32 of the CEA (Measures relating to Safety and Electric Supply) Regulations-2010, Central Electricity Authority (Technical Standards for connectivity of the Distributed Generation Resources) Regulations-2013 and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 is hereby accorded for energisation of the electrical installation covered under the Completion Report read as 2nd above and installed at the premises of M/s Government Ayurveda Hospital, Varkala, Thiruvananthapuram with the following specifications subject to the conditions mentioned here under.

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Electricity duty for the units produced from the solar energy system should be remitted to the government.
5. Only authorised person shall be in charge of the operation and maintenance of the installation
6. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee
7. Consent from licensee shall be obtained for this Solar installation.
8. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and Kerala State Electricity Regulatory Commission (Renewable Energy and Net Metering) Regulations 2020 to ensure the safety of associated equipment and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply in a absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.

Proceedings of the
 Electrical Inspector
 Thiruvananthapuram
Present:P.K.USHAKUMARI

Subject: Installation of at the premises of M/s. Govt. Model HSS,Vellanad, Thiruvananthapuram, 695543 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B5-06206/20/EIT dated 02.12.2020
2. Completion report submitted by Nidhin, kunnamkulam,kunnamkulam,Kerala,680517 dated received on 18.12.2020
3. Inspection conducted on 04.01.2021
4. Non conformity report dated 06.01.2021
5. Compliance report submitted by Nidhin, kunnamkulam,kunnamkulam,Kerala,680517 dated 07.01.2021

Order No: B5-06206/20/EIT Dated 05-02-2021

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (3) above, installed at the premises of ,M/s. Govt. Model HSS,Vellanad,Velland,Thiruvananthapuram,695543 subject to following conditions and as detailed in the annexure appended

1. Date of energization shall be intimated.
2. Operation and maintenance of electrical installation shall be done only by authorized persons.
3. All the maintenance works shall be recorded in the maintenance register.
4. Addition/alteration in the existing installation shall be carried out only with prior approval from the electrical inspectorate.

LETTER OF AWARD

To

**M/s. INKEL LIMITED
AJIYAL COMPLEX, POST OFFICE ROAD,
KAKKANAD, COCHIN, KERALA , 682021**

W.O No.	03 /2020-21
Date	20 .10.2020
Order type	70 kWp Grid tied rooftop Solar PV power plants on the rooftop of 7 buildings owned by LSGD-Kasaragod including Operation & Maintenance of the plant for the first 5 years from the date of handing over
Reference file	CE (REES)/LSGD-Kasaragod Phase III /70kWp/2020-21
e-Tender No	Tender No : KSEB/ REES/LSGD-Kasaragod phase III/70kWp/14/2019-20 dated 08-06-2020 having Tender ID : 2020_KSEB_362941_1
Value	INR Rs. 40,67,899/-(Rupees Forty Lakhs Sixty Seven Thousand Eight hundred and Ninety Nine Only)
Price	Fixed

Sir,

Sub: Appointment of EPC contractor for the design as per site conditions, erection, testing & commissioning of Grid Tied Rooftop Solar Photo Voltaic (SPV) Power plants, on the Roof of buildings owned by LSGD-Kasaragod (Phase-III) Viz Kasaragod District Panchayath, with a total installed capacity of 70 kWp in total 7 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over - Award of contract – reg.

- Ref : 1. This office Tender No: KSEB/ REES/LSGD-Kasaragod phase III/70kWp/14/2019-20 dated 08-06-2020 having Tender ID : 2020_KSEB_362941_1.
2. Letter No. INKEL/SOLAR/KSEBL-70 KW DPKP3/2020-21/135 Dated 13.10.2020

Registered Office, Vidyuthi Bhavanam, Pattom, Thiruvananthapuram-695004 Website:www.kseb.in, CIN: U40100KL2011SGC027424

The subject work is awarded to you at a contract value of INR Rs. 4067899/- (Rupees Forty Lakhs Sixty Seven Thousand Eight hundred and Ninety Nine Only) inclusive of all taxes and duties. You shall carryout and complete the work as per the time schedule as contained in clause 2.2.4 and 5.3.2 in Volume-I of the tender document. Two copies of this order are included herewith. The duplicate copy of this order shall be returned to this office within seven days, after affixing your seal and signature on all pages as a token of acceptance of the order.

This contract will be governed by the terms and conditions as contained in tender documents Volume-I, II and III and addenda issued in this respect by the tendering authority. This Letter of Award (LOA), tender documents will form part of the contract agreement. Additional conditions/modifications if any stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The subject work shall be considered as a composite supply. The scope of work will be governed by clause 2.2.3 in Volume-I of the tender document and addenda issued in this respect.

Sl. No	Name of location	Owners name	Proposed Capacity in kWp
1	GHSS Kadambar	District Panchayath Kasaragod	10
2	GHSS Edaneer	District Panchayath Kasaragod	10
3	GHSS Cherkala	District Panchayath Kasaragod	10
4	GHSS Kulathoor	District Panchayath Kasaragod	10
5	GHSS Irayanni	District Panchayath Kasaragod	10
6	GHSS Perdala	District Panchayath Kasaragod	10
7	V.P.P.M.K.P.S.GVHSS Thrikkarippur	District Panchayath Kasaragod	10
	Total		70 kWp

2. Name of the Project:

Appointment of EPC Contractor for the design as per site conditions, erection, testing & commissioning of Grid Tied Rooftop Solar Photo Voltaic (SPV) Power plants, on the Roof of buildings of District Panchayath Kasaragod with a total installed capacity of 70 kWp in total 7 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over. The Performance ratio of each location shall be 75 - 80% as detailed in the Clause

2.2.3 in Volume-1 of the tender document and the addenda issued in this respect, herein after called "the project".

3. Contract amount:

The Total Contract Amount is INR Rs. 40,67,899/- (Rupees Forty Lakhs Sixty Seven Thousand Eight hundred and Ninety Nine Only) inclusive of all taxes and duties for design, engineering, manufacturing, procurement, supply (including spares), handling, storage, civil works, erection, installation, testing & commissioning, training of personnel, along with operation and maintenance charges of the project as all inclusive Price which include taxes, duties, cess, freight and insurance charges, logistics, etc and all the levies payable by the contractor for successful completion, operation and maintenance of the Grid Tied Rooftop Solar PV Power plants on the Roof of buildings owned by District Panchayath Kasaragod with a total installed capacity of 70 kWp in total 7 locations including Operation & Maintenance of the plant for the first 5 years from the date of handing over. The performance ratio of each location shall be 75 - 80% as detailed in the Clause 2.2.3 of Tender document Volume-1 and the addenda issued in this respect, as per the financial proposal submitted by you and as detailed in the Price Schedule attached as Annexure 1.

Freight and Insurance charges for transportation of material/equipment to the destination project sites and up to complete installation and commissioning should be arranged by the contractor at their own cost. KSEBL will not entertain or bear any charge for the same.

Contract amount shall be governed as per provisions under Clause 4.1 of Volume 1 of the tender document. This amount shall be firm during the period of contract and shall not be varied or adjusted on whatsoever reason on any account.

4. Taxes & Duties:

The Contract Amount as indicated in clause 3 of this document is inclusive of all Taxes, Duties, incidental charges and other levies. Taxes & Duties will be governed by the clauses as detailed in clause 4.1, 5.9.1, 5.9.2, 5.9.3 of Volume 1 of the tender document. All Taxes and duties will be as per the latest orders of KSEBL and prevailing rules of State /Central Government. No separate claim on this behalf will be entertained and future claims on any taxes and duties will not be admitted and also all statutory recoveries will be deducted by K.S.E.B Ltd from the work bill. No future claims on unquoted taxes and duties will be allowed.

5. Insurance:

All equipment, machinery, works etc. which are furnished, installed, constructed and handed over/ to be handed over to the KSEBL under this contract for the completion of project shall be insured by the Contractor for the period of contract. It shall be the responsibility of the Contractor to maintain adequate insurance coverage at all times. Insurance will be governed by Clause 5.9.4 of Volume 1 of the tender document.

All the Personnel employed/engaged by the Contractor shall have adequate insurance coverage. Any claim due to mishap/accidents or otherwise to personnel/equipments, shall be taken

up by the contractor, directly with the Insurance Company. KSEBL will not have any liability in this respect whatsoever.

6. Work Completion Period and Date of Commissioning (CoD):

The Contractor shall complete the works in all respect within **6 months** from the official date of commencement of work which shall be the date of Agreement or the date of handing over of the site, even if not in full, but in a manner the work can be commenced and proceeded with in accordance with the programme of works, whichever is later. All the works stipulated under the scope of the Contract shall be completed in all respects, supplies made, services provided and final cleaning up done and required testing shall be completed and commissioned before the expiry of the Time of Completion unless the time of completion is postponed and period of completion is extended by a written letter from the Tripartite agreement Authority.

The date of completion/commissioning shall be the date on which the Solar plant is synchronized into KSEBL grid after obtaining clearances from all statutory bodies and after conducting necessary grid interfacing tests and measurements by the KSEBL are found satisfactory. The Engineer-in-Charge should issue a certificate including date of commissioning and an authorization certificate/commissioning report after successful synchronization, commissioning of the plant with the grid after proving the Performance ratio as detailed in clause 2.2.3 in Volume-I of the tender document and addenda issued in this respect.

7. Extension of Completion Date:

The contractor shall not claim any price escalation, in case the completion period is extended for any reason, including litigation or force majeure conditions and is governed by clause 5.3.6 in Volume-I of tender document.

8. Liquidated Damage:

Liquidated Damage will be governed by the clause 5.3.9 of tender document Volume I.

9. Execution of Agreement:

The Contractor shall execute a tripartite agreement in Kerala Government Stamp paper worth Rs. 4,070/- (Rupees Four Thousand and Seventy only) after furnishing a Bank Guarantee of Rs 4,07,000/- (Indian Rupees Four Lakhs and Seven Thousand only) i.e. 10% of the Contract value rounded off to the higher multiple of Rs 1000/-, within 15 days from the date of issue of Letter of Award of contract, with KSEBL and District Panchayath Kasaragod as First and Second party respectively, as per the terms and conditions set forth in the Bid document. After execution of the tripartite agreement the successful bidder shall be known as 'EPC Integrator'. The tripartite agreement has to be executed by the contractor in the prescribed format in Form-B of Contract Tripartite agreement of this document, along with the performance security deposit at the Office of the Chief Engineer (Renewable Energy & Energy Savings), on a date and time to be mutually agreed. The contractor shall provide for signing of the contract, 2 additional copies of contract agreement, 2 copies of Bank Guarantee in lieu of Performance security deposit, appropriate power of Attorney and other requisite documents. All the documents cited in clause No. 30 of this

document will form part of the agreement. Power of Attorney shall be in stamp paper attested by a registered Notary Public.

10. Construction Programme:

Within 15 days from the date of award, the contractor shall submit to the KSEBL for approval, a programme showing the general method, arrangements, order and timing for all the activities involved in the work in a systematic manner based on planning technique and tool like PERT /CPM in MS (Projects) and GANTT chart indicating the critical events/paths and milestones.

The contractor shall carryout the works in accordance with this programme and as approved by KSEBL, and complete them in all respects to the full satisfaction of KSEBL.

Any change to the approved work plan due to unavoidable circumstances shall be made only with the prior approval of KSEBL.

11. Terms of Payment:

The payment condition is governed by clause 5.2 in Volume-1 of the tender document and addenda issued in this respect.

a. The Contractor has to produce Bank Guarantee for an amount of 10% of the Contract amount as Performance Security Deposit at the time of executing Contract Agreement.

b. 30% of the contract value excluding O&M, will be released to the contractor as cost of major components of the plant (PV modules, Inverters and module mounting structures) after delivery of this materials at site, inspection and verification by authorized departmental officers, and production of insurance certificates for the materials delivered at site. The Engineer-in -charge is to be informed about the delivery of material one week in advance by the contractor.

The Engineer in charge shall ensure the site acceptance / rejection of the received material at site within three days of delivery of material along with submitting the SAT procedure of the delivered material from the vendor by the contractor. The invoices shall be submitted by the contractor as per the accepted price schedule which is to be verified and made ready for release of payment within 15 days of receipt of the invoices subject to the satisfaction of the above conditions.

c. 100% of the total Contract amount except Operation and Maintenance charges will be released after satisfactory completion, testing, commissioning of the Solar PV Power plant after proving the Performance ratio (AC) as per clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect. The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per Clause 2.2.3 of tender document Volume-1 and addenda issued in this respect) after completing the project within 06 months.

The invoices shall be verified and final payment may be released within 3 months of receipt of the invoices subject to the satisfaction of the above conditions.

d. The Operation & Maintenance charges will be released by KSEBL, after commissioning and demonstration of the specified Performance ratio (AC) by the Contractor as per clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect, at the end of each year during O&M period (5 years).

e. The performance security amount shall also be released in equal installments each year (O&M period) from the date of handing over the project after demonstrating the specified Performance ratio (AC) by the Contractor (as per Clause 2.2.3 in Volume-1 of the tender document and addenda issued in this respect).

f. The Quoted taxes and duties etc as governed by GST will be released subject to an undertaking from the Contractor in Kerala Government Stamp paper that "If any dispute in payment of taxes and duties etc as governed by GST from concerned Tax authorities occurs in future, the Contractor shall indemnify KSEBL from such liabilities and the Contractor shall be liable for the additions, loss or cost on account of such discrepancies / dispute".

12. Advance Payment:

No amount shall be released as mobilisation advance.

13. Performance security deposit:

The performance security deposit is governed by clause 5.1.7 in Volume-1 of the Tender document.

The Contractor shall submit Performance security deposit as Bank Guarantee at the time of execution of tripartite agreement in the prescribed format (Annexure 2) for performance security of the Contract and it shall be an amount equal to 10% of the total Contract amount rounded off to the higher multiple of Rs 1000/- i.e. Rs 40,7000/- (Indian Rupees Four Lakhs and Seven Thousand only). In order to cover the liabilities under the contract and to ensure sufficient guarantee to cover all possible liabilities pertaining to defects, shortfalls, remedial measures arising out of poor workmanship, materials, loss, excess amount, risk and cost of Contractor in case of alternate arrangements and any type of dues to KSEBL, an amount as prescribed by KSEBL shall be collected and retained from the Contractor towards Performance Security of the Contract.

The Bank Guarantee shall be initially valid from the date of agreement for a period of 2 years and be kept renewed from time to time till the end of defect liability period including Operation & Maintenance. The performance security Bank Guarantee will be released in equal installments each year after demonstration of desired performance ratio (AC) (as per clause 2.2.3 of tender document vol-1 and the addenda issued in this respect) during the defect liability period. The performance ratio (AC) (as per Clause 2.2.3 of tender document vol-1 and addenda issued in this respect) will be calculated based on data from pyranometer/ Meteonorm / Pyrheliometer data. Failure of the successful bidder to submit the required Performance Guarantee shall constitute sufficient grounds for termination of Contract & forfeiting the EMD.

No interest will be paid by KSEBL at any stage of contract on the Performance Security.

The performance ratio (AC) (as per Clause 2.2.3 of Vol-I of the tender document and the addenda issued in this respect) can be checked at any time in between if deemed necessary by the Engineer in charge. If any unusual degradation is noticed in the Performance Ratio, the contractor shall attend and rectify the same within 24 hours on intimation. If not the performance security deposit will be forfeited.

14. Payment Authority and Engineer-in-Charge:

Engineer in Charge –Engineer authorized by Chief Engineer (Renewable Energy & Energy Savings). The Engineer-in-Charge may delegate powers to the subordinate officers in respect of execution of work such as Site supervision of Electrical works and arrangements for interconnection facility, Technical support and civil supervision.

The work shall be treated completed only when the Engineer-in- charge issues certificate of completion where the actual date of completion of work will be mentioned. In case of termination or foreclosure the Engineer-in-charge will issue the certificate of completion to that effect. If the contractor fails to complete any part of the work as required for satisfactory completion before taking over and / or the date of completion specified, and fails to remove the surplus materials, the KSEBL will complete the works and remove the surplus materials etc and the amount incurred for the same will be realized from the contractor from any amount due to him from this work or any other work with KSEBL or his assets in appropriate proceedings. The contractor will not have any claim over the surplus materials so removed by the KSEBL.

The contractor shall submit bills in Triplicate to the **Engineer-in-Charge** with all supporting documents as indicated in the relevant clauses in Volume I of the bid document.

15. Manufacturing Schedule:

Contractor shall specify all basic design details, including details of the PV modules and the support structures, inverters, cables, online monitoring, integration and power evacuation details with existing power system, with appropriate diagram and drawings. The drawings along with detailed structure design and material selected as per the relevant standards, all guaranteed technical particulars, details of each items, make, model number and specification conforming to relevant standards, entire drawings, detailed test reports, list of O & M spares for major materials, detailed Bill of materials and Priced Bill of Quantities in respect of materials/equipments and works for the entire Project shall be submitted within 15 days of receipt of this LoA.

All materials and equipments required for successful completion and commissioning of the project must be included. The design details and other accessories should adhere to and match with the technical specifications provided in the Volume III of the tender document and as per the Guaranteed Technical Particulars offered by you.

The Contractor shall submit all the appropriate diagram and drawings to the agreement authority for approval. Also specifications of major items such as PV modules, inverters etc shall be submitted to the Agreement authority for approval. Approvals for Layout of Power Plant Installation shall be provided by the Engineer-in-Charge prior to the submission of all the drawings.

Energy meter provided for the installation of the solar PV plant shall be in accordance with the regulations and technical specifications of KSEBL.

The contractor shall provide all MAFs (Manufacturer's Authorization Forms) for all the components specified in the bid within 15 days and before executing the Contract Agreement.

16. Drawings and documents

The design documents to be submitted by the contractor will include but not limited to:

- I. DC cable size calculation
- II. DC cable specification
- III. DC cable schedule, voltage drop and power loss calculation
- IV. String monitoring unit specification
- V. DC earthing & pit calculation
- VI. Lightning protection details / specification
- VII. All technical specification of AC components
- VIII. Cable schedules

Contractor shall furnish the following drawings under this contract and has to obtain approvals.

- a. Shadow analysis of the roof
- b. General arrangement and dimensional layout
- c. Schematic drawing showing the SPV panels, Power conditioning Unit(s) / inverter, Junction Boxes, AC and DC Distribution Boards, meters etc.
- d. Layout of solar PV Array and Single line diagram.
- e. Mounting structure drawing
- f. Structural drawing along with foundation details for the structure.
- g. Location specific Itemized bill of material for complete SPV plant covering all the components and associated accessories.
- h. Sizes and specification of cables between array interconnections, array to junction boxes, junction boxes to Inverter etc. shall be furnished
- i. PV Syst simulation report of the combination offered PV modules with the offered inverters shall be furnished to the agreement authority for approval.

The drawings along with detailed structure design and material selected and their standards shall be submitted to agreement authority for approval before starting the execution of the work. The work will be carried out as per the approved design.

The contractor shall provide necessary drawings and documents required by statutory authorities and obtain the approval before taking up erection.

17. Quality Assurance:

Strict compliance with the approved and proven & established quality assurance systems and procedures during the different stages of the project starting from sizing, selection of make, storage (at site), during erection, testing and commissioning have to be ensured by the contractor.

PV modules should have valid qualification test (as per STC) certificate as per IEC 61215 and IEC 61730 -1&2 and IEC 61701. The inverters should comply with applicable IEC/ equivalent BIS standard for efficiency measurements and environmental tests, safety standards and characteristics of the utility interface (Parallel operation) as per standard codes IEC 61683 and IEC 60068 2(1,2,14,30) and IEC 62109-1&2 and IEC 61727 respectively. Inverter shall be provided

with protection against islanding of Grid as per IEEE 1547/UL1741/62116 to isolate it from the grid in case of no supply, under voltage and over voltage conditions so that in no case there is any chance of accident. The module mounting structure shall be as per latest BIS and galvanization of mounting structure shall be in compliance of BIS 4759 (amended up to date).

The type test certificates shall be verified by KSEBL while conducting factory inspection tests. The contractor shall furnish detailed quality procedures for the major components for approval prior to the Factory inspection call. The agreement authority will provide the approvals regarding the test to be conducted during the inspection.

The following minimum tests shall be conducted on the required number of samples as is required by the Engineer-in-charge, during the Factory inspection:

For PV modules:

1. Visual inspection
2. Dimensional Check
3. Insulation Resistance
4. Leakage Current
5. Electrical Test(with sun simulator)
6. RFID verification
7. Electroluminescence tests
8. Robustness of termination

For Inverters:

1. Visual inspection
2. Dimensional and Power Wiring Check.
3. Auxiliary functional check.
4. Fan direction of rotation, On-Off control, etc
5. Functionality test of relays
6. Command checks.
7. Protection function checks.
8. AC under voltage, AC over voltage, AC under frequency, AC over frequency
9. Load tests simulation 25%, 50%, 70% and 100%
10. Load test performed at variable MPPT voltage @100% load on the specified voltage range.
11. Over temperature, ground fault simulation

For Module mounting structures:

1. Visual inspection
2. Dimensional Inspection
3. Functional fitments

The Contractor shall submit letters of inspection calls sufficiently in advance specifying the date and venue of inspection to the agreement authority through the Engineer-in-Charge. All the major components should undergo factory inspection tests.

The agreement authority shall arrange inspection of material/ equipment and upon satisfactory completion of the inspection and tests; the Material Dispatch Clearance Certificate will be issued.

The test and Inspection shall be done in accordance with the relevant standards and the Manufacturer's standard before the delivery to site as well as after the erection and commissioning at site.

All acceptance and routine tests of equipment as per the specification and relevant standards shall be carried out by the contractor. Agreement authority or authorized officials may undertake the quality checks during the manufacturing stages also.

Functional testing and erection of equipments shall be carried out by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge and the approvals will be given only if the same is satisfactory.

Engineer-in-Charge shall conduct visual inspection including dimensional checks, verification of serial numbers, RFID reading of PV modules etc for the Site Acceptance of the delivered materials based on the BOM. Any material or work found to be defective or which does not meet the requirements of the specification will be rejected and shall be replaced at the Contractor's cost.

18. Review and Progress report:

The contractor shall submit monthly progress report to Engineer-in-Charge and all concerned personnel in connection with this order, with a copy to this office. The Engineer-in-Charge will co-ordinate and monitor all activities of the project. These progress report formats may be changed as and when required by KSEBL.

The contractor shall produce an updated Activity Schedule within 14 days of being instructed by the KSEBL.

19. Technical parameters for getting grid connectivity:

- a. Harmonic current injections from a plant shall not exceed the limits specified in IEEE 519 2014 as per CEA technical standard for connectivity of the distributed generation resources.

Individual voltage harmonics distortion	< 3 %
Total Voltage harmonic Distortion THD	< 5%
Total Current harmonic Distortion	<8%
Output frequency	= 50Hz +/- 0.5Hz

- b. Photovoltaic system should not inject DC power more than 0.5% of full rated output at the interconnection point or 1% of rated inverter output current into distribution system under any operating conditions
- c. Operation of Photovoltaic system shouldn't cause voltage flicker in excess of the limits stated in IEC 61000 or other equivalent Indian standards, if any
- d. While the output of the inverter is greater than 50%, a lagging power factor of greater than 0.9 shall be maintained.
- e. The Photovoltaic system in the event of voltage or frequency variations must island/disconnect itself within IEC standard on stipulated period.
- f. The voltage-operating window should minimize nuisance tripping and should be under operating range of 80% to 110% of the nominal connected voltage beyond a clearing time of 2 seconds, the Photovoltaic system must isolate itself from the grid.
- g. When the Distribution system frequency deviates outside the specified conditions (50.5 Hz on upper side and 47.5 Hz on lower side up to 0.2 sec), the Photovoltaic system shouldn't energize the grid.

20. Testing and Commissioning:

Commissioning test with all required testing shall be conducted by the contractor in presence of KSEBL officers delegated by the Engineer-in-Charge.

The contractor shall also prepare and handover the as-built drawing, Operational manuals and Maintenance manuals of the plant and hand over to KSEBL.

On completion of all works stipulated in the scope of work and after testing and commissioning of the Project, and if there are no obligations to arise out of the Contract, KSEBL shall issue a completion certificate as described under Clause 5.3.3 of Tender document Volume 1.

21. Operation and Maintenance (O&M):

Operation and Maintenance is governed by clause 6.9 in Volume-1 of the tender document.

Operation and maintenance of the solar plant up to the point of supply for a period of 5 years of Defects Liability period is the responsibility of the Contractor.

Operation and Maintenance during this period shall include supply of spares of panels, inverters and all equipments in the solar plant including transportation of these items from the original manufacturer, consumables, general comprehensive insurance covering fire, earthquake.

The solar plant should be maintained shadow free. The tree branches if any causing hindrance to the shadow free operation of solar plant shall be cut and removed with the concurrence of Collectorate authorities. Copies of the Insurance Policies are to be given to KSEBL as and when taken.

The contractor shall ensure efficient operation of the SPV plant and the associated facilities to achieve the maximum power generation from the plant. For this purpose the contractor shall engage the services of adequate number of Engineers and Technicians. The contractor shall also attend to all failures, rectifications, breakdowns, 5 year comprehensive Operation and Maintenance checks.

Adequate training should be given to personnel identified by KSEBL for Daily Monitoring Information like solar energy generated, net meter readings etc. Monthly System (MIS) reports with

generation and down time analysis data has to be sent to KSEBL, REES by E-mail during the defect liability period. Any discrepancy/malfunctioning noted shall be immediately attended to and got rectified by the contractor.

The Contractor should not misuse the land and buildings in the project site and assign responsibility for the safety of machinery within the premises.

22. Annual Maintenance Contract (AMC):

The plant shall then be handed over to KSEBL after commissioning. After five years from the date of commissioning, the EPC contractor may be asked to execute the AMC for another 5 years on mutual agreement at mutually agreed price.

The EPC contractor shall execute the AMC agreement as per conditions stipulated at that time.

23. Performance & Warrantee:

The mechanical structures, electrical works and overall workmanship of the Solar Power plant must be warranted for a minimum of 10 years. PV modules used in solar power plant must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

EPC contractor shall ensure the performance ratio of each location as detailed in the Clause 2.2.3 of Tender document Volume-1 and addenda issued in this respect.

24. Generation Assessment

The performance ratio (AC) of each location shall range from 75- 80% as per clause 2.2.3 of Tender document Volume-1 and addendum's issued in this respect. Performance ratio test as per IEC 61724 will be carried out at site jointly by the EPC contractor in presence of authorized officials of KSEBL. This is mandatory for commissioning and handing over the plant. If the contractor fails to prove the desired performance ratio at the time of completion and during any of the consecutive years of defect liability period he will be given a second chance to demonstrate the PR in another 7 days. Still if it is not achieved, the same shall be demonstrated in another 7 days and still if it is not achieved, EPC contractor shall enhance the module capacity of solar plant/ improve the quality of the plant by replacement of module/ other components with all suitable modification requirements on balance of systems at his own cost to achieve the stipulated Performance ratio.

Operation and maintenance charges shall be released at the end of each year based on the Performance ratio (AC) as mentioned above, as per the table given below.

Sl.No	Particulars	Performance ratio (AC) in %
1	At the time of completion and commissioning	75-80
2	At the end of 1 st year	74-79
3	At the end of 2 nd year	73-78
4	At the end of 3 rd year	72-77
5	At the end of 4 th year	71-76
6	At the end of 5 th year	70-75

25. Handing over:

After the date of successful commissioning of the Project, the Contractor shall hand over the complete Solar PV Electric Power Generation system to LSGD Kasaragod as specified in the tender within 15 days. Any component found defective/inefficient/worn out shall be rectified/ replaced/ made good at contractor's cost before handing over the system to LSGD Kasaragod. In order to ensure longevity & safety of the core equipment and optimum performance of the system the Contractor should use only genuine spares of high quality standards. Contractor has to maintain the rooftop SPV plant till the end of the contract period of five years from the date of handing over.

The contractor shall provide the named list of essential tools and spares required for the future operation and maintenance of the plant.

After handing over of the 7 sites, The contractor shall execute a separate O&M Bilateral Agreement with LSGD Kasaragod as the first party.

26. Termination of Contract:

Termination of Contract will be guided strictly in accordance with clause 5.3.11 in Volume-1 of the tender document.

27. Force Majeure:

Force Majeure shall be governed by Clause. 5.3.8 in Volume I of the tender document.

28. Defects Liability Period:

The Defect Liability Period shall be governed by Clause.5.3.4 in Volume I of the tender document.

29. Law and Jurisdiction:

This contract has to be performed complying with the laws of India and Kerala and any dispute arising out of this contract will be subject to the exclusive jurisdiction of Civil Courts at Thiruvananthapuram.

30. Contract Documents

1. Agreement executed in Kerala Government Stamp Paper
2. Letter of Award (duly signed and seal affixed on all pages)
3. Correspondences between the KSEBL and the selected bidder included in the Agreement.
4. Special Conditions of Contract.
5. General Conditions of Contract.
6. Technical specifications.
7. Accepted Schedule of Technical Particulars and construction programme & Manufacturer Authorization form of Components.
8. Accepted Schedule of Prices
9. General Bid conditions

10. Instructions to bidders.
11. Information to bidders.
12. Detailed Structural Drawings including approved drawing issued from time to time.
13. All volumes of bid with Tender No :KSEB/ REES/ LSGD- Kasaragod phase III/70kVp/14/2019-20 dated 08-06-2020 having Tender ID :2020_KSEB_362941_1 and its addendums along with clarifications and related documents issued by the Tendering Authority.
14. Response (proposal) of M/s Inket Limited, Building No.vi/832c, First floor, Inket centre, Thrikkakara grama panchayat, Ernakulam ,Cochin, Kerala- 682021, including the Bid, Clarification documents and the accepted rate submitted.

31. Acknowledgment by the Contractor:

This Letter of Award is issued subject to the documents referred above and terms and conditions contained therein. You will also be deemed to be fully aware of KSEBL's **General conditions of contract** which is applicable to this contract also and ignorance of these conditions will not exempt you from your liability to abide by the same.

If there is any contradiction/conflict between the tender documents and LoA, conditions in the LoA will prevail.

The documents specified in Clause 10 and 15 shall be submitted within 15 days from the date of issue of this LoA

WORK ORDER

Sir,

Sub: ANERT- Work Order for the Design, Supply, Installation, Testing Commissioning along with Operation and Maintenance of 100 kW Grid connected SPV Power Plant at Kerala Government Secretariat, Thiruvananthapuram (funded by Smart City Thiruvananthapuram Ltd)- reg

- Ref: 1. Tender ID: 2020_ANERT_400694_1
2. Your Bid No. 998856 dtd 13/01/2021

Attention is invited to the references cited. Your offer for the Design, Supply, Installation, Testing Commissioning along with Operation and Maintenance of 100 kW Grid connected SPV Power Plant at Kerala Government Secretariat, Thiruvananthapuram (funded by Smart City Thiruvananthapuram Ltd) is accepted. You are requested to carry out the work as detailed below subject to the following terms and conditions.

#	Site of Instalaltion	Capacity (kW)	Total
1	Government Secretariat (Annex Complex - 1)	50	19,60,145.55
2	Government Secretariat (Annex Complex - 2)	50	19,60,145.55
TOTAL			39,20,291/-
<i>Rupees Thirty-Nine Lakhs Twenty Thousand Two Hundred and Ninety-One only</i>			

An agreement has to be executed by you in the prescribed form (enclosed as Annexure - I) on Kerala Stamp paper worth Rs. 200/- within 7 days of the receipt of this work order for the fulfilment of the contract along with a security deposit of Rs.

Law College Road, Vikas Bhavan P.O., Thiruvananthapuram, Kerala - 695 033 Phone: +91 471 - 2338077,
2334122, 2333124, 2331803 Fax: +91 471 - 2329853
Web: www.anert.gov.in E-mail: info@anert.in © Market place: www.bnymysun.com

1,96,015 /-(Rupees One Lakh Ninety-Six Thousand and Fifteen only) being the 5% of contract value of **Rs. 39,20,291 /-** on Demand Draft/Bank Guarantee in favour of Director, ANERT. You have to pay all expenses incidental to the execution of the above agreement. Another agreement must be provided before the start of the O&M period and the formats shall be provided during the commissioning of the SPV Power Plant.

1. SCHEDULE OF SUPPLY, INSTALLATION & COMMISSIONING:

- i. The Items should be delivered and installed at the Roof top of the Annex Complexes of Kerala Government Secretariat as specified by ANERT, under prior intimation and supervision of ANERT.
- ii. The Design and Engineering for the Solar Power Plants considering all the site aspects at the Annex complex along with shade analysis reports should be provided within 14 days of the issue of this work order. The detailed Engineering drawings as mentioned in the tender also be submitted prior to start of works.
- iii. Supply of the main components such as SPV module, PCU and charge controller should be from the approved component list published in ANERT Website.
- iv. The agency shall submit the timeline for completion along with the agreement and security deposit. This timeline must be followed and no extension of time for completing the installation will be granted. Although, time extension may be granted for things beyond the control of your agency.
- v. The detailed Bill of Materials along with datasheets & Test certificates of PV Modules (Mono PERC), Grid Tie Inverter etc must be provided well in advance and must be approved by ANERT before material despatch.
- vi. The Supply, Installation and Commissioning of the Power Plant must be completed within **45 days from the date of issue of work order.**
- vii. The Testing and Commissioning of the Power Plant must be completed within **60 days from the date of issue of work order.** This is the time period for handing over the system to ANERT with Grid connectivity and no time extension in this regard without valid reasons will be entertained.
- viii. The additional works/requirements at the site as mentioned in the Tender and the corrigendum issued thereafter need to be completed.
- ix. Penalty for delay in supply and installation will be imposed at 0.5 % per week up to a maximum 10 %. In case of delay in supply and installation, Director, ANERT may cancel the contract and take recourse to other action as deemed appropriate.

2. INSTALLATION

- i. The installation work of the solar power plant must be in compliance with the Technical Requirements and Standards as mentioned in the Tender.

- ii. A display board (size 30cm x 20cm) should be displayed with contents to be provided by the concerned official at ANERT is to be placed at the site.

3. OPERATION AND MAINTENANCE

- i. For the optimal operation of a PV plant, maintenance must be carried out on a regular basis. All the components should be kept clean. It should be ensured that all the components are fastened well at their due place.
- ii. The service personnel should visit the installations at least once a month for preventive maintenance even if no faults are reported. Reports of these preventive maintenance visits and generation data should be submitted to the concerned ANERT District Office on a quarterly basis.
- iii. Maintenance guidelines for various components viz. solar panels, inverter, wiring etc. are provided in annexure - III. The O&M part is not limited to the guidelines but includes all the activities required for the smooth functioning of the Power plant for a period of 5 years. Provision for cleaning the panel must be made along with installation.

4. PAYMENT

A. No advance payment will be given. Payment will be released on receipt of invoices and successful installation and commissioning of power plant along certified by the authorised personnel of ANERT along with the Project completion report in format attached as annexure - IV

B. The terms of payment shall be:

B1 EPC Payment

- i. 2.5 % of the invoice amount shall be charged by ANERT as non-refundable license fee and the remaining amount shall be treated as contract value for further payment.
- ii. Upon delivery of major components at the respective site, 30 % of the contract value will be released as first part payment, if requested. The supplier shall submit the invoice for the materials supplied duly certified by the concerned District Office along with a report regarding the supply of materials.
- iii. On completion of the installation of power plant and filing application for connectivity, 30% of the contract value shall be released as part payment. The supplier shall submit the invoice for the materials supplied and all documents related to the completion of the work certified by the District office shall be submitted for the release of the amount.
- iv. On commissioning of the grid connected system, 30% of the remaining contract value will be released. All documents related to the completion of the work including commissioning report shall be submitted for the release of the amount.

- v. The remaining 10% shall be retained as performance security and will be released as given below. This period will be considered only from the date of commissioning. This can be released against a bank guarantee of equivalent amount valid for 5 years.
 - a. 50% of performance security shall be paid after one year on request along with the preventive maintenance reports.
 - b. The remaining 50% shall be paid after the five-year warranty period on request along with the preventive maintenance reports for the 5 years.
- vi. The security deposit of 5% furnished along with the contract agreement shall be released on successful completion of supply, installation and commissioning.

B2. O&M Payment

- i. The O&M charges for the 5 years shall be released on submission of DD/Bank Guarantee for the equivalent amount taken in the name of Director, ANERT revocable through SBI, Pattom Branch. In case of BG, the same is to be submitted for each of the years and the same will be released after the period is expired. Hence, the BGs submitted must be valid for periods ranging from 1 to 5 years.
- ii. The amount shall be released on annual basis after completion of the O&M period of the previous year. The start of O&M period will be considered from the scheduled date of operation.
- iii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of O&M payments.
- iv. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.
- C. Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

5. WARRANTY

- i. 5 years' warranty should be provided by the supplier for the system and components or part of the system has to be provided
- ii. PV modules used in solar power plants/ systems must be warranted for their output peak watt capacity, which should not be less than 90 % at the end of 10 years and 80% at the end of 25 years
- iii. The Warranty Card to be supplied must contain all the details of the system supplied. The OEM warranty card of all the equipment must also be submitted along with the warranty certificate issued in your letter head.

6. OPERATION MANUAL

- i. An Operation, Instruction and Maintenance Manual, in English and Malayalam should be provided with the system.

- a. The following minimum details must be provided in the manual:
- b. About solar power plant – its components and expected performance.
- c. About PV module
- d. About electronics
- e. About charging and significance of indicators
- f. DO's and DON'T's
- g. Clear instructions on regular maintenance and troubleshooting of solar power plant
- h. Name and address of the contract person in case of non-functionality of the solar power plant.

7. SERVICE AND MAINTENANCE

- i. The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation.
- ii. Any Delay in servicing beyond 7 days of fault reporting would attract penalty at the rate of at the rate fixed by Director, ANERT and further actions will be initiated against the agency.
- iii. A designated contact Telephone Number and address should be submitted for reporting faults during the warranty period.

8. INSURANCE

The power plant must be insured at every stage of operation – from Material dispatch, storage, completion of installation and till 5 years after commissioning. The insurance coverage on handing over of the system must include all conditions of **Standard Fire and Special Perils Policy (Material Damage)**. The insurance premium for the 5 years of warranty is to be paid by your agency. On handing over of the system, the original insurance policy is to be handed over to the authorised person at ANERT District Office. The annual premium payment receipt must be handed to the authorised person at the District Office of ANERT.

Not Withstanding the terms and conditions stipulated above, it is to be noted that the conditions in the tender document shall prevail;

Yours faithfully

General Manager

An IS 15700 : 2005 Certified Department

Proceedings of the
 Deputy Chief Electrical Inspector
 Thiruvananthapuram
Present: Jayakrishnan K A

Subject: Installation of 50 kWp Solar at the premises of Kerala Government Secretariat Annexe II, Statue, Thiruvananthapuram, 695001 - Sanction for energisation orders issued - regarding.

Reference:

1. Scheme Approval No. B5-00728/21/EIT dated 10.02.2021
2. Completion report submitted by DHERSAANS & CO, KARIMKUTTIKARA PO, VAMANAPURAM, TRIVANDRUM, Kerala, 695606 dated received on 15.02.2021
3. Inspection conducted on 24.02.2021
4. Non conformity report dated 01.03.2021
5. Compliance report submitted by DHERSAANS & CO, KARIMKUTTIKARA PO, VAMANAPURAM, TRIVANDRUM, Kerala, 695606 dated 13.03.2021

Order No: B5-00728/21/EIT Dated 23-03-2021

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 and 43 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (3) above, installed at the premises of ,Kerala Government Secretariat Annexe II, Palayam, Thiruvananthapuram, 695001 subject to following conditions and as detailed in the annexure appended

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Date of energisation should be intimated to this office.
5. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and KSERC (Grid interactive distributed solar energy systems) Regulation, 2014.
6. Only authorised person shall be in charge of the operation and maintenance of the installation.
7. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee.
8. As per Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013-Section 5, the prescribed standards and codes of practice should be followed.
9. The mechanically operated isolation switch should have specification prescribed in Sub Section 5.ii.(9) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
10. The tests prescribed under 5 (8) (2), the harmonic measurements should be done using calibrated instrument in a standard laboratory having national intimation traceability with a basic standard instruments.
11. You may conduct tests mentioned in Section 5 (6) 5.ii.1, 2, 3 & 6 in consultation with the licensee and the parameters shall be within the limits as prescribed by Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013 before committing the Solar Supply to Kerala State Electricity Regulatory aid.
12. The tests prescribed by Central Electricity Authority Regulation 2013 should be conducted every year and the results furnished in this department for verification as per Regulation 5.8(2) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
13. The whole installation should be conforming to the stipulation under Kerala State Electricity Regulatory Committee (Grid Technical Distributed Solar Energy System) Regulation 2014 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply in an absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.

5. Compliance report submitted by DHERSAANS & CO, KARIMKUTTIKARA PO, VAMANAPURAM, TRIVANDRUM, Kerala, 695606 dated 13.03.2021

Order No: B5-00727/21/EIT Dated 23-03-2021

Sanction is hereby accorded under section 54 of The Electricity Act, 2003 and Regulation 32 and 43 of the Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010 for the energisation of the installations covered under completion report read as (3) above, installed at the premises of ,50KWp Solar at Kerala Government Secretariat Annexe-I, Palayam, Thiruvananthapuram, 695001 subject to following conditions and as detailed in the annexure appended

1. Supply from the Solar Panel should not be extended out of the premises.
2. Any addition or alteration to the existing installation shall be carried out only after getting prior written approval from this office.
3. The owner should rectify any defects that may be pointed out during subsequent inspection of the installation by the Electrical Inspector.
4. Date of energisation should be intimated to this office.
5. The whole installation should be in conformity with CEA (Technical Standards for connectivity of the distributed generation resources) Regulation, 2013 and KSERC (Grid interactive distributed solar energy systems) Regulation, 2014.
6. Only authorised person shall be in charge of the operation and maintenance of the installation.
7. Power allocation for additional loads, if necessary, should be obtained from KSEB/Licensee.
8. As per Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013-Section 5, the prescribed standards and codes of practice should be followed.
9. The mechanically operated isolation switch should have specification prescribed in Sub Section 5.ii.(9) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
10. The tests prescribed under 5 (8) (2), the harmonic measurements should be done using calibrated instrument in a standard laboratory having national intimation traceability with a basic standard instruments.
11. You may conduct tests mentioned in Section 5 (6) 5.ii.1, 2, 3 & 6 in consultation with the licensee and the parameters shall be within the limits as prescribed by Central Electricity Authority (Technical standards for Connectivity of the Distributed Generation Resources) Regulation 2013 before committing the Solar Supply to Kerala State Electricity Regulatory aid.
12. The tests prescribed by Central Electricity Authority Regulation 2013 should be conducted every year and the results furnished in this department for verification as per Regulation 5.8(2) of Central Electricity Authority Regulation (Technical standards for Connectivity of the distributed generator resources) 2013.
13. The whole installation should be conforming to the stipulation under Kerala State Electricity Regulatory Committee (Grid Technical Distributed Solar Energy System) Regulation 2014 to ensure the safety of associated equipments and operating personnel at the premises as well as the KSEB personnel working on their system after switching off the grid supply. The protection incorporated in the solar in restore, switching off the output when grid supply in an absent should be ensured by the owner of solar system and he/she would be safely responsible for any accident in case of failure violation of the same.

Agency for New and Renewable Energy Research and Technology

(Department of Power, Government of Kerala)

No. ANERT-TECH/43/2020-PE2(RTS)

To

M/s INKEL Limited
7/4732A-5&6, Ajiyal Complex
Post office Road, Kakkanad
Cochin - 682030

WORK ORDER

Sir,

Sub: ANERT- Work Order for the Operation and Maintenance of 100 kW Grid connected SPV Power Plant at Kerala Government Secretariat, Thiruvananthapuram - reg

- Ref: 1. Tender ID: 2020_ANERT_400694_1
 2. Your Bid No, 998856 dtd 13/01/2021
 3. ANERT Work Order No of even number dtd 22/01/2021

Attention is invited to the references cited. With reference to the tender under reference, your agency has completed the Design, Supply, Installation, Testing and Commissioning of 100 kW Grid connected SPV Power Plant at Kerala Government Secretariat, Thiruvananthapuram (funded by Smart City Thiruvananthapuram Ltd). Further, your agency is awarded the Operation and Maintenance of the Power Plant for a period of 5 years. You are requested to carry out the work as detailed below subject to the following terms and conditions.

O & M Charges for the 100 kW SPV Power Plant at Govt. Secretariat, Thiruvananthapuram Annex Complex - 1 & 2		
#	ITEM	Total
1	O&M Charges for the First Year	35,400
2	O&M Charges for the Second Year	35,400
3	O&M Charges for the Third Year	35,400
4	O&M Charges for the Fourth Year	35,400
5	O&M Charges for the Fifth Year	35,400

Total	1,77,000/-
Rupees One Lakh Seventy-Seven Thousand only	

An agreement has to be executed by you in the prescribed form (enclosed as Annexure - I) on Kerala Stamp paper worth Rs. 200/- within 7 days of the receipt of this work order for the fulfilment of the contract. You have to pay all expenses incidental to the execution of the above agreement.

I. SCOPE OF WORKS

- A. Scheduled/ Preventive maintenance works for the Power Plants
- B. The contractor shall ensure trouble free operation of the Solar PV Power Plants by undertaking scheduled maintenance of the plant as per the recommendations of the respective OEMs/vendors of component items. The components of the solar PV plant shall be checked for loose connection/heating and the same shall be rectified. Troubleshooting and repair of the solar PV plant shall be done by the contractor. The contractor shall submit a detailed PM schedule of the plant within 15 days of placement of PO. The schedule shall be approved by ANERT.
- C. During the inspection/maintenance schedule, the equipment in the solar PV plant will be thoroughly checked for proper operation, cleaned and serviced.
- D. Scope of regular maintenance work:
 - i. Periodicity of maintenance: Every month Maintenance work to be carried out (Details of activities to be done is attached as annexure – II)
 - ii. The vendor will depute his Service team at least once a month testing/checking of the solar system.
 - iii. Checking and tightening all wiring connections in PV arrays and electrical cables in PCU, earthing and lightning protection system
 - iv. Checking of proper functioning of PCU and recording all parameters, including any Fault/incipient fault.
 - v. Troubleshoot faults, if any, and rectify the same- if the fault cannot be rectified, the maintenance team will inform Institute and contractor. Contractor will arrange for rectification of the fault with the help of OEM/expert. Spares for regular/breakdown maintenance will be in contractor's scope
- E. In case of any faults/ other problems not directly connected to the solar PV plant, the same shall be reported to concerned electrical engineer/Junior Engineer/supervisor.
- F. The contractor shall check the solar PV plant for any damage and ingress of water.

- G. Following reports shall be submitted by the contractor in hard copy during the periodic visits:
- i. Healthiness/problems of solar PV plant (as per solar PV plant OEM(s)' guidelines)
 - ii. Operation checked status (of all components of the solar PV plant, changeover system etc.)
 - iii. Report attended and action taken (in details) for malfunctioning solar PV Plant
 - iv. Any other relevant point
- H. The starting date for annual maintenance service shall be the date on which the plant shall be handed over to Institute to their full satisfaction.
- I. Any other points specifically not mentioned in the supply, installation and commissioning and annual maintenance services, but required for successful operation shall be in the scope of the contractor.
- J. Any spares/serviceable parts/replacement parts required to put the defective plant back into service shall have to be supplied by the contractor without any cost to Institute.

2. OPERATION AND MAINTENANCE

The Maintenance guidelines for various components viz. solar panels, inverter, wiring etc. are discussed below:

2.1 SOLAR PV PANELS

Although the cleaning frequency for the panels will vary from site to site depending on soiling, it is recommended that

- a. The panels are cleaned at least once every thirty days.
- b. Use water and a soft sponge or cloth for cleaning.
- c. Do not use detergent or any abrasive material for panel cleaning.
- d. Iso-propyl alcohol may be used to remove oil or grease stains.
- e. Do not spray water on the panel if the panel glass is cracked or the back side is perforated.
- f. Wipe water from module as soon as possible.
- g. Use proper safety belts while cleaning modules at inclined roofs etc.
- h. The modules should not be cleaned when they are excessively hot. Early morning is particularly good time for module cleaning.
- i. Check if there are any shade problems due to vegetation or new building. If there

- are, make arrangements for removing the vegetation or moving the panels to a shade-free place.
- j. Ensure that the module terminal connections are not exposed while cleaning; this poses a risk of electric shock.
- k. Never use panels for any unintended use, e. g. drying clothes, chips etc. | Ensure that monkeys or other animals do not damage the panels.

2.2 CABLES AND CONNECTION BOXES

- a. Check the connections for corrosion and tightness.
- b. Check the connection box to make sure that the wires are tight, and the water seals are not damaged.
- c. There should be no vermin inside the box.
- d. Check the cable insulating sheath for cracks, breaks or burns. If the insulation is damaged, replace the wire.
- e. If the wire is outside the building, use wire with weather-resistant insulation.
- f. Make sure that the wire is clamped properly and that it should not rub against any sharp edges or corners.
- g. If some wire needs to be changed, make sure it is of proper rating and type.

2.3 INVERTER

- a. The inverter should be installed in a clean, dry, and ventilated area.
- b. Remove any excess dust in heat sinks and ventilations. This should only be done with a dry cloth or brush.
- c. Check that vermin have not infested the inverter. Typical signs of this include spider webs on ventilation grills or wasps' nests in heat sinks.
- d. Check functionality, e.g. automatic disconnection upon loss of grid power supply, at least once a month.
- e. Verify the state of DC/AC surge arrestors, cable connections, and circuit breakers.

2.4 Inspection and Maintenance Schedule

Component	Activity	Description	Interval
PV Module	Cleaning	- Clean PV modules with plain water or mild dishwashing detergent. - Do not use brushes, any types of solvents, abrasives, or harsh detergents	Monthly or as per site conditions

PV Array	Inspection	• Check the PV modules and rack for any damage. • Note down location and serial number of damaged modules.	Annual
	Inspection	• Determine if any new objects, such as vegetation growth, are causing shading of the array and move them if possible.	Half Yearly
	Vermin Removal	• Remove bird nests or vermin from array and rack area.	Half Yearly
Function Boxes	Inspection	• Inspect electrical boxes for corrosion or intrusion of water or insects. Seal boxes if required. • Check position of switches and breakers. • Check operation of all protection devices.	Annual
Wiring	Inspection	• Inspect cabling for signs of cracks, defects, loose connections, overheating, arcing, short or open circuits, and ground faults.	Annual
Inverter	Inspection Service	• Observe instantaneous operational indicators on the faceplate of the inverter to ensure that the amount of power being generated is typical of the conditions. • Inspect Inverter housing or shelter for physical maintenance, if required.	Monthly
Plant	Monitoring	• Operation and Performance Monitoring	Monthly
Spare Parts	Management	• Manage inventory of spare parts.	As needed

2.5 The faulty system or components should be replaced/ repaired within 7 days of fault reporting. The servicing should be carried out at the site of installation. If any of the components are to be taken out from the site for repair, a standby must be provided to ensure un-interrupted power generation and the systems functions smoothly.

2.6 Any Delay in servicing beyond 7 days of fault reporting would attract penalty at the rate of at the rate fixed by Director, ANERT and further actions will be initiated against the agency.

2.7 A designated contact Telephone Number and address should be submitted for reporting faults during the O&M period of 5 years.

2.8 For the optimal operation of a PV plant, maintenance must be carried out on a period of

5 years.

3. PAYMENT

A. The terms of payment shall be:

O&M Payment

- i. The amount shall be released on annual basis after completion of the O&M period of the previous year. The start of O&M period will be considered from the scheduled date of operation.
- ii. The preventive maintenance reports along with receipt of premium of insurance and generation reports are to be submitted for the release of O&M payments.
- iii. The payment shall be released after the inspection by the authorised personnel of ANERT on annual basis.
- iv. The O&M charges for the 5 years can be released on submission of Bank Guarantee for the equivalent amount taken in the name of Director, ANERT revocable through SBI, Patton Branch. In case of BG, the same is to be submitted for each of the years and the same will be released after the period is expired. Hence, the BGs submitted must be valid for periods ranging from 1 to 5 years.

W. Income tax, contribution to workers' welfare fund and other statutory deductions shall be made from the payment as per prevailing norms.

Not Withstanding the terms and conditions stipulated above, it is to be noted that the conditions in the tender document shall prevail.

Yours faithfully

Chief Technical Manager

Kerala State Electricity Board Limited is pleased to accept your offer and place this Letter of Award (LoA) as EPC contractor for the design, supply, installation, testing and commissioning of 6.5 MWp Grid Tied Rooftop PV Power plants at the identified locations in the State of Kerala including O and M of the plants for 2 years from the date of commissioning.

The contract shall be strictly in accordance with provisions contained in the bid documents, corrigendum cited under reference (1&2) above. This Letter of Award and tender documents will form part of the contract agreement.

Additional conditions/modifications if any, stated in your offer or elsewhere, which are not agreed to by KSEBL or not in accordance with any of the provisions covered by the bid documents referred shall stand withdrawn/nullified.

1. Scope of work:

The scope of work will be governed by clause 2.2.2.1 of tender document Volume-1.

The work includes design as per site conditions, engineering, manufacture/procurement, manufacturer's quality assurance, factory testing, transportation, handling, storage, erection of 6.5 MWp Roof Top Solar Plants at the identified locations in the State of Kerala including all civil/structural works, electrical and general works, piping, cabling, installation, metering, provision for data acquisition with communication facility to Centralized Monitoring System of KSEB Ltd. as specified in Volume-III of the tender document, remittance of grid connectivity fees(Application Fee and Registration Fee), testing, commissioning, training, services, permits/sanction/clearance if any, insurance at all stages of this contract and handing over the grid tied solar PV Plants to State Nodal Officer to its full satisfaction after proving the performance ratio(AC) and mandatory O&M of the plant for a period of 2 years. The defect liability period shall be 5 years from Commercial Operation Date(CoD) for the equipment.

2. Name of the Project:

Soura Project, Phase - I scheme - Design, supply, installation, testing and commissioning of Grid Tied Rooftop PV Power plants on the Roof top of buildings at the identified locations in the State of Kerala including O and M of the plants for 2 years from the date of commissioning and defect liability period for 5 years herein after called "the project".

3. Name of the Agreement Authority:

'Agreement Authority' means State Nodal Officer, Soura Project, Vidyuthi Bhavanam, KSEB Ltd. or any other officer authorized to execute the agreement on behalf of KSEBL with the Contractor for executing the work, herein after called "State Nodal Officer, Soura Project".

4. Name of the Contractor:

M/s INKEL LIMITED, AJIYAL COMPLEX, POST OFFICE ROAD, KAKKANAD, COCHIN
herein after called "Contractor".

5. Contract Plant Capacity:

PART	Awarded Capacity (MWp)
B	2.5
C	2.5
Total	5.0

6. Contract Amount:

The Total Contract Amount is **INR 20,62,35,675/-** (Rupees Twenty Crores Sixty Two Lakhs Thirty Five Thousand Six Hundred and Seventy Five only) as per the scope of work, as all inclusive price for the work, as in Annexure-I.

This amount shall be firm during the period of contract.

7. Taxes & Duties:

The Contract Amount as indicated in clause 6 of this document is inclusive of all Taxes and duties, Freight & Insurance charges, incidental charges and other levies.

8. EPC Agreement:

The EPC Agreement shall be executed within 20 days from the date of issue of this Letter of Award in accordance with the terms and conditions in clause 5.1.1 and format as per Annexure 13 A of the tender document. This agreement shall be the prior document for the work.

The terms and conditions as stated in the EPC Agreement, Letter of Award and Tender document shall be applicable for the contract. For the purpose of interpretation, the priority of the document shall be in accordance with the following sequence.

1. This EPC Agreement;
2. The EPC Order;
3. Letter of Award;
4. Correspondence between the State Nodal Officer and the Contractor
5. Tender Documents

9. EPC Orders.

Separate EPC orders will be issued listing locations ready for taking over by the contractor and such EPC orders shall form part of the EPC contract. The EPC orders will be issued during the period from January 2020 to March 2020.

10. Performance Security Deposit:

The Contractor shall submit Performance security deposit, at the time of execution of agreement in the prescribed format (Annexure 14 of tender document) for an amount of **Rs. 2,06,24,000/- (Rupees Two Crores Six Lakhs Twenty Four Thousand Only)** as Bank Guarantee, which is an amount equal to 10% of the total contract value rounded off to the higher multiple of Rs 1000/-. The terms and conditions shall be as per clause 5.1.8.1 of the tender document.

11. Insurance:

The Contractor shall maintain at its own costs, throughout the duration of this contract (5 years) and any extensions thereof, all mandatory insurance coverage for adequate amount including but not restricted to, theft, damages, comprehensive general liability insurance covering the Solar Plant and accidental losses, bodily harm,

injury, death of all individuals employed/assigned by the Contractor to perform the services required under this EPC Agreement and the occupants of the premises as per clause 5.13.3 of the tender documents and clause 17 of the EPC agreement.

12. Submission of details of equipment , GTP , Drawing and Approval:

The contractor shall furnish Basic design details along with appropriate diagram and drawings as per the tender specifications, Plant protection schemes, integration and power evacuation details with existing power system., material submittal of the PV modules and the support structures, inverters, transformers, cables, (AC & DC), Junction boxes, AC and DC Distribution boards and other materials for the project. He shall provide material sample and obtain material approvals from the State Nodal Officer before offering the materials for inspection and commencement of work. (Cl 6.2, Volume I of tender document.)

13. General Quality requirements of Solar PV Plant shall be as per Volume 3, Cl 1.5 of the tender document.

14. Inspection and acceptance of materials:

The materials shall be offered for inspection, prior to despatch of the same to the locations, as per clause 5.5, Volume I and relevant clauses in Volume III of the tender document.

15. Taking over the location by the contractor and commencement of Work:

Taking over the location and commencement of work shall be as per the conditions prescribed in EPC Agreement and as per the locations listed in the EPC Orders issued from time to time. The EPC Contractor shall open their local offices with sufficient number of staff in each region/regions where the work is awarded within one month of signing the agreement and the details are to be provided to SNO.

On receipt of EPC order, the contractor shall furnish a detailed material procurement and work execution plan in accordance with project completion period, within 7 days from date of receipt of EPC order.

16. Site inspection and Acceptance Test.

All materials and workmanship shall be subject to inspection, examination and testing by the authorized representative of SNO at any and all times during construction at any and all places where such construction is carried out.

17. Work review meetings:

The Contractor shall present the Programme and status at various review meetings as required.

18. Monthly Progress Reports:

This report shall be submitted (e mailed) to the agreement Authority as well as representative of SNO on a monthly basis within Ten Calendar days, covering over all scenario of the work. Report shall include but not be limited, to the following:

- a) Brief introduction of the work.
- b) Activities executed/achievements during the month

- c) Schedule/s Actual percentage progress manufacturing/delivery, sub- contracting, construction and overall work.
- d) Quantum wise status of procurement against schedule shall also be indicated.
- e) Areas of concern/problem/hold ups, impact and action plans.
- f) Resources deployment status.

19. Period of Completion:

The period of completion of plant will be reckoned from the construction start date and time of completion will be worked out accordingly. The plant shall be completed in all respects, tested, commissioned and put in commercial operation in co-ordination with the authorities of the State Nodal Officer within 6 months from the construction start date specified in the EPC Agreement, as mentioned in Clause 2.2.2.3, Vol I of tender document. Construction Start Date means the date on which the construction of a Solar Plant should commence on satisfaction of the Conditions Precedent in accordance with Article 4.3.3 of the EPC Agreement.

20. Payment:

In case of plant capacity greater than or equal to 10 kWp, 50% of the contract value excluding O&M (on prorata basis), will be released to the contractor as cost of major components of the plant [PV modules, inverter, transformers (if required) and module mounting structures] after delivery of this material at site, inspection and verification by authorized departmental officers. No part payment in case of plant capacity below 10 kWp.

100% of the total Contract amount / balance 50% (as the case may be) excluding Operation and Maintenance charges after considering any liquidated damages if any, on pro-rata basis shall be released after CoD of the solar plant/plants. The contractor can submit the final invoice as per the accepted price schedule within 10 days on proving the Performance ratio (AC) (as per tender clause 2.2.2) after completing the plant. The invoices shall be verified and final payment will be released within 2 months of receipt of the invoices subject to the satisfaction of the above conditions.

The terms and conditions of payment is mentioned in Tender clause 5.2.1 / EPC Agreement Clause 13.

21. Warranties:

Manufacturer's warranty certificate as shown below shall be furnished by the contractor inside the packing of each material.

I. Solar PV modules

a) Material Warranty:

- i. The manufacturer should warrant the Solar Module(s) to be free from the defects and/or failures specified below for a period not less than five(05) years from the date of sale.
- ii. Defects and/or failures due to manufacturing
- iii. Defects and/or failures due to quality of materials

iv. Non Conformity to specifications due to faulty manufacturing and/or inspection processes. If the solar Module(s) fails to conform to this warranty, the manufacturer will repair or replace the solar module(s), at the Owners sole option.

b) Performance Warranty:

PV modules used in grid power plants must be warranted for output wattage, which should not be less than 90% at the end of 10 years and 80% at the end of 25 years.

II. **Other equipment:** The module mounting structure, electrical works including power conditioners/inverters / maximum power point tracker units/distribution boards/digital meters/ switchgear etc. and overall workmanship of the SPV power plants/ systems must be warranted against any manufacturing/ design/ installation defects for a minimum period of 5 years. The EPC contractor shall furnish manufacturer's warranty certificate in this regard.

22. Handing over of the plant to KSEBL:

Handing over shall be done as per Clause 10 of the EPC agreement. At the end of the O&M Period, if there are no obligations arising out of the EPC Agreement, then the authorised representative of KSEB LTD. will furnish a certificate to the Contractor to the effect that all the Works upto the end of O&M period of 2 years are completed satisfactorily and no work upto that period remains incomplete as per the terms of the EPC Agreement. Dues and liabilities, if any, outstanding against the Contractor shall also be included in this certificate. The Contractor shall hand over the Solar Plant to KSEB Ltd. on the day of issuance of this Certificate.

23. Acknowledgment by the Contractor:

A copy of the Letter of Award is to be returned within 10 days, duly signed and seal affixed on all pages as token of acceptance and for incorporation in the Contract Agreement.

Yours faithfully,

Sd/-

INDEPENDENT PRACTITIONER'S REPORT ON THE STATEMENT OF COMPUTATION OF FINANCIAL QUALIFICATION CERTIFICATE AS AT 31ST MARCH 2018 TO 31ST MARCH 2022

To
The Board of Directors
Inkel Limited
Kochi

Independent Practitioner's Certificate on "The Statement of Computation of Financial Qualification Certificate" as at 31st March 2018, 31st March 2019, 31st March 2020, 31st March 2021 and 31st March 2022.

1. This Certificate is issued in accordance with the terms of our engagement letter dated 13.12.2022 with Inkel Limited.
2. The accompanying Statement of Computation of Financial Qualification Certificate (hereinafter referred to as 'Statement') (Annexure 1) contains the account balances used in the computation of Financial Qualification Certificate traced from the Audited Financial Statements.

Management Responsibility on "The Statement of Computation of Financial Qualification Certificate" as at 31st March 2018 to 31st March 2022.

1. The preparation of the Statement is the responsibility of the management of Inkel Limited, including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement.

2nd Floor, Mangalam Plaza building, Near Trinity Movie Max, TK Road, Aban Junction,

Phone: +91 7025264206, +91 8078850688, 857: ca.thomasmathew@hotmail.com,
tmathew1967@gmail.com

Independent Practitioner's Responsibility on "The Statement of Computation of Financial Qualification Certificate" as at 31 March 2018 to 31st March 2022

1. Pursuant to the terms of engagement as above, it is our responsibility to provide a reasonable assurance that the amounts in the Statement that form part of the Net Worth computation have been accurately extracted from the audited financial statements and the computation of net worth is arithmetically correct; the computation of net worth and working capital is in accordance with the method of computation set out as per Section 2(57) of the Companies Act, 2013.
2. The examination of the Statement has been conducted in accordance with the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India. The Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.
3. The relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements, to the extent applicable to this assignment have been complied with.

Opinion

4. Based on the verification of the Statement, we are of the opinion that the amounts in the Statement of Computation of Net Worth have been accurately extracted from the Audited Financial Statements of Inkel Limited.

Restriction on Use

5. This certificate is addressed and provided to the Board of Directors of the company solely for the purpose to comply with the Tender requirement of ANERT and should not be used by any other person or for any other purpose. Accordingly, we do not accept or assume any liability or any duty of care or for any other purpose or to any other party to whom it is shown or into whose hands it may come without our prior consent in writing.

INKEL LIMITED

COVERING LETTER

Sir,

I/We hereby e-tender to supply, under annexed terms and conditions of contract, the whole of the articles referred to and described in the attached specification and quantity decided by the Agency for New and Renewable Energy Research & Technology (ANERT), at the rates quoted against each item. The articles will be delivered and installed/commissioned operated and maintained for 10 years thereafter within the time and at the place(s) specified in the schedule.

I am/we are remitting herewith the required amount of Rs.NIL towards the cost of e-tender by electronic payment.

Yours Faithfully,

For **INKEL Limited**

General Manager
Renewable Energy & Business Development

Place:Kakkanad

Date:25-04-2023

ANNEXURE C- DECLARATION BY THE BIDDER

E-Tender Notification No: ANERT-TECH/99/2022-T2 Dated 12.04.2023
Request for Selection (RFS) of agency for the Implementation of 2 MW Solar Power Plant at Travancore Titanium Products Ltd., Kochuveli, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

We, the undersigned, declare that:

1. We have examined and have no reservations to the Bidding Document, including Addenda No.: (if any)
2. We offer to supply in conformity with the Bidding Document and in accordance with the delivery schedule
3. Our Bid shall be valid for a period of 6 months from the date fixed as deadline for the submission of tenders in accordance with the Bidding Document, and it shall remain binding upon us and may be accepted at any time before the expiration of that period;
4. If our Bid is accepted, we commit to submit a Security Deposit in the amount of 5 percent of the Contract Price for the due performance of the Contract;
5. We are not participating, as Bidders, in more than one Bid in this bidding process;
6. Our firm, its affiliates or subsidiaries, including any subcontractors or suppliers for any part of the Contract, has not been declared ineligible by the ANERT or Government of Kerala;
7. We understand that this Bid, together with your written acceptance thereof included in your notification of award, shall constitute a binding contract between us, until a formal Contract is prepared and executed.
8. Our firm has obtained the certifications from MNRE or NABL approved Test laboratories that the goods and services are satisfying the technical criteria specified in the bid.

**ANNEXURE D - DECLARATION OF RELATIONSHIP WITH ANERT
EMPLOYEE**

Tender Notification No.: ANERT-TECH/126/2023-PE1(RTS) Dated 12.04.2023

Request for Selection (RFS) of agency for the Implementation of 1 MW Solar Power Plant at HLL Lifecare Ltd, Peroorkada Factory, Thiruvananthapuram under Solar City project funded by Smart City Thiruvananthapuram Ltd

To

The CEO
ANERT

Name of the ANERT employee with Designation: Not Applicable

Name of the bidder related to the employee: Not Applicable

This is to put on record that no one currently working in ANERT is related to anyone working in INKEL Limited, who is the bidder in the bid. We are aware of the Anti-corruption policy of ANERT and will observe the highest standards during the procurement and the execution of contract and shall retain from corrupt, fraudulent, collusive or coercive practices on competing for the contract.

Guaranteed Technical Particular Data Sheet-2			
Power conditioning unit			
Sl.	Particulars	Required	Offered
1	Manufacturer		Hitachi
2	Model name/No.		Si 70K(HV)
3	No of Units		
4	Nominal AC power		70000W
5	Nominal AC voltage		480VAC
6	Nominal AC Current		90A
7	AC grid Frequency range	50Hz $\pm$ 0.5%	50/60Hz
8	AC grid voltage range		422V-528V
9	Power Factor (+ and -)		0.8 Lag and Lead
10	Total Harmonic Distortion	as per IEEE-519 2014	Less than3%
11	AC over / under voltage over / under frequency protection		Provided
12	Max PV input power		77000W
13	Maximum DC voltage	1000V	1000V
14	MPPT voltage range		250V to 960V
15	Maximum DC current		40A per MPPT
16	No. of DC input ports		12 Pairs
17	Maximum Efficiency	as per IEC61683	98.60%
18	DC voltage ripple		Less than0.5%
19	Ambient temperature range		-25C to60C
20	Humidity (non condensing)	95%, non condensing	100% Condensing
21	Degree of protection		IP 65
22	Dimensions(HxWxD)		713x737x297mm
23	Weight		70Kg
24	Protective functions AC over/under voltage, AC over/under frequency, over-temperature, AC and DC over-current, DC over-voltage, against Islanding		Provided
25	Communication Interface	RS232/RS485MPI ProfiBus/ Telephone Modem/WiFi	RS 485,WLAN
26	User-display standard	LCD panel with membrane keypad	LCD Display
27	Enclosure Environment Rating		IP 65
28	Safety and EMC		EN 61000-6-2, EN 61000-6-4, EN 61000-3-11, EN 61000-3-12, IEC62109-1/2, IEC 62116, IEC 61727, IEC-61683, IEC60068(1.2.14,30)
29	Anti Islanding Feature	IEEE1547/UL1741/IEC62116	IEC 62116

Guaranteed Technical Particular Data Sheet Power Conditioning Unit			
Sl.	Particulars	Required	Offered
1	Manufacturer		FRONIUS
2	Model name/No.		FRONIUS SYMO 20.0-3-M
3	No of units		
4	Nominal AC power		20000W
5	Nominal AC voltage		400V
6	Nominal AC Current		28.9A
7	AC grid Frequency range	50Hz $\pm$ 0.5%	45HZ-55HZ
8	AC grid voltage range		380V-480V
9	Power Factor (+ and -)		0.995Lag and Lead
10	Total Harmonic Distortion	as per IEEE-519 2014	Less than 3%
11	AC over / under voltage over / under frequency protection		Provided
12	Max PV input power		20kW
13	Maximum DC voltage	1000V	1000V
14	MPPT voltage range		200V to 800V
15	Maximum DC current		33 A
16	No. of DC input ports		3+3
17	Maximum Efficiency	> 97% As per IEC61683	98.10%
18	DC voltage ripple		Less than 0.5%
19	Ambient temperature range		-25C to 60C
20	Humidity (non condensing)	95%, non-condensing	100% Condensing
21	Degree of protection		IP 65
22	Dimensions(HxWxD)		725x510x225mm
23	Weight		43.4Kg
24	Protective functions AC over/under voltage, AC over/under frequency, over-temperature, AC and DC over-current, DC over-voltage, against islanding		Provided
25	Communication Interface	RS232/RS485/MPI/Profibus/Tel ephone Modem/WiFi	RS 485, WLAN
26	User-display standard	LCD panel with membrane keypad	LCD Display
27	Enclosure Environment Rating		IP 65
28	Safety and EMC		IEC 62109-1/-2, IEC 62116, IEC 61727
29	Anti Islanding Feature	IEEE1547/UL1741/IEC62116	IEC 62116

Guaranteed Technical Particular Data Sheet Power Conditioning Unit			
Sl.	Particulars	Required	Offered
1	Manufacturer		FRONIUS ECO
2	Model name/No.		FRONIUS ECO 25.0-3-S
3	No of units		
4	Nominal AC power		25000W
5	Nominal AC voltage		400V
6	Nominal AC Current		37.9A
7	AC grid Frequency range	50Hz $\pm$ 0.5%	45HZ-55HZ
8	AC grid voltage range		380V-480V
9	Power Factor (+ and -)		0.995Lag and Lead
10	Total Harmonic Distortion	as per IEEE-519 2014	Less than3%
11	AC over / under voltage over / under frequency protection		Provided
12	Max PV input power		25kW
13	Maximum DC voltage	1000V	1000V
14	MPPT voltage range		580V to 850V
15	Maximum DC current		44.2 A
16	No. of DC input ports		6
17	Maximum Efficiency	> 97% As per IEC61683	98.20%
18	DC voltage ripple		Less than0.5%
19	Ambient temperature range		-25C to60C
20	Humidity (non condensing)	95% non-condensing	100% Condensing
21	Degree of protection		IP 65
22	Dimensions(HxWxD)		725x510x225mm
23	Weight		35.7 Kg
24	Protective functions AC over/under voltage, AC over/under frequency, over-temperature, AC and DC over-current, DC over-voltage, against Islanding		Provided
25	Communication Interface	RS232/RS485MPIProfibus/Tel ephone Modem/WiFi	RS 485,WLAN
26	User-display standard	LCD panel with membrane keypad	LCD Display
27	Enclosure Environment Rating		IP 65

23	Dimensions(HxWxD)		869x1086x419mm
24	Weight		70Kg
25	Protective functions AC over/under voltage, AC over/under frequency, over-temperature, AC and DC over-current, DC over-voltage, against Islanding		Provided
26	Communication Interface	RS232, RS485, MPI, Profibus, Telephone, Modem, WiFi	RS 485, WLAN
27	User-display standard	LCD panel with membrane keypad	LED Display
28	Enclosure Environment Rating		IP 65
29	Safety and EMC		IEC 62109-1, IEC 62109-2, IEC 61000-6-1, IEC 61000-6-3, IEC 61000-3-11, IEC 61000-3-12
30	Anti Islanding Feature	IEEE 1547, UL1741, IEC 62116	IEC 62116

PV Module			
SL NO	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	Indian make solar module (manufacture name to be specified). Should be included in the updated ALMM list published by MNRE for PV modules	Credance Solar Panels Pvt Ltd
2	PV Module type	Mono PERC PV modules having half cut cell of indigenously manufactured solar modules of 540 Wp or higher and the cells shall be with multi bus bar technology	550Wp Half Cut Mono PERC Module
3	Product Code	To be specified	CS-HN550-144
4	No. of PV cells per Module	144	144
5	Total number of PV modules	As per the requirement	As per the requirement
6	Max.Power, Pmp@STC	≥540Wp	≥550Wp
7	Max.power tolerance (%)	Not more than 3%	Not more than 3%
8	Max.power voltage (Vmp)@STC	To be specified	42.6V
9	Max.power current (Imp) @STC	To be specified	12.95A
10	Open circuit voltage,@STC	To be specified	49.35V
11	Short circuit current@STC	To be specified	13.9A
12	Nominal voltage	To be specified	38.41V
13	Nominal Wattage	To be specified	400W
14	Fill Factor	Not less than 0.7	Not less than 0.7
15	Temp.coefficient of Voc(%/C)		-0.230%
16	Temp.coefficient of Pmp (%/C)		-0.278%
17	Temperature Co-efficient of Isc (%/°C)		0.05%
18	Normal Operating Cell Temperature (NOCT) (°C)		44±2
19	Operating Temperature (°C)		44±2
20	Max Temperature rise of solar cells under severe working conditions over Max. Ambient Temp.	To be specified	85°C
21	Module is suitable to operate at 50 ambient	Yes/No	Yes
22	Cell efficiency	%	>20
23	Module efficiency	≥20%	21.50%
24	Maximum System Voltage	1500V	1500V DC
25	No. of By-pass Diodes		3Nos Schottky
26	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed Arrangement
27	Solar Module frame material	Anodized Aluminum	Anodized Aluminum
28	Finish		Smooth Finish
29	Types of Sections used		
30	Module dimensions cms (LxWxH)	To be specified	2261 X 1134 X 35mm
31	PV panel Weight (kg)	To be specified	28.5 Kg
32	Module Life (minimum)	25 Years	25 Years
33	PV array area(sqm)		2.56 Sqm
34	Standards/Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected &Weather Proof DC rated multi-contact connector	Polarized, UV protected &Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass. Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass. Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	Low iron tempered
43	Copies of test certificates	IEC 61215,61730 part 1&2, IEC 61701	IEC 61215,61730 part 1&2, IEC 61701

PV Module			
SL NO	Particulars	Required	Offered

2	PV Module type	Mono PERC PV modules having half cut cell of indigenously manufactured solar modules of 540 Wp or higher and the cells shall be with multi bus bar technology	650 Wp Half Cut Mono PERC Module
3	Product Code	To be specified	CS-QU650-132
4	No. of PV cells per Module	144	132
5	Total number of PV modules	As per the requirement	As per the requirement
6	Max.Power, Pmp@STC	≥540Wp	≥650Wp
7	Max.power tolerance (%)	Not more than 3%	Not more than 3%
8	Max.power voltage (Vmp)@STC	To be specified	38.05V
9	Max.power current (Imp) @STC	To be specified	17.10A
10	Open circuit voltage,@STC	To be specified	45.2V
11	Short circuit current@STC	To be specified	18.15A
12	Nominal voltage	To be specified	34.31V
13	Nominal Wattage	To be specified	471W
14	Fill Factor	Not less than 0.7	Not less than 0.7
15	Temp.coefficient of Voc(%/°C)		-0.212%
16	Temp.coefficient of Pmp (%/°C)		-0.273%
17	Temperature Co-efficient of Isc (%/°C)		0.036%
18	Normal Operating Cell Temperature (NOCT) (°C)		44±2
19	Operating Temperature (°C)		44±2
20	Max Temperature rise of solar cells under severe working conditions over Max. Ambient Temp.	To be specified	85°C
21	Module is suitable to operate at 50 ambient	Yes/No	Yes
22	Cell efficiency	%	>19.6
23	Module efficiency	≥20%	21.60%
24	Maximum System Voltage	1500V	1500V DC
25	No. of By-pass Diodes		3Nos Schottky
26	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed Arrangement
27	Solar Module frame material	Anodized Aluminum	Anodized Aluminum
28	Finish		Smooth Finish
29	Types of Sections used		
30	Module dimensions cms (LxWxH)	To be specified	2384 X 1303 X 35mm
31	PV panel Weight (kg)	To be specified	33.8 Kg
32	Module Life (minimum)	25 Years	25 Years
33	PV array area(sq.m)		3.10 Sqm
34	Standards/Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected &Weather Proof DC rated multi-contact connector	Polarized, UV protected &Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass. Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass. Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	Low iron tempered

39	Construction Front and Back	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low Iron tempered	3.2mm Thick Low Iron Tempered
43	Copies of test certificates	IEC 61215,61730 part 1&2, IEC 61701	IEC 61215,61730 part 1&2, IEC 61701

PV Module			
SL NO	Particulars	Required	Offered
1	PV Module Manufacture name &Country of origin	manufacture name to be specified	Credance Solar Panels Pvt Ltd
2	PV Module type	Mono PERC	Half Cut Mono PERC Crystalline
3	Product Code		CS-QU655-132
4	No. of PV cells per Module		
5	Total number of PV modules		
6	Max.Power, Pmp@STC	380 Wp or Above	655 Wp
7	Max.power tolerance (%)	Not more than 3%	Not more than 3%
8	Max.power voltage (Vmp)@STC	To be specified	38.10 V
9	Max.power current (Imp) @STC	To be specified	17.20 A
10	Open circuit voltage,@STC	To be specified	45.25 V
11	Short circuit current@STC	To be specified	18.30 A
12	Nominal voltage	To be specified	41.15V
13	Nominal Wattage	To be specified	475
14	Fill Factor	Not less than 0.70	>0.70
15	Temp.coefficient of Voc(%/C)		-0.36
16	Temp.coefficient of Pmp (%/C)		-0.38
17	Temperature Co-efficient of Isc (%/°C)		0.07
18	Normal Operating Cell Temperature (NOCT) (°C)		44C±2
19	Operating Temperature (°C)		-40°C TO 85°C
20	Max Temperature rise of solar cells under severe working conditions over Max. Ambient Temp.	To be specified	85°C
21	Module is suitable to operate at 50 ambient	Yes/No	Yes
22	Cell efficiency	%	>19
23	Module efficiency	≥19%	21.10%
24	Maximum System Voltage		1500V
25	No. of By-pass Diodes		3Nos Schottky
26	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed Arrangement
27	Solar Module frame material	Anodized Aluminum	Anodized Aluminum
28	Finish		Smooth Finish
29	Types of Sections used		
30	Module dimensions cms (LxWxH)	To be specified	2384x1303x35 mm
31	PV panel Weight (kg)	To be specified	32.90 kg
32	Module Life (minimum)	25 years	25Years
33	PV array area(sqm)		1.985 sqm
34	Standards/Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected &Weather Proof DC rated multi-contact connector	Polarized, UV protected &Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	3.2mm Thick Low Iron Tempered
43	Copies of test certificates	IEC 61215,61730 part 1&2, IEC 61701	IEC 61215,61730 part 1&2, IEC 61701

34	Standards/ Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected & Weather Proof DC rated multi-contact connector	Polarized, UV protected & Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass, Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass, Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	3.2mm Thick Low Iron Tempered
41	Total Plant's foot print area (sqm)		
42	Control facility area (sqm)		2
43	Copies of test certificates	IEC 61215, 61730 part 1&2, IEC 61701	Enclosed

GUARANTEED TECHNICAL PARTICULAR			
DATA SHEETS			
SL NO	Particulars	Required	Offered
1	PV Module Manufacture name &Country	Indian make,(manufacture name to be specified)	Renewsys,India
2	PV Module type	Mono PERC	Monofacial
3	Product Code		DESERV SGALACTIC 156
4	No. of PV cells per Module		156 Cells
5	Total number of PV modules		
6	Max.Power. Pmp@STC	≥385Wp	590Wp
7	Max.power tolerance (%)	Not more than 3%	5W(Positive)
8	Max.power voltage (Vmp)@STC	To be specified	45.48 V
9	Max.power current (Imp) @STC	To be specified	12.98A
10	Open circuit voltage,@STC	To be specified	54.15
11	Short circuit current@STC	To be specified	13.73
12	Nominal voltage	To be specified	41.59V
13	Nominal Wattage	To be specified	439.10Wp
14	Fill Factor	Above 0.70	Above 0.70
15	Temp.coefficient of Voc(%/°C)		-0.279
16	Temp.coefficient of Pmp (%/°C)		-0.36
17	Temperature Co-efficient of Isc (%/°C)		0.044
18	Normal Operating Cell Temperature (NOCT) (°C)		45°C±2
19	Operating Temperature (°C)		-40°C TO 85°C
20	Max Temperature rise of solar cells under severe working conditions over Max. Ambient Temp.	To be specified	90°C
21	Module is suitable to operate at 50° ambient	Yes/No	Yes
22	Cell efficiency	%	>19
23	Module efficiency	≥19%	21.02%
24	Maximum System Voltage	600/1000V	1500V
25	No. of By-pass Diodes		3NOS
26	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed Arrangement
27	Solar Module frame material	Anodized Aluminum	Anodized Aluminum
28	Finish		Smooth Finish
29	Types of Sections used		
30	Module dimensions cms (LxWxH)	To be specified	2469x1137(±2)x35
31	PV panel Weight (kg)	To be specified	31.7kg
32	Module Life (minimum)	25 years	25Years
33	PV array area(sq.m)		
34	Standards/ Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected &Weather Proof DC rated multi-contact connector	Polarized, UV protected &Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass,Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	3.2mm Thick Low Iron Tempered
41	Total Plant's foot print area(sq.m)		
42	Control facility area (sq.m)		2
43	Copies of test certificates	IEC 61215,61730 part 1&2, IEC 61701	Enclosed

PV Module			
SL NO	Particulars	Required	Offered
1	PV Module Manufacture name & Country of origin	manufacture name to be specified	Adani Solar
2	PV Module type	Mono PERC	Monofacial
3	Product Code		M10-144 HC
4	No. of PV cells per Module		
5	Total number of PV modules		
6	Max.Power, Pmp@STC	380 Wp or Above	525 Wp
7	Max.power tolerance (%)	Not more than 3%	Not more than 3%
8	Max.power voltage (Vmp)@STC	To be specified	41.34 V
9	Max.power current (Imp) @STC	To be specified	13.48 A
10	Open circuit voltage,@STC	To be specified	48.78 V
11	Short circuit current@STC	To be specified	12.72 A
12	Nominal voltage	To be specified	38.54 V
13	Nominal Wattage	To be specified	393
14	Fill Factor	Not less than 0.70	>0.70
15	Temp.coefficient of Voc(%/C)		-0.28
16	Temp.coefficient of Pmp (%/C)		-0.38
17	Temperature Co-efficient of Isc (%/°C)		0.048
18	Normal Operating Cell Temperature (NOCT) (°C)		45°C±2
19	Operating Temperature (°C)		-40°C TO 85°C
20	Max Temperature rise of solar cells under severe working conditions over Max. Ambient Temp.	To be specified	85°C
21	Module is suitable to operate at 50 ambient	Yes/No	Yes
22	Cell efficiency	%	>19
23	Module efficiency	≥19%	20.44%
24	Maximum System Voltage		1500V
25	No. of By-pass Diodes		3Nos Schottky
26	Mounting arrangement for Solar Module	Fixed Arrangement	Fixed Arrangement
27	Solar Module frame material	Anodized Aluminum	Anodized Aluminum
28	Finish		Smooth Finish
29	Types of Sections used		
30	Module dimensions cms (LxWxH)	To be specified	2266x1133x35 mm
31	PV panel Weight (kg)	To be specified	28 kg
32	Module Life (minimum)	25 years	25Years
33	PV array area(sqm)		1 985 sqm
34	Standards/Approvals from International Agencies	IEC 61215/IEC 61730/ IEC 61701	IEC 61215/IEC 61730/ IEC 61701
35	Guaranteed output confirm	Yes	Yes
36	Output Cables	Polarized, UV protected & Weather Proof DC rated multi-contact connector	Polarized, UV protected & Weather Proof DC rated multi-contact connector
37	Output Terminal	PV Connectors	PV Connectors
38	Junction Box	Weather resistant HDPE (IP65)	Weather resistant HDPE (IP65)
39	Construction Front and Back	High transmittance glass, Polyester Ethyl Vinyl Acetate(EVA) encapsulate	High transmittance glass, Polyester Ethyl Vinyl Acetate(EVA) encapsulate
40	Glass	Low iron tempered	3.2mm Thick Low Iron Tempered
43	Copies of test certificates	IEC 61215,61730 part 1&2, IEC 61701	IEC 61215,61730 part 1&2, IEC 61701

Hitachi, with more than 100 years of legacy worldwide and with over 3 GW installation base of PV Central Solar Inverters in India, brings to you the PV STRING INVERTER with latest, efficient & flexible design to maximize the energy yield for large commercial & utility solar projects. With highly efficient conversion technology, this HIVERTER Si Series PV String Solar Inverter is available from 4.4 kW to 70 kW range with 3 Phase output and 1.1 kW to 6 kW range with 1 Phase output.

- Best suitable for heavy industries and large commercial establishments in India
 - Wide range of 1.1 kW to 70 kW Inverters offers more flexibility as per project design
 - Real time precise MPPT algorithm to ensure highest efficiency up to 98.6%
- Intelligent grid management features first of its kind IV curve diagnostics feature
 - A robust IP65 enclosure allowing hassle free outdoor installations
 - Low maintenance cost
 - Safety assured through its anti islanding, RCMU, ground fault monitoring

String Inverter Technology

Intelligent Power Management

- LVRT / ZVRT protections
- Self-power reducer in case of over frequency
- Fully adjustable reactive power & power factor for different grids
- Real time MPPT algorithm

Built-In Protection Functions

- Over current, Over load
- O/ V & U/V protection
- Anti-islanding, Current leakage
- Over temperature protection
- Over frequency, Under-frequency
- SPD Type III, Type II (Optional for 20-33 kW models)

Humanized Functions

- Audible & visible alarming function
- Remote system connection or disconnection
- Remote firmware upgrade
- Remote monitoring
- Separate section for power & termination

Highlights

- Wide DC input range from 250 V to 950 V
 - Highest AC output range +/- 25%
 - Up to 3 Independent MPPT to ensure optimalenergy harvest
 - MPPT accuracy is up to 99.9 %, max euroefficiency 98.4 %
 - Wide ambient temp range -25°C to 60°C
 - IP 65 protection for Indoor & outdoor application
- Low sensitivity to the grid disturbance to avoid unnecessary breakdo
 - User friendly interface like RS 232 / RS 485 / Wi-Fi
 - Easy to read LCD display with all operational status & necessary data
 - Reactive power controller
 - Type II SPD String current monitoring

Advantages

More Reliability

- Usage of only higher voltage level capacitor
- Support four uni-polar output relays (effective heat dissipation, longer life)

Higher Efficiency

- “T” type 3 level topology provides higher efficiency

More Convenience

- All information is available on a 4” large screen
- Availability of four separate buttons give easy operation
- Equipped with compact ACDB & DCDB (optional*)

Safer

- Equipped with leakage current detection components
- Use professional solar AC connectors as output

Better Monitoring

- RS485 / Wi Fi / GPRS / Ethernet
- Local data is recorded in SD card for 25 years
- IV curve scanning technology, catch MPPT easily and quickly

Better Appearance

- Die-casting housings
- Go through anti-corrosion and anti-rust protection processes

Grid Tied Solar String Inverters
Highly Efficient Conversion Technology
4.4 kW to 70 kW (3Ph.)
1.1 kW to 6 kW (1Ph.)

Generating
3 GW+
Renewable Power
in Indian Solar Sector
through
Central Inverters

Efficiency Curve

(HIVERTER Si - 20 kW to 33 kW Models)

(HIVERTER Si - 50 kW to 70 kW Models)

High-yield

- Max 98.6% efficiency
- Real time precise MPPT algorithm for max harvest
- Wide input voltage operation range from 250 V to 950 V

All in one, Flexible and economical system solutions

- DC switch
- Built-in PV combiner
- Power management unit
- Optimum selection for big PV plants, commercial buildings.
- Inbuilt type II DC surge protection device#
- Inbuilt type II AC surge protection device#

Low maintenance cost

- Rust-free aluminum covers
- Flexible monitoring solution
- Multi-function relay can be configured to show various inverter information

Intelligent grid management

- ZVRT support
- Reactive power adjustable
- Self-power reducer when over frequency
- Remote active / reactive power limit control

(*Optional for 20-33 kW Models)

Certificate of Conformity

Certificate No.: 1988AP1010N008001
Equipment: Solar Grid-tied Inverter

Brand Name:

HITACHI

Test Model No.: Hiverter Si-20K, Hiverter Si-25K,
Hiverter Si-30K, Hiverter Si-33K

Applicant: Hitachi Hi-Rel Power Electronics Pvt. Ltd.
SM 3 & 4, Sanand – II GIDC, Industrial Estate, Boll Village,
Sanand – 382 110, Gujarat, India.

Report No.: LD191010N008

The submitted sample of the above equipment has been tested for CE marking according to following European Directive and standards:

- Low Voltage Directive 2014/35/EU.

The referred test report(s) show that the product complies with standard(s) recognized as giving presumption of compliance with the essential requirements in the specified European Directive.

This verification does not imply assessment of the production of the product. The CE marking may be affixed if all relevant and effective European Directives with CE are applicable.

Applied rules and standards

IEC/EN 62109-1:2010

Safety of power converters for use in photovoltaic power systems – Part 1: General requirements

IEC/EN 62109-2:2011

Safety of power converters for use in photovoltaic power systems –
Part 2: Particular requirements for inverters

Name: James Huang
Technical Manager/ New Energy Team
Date: 2019-11-08

This document shall not be reproduced, except in full, without the written approval of
Bureau Veritas Shenzhen Co., Ltd. Dongguan Branch.
Information given in this document is related to the tested specimen of the described electrical sample.

ATTESTATION of conformity with European Directives

Attestation Number: 1988AB1010N008001
 Product: Solar Grid-tied Inverter
 Brand Name: **HITACHI**
 Model: Hiverter Si-33K, Hiverter Si-20K
 Additional Model: Hiverter Si-25K, Hiverter Si-30K
 Applicant: Hitachi Hi-Rel Power Electronics Pvt. Ltd.
 Address: SM 3 & 4, Sanand – II GIDC, Industrial Estate, Boll Village, Sanand – 382 110, Gujarat, India.
 Technical Characteristics: DC input: 230-960V
 AC output: 400V 45-65Hz

The submitted sample of the above equipment has been tested for **CE** marking according to following European Directive and following standards:

- Electromagnetic Compatibility Directive 2014/30/EU

Standards	Report Number	Report date
EN 61000-6-3:2007 + A1:2011 EN 61000-3-11:2001 EN 61000-3-12:2011 EN 61000-6-2:2005	CE191010N008	Nov. 05, 2019

The referred test report(s) show that the product complies with standard(s) recognized as giving presumption of compliance with the essential requirements in the specified European Directive.

This verification does not imply assessment of the production of the product. The **CE** marking may be affixed if all relevant and effective European Directives with **CE** are applicable.

Certificate of Conformity

Certificate Number: CN-PV-190053

On the basis of the tests undertaken, the samples of the below product have been found to comply with the requirements of the referenced specifications /standards at the time the tests were carried out. It does not imply that Intertek has performed any surveillance or control of the manufacture. The manufacturer shall ensure that the manufacturing process assures compliance of the production units with the examined products mentioned in this certificate.

Applicant Name & Address:	Hitachi Hi-Rel Power Electronics Pvt. Ltd. SM 3 & 4, Sanand – II GIDC, Industrial Estate, Boll Village, Sanand – 382 110, Gujarat, India.
Product Description:	Solar Grid Tied Inverter
Ratings & Principle Characteristics:	See Annex to Certificate of Conformity
Models/Type References:	Hiverter Si-20K, Hiverter Si-25K, Hiverter Si-30K, Hiverter Si-33K
Brand Name:	HITACHI
Specification/Standard:	IEC 60068-2-1:2007, Environmental testing – Part 2-1: Tests- Test A: Cold IEC 60068-2-2:2007, Environmental testing – Part 2-2: Tests- Test B: Dry heat IEC 60068-2-14:2009, Environmental testing – Part 2-14: Tests- Test N: Change of temperature IEC 60068-2-30:2005, Environmental testing – Part 2-30: Tests- Test Db: Damp heat, cyclic (12h +12h cycle)
Certificate Issuing Office Name & Address:	Intertek Testing Services Ltd. Shanghai 2/F (West Side), No. 707, Zhangyang Road, Free Trade Experimental Area, Shanghai, P. R. China
Test Report Number:	191012016GZU-004

Additional information in Appendix.

APPENDIX: Certificate of Conformity

This is an Appendix to Certificate of Conformity Number: CN-PV-190053.

Ratings &
Principle
Characteristics:

Model	Hiverter Si-20K	Hiverter Si-25K	Hiverter Si-30K	Hiverter Si-33K
Max. DC input Voltage	1100Vdc			
Operating MPPT voltage range	230Vdc – 960Vdc			
Max. Input current	24A/24A	28A/28A	30A/30A	30A/30A
PV Isc	30A*2	35A*2	37.5A*2	37.5A*2
Nominal AC output voltage	3/N/PE 230Vac/400Vac			
Nominal AC output Frequency	50Hz			
Nominal AC output Power	20000W	25000W	30000W	33000W
Max. Output Power	22000VA	27500VA	33000VA	36300VA
Power factor	0.8 Leading – 0.8 Lagging			
Safety level	Class I			
Ingress Protection	IP 65			
Operation Ambient Temperature	-25°C - 60°C			
Software version	V1.40			

This Certificate is for the exclusive use of Intertek's client and is provided pursuant to the agreement between Intertek and its Client. Information given in this document is related to the tested specimen of the described electrical sample.

Hitachi, with more than 100 years of legacy worldwide and with over 3 GW installation base of PV Central Solar Inverters in India, brings to you the PV STRING INVERTER with latest, efficient & flexible design to maximize the energy yield for large commercial & utility solar projects. With highly efficient conversion technology, this HIVERTER Si Series PV String Solar Inverter is available from 4.4 kW to 70 kW range with 3 Phase output and 1.1 kW to 7.5 kW range with 1 Phase output.

- Best suitable for heavy industries and large commercial establishments in India
- Wide range of 1.1 kW to 70 kW Inverters offers more flexibility as per project design
- Real time precise MPPT algorithm to ensure highest efficiency up to 98.6%
- Intelligent grid management features first of its kind IV curve diagnostics feature
- A robust IP65 enclosure allowing hassle free outdoor installations
- Low maintenance cost
- Safety assured through its anti islanding, RCMU, ground fault monitoring

String Inverter Technology

Intelligent Power Management

- LVRT / ZVRT protections
- Self-power reducer in case of over frequency
- Fully adjustable reactive power & power factor for different grids
- Real time MPPT algorithm

Built-In Protection Functions

- Over current, Over load
- O/ V & U/V protection
- Anti-islanding, Current leakage
- Over temperature protection
- Over frequency, Under-frequency
- SPD Type III, Type II (Optional for 20-33 kW models)

Humanized Functions

- Audible & visible alarming function
- Remote system connection or disconnection
- Remote firmware upgrade
- Remote monitoring
- Separate section for power & termination

Highlights

- Wide DC input range from 250 V to 950 V
- Highest AC output range +/- 25%
- Up to 3 Independent MPPT to ensure optimalenergy harvest
- MPPT accuracy is up to 99.9 %, max euroefficiency 98.4 %
- Wide ambient temp range -25°C to 60°C
- IP 65 protection for Indoor & outdoor application
- Low sensitivity to the grid disturbance to avoid unnecessary breakdo
- User friendly interface like RS 232 / RS 485 / Wi-Fi
- Easy to read LCD display with all operational status & necessary data
- Reactive power controller
- Type II SPD String current monitoring

Advantages

More Reliability

- Usage of only higher voltage level capacitor
- Support four uni-polar output relays (effective heat dissipation, longer life)

Higher Efficiency

- “T” type 3 level topology provides higher efficiency

More Convenience

- All information is available on a 4” large screen
- Availability of four separate buttons give easy operation
- Equipped with compact ACDB & DCDB (optional*)

(*Optional for 20-33 kW Models)

Efficiency Curve

(HIVERTER Si - 20 kW to 33 kW Models)

(HIVERTER Si - 50 kW to 70 kW Models)

High-yield

- Max 98.6% efficiency
- Real time precise MPPT algorithm for max harvest
- Wide input voltage operation range from 250 V to 950 V

All in one, Flexible and economical system solutions

- DC switch
- Built-in PV combiner
- Power management unit
- Optimum selection for big PV plants, commercial buildings.
- Inbuilt type II DC surge protection device[#]
- Inbuilt type II AC surge protection device[#]

Low maintenance cost

- Rust-free aluminum covers
- Flexible monitoring solution
- Multi-function relay can be configured to show various inverter information

Intelligent grid management

- ZVRT support
- Reactive power adjustable
- Self-power reducer when over frequency
- Remote active / reactive power limit control

Max. Efficiency up to	98.0%						98.2%
European Weighted Efficiency up to	97.5%						97.6%
Self-consumption at Night	<1W						
Feed-in Start Power	50W						
MPPT Efficiency	>99.9%						
Protection							
DC Reverse Polarity Protection	Yes						
DC Switch	Optional						
Protection Class/Overvoltage Category	I / III						
Input/Output MOV (II)	Yes						
Safety Protection	Anti islanding, RCMU, Ground fault monitoring						
SPD	MOV: Type III standard / Type II optional						
Communication							
Power Management Unit	According to certification and request						
Standard Communication Mode	RS485, Wifi / Ethernet / GPRS (optional), SD card (optional)						
Operation Data Storage	25 years						
General Data							
Ambient Temperature Range	-25℃ ~ +60℃						-30℃ ~ +60℃
Topology	Transformer-less						
Degree of Protection	IP65						
Allowable Relative Humidity Range	0~100%						
Max. Operating Altitude	2000m						
Noise	<25dB						
Weight	11.5kg						18kg
Cooling	Natural convection						
Dimension	405 x 315 x 135mm						467 x 352 x 157mm
Display	LCD display						
Standard							
EMC	EN 61000-6-2, EN 61000-6-3, EN 61000-3-2, EN 61000-3-3, EN 61000-3-11, EN 61000-3-12						
Safety Standards	IEC62109-1/2, IEC62116, IEC61727, IEC-61683, IEC60068(1,2,14,30)						
Grid Standards	A S/NZS 4777, VDE V 0124-100, V 0126-1-1, VDE-AR-N 4105, CEI 0-21, EN50438/EN50549, G83/G59/G98/G99, NB/T32004; ABNT NBR 16149/16150 (for SOFAR3KTLM- G2, SOFAR5KTLM- G2& 7.5KTLM)						

Technical Specifications - Solar String Inverter - 4.4 kW to 12 kW (3Ph.)

HIVERTER-Si Series Three Phase	Si 4.4K	Si 5.5K	Si 6.6K	Si 8.8K	Si 11K	Si 12K
Input (DC)						
Recommended PV Input Power	4800W	6000W	7200W	9600W	12000W	14400W
Max DC Power for Single MPPT	4500W	5700W	6250W	6200W	6200W	6850W
Number of Independent MPPT	2					
Number of DC Inputs	1 for each MPPT					
Max. Input Voltage	1000V					
Start-up Input Voltage	180V					
Reated Input Voltage	600V					
MPPT Voltage Range	160V - 900V					
Full Load DC Voltage Range	190V-850V	240V-850V	290V-850V	380V-850V	480V-850V	575V-850V
Max. Input Current per MPPT	11A / 11A					
Max. DC Input Short Circuit Current per MPPT	14A					
Output (AC)						
Rated Power	4400W	5500W	6600W	8800W	11000W	12000W
Max. AC Power	4400VA	5500VA	6600VA	8800VA	11000VA	13200VA
Max. Output Current	6.4A	8.0A	9.6A	12.8A	15.9A	19.1A
Nominal Grid Voltage	3/N/PE, 220/380VAC, 230/400VAC, 240/415VAC					
Grid Voltage Range	310VAC-480VAC (According to local standard)					
Nominal Frequency	50 / 60Hz					
Grid Frequency Range	45Hz-55Hz/54Hz-66Hz (According to local standard)					
Active Power Adjustable Range	0 ~ 100%					
THDi	<3%					
Power Factor	1 default (adjustable ±0. 8)					
Power Limit Export	Zero export or adjustable power limit export					
Performance						
Max Efficiency up to	98%			98.3%		
European Weighted Efficiency up to	97.50%			98%		
Self-Consumption at Night	<1W					
MPPT Efficiency	>99.9%					
Protection						
DC Reverse Polarity Protection	Yes					
DC Switch	Yes					
Safety Protection	Anti-islanding, RCMU, Ground fault monitoring					
ARPC	Anti-reverse power controller (optional)					
Communication						
Power Management Unit	According to certification and request					
Standard Communication Mode	RS485, Wifi / Ethernet / GPRS (optional), SD card					
Operation Data Storage	25 years					
General Data						
Ambient Temperature Range	-25°C ~ +60°C					
Topology	Transformer-less					
Degree of Protection	IP65					
Allowable Relative Humidity Range	0~100%					
Max. Operating Altitude	2000m					
Noise	<29dB					
Weight	21kg			22kg		
Cooling	Natural					
Dimension	457 x 452 x 202mm					
Display	LCD display					
Standard
